#### A Complaint.

To the Editor of Carleton Sentinel:

Complaints have reached the undersigned of the lack of accommodations at the Benton station for the travelling public. Passengers complain that the ticket agent leaves the office after the express, going south, passes the station, and passengers coming north have to purchase tickets from the conductor; that the waiting room is not lighted, and that the baggage truck has injured passengers by being left on the platform.

Yours truly,

J. A. LINDSAY.

#### S. S. WORKERS.

Fredericton, Oct. 8.—The eighteenth annual session of the New Brunswick Provincial Sunday School Convention opened in the Methodist church here at 2.30 o'clock this afternoon.

The church was tastefully decorated for the occasion. At the head of the stairway at the main entrance the Union Jack and Stars and Stripes are draped, and over the door is the device, "Welcome," with smaller mottoes on either side. In the auditorium the front of the gallery is festooned with red and white bunting, caught up at the pillars by small flags. The altar is handsomely decorated with plants and flowers, and appropriate mottoes in bright colors are placed at frequent intervals all about the church.

The first half hour was given over to a highly interesting and most helpful Bible reading, conducted by Rev J H MacDonald of Fredericton. This was followed by an address of welcome on behalf of the citizens, eloquently spoken by His Worship Mayor Crockett, and to which Rev Mr Fotheringham made an appropriate reply. After the appointment of several convention committees, the

first address by Rev Dr Clark of Columbus the International representative, was delivered, his theme being, A Voice from the International Association.

The report of the executive committee was then presented by the chairman, R G Harley of St John, and the meeting adjourned after singing and the offering.

The treasurer's report read by E R Machum of St John, showed \$1,850 pledged by the counties of last convention, and the amount received to date was \$1,883.58—\$33.58 over the amount pledged. The total receipts from all sources were \$2,022.19; total expenditure \$1,988.17; balance on hand \$34.02.

The field secretary's annual report told that 289 meetings had been held. The banner for perfect statistics goes to Restigouche.

There are 878 schools, 6,056 officers and teachers, and 40,944 scholars. The average attendance was 30,601. During the year 598 scholars joined the church.

A report of the S S Advocate was read by E R Machum. The journal has on hand \$21.30 with all bills paid. There is due it \$42.

#### F. B. CONFERENCE.

(Continued from page 1.)

Jas Patterson, conference treasurer, reported; On hand from last year, \$638.50; received during the year, \$226.89; total, \$865.39 now on hand.

Rev F C Hartley, from committee on union with general F B conference of United States, reported that while pleased to be in friendship and communion with our brethren in the United States, yet we think that closer union is not desirable nor practicable for us at present.

It was resolved that location of next session of conference be left to the executive of conference.

Mrs D McLeod Vince, treasurer of the Women's Missionary Society, reported receipts of over \$2,200; expenditures over \$500; balance over \$1,400.

H H Ferguson, A A Rideout and F H Knollin were ordained to the ministry.

Revids Dr Hartley, Dr McLeod, C T Phillips, J W Clarke and B H Nobles were chosen as the conference executive.

Resolutions were passed on the death of Queen Victoria, one of loyalty to King Edward and one of welcome to the Duke and Duchess of York.

Resolved, on motion of Rev Dr Hartley, seconded by D McLeod Vince, that as God has blessed us as a people while teaching the doctrines of free grace, free agency, free salvation and free to our communion, therefore we will continue to urge home to the hearts of the people the Scripture truthfulness of their doctrines with unabated earnestness.

Rev Joseph McLeod, from the committee on Maritime Baptist proposal, reported "that the conference thought it inadvisable to co-operate in the schemes proposed."

#### A STRONG MAN.

Sergt. Dacombe of the Marines on board the Ophir, is claimed to be the strongest man in the British army and navy, and the second strongest man in all England. He holds 300 pounds over his head by one hand and has several heavy lifting bells, of different sizes, which he handles with ease. Some of the bells are trick lifts. He met a strong man in Australia and took part in a competition. The sergeant is not a professional lifter, as his duties will not allow him to take up lifting as such. He prefers the service of a professional strong man's life.

At the military boxing tournament in Halifax on Friday evening last, Sergt. Dacombe gave an exhibition of weight lifting. He is described by the press as a magnificent specimen of manhood, stands 6 feet 4 inches, weighs 224 lbs. and has a chest expansion of 48 inches. His feats included lifting two 56lb. weights with his little finger; lifting 56lb. weight at arm's length, and while holding it thusly, raising an 80lb. weight from the floor; passing a 100lb. bell over his head from right to left hand; lifting a 160lb. with one hand, and lifting a 250lb. bar bell from above his head.

From statements made in several Russian papers, it seems that there is no country in the world where human life is so short and mortality so great as in Russia. According to the Petersburg Viedomosti, the average length of life in that country is only 29 years. "The death rate in St Petersburg is higher than anywhere else in Europe, with the exception of Constantinople. While in London, for instance, the percentage is 17 per 1,000, in St Petersburg it is 40 per 1,000. Only Moscow sometimes beats St Petersburg in this respect. Among the reasons that increase the mortality and shorten the length of life in St Petersburg, infectious disease occupies a conspicuous position."

#### Traffic of Inner London.

The movement of traffic in the city of London proper, the centre of the financial activity of the world, is suggestive; says F J Sprague in the Engineering Magazine for October. Although but a square mile in area, with a day population of about three hundred thousand, and a night population of but a tenth of this, in a single day over a million and a quarter people and one hundred thousand vehicles enter and leave its limits. The general street traffic is carried on by about 200 miles of tramways, nearly one hundred and fifty lines of omnibuses, and twelve thousand cabs. Internal communication is also provided by two lines of underground railways, with suburban connections, and three deep level roads operated electrically. Two lines are under construction, six more authorized, and parliamentary rights are sought by existing or new companies for thirteen railways, or extensions thereof.

#### A Plea For Patience.

LONDON, Oct. 9.—Lord Roberts, commander-in-chief of His Majesty's forces, conferred medals at Liverpool upon soldiers who had returned from South Africa. In the course of an address to the troops he referred to the newspaper outcry against the prolongation of the war. He assured his hearers that every effort was being made by the generals in South Africa, the War Office and the government to hasten the end. Lord Kitchener, in whom he had implicit confidence, has not made a single request but what has been complied with immediately. This would be continued. Lord Roberts, in conclusion, declared that the anxiety was without cause, and he appealed to the nation to have patience.

#### The Halifax Review Probably Called Off.

Ottawa, Oct. 7.—Advices from Nova Scotia, received by Dr. Montizom-Bert, Director General of Public Health, show that serious outbreaks of smallpox have occurred in Amherst, Lunenburg, Canning and other parts of the province, with serious chances of its spreading. Under the circumstances it is more than probable that the mobilization of the troops at Halifax on the 17th inst., and subsequent reviews will be entirely abandoned. All orders in connection therewith have been cancelled.

#### BRITISH LOSSES.

According to the official summary issued monthly by the War Office, the losses in the field force in South Africa, from the beginning of the campaign up to and including the month of August, are as follows:—

	N. C. O.'s	Officers and men
Killed in action,	397	4,172

A French insurance company has just put into operation the novel idea of insuring candidates for parliamentary honors against defeat at the polls. The rates vary, of course, with the risk involved in different cases, the popularity of the candidate being a prominent factor in determining the amount of the premium to be paid by him.

SHAUN.

A strange story from the frozen north is brought to Sydney by one of the crew of the Peary relief steamer Eric, the truth or falsity of which must be determined by future events. He says he has reason to believe that gold and other valuable minerals has been discovered by Lieut Peary during his stay up north. The discovery is said to be the cause of the quarrel between Dr Deidrick and Lieut Peary, as the explorer will not let the doctor share in the benefits of the find. He has reason to believe that some interesting developments will be forthcoming when Dr Deidrick returns.
