YUKON DEVELOPMENT.

Late newspapers from Dawson show that Yukon Council, at a meeting early in July, passed the budget for the year ending June 30, 1902. The appropiations amout to \$479,800, and in addition the sum of \$137,000 was voted to cover certain expenses of the Territorial Government for the year which has just elapsed. It is of interest to note the objects for which money has been appropriated. Of the latter sum nearly half, or \$63,900, was for roads, bridges and public works, while \$25,000 more was for the Territorial Medical Board of Health, \$14,800 for schools. In the appropriations for the current year, roads, bridges and public works accounted for \$60,000; the fire department is voted \$85,000; the maintenance, cleaning and lighting of streets \$60,000, schools \$71,200, and hospitals and charity \$38,000. It will be seen that one-third of the expenditure will be for public works, mainly of a nature to improve the mears of communication, and that nearly a quarter will be for education and relief, while nearly a third goes for municipal services of a description which are keenly needed. Steps have been taken to incorporate Dawson, giving it a simple form of town government, and a variety of other ordinances have been considered, including one dealing with the question of miners' lines. A forecast of the roadbuilding operations for the year has been made public by Commissioner Rose, and the work will be pushed with vigor, so as to make the most of the advantage of the summer weather.

An acorn is not an oak when it is sprouted.—It must go through long summers and fierce winters, and endure all that frost, and snow, and thunder, and storms, and side-striking winds can bring, before it is a full one come to the fullness of manhood. -H. W. Beecher.

Came violent Rheumatism and more violent Neuralgia – Doc-tors couldn't stem the disease tide—3 bottles of South American Rheumatic Cure "gave battle" and won gloriously.

Mr. W. W. Brownell, of Avonmore, Ont., says that a few years ago he had typhoid fever. After recovering was attacked most violently by Rheumatism and Neuralgia, he suffered so he thought he would die. Many a night thought he could not live till morning. Doctors tried to relieve him but could not. After taking three bottles of South American Rheumatic Cure every vestige of pain left him and he was as well as ever.

'You know Will was just crazy to marry me!' said the young bride. 'Yes; that's what everybody thinks,' replied her jealous rival.

"STIFFLED" HEART

Ever feel that every breath would be your last—that the thumping, stiffling sensations about your Heart were crushing your life out?

Dr. Agnew's Cure for the Heart is the only absolutely unfailing remedy known and pre-scribed by eminent physicians. Its claims of potency are not heresay or false hope to the sufferer. It is not a spirit lifter to gather you up to the high pinnacle of expectancy only to drop you into a deeper mire of disease. It gives relief in thirty minutes. A few bottles cure the worst forms of heart malady. Sold by Garden Bros.

A New Danger to Consumptives.

The general acknowledgment of the fact that tuberculosis is contagious, and that contagion is largely spreading by means of spittle, is having the most far-reaching effects. In many Canadian cities "spitting notices" have been put up. In London these notices say, "Please do not spit on the sidewalks," in St Catharines they say "You must not." The most serious development in connection with the new crusade, hawever, is in the steps that are being taken to exclude consumptives from places to which they I'm awful glad you married into our have hitherto gone in search of health. Arizona has, says a dispatch to the New York Post, begun a campaign against tuberculosis, which may result in a strict quarantine against victims of pulmonary He-'He said he'd be delighted to trouble. The City Council of have me for a son-in-law, only he Phoenix has passed ordinances intended to provide protection against infection from the thousands of health-seekers who come to Arizona each year. The plans submitted by the Health Board call for the providing of cuspidors or proper receptacles on the street crossings and in public parks. The most important ney diseases, and nothing measure is the fumigation of rooms occupied by invalids. In its report South American Kidney Cure touches the weak spot firmly, but gently; gives the best results in the shortest time; cleanses the kidneys which in return cleanse and purify the blood, for blood can become impure only by passing through weak and ailing kidneys. Let us live up to the light of the 20th century. Employ the means, and enjoy robust and vigorous health. 6 the board says: "The danger of infection to natives here is growing more apparent, and the need of adopting stringent safety precautions more urgent. Annually the number of invalids suffering from consumption come to Arizona in

g sater numbers. The fame of the Salt River valley as a health resort is spreading all over the country, and future influxes of consumptives will grow larger in consequence." The Arizona Medical Association, at its meeting two months ago, adopted a resolution calling upon the Councils of cities and towns throughout the Territory to take precautionary measures against the spread of the disease. Nearly every city in the Territory is preparing to take up the fight on the disease, and a bill has been prepared for the next Legislature, barring from entrance into the Territory all persons showing the germs of tuberculosis.

Turning to Stone.

Laporte, Ind., Aug. 25.-Eli Green has returned to his home at North Judson, after receiving treatment from medical experts, who pro- Window Curtains and nounce his case incurable. Green is going through the process of ossification. His body is rapidly turning grown oak.—So a man is not a man to stone. The upper part of his stom- Parlor Suites, when he is created; he is only begun. ach is as hard as rock, as are also the Dining Room Suites, -His manhood must come with upper parts of his arms and limbs. Kitchen Suites, years.—He that goes through life A knife can be run into his body at prosperous, and comes to his grave places without his feeling it. He has without a wrinkle, is not half a man. been baked in ovens, heated at 120 Difficulties are God's errands and degrees but with little improvement. trainers, and only through them can His heart is being gradually encrusted with a stony formation, which will sooner or later stop its action. He no longer perspires, and his weight is steadily increasing.

The extraordinary conditions in Green's case began to develop about a year ago. The progress of ossification was then slow. Physicians say that, when life has been crushed out of the human frame, Green's

body will be literally a stone corpse. The medical experts who have examined Green say there is only one parallel case in medical annals, and that was recently reported from Australia. The conditions which contribute to the phenomena of Green's case are an enigma to the medical fraternity.

OATMEAL AND DYSPEPSIA

The Scotch are the greatest dyspeptics on earth, largely owing to their use of half-cooked oatmeal and soft bread. Next to the Scotch are the Americans, and no single thing has contributed more to American dyspepsia than half-cooked oatmeal mush for breakfast. In rural France, where dyspepsia is practically unknown, hard bread and vegetables, with a very moderate amount of meat, comprise the chief items of the bill of fare. Take the centre out of a hot biscuit, and roll it a minute in your hand; and it soon becomes a solid mass of dough, "a lead pill". That is the thing your stomach wrestles with when it attempts to digest hot bread or biscuit. A good deal of the cold bread is just as bad. Such food may be nutritious for the chap in the circus who relishes ground glass and eats swords and tenpenny nails, but it shortens the lives of average people. -Leslie's Weekly.

London's tax rate is \$1.92 per capita; that of Paris, \$1.02; that of New York, \$28.00.
