

HAIR Does your hair split at the end? Can you pull out a handful by running your fingers through it? Does it seem dry and lifeless?

Give your hair a chance. Feed it. The roots are not dead; they are weak because they are starved—that's all.

The best hair food is—
AYER'S HAIR VIGOR

If you don't want your hair to die use Ayer's Hair Vigor once a day. It makes the hair grow, stops falling, and cures dandruff.

It always restores color to gray or faded hair; it never fails.

50¢ a bottle. All druggists.
"One bottle of Ayer's Hair Vigor stopped my hair from falling out, and started it to grow again nicely."
March 28, 1899. Canora, S. Dak.
"Ayer's Hair Vigor completely cured me from dandruff, with which I was greatly afflicted. The growth of my hair since its use has been something wonderful."
April 13, 1899. New York, N.Y.
If you do not obtain all the benefits you expect from the use of the Hair Vigor, write the Doctor about it.
Dr. J. C. Ayer, Lowell, Mass.

NOTICE OF SALE.

INFLUENZA AND PNEUMONIA

(American Medicine.)

Pneumonia more fatal than tuberculosis is the teaching of statistics. In New York, from 1890 to 1900, there were 56,092 deaths from pneumonia, and 50,490 from pulmonary tuberculosis, and in Chicago the relative figures are 25,228 and 22,957. The increased mortality from pneumonia is ascribed to influenza, which although also increasing the fatality of tuberculosis, does so to a much greater degree in the more acute disease, pneumonia. The fact that the first death from influenza in New York was reported in December, 1899, shows how quickly we must be prepared to deal with new and dangerous diseases. The report of the New York state board of health for the month of March shows that influenza has caused about 1,500 deaths, and that 76 per cent of the deaths from acute respiratory diseases were from pneumonia. The fundamental condition underlying the rise and continuance of an acute infectious disease, such as influenza, is probably the tremendously increased amount of travel. Reinfection from new foci constantly occurs in places in which the disease is dying out, and every city or part of the country is bound up with all others by the railroads. The problem of disease in a high state of civilization becomes more than ever one of prevention, and yet how slow is civilization to recognize and act upon the fact. Millions for tribute, but not one cent for defence is the motto of the modern "statesman."

RUSSIA MAY BUY HER COAL.

STEEL AND IRON SUPPLIES IN CANADA.

SYDNEY, June 24.—N. de Struve, Russian Consul-General for Canada, arrived in Sydney on the fast express to-night. Mr. De Struve, accompanied by A. Boff, German Consul-General for Canada, is on a tour of inspection of the industries of Canada, with the view of extending the commercial relations between Canada and Russia. The consul-general speaks English with fluency and accorded the *Chronicle's* representative an interesting interview to-night. He said:

"I am told that there is an unlimited coal supply in Cape Breton. Hitherto Russia has been securing most of the coal for her navy from England. If coal is cheaper in Canada, I will certainly recommend to my government the advisability of purchasing considerable coal for our navy from Canada. Russia is, of course, also greatly interested in the iron and steel industry. We want rails for our Siberian railway, and we want other products of iron. And I will make a report to my government on the steel industry as it exists in Canada to-day."

"I was at Sault Ste. Marie two weeks ago and was very much pleased with the outlook there. Siberia is rapidly increasing in population and will soon be a great country, and I hope to more closely unite the relations between Canada and that country. It is solely an agricultural country and will need all sorts of machinery and I look to Canada to supply a large portion of this machinery."—*Halifax Chronicle*.

Sex In Brain.

It is most difficult for the generalist to assent to the proposition that there is no sex in brain, that John's nerves and brain cells are the same as Jane's, and that the difference in mental attitude is due not to any basic difference as to structure, but to habit, custom and environment. John is left in freedom to enjoy himself, to expand, to grow. He does not have to play his games, run his races, develop his muscles impeded and hampered by petticoats. He is not forever curbed and restrained by constant reminders that what he does is not according to etiquette, that he will spoil his figure, coarsen his hands, destroy his complexion, ruin his clothes. Were these restraints put on the boisterous John, one would see how soon he would wilt, how lassitude, dyspepsia, headache and inability to study would steal upon him. But in his case it would be as in Jane's, attributed to overwork with study and books. It would not be said of him that his brain was overtaxed. The popular notion, based on historic past, is that the masculine brain is capable of sustained effort, but the feminine brain is not; a woman studies at the expense of her vitality, and thus impairs her whole system; she can stand all kinds of follies in dress, she can go to theatres and parties, eat luncheons and dinners composed of courses which are the results of modern invention, and which would tax the digestion of an ostrich. If at the same time she is pursuing any course of study, not any of these things give her trouble.

There are four estates in London, England, where no liquor can enter: Shaftsbury Park, Queen's Park, Noel Park, and Leigham Court estate, containing 300 acres of land and 50,000 inhabitants.

Dyspepsia

From foreign words meaning bad cook, has come rather to signify bad stomach; for the most common cause of the disease is a predisposing want of vigor and tone in that organ.

No disease makes life more miserable. Its sufferers certainly do not live to eat; they sometimes wonder if they should eat to live.

W. A. Nugent, Belleville, Ont., was greatly troubled with it for years; and Peter H. Gaare, Eau Claire, Wis., who was so afflicted with it that he was nervous, sleepless, and actually sick most of the time, obtained no relief from medicines professionally prescribed.

They were completely cured, as others have been, by

Hood's Sarsaparilla according to their own statement voluntarily made. This great medicine strengthens the stomach and the whole digestive system. Be sure to get Hood's.

Helpful Hints For Cyclists.

1. A good bicyclist is careful of his roads; therefore when taking a header, be careful not to hit the road too hard with your forehead. You might make a dent in the pavement.

2. In falling off your wheel do not fall on both sides at once. Failure to observe this rule will result in dividing you against yourself.

3. Always be courteous. If a trolley car has the right of way over the track, do not dispute with it.

4. Keep a lamp lit when riding at night. The boy who thought he was safe because he had a parlor match in his pocket came home with a spoke in his wheel that didn't belong there.

5. Do not be rough with ice carts and furniture trucks. If you must run into one of them, do it as gently and tenderly as if it were a baby carriage.

6. A merciful rider is merciful to his wheel, so do not force a bicycle beyond the point of its endurance unless you want to walk back with your wheel on your shoulders.

7. Keep cool. If in the course of a ride you find yourself in a tight place, with a skittish horse to the left and a steep ravine to the right, and a bulldog directly to the fore, take the ravine. You'll go into it anyhow, and if you take it alone without dragging the dog or the horse after you your chances will be improved.

8. Never use spurs on the pneumatic tires of your wheel. The use of spurs in this manner is likely to leave your bicycle in a winded condition. Spurs are not comfortable either in case of a throw.

9. Do not be stubborn with a balky wheel. If the front wheel gets in a rut going east and the hind wheel in another going west, dismount and argue the matter standing, unless you are tired and want to lie down by the road side without making the effort to do so unassisted.—*Exchange*.

THE BOYS.

When we see the boys on the street and public places we often wonder if they know that business men are watching them. In every bank, store and office there will soon be a place for some boy to fill. Those who have the management of the affairs of the business houses will select a boy in whom they have confidence. When they select one of these boys they will not select him for his ability to talk "sassy," or wear, use slang, smoke cigarettes, or tap a beer keg. These men have little to say, and some may have a few of these habits themselves but they are looking for boys who are as near gentlemen in every sense of the word as they can find, and they are able to give the character of every boy in town. They are not looking for rowdies, and when a boy applies for one of these places and is refused they may not tell him the reason why they do not want him but the boy can depend upon it that he has been rated according to his behavior. Boys cannot afford to adopt the habits and conversation of the loafers and rowdies if they ever want to be called to responsible positions.

Education of Girls.

There is too great a lack in the practical education of our girls. Such a practical phase of a woman's life as the realization and meeting of honest obligations never enters into a girl's studies at school, college, or in the vast majority of cases, even at home. We go on and let our girls study useless ologies and isms, and accumulate a vast amount of undigested and unintelligible information which never, even for a single moment, will be of the slightest use to them in their lives. But of the practical things, yes, the fundamental principles which must govern their lives, they are taught either nothing or little. There is where we are floundering in this country, despite our boasts of progress in matters educational. The things we ought to know we know not, and the things which avail little are often our choicest boasts.—*Edward Bok, in The Ladies Home Journal for June.*

Woman's Mind a Puzzle.

A man can very seldom tell what is passing in a woman's mind. He talks with another man and he can follow his processes—he gets his point of view, he can read between the lines, he can make a shrewd guess as to how he came to see that, or why he refrained from saying the other.

But a woman's mental processes are not those of a man. Her mental machinery is geared differently. You hear what she tells you. You can make inferences from it, they will be wrong, because you do not know how she came to say what she did. You do not have the clew. Try to guess what she will say next and you will find that you are all at sea.

The man who says that he understands woman is himself a woman. No man can understand a woman. He may love her. There may exist between his soul and hers that indefinable and celestial sympathy which is the sweetest thing on earth; but he does not understand her.

Her mental operation, her ways of thought, her point of view, will always be as inscrutable to him as the mental processes of an angel. Whether women understand each other is not quite certain. A greater part of the delight that men find in the companionship of women arises from their inscrutability. You cannot measure or exhaust them.

Their charming inconsequence as they seem to you, will never cease to puzzle you, and every fresh conversation reveals a novelty of attitude or opinion.

The Fata Morgana.

The fata morgana is a singular aerial phenomenon akin to the mirage. It is seen in many parts of the world, but most frequently and in greatest perfection at the strait of Messina, between Sicily and Italy. So many conditions must coincide, however, that even there it is of comparatively rare occurrence. To allow of its production the sun must be at an angle of 45 degrees with the water, both sky and sea must be calm, and the tidal current sufficiently strong to cause the water in the center to rise higher than on the edges of the strait. When these conditions are fully met, the observer on the heights of Calabria, looking toward Messina, will behold a series of rapidly changing pictures, sometimes of most exquisite beauty.

Castles, colonnades, successions of beautiful arches, palaces, cities, with houses and streets and church domes, mountains, forests, grottoes, will appear and vanish, to be succeeded perhaps by fleets of ships, sometimes placidly sailing over the deep, sometimes inverted, while a halo like a rainbow surrounds every image. It is supposed that the images are due to the irregular refractive powers of the different layers of air above the sea, which magnify, repeat and distort the objects on the Sicilian shore beyond, but to the Italians these singular appearances are the castles of the Princess Morgana, and the view of them is supposed to bring good fortune to the beholder.

King Edward has intimated both to the cabinet and to the authorities in all portions of his empire and particularly in Ireland, that he is strongly opposed to any notice being taken of attacks upon him in print. He is entirely indifferent to any hostile comment either about his doings or about his personality, and declares that he is "content to leave himself entirely in the hands of the public," whom he is convinced will deal fairly and justly with him.

Piles

To prove to you that Dr. Chase's Ointment is a certain and absolute cure for hemorrhoids and every form of itching, bleeding and protruding piles, the manufacturers have guaranteed it. See testimonials in the daily press and ask your neighbors what they think of it. You can use it and get your money back if not cured. 50c a box, at all dealers or EDMANSON, BATES & Co., Toronto.

Dr. Chase's Ointment

A manuscript Bible of about the year 1410 was sold in London, at auction for 1200 guineas.

Severely Afflicted

With Kidney Disease.

Stone in the Bladder, Incontinence and Pains in the Back—Another Remarkable Cure Effected by Dr. Chase's Kidney-Liver Pills.

Mr. Wm. Boyne of 19 McGee street, Toronto, says:—"I was afflicted severely with kidney disease, stone in the bladder, incontinence, deposits in the urine, severe pains in the back, and strains over the loins. I was so bad that I had to get up two or three times in the night and could then only make water with great pain."

"Though long a sufferer and unable to work, I was confined to my bed for three weeks, and during that time I thought I could not possibly endure greater misery. It was then that I began to use Dr. Chase's Kidney-Liver Pills. It is with gratitude that I say that they have freed me of all these symptoms, and made me a well man. I would not think of being without Dr. Chase's Kidney-Liver Pills in the house, and can also recommend Dr. Chase's Syrup of Linseed and Turpentine and Dr. Chase's Nerve Food as very superior medicines."

In every town, village and township in Canada just such cures are daily being brought about by Dr. Chase's Kidney-Liver Pills. They are no experiment, but a kidney medicine that has stood the test. One pill a dose, 25c a box, at all dealers, or EDMANSON, BATES & Co., Toronto.

McCormick Mowers Ahead!

The McCormick Harvesting Machine Company awarded the highest honors at the Paris Exposition, capturing all the Medals of importance.

The Strongest Mower.
The Lightest Draft Mower.
The Mower that costs the Farmers the least for Repairs than any Machine on the Market.

See this Machine before you buy, and be convinced that what we state is beyond doubt.
