Cook's Cotton Root Compound
Is successfully used monthly by over
10,000 Ladies. Safe, effective. Ladies ask
your druggist for Cook's Cotton Root Com-
pound. Take no other, as all mixtures, pills and
medications are dangerous. Price, 80c. per
bottle. No. 2, 10 degrees stronger, 80c. per bottle.
No. 2, mailed on receipt of price and two-cent
stamp. The Cook Company, Windsor, Ont.
Nos. 1 and 2 sold and recommended by all
responsible Druggists in Canada.

No. 1 and No. 2 are sold in Woodstock by
Garden Bros., Druggists.

RIVERSIDE HOUSE.

THIS House situated at the foot of Regent
Street, is now open to the public. The
proprietor, Colin Campbell, who ran so
successfully for thirteen years the Newburg
Junction Eating House, also for two years the
McAdam Junction House and six years the
Haycock Junction Restaurant, is well known
favorably known to the travelling public
that further recommendation is not neces-
sary. He guarantees to sustain that reputa-
tion in his new quarters.

The Riverside House will be found as good
a BOUTIQUE as a DAY HOUSE as can be found
in the Province.

No charge for conveying baggage to and
from the House to the Station.

Open for transient or permanent boarders.
COLIN CAMPBELL.
Woodstock, April 17, 1901.

TO CONSUMPTIVES.

The undersigned having been restored to
health by simple means, after suffering for
several years with a severe lung affection,
and that dread disease Consumption, is an-
xious to make known to his fellow sufferers
the means of cure. To those who desire it, he will
heartily send free of charge a copy of the
prescription used, which they will find a sure
cure for Consumption, Asthma, Catarrh,
Bronchitis and all throat and lung troubles.
He hopes all sufferers will try his remedy, as
it is invaluable. Those desiring the prescrip-
tion, which will cost them nothing, and may
prove a blessing, will please address,
REV. EDWARD A. WILSON, Brooklyn, New York.

Digestion Without a Stomach.

The fact that people live and digest food
after the stomach has been removed proves
that the important part of digestion takes
place in the intestines. Hence it comes that
Dr. Chase's Kidney-Liver Pills are so won-
derfully successful in curing chronic in-
digestion and dyspepsia. They act directly
on the kidneys, liver and intestines, making
them healthy, active and vigorous, and so
insure perfect digestion and prompt removal
of poisonous waste matter.

A revolting carbine used in the

dler of Auburn, Me., who is 12 years
old, weighs 300 lbs., and is 5ft. 3in.
tall.

CURED TOTAL PARALYSIS!

It puzzles the Doctors and as-
tonishes his patients how
South American Nervine
cures so many who are
"given up to die"—it never
fails.

"My wife was stricken with nervous prostra-
tion, which developed into total paralysis. We
had hardly any hope of her recovery, but had
heard of the great cures made by South Amer-
ican Nervine in cases of nervous troubles. We
decided to try the treatment, and it was aston-
ishing the results that followed the taking of
three bottles—it worked wonders indeed. I feel
I cannot speak too highly of this great remedy."
—Edward Farr, Surrey Centre, B.C.

Germany has a larger representa-
tion among the United States foreign-
born population than that of any
other country. It is reckoned that
about 4,000,000 people in the United
States are of German birth or parent-
age, not counting those of the second
and third generations.

AWAY WITH CATARRH!

It's Loathsome,
It's Disgusting.

Instant Relief and Permanent
Cure Secured by the use of Dr.
Agnew's Catarrhal Powder.

Here's strong evidence of the quickness and
sureness of that wonderful remedy, Dr. Agnew's
Catarrhal Powder: "For years I was a victim
of Chronic Catarrh—tried many remedies but no
cure was effected until I had procured and used
Dr. Agnew's Catarrhal Powder. First applica-
tion gave me instant relief, and in an incredibly
short while I was absolutely cured."—James
Headley, Dundee, N.Y.

Captain Bernex, of Quebec, is plan-
ning an expedition to the North Pole.
He will take with him large kites
fitted with cameras. These will en-
able him, even if he fails to get to

many points which he cannot reach.

TEST THE PINE- APPLE CURE

In the Storehouse of Providence there's an
Antidote for every bodily ailment. Science
has found Nature's Stomach Pan-
acea in that most delicious of fruits—the
Pineapple.

And medical science has given to mankind that
pure and pleasant formula, Dr. Von San's Pine-
apple Tablets, to be an everlasting and never-
failing healer to suffering humanity—a treatment
quick and effective, and so inexpensive that the
poorest sufferer in the land may use it almost
as "free as water." One dose gives relief to
stomach distresses in any form.

Sixty Tablets, 35 cents.

From the latest published statistics
we learn that the total population of
London amounts to 4,536,963.

"SCARRED FOR LIFE"

Skin diseases in many cases
may need the "inward" ap-
plication to remove the taint
from the blood.

But many a once handsome countenance
is "scarred for life" for lack of using such
a healing "rent" as Dr. Agnew's Ointment.
Only need a few applications of this magic
healer to any skin disease to clear away all
signs of outward disorder and leave the
affected part as smooth and soft as an in-
fant's cheek.

There were 3,516 immigrants refused
admission to the United States
last year.

ANNUAL MEETING OF THE FARMERS' AND DAIRY- MEN'S ASSOCIATION.

(From SENTINEL'S Special Reporter.)

The Farmers' & Dairymen's Asso-
ciation of New Brunswick met in an-
nual convention at Fredericton on the
25th ult. President B. R. Vi-
lotte, of St. Leonards, presided, and
there were about 150 delegates pre-
sent. Seated upon the platform were
His Honor Lt. Governor McClellan
and Hon. L. P. Farris, Commissioner
for Agriculture.

President Vilette in opening the
meeting welcomed the delegates and
expressed the hope that the meeting
would prove very useful to our agri-
cultural interests. He thought that
provision should be made by the
Government to prevent subsidizing
cheese and butter factories that were
cutting into the territory of a pre-
viously established factory.

His Honor the Lieut. Governor was
then introduced. He urged the de-
velopment of the butter industry to
a par with the cheese business, and
thought more attention should be
given to fruit growing. He believed
the conditions of New Brunswick in
most parts of the Province to be
highly favorable for apple growing,
and urged the establishment of a
fruit growers association as a step
toward creating greater interest and
spreading more knowledge. He also
dwelt at some length upon the im-
portance of more and better educa-
tion along the line of nature study
and warmly commended Sir Wm Mc-
Donald's plans as outlined by Prof.
Robertson.

Hon. L. P. Farris, Commissioner
for Agriculture, followed. He was
glad to note the constantly growing
interest in their business among the
farmers of New Brunswick. During
the past year his department had
made strong efforts to keep abreast
with the times, and aided by the Do-
minion Agricultural Dept. they had
held some 137 meetings, attended by
over 100,000 people, at which improv-
ed methods of agriculture were dis-
cussed.

An effort had been made to com-
pile the agricultural statistics of the
Province and he submitted the fig-
ures obtained:

Acres	Bushels	Bus. per Acre.
26,010	478,886	18.4
	OATS.	
184,114	4,944,992	26.8
	BARLEY.	
4,336	99,540	22.6
	BUCKWHEAT.	
70,114	1,479,477	21.1
	POTATOES.	
37,527	4,077,478	108.6
	TURNIPS.	
7,633	2,099,940	275.1
	CHEESE.	
1,932,432 lbs.	Increase, 50,000 lbs.	
	BUTTER.	
562,606 lbs.	Increase, 100,000 lbs.	

AGRICULTURAL CREDIT.

The first question taken up was
that of credit for the farmers. W W
Hubbard was the first speaker. While
much had been done and was being
done to educate the farmer, while
strong efforts were being made to
help him market his products, there
yet remained a matter where the
small back country farmer was at a
tremendous disadvantage, viz., in
securing credit to improve his farm
and buildings, or for his business
operations. If he wanted a mort-
gage of say \$500, it would cost him
\$50 to get it, and it was almost im-
possible for him to use our com-
mercial banks for ordinary business
operations, as he was unknown. As
a consequence, he was at the mercy
of men whom he owed and often times
was ground down till, in despair, he
abandoned his farm and left the
country.

Prof. Davidson, of the University
of New Brunswick, gave a most in-
teresting address upon our banking
system and compared it with that of
other countries. He stated that,
while it was not altogether adapted
to agricultural needs, it was, never-
theless, more so than the banking
systems of any other country. He
outlined what was being done in
Europe, in New Zealand and else-
where, and advised hesitation before
adopting any of them in Canada.

Geo. E. Baxter, Andover, N. B.,
followed, suggesting that if the far-
mers would form themselves into a
corporation, subscribing their farms
as capital stock, that they would be
in a position to sell bonds and secure
money as well as railroads, cities, etc.

The following committees were
then appointed:

NOMINATING COMMITTEE—J. S.
McGillern, St. John Co.; H. H. Mc-
Intyre, Kings Co.; Thos. Hethering-
ton, Queens Co.; Henry Wilmet,
Simbury Co.; J. G. Douglas, York
Co.; John Ronald, Carleton Co.; C.
E. Pickett, Victoria Co.; Donald
Daigle, Madawaska Co.; Alex. Dick-
son, Northumberland Co.; Felix
Michaud, Kent Co.; T. T. LeBlanc,
Westmorland Co.; G. M. Killam,
Albert Co.; Geo. Mowatt, Charlotte
Co.

FINANCE COMMITTEE—Frank Tur-
ner, H. H. Smith, Charles Smith.

EVENING SESSION.

The session opened with an ad-

dress by Mayor Crockett, of Freder-
icton, who extended a cordial wel-
come to the members of the Associ-
ation. Agriculture, said Mayor
Crockett, was the basis of the coun-
try's wealth and the general well-
fare of the community was very
largely dependent upon the pros-
perity of the farmers. He was glad
to note the growing interest in agri-
cultural education, and paid a warm
tribute to the generosity of men like
Sir Wm. C. Macdonald, who by their
munificence were making it possible
to introduce a course of nature study
in the rural schools of the country.

He wished the Association every
success in their efforts to further the
interests of its members and the
farmers throughout the Province.

A. G. Dixon, of Chatham, replied
to the address of welcome, thanking
the Mayor for the hearty reception
which had been accorded the mem-
bers of the Association.

APPLE CULTURE.

Alex. McNeal, Walkerville, Ont.,
was then introduced and gave a
most interesting address on "Apple
Culture." He began his remarks by
stating his conviction that as far as
he had been able to observe the con-
ditions here, that apples could be
grown successfully in very many
sections of New Brunswick, and ad-
vised the farmers to turn their at-
tention to this important branch of
agriculture. In his opinion, five
acres of apples of the right varieties
and well taken care of, will yield a
larger cash return than five acres of
orange grove in either Florida or
California. Every one hundred acre
farm in New Brunswick ought to
have at least five acres devoted to
orchard, choosing, if possible, a
northern or eastern exposure.

In selecting trees for planting care
should be taken to secure them from
a reputable nursery firm. He would
advise buying vigorous stock or
either Duchess of Oldenburg or Tal-
man Sweet and to grafting this stock
with the varieties best suited for the
market, and the different localities
in which the orchard is situated. If
ever asked to recommend a list of
varieties, he would name Baldwin,
Ben Davis, Greening, Fameuse
(Snow) McIntosh Red and Spy. He
denied the Ben Davis most warmly,
stating that while not first-class in
quality, it was a grand shipping sort,
owing to its keeping qualities and
handsome appearance.

Pruning. This should be com-
menced when the tree was small, and
should be done with a view to keep-
ing the head of the tree compact and
comparatively open, so that the sun
could reach all parts of the tree. He
advised low heading of the tree, to
facilitate picking the apples. Prun-
ing can be done any time when the
tree is dormant.

Cultivation. Thorough culture of
the orchard was all important. Thorough
working of the soil should com-
mence as soon as the land is fit to
work in the Spring and kept up
till about the first of August, at
which time it is best to cease culti-
vation, and sow the land to clover,
either Mammoth late Red or Crim-
son. Cultivation is stopped at this
time to prevent late growth of wood,
as such a growth of unripened wood
might be apt to become frozen in the
Winter, and, consequently, injure
the tree.

Packing and Marketing. At pre-
sent the barrel is the almost univer-
sal package, but, in the speaker's
opinion, the time is soon coming
when the finer grades of apples will
be shipped in boxes. This is being
done to some extent at present, with
most gratifying results. Carefulness
in grading and proper pressing, to
avoid bruising in the package, was
necessary.

W. Saxby Blair, Horticulturist, at
the Nappan Experimental Farm,
next gave an instructive talk on
"Spraying for Insects and Fungus
Growths." Spraying is no experi-
ment, but has been found to be abso-
lutely necessary in securing first-
class fruit. Insects pests were
divided into two general classes, i. e.,
—those which injure the fruit by bit-
ing, and those which suck the juice
of the fruit. To destroy the first or
biting insects poison must be applied,
for this purpose Paris Green has
proved most efficient. To combat
the sucking insect it is necessary to
use some caustic preparation which
shall kill by coming into contact with
the bodies of the insects. For this
purpose the so called "Bordeaux
Mixture" is used. This is composed
of four pounds of copper Sulphate
(blue stone) four pounds of lime and
forty gallons of water. The speaker
gave a practical demonstration of
how to prepare the mixture, showing
that to get a perfect compound the
ingredients should be mixed in solu-
tion. Dissolve the copper sulphate
and put it into the barrel then add
the lime slaked in water and fill up
with the forty gallons of water. A
first-class pump, which will give a
steady pressure of 100 lbs to the
square inch, should be used, as on
the steadiness of the pressure de-
pends the efficiency of the spray. Do not
drench the trees, but cover all parts
of the leaves with a thin and even
coating.

Liver Pills

That's what you need; some-
thing to cure your bilious-
ness and give you a good
digestion. Ayer's Pills are
liver pills. They cure con-
stipation and biliousness.
Gently laxative. 25c.
All druggists.

Want your mustache or beard a beautiful
brown or rich black? Then use
BUCKINGHAM'S DYE for the
Whiskers.
50 cts. per package. Sold by all druggists, N. B.

The codlin moth, which causes
wormy apples, and the apple scab or
black spot are the two greatest pests
to contend with. For the latter four
sprays should be given, the first
just before the blossoms open in the
Spring, another immediately after
the blossoms fall, a third about ten
days later. If heavy rains should
occur after the spraying, it would be
necessary to repeat the operation.
The addition of Paris Green (4 oz to
40 gals of water) to the Bordeaux
Mixture will effectually destroy the
codlin moth, so that it and the
apple scab may be exterminated at
the same time by mixing the Paris
Green with the Bordeaux Mixture.

For external sucking insects, such
as the common oyster shell bark
louse, a spray either of kerosene
emulsion, lime mixture or potash
solutions will be most effectively ap-
plied just as the young trees are
hatching out, usually about the first
week in June.

W. O. McKinnon, Chief of the
Fruit Division, Dept. of Agriculture,
Ottawa, on being called up, gave a
short address dealing with the Fruit
Marks Act. This is an Act to pre-
vent the fraudulent packing of apples
which it was the intention of the
Government to rigidly enforce next
year. The present season has been
largely occupied by the inspectors
in familiarizing the farmers with the
requirements of the Act.

Ralph S. Eaton, Kentville, N. S.,
gave an interesting talk on orchard-
ing, and the great profits to be de-
rived from it. He enumerated a
number of profitable apple orchards
in the Annapolis valley and strongly
urged the farmers of New Brun-
swick to go into orcharding, assuring
them that by so doing they would
very largely increase the income of
their farms.

A resolution regarding the estab-
lishment of an Agricultural College
was moved by Chas. L. Smith, of
Woodstock, and seconded by Thos.
A. Peters, Deputy Commissioner Agri-
culture, and deferred for further
discussion.

WEDNESDAY MORNING SESSION.

The first matter taken up was the
reports of the different vice-presi-
dents. All counties reported a more
than usually good year for agricul-
tural operations, though on the
North Shore counties a very severe
drouth prevailed and interfered with
all fodder and grain crops.

It was reported that the Resti-
gouche Agricultural societies had
met at Dalhousie and passed resolu-
tions asking the Provincial Govern-
ment to import some stallions and
lease them to the various counties as
the demands arose.

F. E. Came, in reporting for Char-
lotte county, urged strongly a more
systematic management of our ex-
hibitions and moved for the ap-
pointment of a committee to formu-
late a plan and submit it to the Gov-
ernment. The following were named
as such a committee: F. E. Came, St
Andrews; W. S. Tompkins, Grand
View; Thomas J. Dillon, St. John;
Charles L. Smith, Woodstock; Dr. J.
H. Frink, St. John.

ROTATION OF CROPS.

Prof. J. H. Grisdale, of Ottawa, ap-
proved a five years' rotation as fol-
lows:—

1. Grain seeded to clover.
2. Roots.
3. Grain with clover seeded.
4. Clover hay.
5. Hay or pasture.

He believed in shallow cultivation
and keeping always the humus in the
soil near the surface as possible.
Cultivation was all important to
make plant food available and fur-
nish a comfortable growing place for
the plant, while a rotation of crops
requiring different constituents of
the soil and with different habits was
very essential to a continued pro-
duction of large crops.

THE GROWING OF CORN AND ROOTS.

Simpson Rennie, of Milliken, Ont.,
spoke at some length giving in de-
tail his experience in growing hood
(Continued on third page.)
