WOODSTOCK, N. B.

Paint for Everybody

And for everything under the sun. Every home has need of paint. Each kind of

THE SHERWIN-WILLIAMS PAINTS

is specially suited to some home use—either outside or inside. It's knowing the right kind of paint, and putting it on the right place that makes painting a success. Tell us what you want to paint, and we'll tell you the right kind to use.

It is true that **Sherwin-Williams Paints** cost more. They are the most economical Paints you can use, because they cover more and wear the longest. Add to this their good appearance and you have perfect paints.

For Sale by W. F. DIBBLEE & SON, at Woodstock, And at their Branch Store at Centreville.

Attention, Breeders!

If you want to Breed for Speed, breed to **RED GLEN**
If you want to Breed for Road purposes, breed to **RED GLEN**

For his colts trot when young, and for road purposes are excelled by none. Lady Glen, 2:19, holds the championship of the Maritime Provinces as a four and five year old; also the championship of Annapolis County of 2:19. She won every race she started in last season but one, and got second in that. She has trialed a mile better than 2:14; has paced a quarter in 30 seconds flat, a two minute clip. Where is there another one in this County that can do it. She is the most level-headed pacer on top of the turf. She has never made but one break in all of her races, and that was caused by accidental means. Gentlemen, I want you to understand that RED GLEN is the best bred Pacing Stallion that stands in this County. In the first place his sire is the greatest sire in the Wilkes family, being Red Wilkes. He has to his credit 100 2:30 performers, including Ralph Wilkes 2:06, the fastest trotting stallion in the Wilkes family; Fred W. 2:08; Imperial 2:09; Blanch Louise 2:10, and 18 in the 2:15 list, 40 in the 2:20. RED GLEN has a number of colts that could enter the list if their owners would only give them a chance. I know of a colt out of a John Wright mare that can beat 2:20 this season if reports are true. RED GLEN is just as well bred on his dam's side as any horse living. His dam Stella 2:14 is by Lamps record 2:21, by George Wilkes record 2:22. 2:30 list. RED GLEN's second dam is Maoria Clay, by Harry Clay 2:22, a son of Cassius M. Clay Jr., and sire of Clayton 2:19, also the dams of Harrietta 2:09, Belina 2:08, St. Julian 2:11; the dam of Electioneer with 161 in 2:30 and better. RED GLEN's third dam is Maoria (thoroughbred) by Imported Australian, sire of the second dam of Alonzo 2:27, sire of Martha Wilkes 2:08, Harrietta 2:09; second dam of Alcantara 2:23, sire of Nightingale 2:16, with 133 in 2:30 and better. RED GLEN's fourth dam is by Lexington, sire of the dam of Sunol 2:08, J. L. C. 2:06. RED GLEN's fifth dam is by Imported Gloucester, sire of the dam of Truman 2:12, Billy S. 2:06, Lightning 2:05. RED GLEN's sixth dam is by the famous Boston, sire of the second dam of Mand S. 2:08, Natwood 2:15, sire of 163 in 2:30 and better, including Bloodgood 2:06 (P). You see on RED GLEN's dam's side, as well as on his sire's side, he carries the blood of the greatest trotting families in the world. Note the sons of Red Wilkes have sired the fastest in the Wilkes family, producing John H. Penny record 2:09 (pacing). He held the world's record for four years, when Star Pointer trialed a mile in 1:50, which is the present record. Bert Oliver 2:06, Arlington 2:06, Gentry's Treasure 2:10 as a four-year old, Sally Toyler 2:06. His daughters have produced Onouqua 2:05, Coleridge 2:05. Red Wilkes, his sons and daughters have produced 28 2:10 performers, and an exceedingly large list of 2:20 performers.

RED GLEN is a horse of very high mettle. No horse living has more nerve force. He is a beautiful Bay, carries his head well up, good strong limbs, good feet, a very fast walker, a very level-headed horse for his culture. His weight is 1,300 pounds, strong, making him a very desirable horse to breed to, both for speed and road; he has colts that weigh 1,150 pounds out of mares of medium size. His colts command good prices. RED GLEN has a trial mile of 2:27, a quarter in 33 seconds, and if given a chance, such as he should have, should get a mark far below 2:20. The past season he had 70 patrons, showing that the public are getting their eyes open to the good stock that this horse is getting.

RED GLEN will stand at the stable of his owner, Connell Bros., Address all communications to A. W. BROWN, Proprietor, Service for 1901 will be \$20.00, \$10.00 down, balance when single service \$10.00. Mare not proving with foal \$10.00 more to be paid, with privilege of using her until mare proves with foal. Mares, after being bred to RED GLEN disposed of, will serve for stallion. Mares sent to RED GLEN will be kept for from \$2.50 to \$2.00 per week. All accidents and escapes at owner's risk.

W. C. T. U. Corner.

The meeting of the W. C. T. U. is held in Gentry's Hall, each Thursday afternoon, at three o'clock. All ladies are cordially invited to attend.

OUR MOTTO.
If God be for us, who can be against us.

OUR PERSUASION.
That temperance is the moderate use of all things helpful, and total abstinence from all things harmful.

OUR FAITH.
That as God lives, right the day shall win.

Temperance and Education.

The "Journal and Messenger," in an article on this subject, urges a crude education along the line of total abstinence. It favors the old-fashioned temperance meeting in every school district, in every hamlet and village, in every city and its suburbs. It favors Sons of Temperance, Rechabites, Good Templars, Temples of Honor and Temperance, anything which will educate and hold the young people.

It says: "The National Temperance Society has strewn the land with literature," and favors making every Sabbath school not only a total abstinence society but a propaganda of temperance. It would give one or two, perhaps four, Sabbath days in every year to the subject of temperance, basing the argument upon right interpretations of Scripture and upon facts and figures, and it would have a temperance paper, say the "Temperance Banner," put into the hands of every member of the school. When the boys of our Sabbath schools are made thoroughly temperance boys, then when they reach the voter's age we may hope that not only no license, but prohibition, may carry in the several states, not only carry at the polls, but be enforced by public opinion. That is what we want and we want all the help we can get to bring it about.

Frances E. Brockway, delegate from India, being asked what was her impression of the World's Convention, said: "My greatest impression is amazement. Six or seven years ago, while engaged in deputizing work for the London Missionary Society, it was thought very infra dig for a lady to address mixed meetings. The few ministers who arranged for such meeting did so in fear and trembling and prepared me for some opposition. As a matter of fact, their fears were groundless, and I was heartily welcomed at the close of the meeting! And now I return to find what? The very heart of Scotland responding to woman's voice, whether it be in Assembly Hall or Church, and such a recognition of woman as co-worker with man, with God, as shall send us back to our dark lands of adoption, feeling that our dear native lands respond to our white ribbon work for God, for home, and every land."

To Reward Drunkenness.

(From the Chicago Tribune.)

The bill introduced in the legislature by Representative Sullivan of Cook County, which provides that voters who are too drunk to mark their own ballots shall be assisted by two election officers in so doing marks the climax in idiotic legislation. A man who is so drunk that he cannot mark his ballot should lose his vote. The idea of providing special officers who shall assist him in putting the crosses in the proper places is worthy the imagination of a farce writer. If this bill were to become a law it would be easy for men who are unable to sell their votes now because there is no way of making sure that "the goods are delivered" to pretend to be drunk and ask for aid in marking their ballots. Then the buyer of a vote would know that the seller had kept his bargain.

Appetite is the Life of our Trade.

The following words were spoken by a liquor dealer, in an address at a meeting of the Liquor League of Ohio: "The success of our business is dependent largely upon the creation of appetite for drink. Men who drink liquor, like others, will die, and if there is no new appetite created, our counters will soon be empty, as will be our coffers. After men have grown and their habits are formed, they rarely ever change in this regard. It will be noted, therefore, that missionary work to be done among the boys, and I make the suggestion, gentlemen, that nickels expended in treats to the boys now, will return in dollars to your tills after the habit has been formed. Above all things create appetite."

As to whether or not a person who destroys outlawed property is a law-breaker, is a point Kansas people, and all the rest of us, are hoping to see decided by the courts. Mrs. Nation's case will probably have to go to the Supreme Court before such decision can be reached. "Meanwhile," says Mrs. Hutchinson, President Kansas W. C. T. U., "people here have changed their opinions since the beginning of the Nation crusade. Those who were at first very much prejudiced against her and her methods have become her sworn advocates."

"I venture to say, from my experience of this sin of drunkenness, starting in life, it has robbed of their honor more pure women, it has brought down more gray hairs with bitter sorrow to the grave, it has emptied more churches and chapels, and I say it has damned more souls than all the sins of the Ten Commandments rolled into one."—Canon Withersforce.

Some women cling to their homes like the honeysuckle over the door, yet, like it, fill all the region with the subtle fragrance of their goodness.—Henry Ward Beecher.

I am wickedly in the habit of saying that the three maladies which hinder piety are too many books of devotion, theatrical music in churches, and pulpit oratory.—Cardinal Manning.

Agricultural.

Dairy Outlook Bright.

Dairy Supt. Harvey Mitchell in conversation with the *Sussex Record*, states that prospects are bright for the best season in our history. There is every prospect at present of early pasturage in May, and this coupled with the extremely high price of creamery butter which is keeping at 22 cents, will have a tendency to stiffen cheese prices on account of curtailing the make of fodder cheese. Already Montreal buyers are willing to make season contracts for cheese at 10 cents which, in comparison with the price of three years ago, is a remarkably high rate. In spite of the good work that has been done here the past years by the Provincial Dairy school in turning out cheese makers, Supt. Mitchell informs us that it is very hard to engage makers even this early in the season. If present indications hold, the farmers of the Maritime Provinces will have a very prosperous year with which to commence the new century.

How New Zealand Government Helps Farmers.

The Government in New Zealand, says Frank G. Carpenter in *Chicago Times-Herald*, watches the interests of the farmers very closely and aids them in many ways. This is especially so as to the dairy industry. The Government loans money to butter makers, making cash advances up to \$10,000 under certain conditions. The interest paid is 5 per cent, and the loan is to be repaid within fifteen years in half-yearly instalments. The Government has also cold stored butter, where all butter intended for export is frozen, given free storage for a month, and then put on the steamer. The law provides that all exported butter must pass through these plants, and thus be subject to Government inspection. I see large butter factories everywhere in New Zealand, and I am told that such factories are steadily increasing. The annual butter and cheese exports now amount to more than \$2,500,000, and last year almost 10,000,000 pounds of butter were exported. Some of this went to Australia, some to Great Britain, and some to the Philippines.

Sun Factories.

The fields of our farms are so many factories driven by sunshine, in which the materials are being worked into finished products. If we would double our output, we must double the stock out of which the wares are made. In the soil there are no inexhaustible stores from which the stock may be drawn. The nitrogen, it is true, comes from the boundless atmosphere, but with the best till we are able to maintain, it can only enter the soil at a limited rate and not such as to utilize the full power of the stream of sunshine flowing by, nor to match the carbon taking in the wind. The phosphorus and potash enough in the soil and rock beneath for 10 large crops a year but the rate at which the best amount of water can bring it into soluble form is too slow for even one. But the raw material whose deficiency causes the key of the factory hum often more than any other, is soil moisture, and this is true even in very humid climates, when humidity is measured by inches of rainfall.

Food Flavors in Eggs.

"The eggs of a scavenger hen are not fit to be eaten," says Dr. J. H. Kellogg, writing in *Modern Medicine*. "My attention was called to this a number of years ago. A lady said she wanted 'sunflower eggs.' I asked her what she meant by that, and she said she could not eat our eggs. She wanted 'sunflower eggs.' I told her we had the best eggs in the country, but she said that an old German at home fed his chickens on sunflower seeds, and that the eggs were remarkably sweet. Some of the eggs were sent for, and this was found to be true. Eggs do partake of the nature of the food which has been eaten. When chickens are fed on dead calves, dead hogs, or other dead animals, their eggs will partake of the strong, rank flavors that have been swallowed with their food."

If not done already, then cut the raspberry and blackberry canes now. If allowed to grow too thickly, small the fruit will be the result. The thinning should be done before the canes start to grow.

Growing top onion sets is suggested in an exchange as a good way for women to earn pin money. When frost is out of the ground, plant sound medium sized onions very shallow and keep perfectly free from weeds while growing.

Every Mother A Doctor

It is an anxious time for mothers when the little ones get their feet cold and wet, and come home hoarse and coughing, or awoken in the night by fits of deadly dread. Then it is that the mothers turn gratefully to Dr. Chase, who, through his great Recipe Book and famous family remedies, has time and again saved the little ones and older ones, too, from suffering and death.

It is truly surprising how promptly Dr. Chase's Syrup of Linseed and Turpentine brings relief when the throat is sore and irritated, when the cold is tight in the chest, and the cough painful and distressing. It allays the inflammation, heals the sore and torn membranes, soothes the nerves and clears the air passages.

People who know of the singular virtues of Dr. Chase's Syrup of Linseed and Turpentine do not think of accepting the cheap substitutes which many druggists offer in its place; 25 cents.

Dr. Chase's Syrup of Linseed and Turpentine.

Are You Well?

Unusual question!
If your digestion needs a rest—whatever else may be true—you can get it from **SCOTT'S EMULSION of Cod Liver Oil.**

Whatever else it may be—it is a vacation for stomach and partly for bowels.

It feeds you a little without any work at all by the stomach. That little may be enough to set your whole body going again; for it helps you more than it feeds you.

If you have not tried it send for free sample, its agreeable taste will surprise you.
SCOTT & BOWNE, Chemists, Toronto, 50c and \$1.00; all druggists.
