

COUGHS KILL

We know of nothing better than coughing to tear the lining of your throat and lungs. It is better than verfect to cause bronchitis and pneumonia. Only keep it up and you will succeed in reducing your weight, losing your appetite, bringing on a slow fever, and making everything exactly right for the germs of consumption. Better kill your cough before it kills you.

AYER'S Cherry Pectoral

kills coughs of every kind. A 25 cent bottle is just right for an ordinary cough; for the harder coughs of bronchitis you will need a 50 cent bottle; and for the coughs of consumption the one dollar size is most economical.

"My cough reduced me to a mere skeleton. I tried many remedies, but they all failed. After using the Cherry Pectoral I immediately began to improve, and three bottles restored me to health. I believe I owe my life to it."

SAMUEL MORGAN, Oct. 7, 1895. Brownstown, Va.

Note 2—Fancy points or breed points are not to be considered in judging or lecturing.

PROVINCIAL PROHIBITION.

Toronto, Nov 29.—This statement by the Hon. G. W. Ross, given on the question of provincial prohibition before the Royal Commission on the Liquor Traffic on Oct 29, 1893, is being quoted to show his personal views as a cabinet minister and as a citizen: In reply to Sir Joseph Hickson the Hon. Mr. Ross said that he preferred to make a personal statement rather than to answer a series of questions. Being asked to make such a statement Mr. Ross said he thought it a duty of legislators to restrict as far as possible the sale of liquor, and of citizens to influence all men possible to give up liquor. Personally he was an abstainer, he had supported restrictionist laws, and, as Minister of Education, he had made the study of temperance in the schools compulsory. He had supported all measures of prohibition and had voted for and worked for the Scott Act. The reduction of the number of licenses, the closing on Sunday, the prohibition of sale to minors, all these the minister thought have resulted in good.

As regards prohibition he thought

it effective where enforced. The record of the Scott Act convinced him that its effects had been good, and if this had been the case in separate localities a wider enforcement could not but be beneficial. As regards social conditions he thought the social conditions of many families would be improved and that schools, churches and Sunday-schools would all have a large increase in attendance. The condition of the general community would be greatly improved; there would then be no loss occasioned the state resulting from injuries caused by intemperance. The revenues of municipalities and governments would undoubtedly increase if all the people were temperate. There would be more money for all purposes of government. Ontario does gain a revenue from the liquor traffic but could find other means of raising it. He certainly, however, would prefer a good license law, stringently administered, to a loosely administered, inefficient prohibitory law.

On being questioned, the Hon. Mr. Ross stated that he would not like to see a law prohibiting the importation of liquors for private consumption.

Mr. Onesime Gosselin,

OF ST. JOSEPH de LEVIS,
Cured by

'MORIN'S WINE CRESO-PHATES.'

Cold and Pleurisy Cannot Resist the Powerful Action of this Incomparable Remedy.

MR. ONESIME GOSSELIN, of SAINT JOSEPH DE LEVIS, thus relates his sufferings and his gladness:—

"I was attacked by Cold and Pleurisy which caused me to suffer horribly. I could get no rest. I was daily growing weaker. I made the acquaintance, one day, of a person who advised me specially to try 'MORIN'S WINE CRESO-PHATES.' I sent for a bottle and began at once to use it. The first dose produced a good effect. This gave me so much confidence in this powerful tonic that I continued to courageously take it according to the directions given in the circulars. After using it for several days, I felt myself a new man. My cough had gone. The Cold and Pleurisy had disappeared as if by magic.

My strength, which I had long lost, returned gradually. My appetite was good, and my sleep restorative. The family were happy to see me so well.

My friends visited me every day and each expressed pleasure at seeing me, and so strengthened and joyous after such an illness.

I continued for a few days more to use this incomparable remedy, and, being eventually restored, I resumed my daily work full of courage, energy and strength.

See always that you get 'MORIN'S WINE CRESO-PHATES.' FOR SALE EVERYWHERE.

Coal Supplies of the World.

As each year the coal consumption of the world grows, so do coal resources hitherto unexplored, appear to meet the demand. Last year in Great Britain we "brought to bank" 22,000,000 tons. Fifteen years ago it would have been declared impossible for the world to absorb such a quantity in addition to what was being produced by other countries. Yet not only is our own supply of coal and our exportation of coal increasing, but the exploration of new coal seams is going on all over the world, and the commanding position which Europe once occupied as the colliery of the world is each year diminishing in importance. Great Britain's position as the chief "pit" is still maintained, though the United States is running us hard, but the question for us is not how long our coal resources will last, but how long we are to go as chief coal supplier to the world. The coal resources of Europe have been appraised as follows:—

Tons.
United Kingdom..... 198,000,000,000
Germany..... 112,000,000,000
France..... 18,000,000,000
Austria-Hungary..... 17,000,000,000
Belgium..... 15,000,000,000

This estimate may for the time relieve us of any fear of the immediate

Your Nose

[That is what you should breathe through—not your mouth.

But there may be times when your catarrh is so bad you can't breathe through it.

Breathing through the mouth is always bad for the lungs, and it is especially so when their delicate tissues have been weakened by the scrofulous condition of the blood on which catarrh depends.

Alfred E. Yingse, Hoernerstown, Pa., suffered from catarrh for years. His head felt bad, there was a ringing in his ears, and he could not breathe through one of his nostrils nor clear his head.

After trying several catarrh specifics from which he derived no benefit, he was completely cured, according to his own statement, by

Hood's Sarsaparilla

This great medicine radically and permanently cures catarrh by cleansing the blood and building up the whole system.

HOOD'S PILLS are the favorite cathartic. 25c.

exhaustion of our coal supplies; but it does not reassure us with respect to our positions as colliery owners, and it must be recollected that this by no means represents the coal supplies of the world. It does not include the unknown but enormous resources of the Russian Empire, the largest and most valuable of which will probably be opened up by the Trans-Siberian Railway, nor the deposits of India, China, Japan and Australasia, nor, again, those of America, which can be supplied both to Europe and to the far east.

But there is another side of the question. Other nations are not so dependent upon us for coal as many people seem to think. The following table of the world's annual production reveals not only the possibilities of the future but one or two rather startling actualities of the present. They are the figures of the yearly coal crop of the world:—

Tons.
United Kingdom..... 224,000,000
United States..... 230,250,000
Germany..... 135,800,000
France..... 31,000,000
Belgium..... 22,500,000
Russian Empire..... 12,000,000
Austria-Hungary..... 37,500,000
Japan..... 6,700,000
China..... 2,500,000

—London Daily Graphic.

HELD UP BY A BUCK.

WHAT STATE OF MAINE GAME IS CAPABLE OF.

The latest highway holdup is reported from Dexter, and is a little out of the ordinary, even in this game-infested state. It happened about three miles from the village, and Henry Allen tells the story as follows: "I was passing along, my thoughts upon other matters than my surroundings, when I was startled almost to a point of a panicky feeling by the loud snort of a deer. Very naturally I jumped, and as I looked ahead of me, there, standing on the road, I could see the outline of a large buck deer in the twilight. I immediately threw my axe at him and the weapon failed of hitting the mark. I thought when I threw the axe that would come near ending the incident, but not so. The buck was not so easily frightened. He stood there, his body erect, and would bring down first one forward leg and then another with a stamp which sounded pretty loud on the hard road.

"I advanced toward him, thinking he would turn and run, but when I started forward he made for me, and with something of a rush. Before I could realize what the deer's intention was he struck me with one of his forward legs, striking my hand. When he did this I made up my mind that he intended to kill me and that it was time to yell. I presume in my fright I yelled out pretty loud, anyway I felt like it, and when I did so the big buck gave another snort, as did a half dozen more deer that were apparently lying down in the woods close by the road, and then all of the animals rushed off through the woods as fast as they could go." Mr. Allen shows as proof of his strange encounter with the deer a swollen hand, where the animal's forward foot struck him in its downward move.—Kennebec Journal.

Can a Victim of Tuberculosis be Excluded from the U. S.

New York despatch: "In deciding the case of Thomas Boden, the courts will rule whether or not a man suffering from tuberculosis can be excluded from this country. This is the first case in which the constitutionality of the treasury ruling that consumptives shall be prevented from landing as immigrants will be passed upon by the courts. Thomas P. Boden arrived here from Ireland on Nov. 9 on the 'Lucania.' His wife and child were with him. He has relatives who live in Philadelphia. They were able to guarantee that he would not become a public charge, and he had means of his own.

The authorities at Ellis Island were satisfied on that score, but they declined to admit him because examination by physicians of the Marine Hospital corps showed he had tuberculosis of the lungs. He appealed

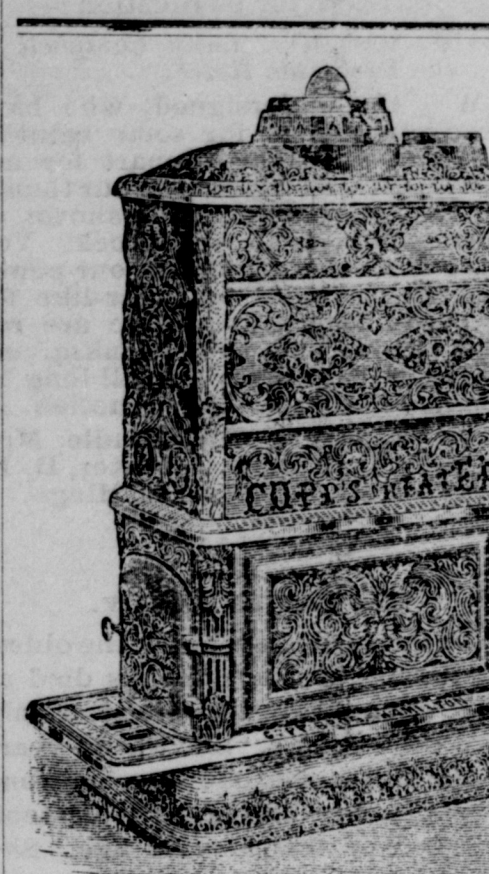

SHOWING OUR BEAUTIES

In NEW FALL FABRICS

To our patrons is a pleasure, when we have such a matchless stock of fine Foreign and Domestic Woollens in finer grades and more variety of styles than we have ever offered before. We will make you a suit to order, perfect in fit and nobly in style, from any fabric your fancy may dictate; or a handsome silk-lined Fall and Winter Overcoat.

W. B. NICHOLSON.

to the Treasury Department, and a re-examination was ordered. The Treasury Department ordered that Mr. Boden be sent back on the next Cunard line steamer, the 'Eturia,' which sails to-day. Francis Tracy Tobin, a lawyer from Philadelphia, has obtained a writ of habeas corpus. The act of Congress under which it is proposed to exclude Mr. Boden is framed to prevent the admission of 'persons suffering from a loathsome or a dangerous disease.'

Mr. Boden claims that the majority of physicians do not regard consumption as contagious.

There's a Story in Morning Tiredness.

A story of poor blood, weakened nerves, of a starved brain. Plenty of food, mind you, but perhaps poorly prepared and too poorly digested to maintain a vigorous body. Ferrozine quickly makes blood, gives strength to the nerves, cures the faded feeling that prevents vigorous thought and action. Use Ferrozine, it makes blood, and good blood feeds the nerves. Strong and vigorous nerves are just another name for good health. If you seek health, and a relief from the tired morning feeling, use Ferrozine. Sold only by Garden Bros.

of fur are frequently seen on the same garment. A scarf of Persian lamb has a cluster of six long streamers of seal, tipped with skunk. The streamers are put on with claws and heads. Heads, claws and tails are much used for trimming. Bruin metamorphosed into several yards of boa will be allowed to hug the necks of fashionable dames. These fluffy boas of bear, with their accompanying huge muffs, are exceedingly picturesque and becoming.

One of the new Persian lamb collarettes has skunk trimming and collar and a cluster of eight tails, with heads. Sable and ermine reign over the fur market, but their price naturally puts them beyond moderate incomes. A word as to the imitation furs—be it said that many of them are not only very good, but wear as well as the real thing. There are various pelts masquerading as sable, marten and bear which are very good imitations. Long boas of sable wolf with claws and brush tails are rich looking and inexpensive. Stone marten and blue or brown racoon, with cluster tails or tab fronts are shown in collarettes.

Italy and Spain have fewer houses in proportion to population than any other country. The Argentine Republic has most.

European newspapers are predicting an industrial awakening in the Holy Land, owing to the recent discovery of valuable minerals.

An international boundary commission is to be established by the United States and Canada, the object being to finally determine the correct boundary of the Mount Baker mining district.

There are 313,000 members of the W. C. T. U. in the United States. The largest local union is that of Portland, Me., with 255 members.

A record pine log, 94 feet long, 19 inches square and perfectly straight, was recently landed at Leith.

FASHIONS IN FUR.

A New York paper says that it would seem as if certain of the animal species were doomed to extinction that the human race might, literally speaking, step into their shoes—that is to say, pelts. In accordance with Dame Fashion's decrees, no matter how mild a winter the weather clerk may prophesy, the smart women will prepare to swathe herself in furs from top to toe. Not content with hats, coats and trimmings of fur, London and Paris advices quote entire gowns of it.

As for coats, they may be either long or short. Seal skin is always in good style. A modern Eton jacket is of broadtail, with large collar and revers of chinchilla. Several kinds
