

## W. C. T. U. Corner.

The meeting of the W. C. T. U. is held in GRAHAM'S HALL, each THURSDAY afternoon, at three o'clock. All ladies are cordially invited to attend.

## OUR MOTTO.

If God be for us, who can be against us.

## OUR PERSUASION.

That temperance is the moderate use of all things helpful, and total abstinence from all things harmful.

## OUR FAITH.

That as God lives, right the day shall win.

## A Thought Worth Holding.

In his sermon, recently, my pastor gave utterance to these words: Sin inevitably brings suffering. Engage in some forms of sin, and you will suffer in your body. Engage in other forms of sin, and you will suffer in your mind! Continue in any form of sin and you will damn your soul. My! What a thought! Ought it not to lead sinners to repentance and stir to mighty activity the whole church of God? May the Lord help us each to shun sin, to war against sin, and if we have done so to hasten at once to the fount of cleansing, for the blood of Jesus Christ cleanseth from all sin.

## Rothschild's Rules.

When Meyer Rothschild, founder of the great banking house in Frankfurt, Germany, died, he left something better than wealth—an example that has become a tradition in this noted family. He also left precepts. Among them were the following:—

Carefully examine every detail of your business.

Be prompt in everything.

Take time to consider, but decide positively.

Dare to go forward.

Bear troubles patiently.

Be brave in the struggle of life.

Maintain your integrity as a sacred thing.

Never tell business lies.

Make no useless acquaintances.

Pay your debts promptly.

Shun strong liquors.

Employ your time well.

Do not reckon on chance.

Work hard.

## Neal Dow and His Son.

Colonel Fred. N. Dow tells the following story to illustrate how the son of a father devoted to a great principle is likely to follow in his father's steps.

Colonel Dow once visited friends at Quebec, and, while seeing the sights of the city and its surroundings, he took a public carriage to visit the Falls of Montmorency. At a half-way house on the road the driver pulled up his horse, and remarked, "The carriage always stops here."

"For what purpose?" asked the colonel.

"For the passengers to treat," was the reply.

"But none of us drink, and we don't intend to treat."

The driver had dismounted and was waiting by the roadside. Drawing himself up to his full height he said impressively, "I have driven this carriage now more than thirty years and this has happened but once before. Some time ago I had for a fare a crank from Portland, Me., by the name of Neal Dow, who said he wouldn't drink; and, what was more to the point, he said he would not pay for anybody else to drink."

The son found himself occupying the same ground as that on which his father had stood.

## The Tale of One Bottle of Liquor.

A writer in the Youth's Companion said: "Some time ago, when travelling in the Northwest of Canada, the following incident happened, illustrating in a striking way how the drink traffic works evil. In Prince Albert, N. W. T., Canada, there is a barracks of the Mounted Police, a body of men who patrol the country for miles around to keep peace among the Indians. It was their duty to arrest one for some petty offence, and he was placed in the barracks, not closely confined, as an armed guard stood day and night at the entrance, and no one could pass without his notice. It was Private Coleman's night watch, and he had brought from town a bottle of liquor. Constant pulls at it put him to sleep, and the foxy Indian crept up, stole his revolver and made off.

A sergeant, whose name I now forget, was returning home at a late hour, saw the Indian escaping and must have tried to arrest him. A revolver shot woke the police, and disclosed the awful fact that the sergeant was dead.

The Indian made good his escape and a reward was offered for him. For months the police hunted him, at last two of them found him, but only to lose their lives in the effort to take him. He had friends who were with him: how many it is not known. The militia was called out and the place surrounded and stormed where they were known to be. After a time the two hundred volunteers made a rush and found the poor old Indian and his two followers dead. Six lives had been sacrificed, one man disgraced, and a large sum of money expended, all for one bottle of liquor.

## For Croup, Coughs and Colds

Mothers must have something that is safe and acts promptly. Even a few minutes' delay in a case of Croup often means death.

## Shiloh's Consumption Cure

should be where it can be had at any minute.

Mothers have you SHILOH in the house at all times? Do you know just where you can find it if you need it quickly—if your little one is gasping and choking with croup? If you haven't it get a bottle. It will save your child's life.

"Shiloh always cured my baby of croup, coughs and colds. I would not be without it."

MRS. ROBINSON, Fort Erie.

Shiloh's Consumption Cure is sold by all druggists in Canada and United States at 25c, 50c, \$1.00 a bottle. In Great Britain at 1s. 2d., 2s. 3d., and 4s. 6d. A printed guarantee goes with every bottle. If you are not satisfied go to your druggist and get your money back.

Write for illustrated book on Consumption. Sent to you free. S. C. Wells & Co., Toronto.

## WANTED!

Dry Birch Plank. Also Dry Pine and Bass-wood.

Our ambition is to suit customers in quality and price and your patronage will be appreciated.

TOWNSEND & CO.

Woodstock, June 27, 1900.—1y-62.

## Agricultural.

## Marvellous Records For Holsteins.

American Holsteins continue to make some marvellous records. S. Hoxie, superintendent of advanced registry, reports a Holstein heifer at one year and nine months making nine pounds ten ounces of butter in seven days. A two-year-old made nine pounds thirteen ounces; and one just under two years made ten pounds eight ounces. One a little over three made nineteen pounds four ounces; one just under eight, almost twenty-one pounds, and one nearing ten years of age, twenty-three pounds.

## Danger in Tuberculin Test.

The Breeders' Gazette says that a bull which was purchased in England for \$6,000, for importation into the United States, was nearly killed by the application of the tuberculin test at Garfield Station. The United States veterinary officer in charge of the case admitted that the bull was sicker than any animal he had ever seen which still escaped death. Still that bull had no tuberculosis, and was released after the application of the test. Of the seven head imported at the same time as this particular bull, all but one were seriously injured by the application and one heifer lost her calf.

## Pure Bred Cattle in the United States.

The Chicago Breeders' Gazette says that a large number of men who have not heretofore had pure bred stock in the United States are now making purchases in that line. The movement in this direction, it says, is sweeping. In this connection the Breeders' Gazette warns these inexperienced buyers against the danger of basing their estimate of the value of an animal on the amount of fat it has laid on. Dealers in pure bred stock have, it says, learned by experience that nothing but a fat animal will bring the top price at a sale of breeding stock. On this account they sometimes have their animals over fat at time of sale, and buyers, believing they must continue the stuffing process, often keep on in that same line until the animal is ruined.

At a sale of Aberdeen Angus cattle at Chicago three females averaged \$178.08, and seven bulls an average of \$102.94. At another sale in the same place nine females averaged \$243.33, and six bulls \$190.83. Another lot averaged \$213 for ten females, and \$107.22 for nine bulls. Twelve cows in another consignment averaged \$259.58, while in one other lot 53 bulls averaged \$93.58, and 58 cows \$209.30.

## Absorbs All Knowledge.

Farming has this peculiarity, that it can absorb and supply all knowledge. Not one of the sciences but is related, or may be related, to agriculture. Botany, rightly understood, is the art of growing better potatoes, beans and corn. Entomology is that economic science that discusses what bugs are of use to man and what are injurious. Geology is an analysis of the soils and rocks that underlie the soils for the purpose of making them more available for human warfare.

## Fertilizer Experiments in Canada.

A small experiment was tried by some practical Ontario farmers last season with different fertilizers for corn. Barnyard manure, mixed fertilizers, muriate of potash, superphosphate, nitrate of soda and no fertilizers at all were tried. The best results were obtained from barnyard manure, which gave a yield of 9.9 tons of the whole crop and 73 bushels of corn per acre; mixed fertilizers gave 9.7 tons and 61 bushels, muriate of potash 9.6 tons and 66.7 bushels, superphosphate 9.3 tons and 70.7 bushels, nitrate of soda 9.2 tons and 72.4 bushels, while with no fertilizer the field was 8½ tons and 61.8 bushels. The results, while of course mostly favoring barnyard manure, show a large profit from the use of commercial fertilizers. Every farmer should make the most use of what manure is produced on the farm, then supplement this with as much fertilizer as he needs or can afford to buy.

## General Purpose Farming.

The general purpose farmer who is a good gardener gets a better living for himself and family than the special crop farmer, says the American Agriculturist. He raises his own dairy products, beef, pork and mutton, eggs and fowls, fruit and vegetables, and if he wants to eat them he is not obliged to stop and count the cost. He has no fear of starvation through stoppage of railroads or strikes. He is not as badly affected by a poor season, for he has several crops to depend upon, and as he usually sells more than he buys it is an easy matter to keep out of debt.

## General News Items.

There are 56 English teetotal mayors.

Minard's Liniment Cures Dandruff.

During last year the lifeboats on the British coasts rescued 676 lives.

The best protection against fevers, pneumonia, diphtheria, etc., is in building up the system with Hood's Sarsaparilla.

In Switzerland no one under the age of 14 is allowed to become a wage earner.

Lack of vitality and color-matter in the bulbs causes the hair to fall out and turn gray. We recommend Hall's Hair Renewer to prevent baldness and grayness.

London, Feb. 7.—Upwards of 3,000 wreaths, worth \$500,000, were sent to Windsor for the Queen's funeral.

WANTED.—Capable, reliable person in every county to represent large company of solid financial reputation; \$300 salary per year, payable weekly; \$3 per day absolutely sure and all expenses; straight, bona-fide, definite salary, no commission; salary paid each Saturday and expense money advanced each week. STANDARD HOUSE, 534 DEARBORN ST., CHICAGO.—41-1.

Dried blood is sold as a fertilizer in the United States, at prices varying, according to Country Gentleman, from \$35 to \$45 per ton.

To Cure a Cold in One Day  
Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. 25c. E. W. Grove's signature is on each box.

CANTON, Feb. 7.—The intensely cold weather prevailing is causing widespread suffering. There have been over a hundred deaths here from the cold.

Minard's Liniment Cures Burns, etc.

Five Chinese girls were sold at public auction, in San Francisco, the other day, the prizes realized ranging from \$1,700 to \$2,500.

## Be Confident.

Should you suffer of La Grippe for the right remedy which cures you is the MORIN'S WINE CRESSO-PHATES. The only one that has always proved satisfactory.

The latest labor-saving contrivance is said to be an electric collection box. No sidemen are required for as soon as the clergyman has touched a button in the pulpit the box runs along wires from pew to pew, and the congregation does the rest.

Dyspepsia Pains.  
arising from the formation of gas owing to improper digestion, is the source of great misery to many. A very prompt and efficient remedy for this trouble is found in Nerviline. It relieves the distention instantly, and by stimulating action on the stomach aids digestion. Good also for Colic, Colds, Rheumatism, Neuralgia and Headache. In medicinal power Nerviline has a value five times greater than any other. Test it and see if it is not so. Druggists sell it.

The total wealth of the world is computed to be five hundred billions of dollars. Of this sum, three hundred and fifty billions are in the possession of the Christian nations, and of this sum again two hundred billions belong to the Protestant nations.—Statesman.

## Deadly La Grippe

Numbers its victims by thousands, leaves a deadly trail of disease and weakness behind it. You can avert danger from the deadly malady; you can prevent the disease if you will breathe Catarrhose. The germ cannot develop where it is used; that is prevention. You can check and destroy its ravages by Catarrhose by simply breathing it. That is cure. Sold in two sizes, 25c. and \$1.00, by all druggists, or by mail prepaid on receipt of price. N. C. Polson & Co., Kingston, Ont., and Hartford, Conn.

Sixty thousand dollars for a horse reads like the boom days of long ago, yet that is what one of the noted thoroughbred stallions sold for last week in New York, the total amount realized from 160 head being \$425,000. Evidently there is still a lively demand for the runners.—Maine Farmer.

## Beauty of Form and Figure

Health and beauty always go linked together. A wrinkled, tired and worn-looking face tells immediately of nervousness, worry and many accompanying ills and irregularities. Dr. Chase's Nerve Food fills the shrivelled arteries with new, rich blood, strengthens and rekindles the vitality of the nerves, and gives a well-rounded form, and clear healthy complexion to all who use it. 50 cents a box, all dealers.

There threatens to be a scarcity of girls in Chatham in the future. A female infant, born the other day, is said to be the first of the sex to seek the light in Chatham for precisely three months.—World.

## Free to Inventors.

The experience of C. A. Snow & Co., in obtaining more than 20,000 patents for inventors has enabled them to helpfully answer many questions relating to the protection of intellectual property. This they have done in a pamphlet treating briefly of United States and foreign patents, with cost of same, and how to procure them: trade marks, designs, caveats, infringements, decisions in leading patent cases, etc., etc. This pamphlet will be sent free to anyone writing to C. A. Snow & Co., Washington, D. C.

A ring-bearer is now a prominent character at American weddings. Nervous bridegrooms often had so much trouble to produce the ring at the exact moment, keeping the ceremony waiting whilst they fumbled in every pocket, that some ingenious individual hit on the idea of entrusting the ring to some special official. So a small boy, clad in court costume carries the important ring on a white satin cushion and stands by the best man.

The bones of a human being will bear three times as great a pressure as oak and nearly as much as wrought iron without being crushed.

## The Australian Commonwealth.

The Australian Commonwealth, which sprung into existence on the 1st inst., is bound to bulk more and more largely in the world's notice as time wears past. It is only in its infancy, but ere long it will develop into one of the strongest and largest members of the family constituting the British Empire. Though the confederation of the several colonies was not accomplished without considerable opposition and trouble—the negotiations thereto having extended over a period of no less than eleven years—its inauguration has taken place under the brightest auspices. The final arrangements with the Imperial Parliament were most amicably adjusted, and no burning question was left over to disturb future harmony in the new Commonwealth's relations with the Mother Country. Happy as Canada's relations with it have always been, one may reasonably expect that those of Australia will, if possible, be even happier, for in the latter there is no alien race to raise a single jarring sound.

This new Commonwealth is fortunate, too, in its first Governor General, the Earl of Hopetoun, who was inaugurated on the 1st inst with such enthusiastic demonstrations. As the Australians know he is no novice in such duties as he will be called upon to discharge, nor is he a needy adventurer to whom the salary attached is a great consideration, for his rent-roll in Scotland amounts to no less than £30,000 a year. He will fill the position of His Majesty's representative in the new commonwealth in a manner which will reflect the highest credit upon his King and country and also upon himself, and which will form a noble and laudable example for his successors in office.

Then the new commonwealth is further fortunate in the person whom His Majesty has deputed to open in his name its first parliament. Considering the few opportunities he has yet had of earning it, the Duke of York is already very popular in the Mother Country, and possesses to a large extent that peculiar charm of manner so characteristic of his father King Edward VII., and which more than anything else has tended to make the latter so much loved by all classes in Britain. Then, like his father, the Duke is happily and ably mated, and so far as any of the duties will devolve upon his Duchess, nothing will be wanting to make the opening of this first parliament, and their first visit to the colonies (for they intend to visit all of them) pass off most successfully. Their numerous escort, representing all branches of the British service, is intended as a further honor to the new commonwealth, and will add greatly to the eclat on the occasion.

Already this new commonwealth is no mean member of the British family. It has a population of some three and a half million people, and comprises a land of unusual fertility, adaptability to grazing purposes, and mineral resources, that give every assurance of future great national prosperity. Australasia is truly a land of promise.

## Wireless Telegraph Beneath the Waves.

Professor Elisha Gray of Chicago and Arthur J. Munday of Boston have, says the Chicago Times-Herald, invented a wireless system of sending and receiving signals under water that promises to save many lives and much property. They have discovered that sound may be transmitted beneath the sea with much more reliability than above its waves. It is possible, in the present stage of the invention to transmit signals a distance of twelve miles. The invention may be used to warn vessels approaching dangerous coasts. It will serve to give warships notice of the approach of torpedo boats. By its use lightships may be placed in communication with land, and vessels at sea may communicate with each other even though hidden from sight by fog. The new system may in a large measure take the place of fog-horns and bells on the sea coast. It must be apparent from this summary that many maritime nations are likely to find it of great value, and in thus serving humanity the inventors may have earned fame and fortune for themselves.

A whale over ninety feet in length was captured a short time ago at Petit De Gras, N. S., from which was extracted over one thousand gallons of oil. The whale bone is worth in the vicinity of \$600.

It takes thirty-seven specially-constructed and equipped steamers to keep the submarine telegraph cables of the world in repair.

Eighteen of the most modern guns, of German manufacture, with their carriages, ammunition waggons and other equipment, have arrived in England from Germany.

Smallpox is again spreading in New York. It is particularly severe in the district known as "Little Italy," from 112th street to 116th street, and from Fifth avenue to the East river.

## Hotels.

## ROYAL HOTEL,

41, 43 & 45 King St., - St. John, N. B.

RAYMOND & DOHERTY, PROPRIETORS.
