

Shoe Style.

When you wear a "King Quality" shoe you get all the style, the fit and finish found in the best American shoes.

The "King Quality" factory is the only one in Canada that makes Ladies' Shoes better than the American article, which comes into Canada with a 25% duty taken out of its quality.

The "King Quality" brand is worn by the best dressed Canadian ladies; it is a true note of shoe fashion, of correctness in dress, 27 styles, 4 widths, all sizes. Branded "King Quality." Gold medal awarded at the Paris Exposition, 1900.

Made by The J. D. King Co. Limited, Toronto.

Bailey Bros., Local Agents.

Interesting Construction of an Irishman's Will.

In the name of God, Amen! I Timothy Delona, of Barrydownerry, in the county of Clare, farmer; being sick and weak in my legs; but of sound head and warm heart; Glory be to God!—do make the first and last will the old and new testament; first, I give my soul to God when it pleases him to take it; sure no thanks to me for I can't help it then; and my body to be buried in the ground at Barrydownerry Chapel, where all my kith an, kin that have gone before me, and those that live after, belonging to me, are buried, pace to their ashes, and may the sod rest lightly over their bones. Bury me near my godfather, Felix O'Flaherty, betwixt and between him and my father and mother, who lie separate altogether, at the other side of the chapel yard. I have the bit of ground containing ten acres—rall old Irish acres—to me eldest son, Tim, after the death of his mother if she survives him. My daughter Mary and her husband, Paddy O'Ragan are to get the white sow that's going to have twelve black bonifs. Teddy my second boy that was killed in the war of Amerikay, might have got his pick of the poultry, but as he is gone I'll have them to his wife, who died a wake before him; I bequeath to all mankind fresh air of heaven, all the fishes of the sea they can take, and all the birds of the air they can shoot; I have to them the sun, moon and stars. I have to Peter Raffery a pint of fulpoten I can't finish and may God be merciful to him.

THE UNITED STATES BALANCE SHEET.

The fiscal year of the United States ends on June 30, the same day as our own, and a statement of the receipts and expenditure has now been given out at Washington. The revenue for the year amounted to \$585,945,307, an increase of \$18,600,000 over the revenue for the year ending June 30, 1900, while the expenditure reached \$509,983,308, an increase during the year of \$32,250,000. The surplus for the fiscal year 1900 was \$79,527,060, and the surplus for the fiscal year just closed \$75,864,998.

Of the receipts for the past year, \$238,786,740 was derived from customs, \$305,514,410 from internal revenue, and \$41,547,157 from miscellaneous sources. Of the expenditure, \$122,310,434 was applied for civil and miscellaneous purposes; \$144,620,590 went to the War Department; \$80,515,387 to the navy; \$10,896,006 to the Indians; while pensions took \$139,323,489, and interest on the public debt \$32,317,402. It is estimated that the partial repeal of the war revenue taxes will lead to a reduction in the revenue for the fiscal year just opening of about \$45,000,000, while the appropriations for the post office and other departments show an increase amounting in all to nearly \$20,000,000. On the other hand the subsidence of the war in the Philippines is likely to lead to a falling off in the expenditure by the War Department. The prospect is that the surplus for the current fiscal year will reach nearly \$20,000,000.

The amount of cash in the Treasury, on June 30, stood at the enormous total of \$1,181,868,911. Against this there were outstanding gold certificates, silver certificates and Treasury notes issued by the government and used as currency, amounting to \$771,754,689, and miscellaneous liabilities of \$83,281,097, making the total liabilities against the cash in the Treasury \$855,035,786, and leaving the net cash balance \$326,833,125. Of this sum the secretary of the treasury is required to maintain \$150,000,000 as a fixed gold reserve, so that the balance actually available for use in the event of future deficits is \$176,833,125.

During the year the public debt of the United States was decreased by \$63,072,138, of which \$36,337,520 was by the purchase and cancellation of outstanding indebtedness, and \$21,127,470 through an increase of that amount in the cash in the Treasury. Of the indebtedness still outstanding, \$445,000,000 bears interest at 2 per cent. Most of these 2 per cent. bonds are owned by the National banks, and have been deposited in the Treasury as security for circulating notes and deposits of public funds.

COUGHING ALL NIGHT.

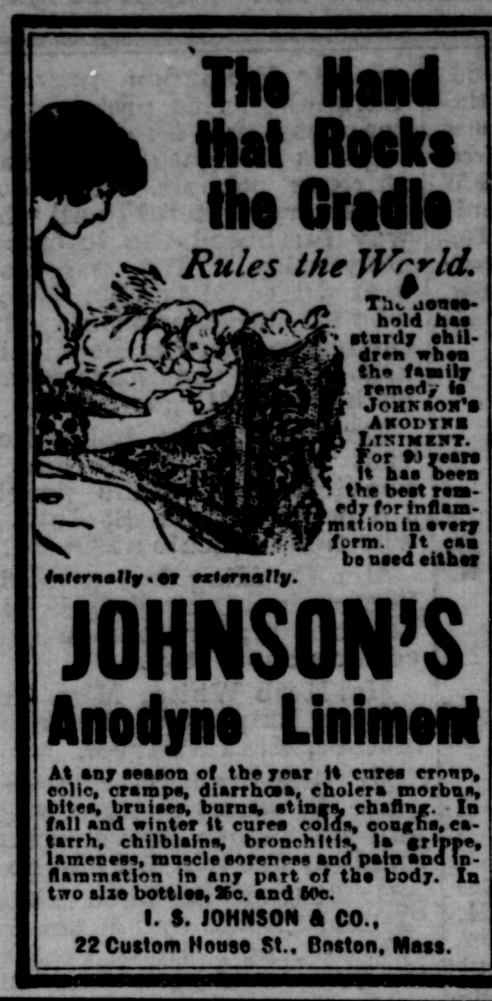

It's this night coughing that breaks us down, keeping us awake most of the time, and annoying everybody in the house. Lots of people don't begin to cough until they go to bed. It gets to be so that retiring for the night is an empty form, for they cannot rest.

Adamson's Botanic Cough Balm makes life worth living to such people by its soothing effect on the throat. The "tickling sensation" promptly disappears when the use of the Balm is begun, and the irritation goes with it. This medicine for cough hasn't a disagreeable thing about it, and it does efficient service in breaking up coughs of long standing. It is prepared from barks and roots and gums of trees, and is a true specific for throat troubles.

Handling coughs is a science that everyone should learn. Not knowing how to treat them has cost many fortunes and many lives. In Adamson's Balm there are the elements which not only heal inflammation, but which protect the inflamed parts from further irritation. The result of this is that the tendency to cough does not manifest itself, and you are surprised at it. Afterward you would not be without Adamson's Balm at hand. This remedy can be tested. 25 cents at any druggist's.

Russia's Internal Danger.

A correspondent of a London newspaper writing from Odessa says the continued unrest among the industrial classes in Russia is causing the liveliest concern among the military and civil authorities, both central and provincial. This has been increased by the recent discovery of the movement for a general trades union of all the workmen in the iron and steel factories. He says that the Government is gradually awakening to a realization of the fact that the time is approaching rapidly when it will no longer be safe to take the side of the employers against the employed as a matter of course. He quotes a significant remark made in his presence a short time ago by an experienced inspector of Russian factories. He said: "If Russia were to find herself at war to-morrow with a great power she might, possibly, be able to wage it without obstructive drawback in the shape of internal trouble and complication; but if we should be launched into a great struggle at the end, say, of the next five-year period, and things should drag along in the meantime in their present precarious and treacherous groove, then we should require a strong garrison

in every industrial centre in the Empire. We should want two or three hundred thousand troops in Finland, and half a million in Poland, to say nothing of the requirements of the Caucasus. Industrial discontent and political disaffection are, for fundamental reasons, you will readily understand, synonymous and inseparable terms and quantities as applied to the mass of our countrymen.—*New York Post.*

If you try a pound of Union Blend Tea to-day and another a year hence you will find that the two pounds are identical in quality. We cannot afford to deceive or defraud our customers. 25, 30, 35 and 40 cents per pound.

Quick Firing Guns.

The British Naval Department are introducing a new breech-loading quick-firing gun into the new 18,000 ton battleships which are now in course of construction. The diameter of the bore is 7.5 inches and its total length from breech to muzzle is 386.7 inches. The gun weighs 15½ tons and is equipped with a shield weighing 12 tons 16 hundredweight. The weight of the projectile is 209 pounds, which is twice the weight of that utilized with the 6-inch gun. The charge is 79 pounds of nitro-cellulose, which imparts a velocity of 3000 feet per second and an energy of 12,480 foot-tons. The breech mechanism is very ingenious, being of a new hand-lever type, by which means the breech is opened and closed by a single motion of the lever. The one horizontal swing of the lever rotates the breech plug, swings it in and out of the gun, and cocks the firing striker. Considering its size it is the most powerful weapon in existence. It is more than twice the length of the former 6-inch gun and exceeds in length the former earlier type of 12-inch gun.

Diplomacy a Fine Art.

Diplomacy is a fine art, and in its successful practice much depends upon the observation of social conventions. Some of the most successful diplomats seem to spend most of their time at dinners and parties, apparently doing nothing but enjoying themselves, but in reality serving well their countries. In truth, the reputation of a country at a foreign court and oftentimes its welfare in important issues depend very largely upon the social abilities of its minister, for the man who is popular socially is very likely to drive a better international bargain than his unsocial brother. This is well understood at Washington, and the selection of a chief for one of our foreign embassies depends in no small part upon his social culture.—*Edward Page Caston in Woman's Home Companion.*

GAMBLING.

The writer once spent a Saturday afternoon in the study of a dignitary of the church while the ecclesiastic struggled in vain to frame an argument against gambling to be presented to the congregation on the morrow. He abandoned the attempt. Far be it from a literary journal to assert powers the possession of which the professionally religious are fain to disclaim, yet with submission we even venture to believe that at least one cogent and effective argument lies against all forms of gambling—one, namely, based on the truth that wealth, great or small, is a trust and therefore may not be put in risk.

The moralist may declare that the gambler gets, or at least wants to get, something for nothing. Men will laugh. They know better. The winner gave his chance to lose for his winnings. For his losses the winner got his chance to win. But ask the speculator whether he would gamble with trust funds held by him for orphans and then suggest to him the one great truth that is seizing hold of men's conscience, the most hopeful sign in these perplexing days of social unrest, that men are trustees of all that they call their own.—*Current Literature.*

England and France.

There is always an alarmist, on one side or the other, to foresee an imminent conflict between France and England, and to compare the respective forces of the two countries. The most recent of them is Monsieur Germain Bapst, who in a long article in the Figaro argues that it is the urgent duty of the Government to make ready against an attack from their neighbor across the Channel. The French fleet, he admits, is much weaker than the British—in spite of the superiority of the French ships as individual units—but he does not think that the English men-of-war could do much mischief by a bombardment of the naval works at Marseilles, Havre, or Dunkirk, as the land defenses are too strong, but they could easily, of course, if they choose, destroy such resorts as Nice or Cannes. It is not likely, says M. Bapst, that the English would attempt to land either in France or Algeria, but the South African war has proved that they could transport to and maintain in any part of the world an army of 250,000 men, and this was a threat to all French colonies. Great Britain already has 60,000 colonial troops in the Transvaal, and this force could be augmented indefinitely, if necessary. Now Parliament has passed a bill creating three army corps ready for immediate embarkation, and it is France's bounden duty, says M. Bapst, to be prepared for all eventualities. England's weak point is her commerce, and the true French policy, he believes, is to build large numbers of swift cruisers to play upon it. He would cease the reconstruction of battleships on the ground that his countrymen have always been worsted by the British in great naval battles.

This is an Irishman's Love Letter.

Letter CXLII.—And last—Patrick O'Brien, sir: This is the last letter ye'll have from me, bad cess to ye. And it's writing this I am to tell ye that ye are a lobster. There's lots of good fish in the sea besides lobsters, and if ye think I'll cry my eyes out because ye jilted me, that's where ye make a mistake. Troth, the policeman on the beat has been coaxing me to go skatin' with him, and its going I am to-morrow. Tear up me photograph; yeurs in the ash-barrel. Farewell, Patrick O'Brien, and may the devil fly away with ye. Yours without respect, Mary Ann Brady.

Personally Conducted Excursions to the Pan-American Exposition.

The Canadian Pacific Ry. propose running four Personally Conducted Excursions to the Pan American Exposition at Buffalo, parties to be away from home about nine days, and have stop overs en route at Montreal, Ottawa and Toronto, with three days at Buffalo and one day at Niagara Falls. The cost to be \$80.00 to \$100.00 each, for the trip. Write for dates of starting and other particulars to A. J. Heath, D. P. A., C. P. Ry., St. John N. B.—31-27.

A FAST 2-YEAR-OLD.

Todd, the fast Maine 2-year-old lately purchased by George W. Leavitt, trotted a mile last week in 2:34 on the Readville track, the fastest mile thus early in the season ever trotted in the north by a youngster of similar age, and the fastest mile by any 2-year-old this year. The colt made easy work of the performance, and it was only at the end of the mile that his driver really asked the colt to step along. When he did, he left the two pacers in the rear and finished the last furlong in 16 seconds, or at the rate of a mile in 2:08. On the strength of this performance, W. F. Steele offered Leavitt \$10,000 for Todd, which meant a profit of \$6000, for an investment of two months' standing, but Leavitt refused the offer. The colt is entered in \$48,000 worth of stakes, and, barring accidents, it looks as though he should win the larger per cent of this money. And if he trains on as did his sire, Bingen, who was also a phenomenal colt trotter, he should be worth at least five times the amount offered after he has been retired from the track. All that is needed now to make Leavitt happy is to have Fanella, the dam of Todd, take a record of about 2:12, which she should be able to do with a little luck to help her along.—*Maine Farmer.*

The bottled beer of England requires nearly 70,000 tons of cork yearly.

The Fredericton Exhibition will open October 1st and will continue for four days.

A recent hotel census of Paris shows that the city has 11,700 hotels.

Fire 14 miles west of Great Bend, Kan., Sunday night, burned 10,000 acres of standing wheat, loss \$50,000. William Gerhardt, a farmer, is said to have perished.

The above cut shows the very latest and UP-TO-DATE RANGE in the market. Made with or without Reservoir, or with or without High Shelf. Has a Towel Rail and Teapot Swing.

IMPROVED DRAG SAW.

3 kinds of Drag Sawing Machines. Also Circular Sawing Machines, Shingle Machines, Etc. Etc.

Small & Fisher Company, L'td

Attention, Breeders!

If you want to Breed for Speed, breed to **RED GLEN**

For his colts trot when young, and for road purposes are excelled by none. Lady Glen, 2:19, holds the championship of the Maritime Provinces as a four and five year old; also the championship of Aroostook County of 2:19. She won every race she started in last season but one, and got second in that. She has trotted a mile better than 2:14; has paced a quarter in 30 seconds flat, a two minute clip. Where is there another one in this County that can do it. She is the most level-headed pacer on top of the turf. She has never made but one break in all other races, and that was caused by accidental means. Gentlemen, I want you to understand that RED GLEN is the best Pacing Stallion that stands in this County. In the first place his sire is the greatest sire in the Wilkes family, being Red Wilkes. He has to his credit 109 2:30 performers, including Ralph Wilkes 2:06, the fastest trotting stallion in the Wilkes family; Fred W. 2:08; Thurlow 2:09; Blanch Louise 2:10, and 16 in the 2:15 list; 40 in the 2:20. RED GLEN has a number of colts that could enter the list if their owners would only give them a chance. I know of a colt out of a John Bright mare that can beat 2:30 season if reports are true. RED GLEN is just as well bred on his dam's side as any horse living. His dam Stella 2:30 is by Lumps, record 2:21, by George Wilkes record 2:22. Lumps is the sire of Echo 2:15, Classmate 2:17, Bamboo trial 2:09, 10 in the 2:15 list, 30 in the 2:20 list. RED GLEN's second dam is Maoria Clay, by Harry Clay 2:28, a son of Cassius M. Clay Jr., and sire of Clayton 2:19, also the dams of Harrietta 2:09, Belina 2:08, St. Julian 2:11; the dam of Electioneer with 163 in 2:30 and better, including Arion 2:07, Sunol 2:08. RED GLEN's third dam is Maoria Wilkes 2:08, Harrietta 2:09, second dam of Alcantara 2:23, sire of Nightingale 2:10, with 133 in 2:30 and better. RED GLEN's fourth dam is by Lexington, sire of the dam of Sunol 2:08, A. L. C. 2:06. RED GLEN's fifth dam is by Imported Glencoe, sire of the dam of Truman 2:12, Billy S. 2:06, Lightning 2:05. RED GLEN's sixth dam is by the famous Boston, sire of the second dam of Maud S. 2:08, Notwood 2:18, sire of 163 in 2:30 and better, including Manager 2:06. (P. You see on RED GLEN's dam's side, as well as on his sire's side, he carries the blood of the greatest trotting families in the world. Note the sons of Red Wilkes have sired the fastest in the Wilkes family, producing John R. Gentry record 2:01 paces). He held the world's record for four years, when Star Pointer trialed a mile in 1:39, which is the present record. Bert Oliver 2:06, Arlington 2:06, Gentry's Treasure 2:10 as a four year old, Sally Tuxter 2:06. His daughters have produced Onoqua 2:45, Coleridge 2:05. Red Wilkes, his sons and daughters have produced 28 2:10 performers, and an exceedingly large list of 2:20 performers.

RED GLEN is a horse of very high mettle. No horse living has more nerve force. He is a Beautiful Bay, carries his head well up, good strong limbs, good feet, a very fast walker, a very level-headed horse for his caliber. He is 1,100 pounds strong, making him a very desirable horse to breed to, both for speed and road; he has colts that weigh 1150 pounds out of mares of medium size. His colts command good prices. RED GLEN has a trial mile of 2:27 a quarter in 31 seconds, and if given a chance, such as he should have, should get a mark far below 2:20. The past season he had 59 patrons, showing that the public are getting their eyes open to the good stock that this horse is getting.

RED GLEN will stand at the stable of his owner, Connel Street. Address all communications to A. W. BROWN, Proprietor. Service for 1901 will be \$20.00, \$10.00 down, balance when mare proves with foal a conditional note must be given for balance of \$10.00 in every case. Single service \$10.00. Mare not proving with foal \$10.00 more to be paid, with privilege of using horse until mare proves with foal. Mares, after being bred to RED GLEN, disposed of, will be considered with foal and fee collectible in every case. Mares and colts taken for service fee of station. Mares sent to RED GLEN will be kept for from \$1.50 to \$2.00 per week. All accidents and escapes at owners' risk.

—3mcs-16.

FOR BEST RESULTS, ADVERTISE IN THE CARLETON SENTINEL.
