Your Chance To Save Money!

The Carleton Sentinel.....\$1.00
The Maritime Homestead..... 50
and a very fine picture of King Edward VII..... 50

All for \$1.25.

The Maritime Homestead is the new semi-monthly Farm and Home paper, published at Halifax and St. John. It has among its contributors over 50 of the leading farmers of the three Provinces. Prof. F. C. Sears, the Director of the Nova Scotia School of Horticulture, is Editor of the Maritime Homestead. The Managing Editor is W. W. Hubbard, Secretary of the Maritime Stock Breeders' Association, a prominent Farmer's Institute worker, and a practical farmer with 18 years experience on a New Brunswick farm. It will be complete in all its departments, and illustrated with cuts descriptive of farm work, live stock, the farmers themselves and all matters of interest.

The King's portrait is the best ever presented in Canada, and will be sent until the large supply is exhausted—early subscribers will be sure to get it.

Address all orders to
The Carleton Sentinel,
Woodstock, N. B.

Human Express Packages.

"That was a good story about John Beck and his trip across the Atlantic in a box, like an express package," remarked an officer of one of the big express companies the other day. "It reminds me of a stranger employed a few years ago by train robbers in the west, and of an experience I had when I was a messenger on the road. It was a favorite trick of robbers in the sparsely settled portions of the west to take their express companies in, not aid to their own robbery by locking up one of a gang in a box and then shipping him on a train known to have rich packages aboard. At some isolated spot the robber would step out of his box, hold up the messenger and make off with his

plunder. This scheme was employed so often that messengers became suspicious of any large box put into their cars.

"Just before the adventure that befell me, of which I'll tell you, a fellow put up at a hotel in St. Paul, and one afternoon told the clerk to call an expressman and give him a box which would be left in the guest's room, and which was to be shipped on a certain train that night. The visitor was not seen about the hotel after that. The scamp was in the box, from which he emerged about midnight and robbed the express messenger's safe of thousands of dollars.

"About that time I was running as messenger on the Burlington, and those box robberies made me as nervous as a cricket. I used to quiver every time I got a package big enough to hold half a man, and I made sure on each trip that my guns were ready for action. Nothing unusual happened for a month or so after that St. Paul incident, but one night, when we stopped at a little lonely station, the agent put aboard a long, coffin-like box, and laughingly remarked, 'Look out for it, Bill, there's a man in it.' He was only joking, but I didn't see the joke. I was scared through and through, and you can bet that I piled as many packages as there were in the car right on top of the latest addition to my freight. But I was not satisfied even then, and as the train sped on I became more nervous and suspicious. Finally I couldn't stand it any longer, and I prepared for action. First I got out a revolver and my watch, and then, mustering what little of my courage was left, I blurted out:

"If there's a man in that box I'll give him just a minute to come out. If he doesn't step out I'll fill him full of lead!"

"Half a minute passed before there was any response, but before the minute was up the end of the box was opened, and a husky built fellow crawled out and threw up his hands. I stopped the train and the crew secured my visitor. He served a good long term for attempted train robbery."

Dr. Pierce's Golden Medical Discovery.

THE GREAT BLOOD PURIFIER.

Let us start with that axiomatic truism "the blood is the life," and ask how is it the life? We know that blood is life, because we know that loss of blood means physical depletion. "Weak from loss of blood" is the common phrase used to describe the condition of one who has bled as a result of wounds. We know, too, that any large loss of blood means death. People bleed to death of wounds if the injuries do not receive timely attention. It seems to follow as a natural conclusion that if loss of blood means weakness, gain of blood means strength. And this is indeed the case assuming the blood gained to be pure and rich. If then blood can be made, the blood supply may be increased in quantity and quality which would mean an increase of physical vitality and strength.

Then comes the question, How is blood made? And the answer to that question is that it is made from the food we eat. It is the function of the stomach and the organs of digestion and nutrition to extract from the food, the pabulum, the nutritive elements of food which sustain the physical strength. Now when there is disease of the stomach and digestive and nutritive tracts, the nutrition contained in food is imperfectly extracted. There is an increase in residuum or waste and a decrease of aliment or nutritive substance, the loss of which goes to swell the bulk of the residuum or waste. There is then a steady loss of nutrition by the body which means weakness. But this is not all. Some of this waste is carried into the blood and clogs and corrupts it, making it a prepared breeding ground for disease.

Dr. Pierce's Golden Medical Discovery cures the diseases of the stomach and allied organs of digestion and nutrition and thus enriches the blood with the nutrition which had before been lost through disease. Beyond this when the digestion and assimilation are made perfect, there is no more corrupting waste matter carried into the blood to poison it and breed disease, so that the use of "Golden Medical Discovery" increases the blood supply and enriches it, keeping it pure from poisonous substances. But more than this the "Discovery" acts directly on the blood, purifying it of its poisons, as is proven by cures of scrofulous diseases, eczema, tetter, boils, pimples, rheumatism and other diseases which are caused by impure blood.

Let it be remembered that there is no such thing as "blood making" medicine. Blood is not made from medicine but from food properly digested and assimilated. And the reason why Dr. Pierce's Golden Medical Discovery increases the blood supply and eliminates its impurities is because it enables the perfect digestion and assimilation of food thus increasing the blood making material and cutting off the entrance of waste substance into the blood; and going farther yet it carries off the waste accumulations which are already in the blood and are a common source of disease.

WOMAN IN THE CHURCH.

A Chicago despatch: Announcement has been made that the new constitution of the Methodist Episcopal church which was adopted at the last general conference in May, 1900, and referred to the various conferences throughout the country has

finally been approved by the three-quarters vote required. Ayes were 8,196; nays, 2,513.

The element which opposed the new organic law of the church because it provided for the admission of women as delegates to the general conference, made war on the new constitution along the line, but met with defeat. One hundred and twenty-one conferences voted on the question, a total of 10,709 ballots being cast.

The principal changes provided for the new constitution are:

It gives women the right to sit as delegates in the general conference. It gives laymen's electoral meetings authority to vote on constitutional questions. It changes the vote necessary in the general conference to amend the constitution from three-fourths to two-thirds.

Poor Girl, Pity Her.

Growing! Yes, into weakness, but not strength. Studies—plenty of them. Tired, of course she is, and weak too. Does not eat enough, and digests far less than enough. This condition is so frequent, but how seldom noticed even by fond parents. Give her Ferrozone, then watch her appetite improve, her cheeks and lips grow ruddy, her step elastic, her spirits buoyant. All this simply the result of eating and digesting enough, making blood, and thereby strengthening the nerve and brain power. Ferrozone gives a woman's strength to weak girls. your daughter or wife needs Ferrozone. Get it to-day from Garden Bros.

THE BLOCKHOUSE SYSTEM.

Though Lord Kitchener's reports from the seat of war this week are not so satisfactory as usual it is gratifying to observe that the consensus of opinion is that the blockhouse system adopted by him in South Africa is very effective.

At Zeefontein last week Colonel Firmans' camp, consisting of three companies of Yeomanry and two guns, was surprised and successfully rushed by about 1300 Boers under command of General De Wet. In the absence of Colonel Firmans the camp was under command of Major Williams, who was killed. These Yeomanry were encamped on the slope of a solitary kopje, the southern side of which was precipitous—a naturally strong position, and it had been entrenched. The Boers climbed the precipice, mustered near the top, attacked the picket on the summit suddenly, and before the Yeomanry could get clear of their tents swooped through them, shooting the men down as they came out. Six officers and fifty men were killed, eight officers were wounded, and about 150 men were wounded and taken prisoners. The Imperial Light Horse were fourteen miles distant, and on hearing of the fight hurried to the scene. After breathing their horses they galloped after the Boers, who, however, succeeded in reaching the broken country, where the Light Horse were useless against superior numbers. The Boers are said to have behaved well on this occasion, leaving men to look after their wounded, and they have since liberated those whom they took prisoners.

This mishap, however, does not tell against the effectiveness of the blockhouse system, which, we fear, is little understood. That system proved a failure when tried by the Spaniards in Cuba, and the area there was far less than that in South Africa, but it has taken Lord Kitchener a considerable time to lay down his lines. First he paralleled the railways on either side and then the Orange River. Finding these lines successful he steadily extended the system until now, besides a number of lines in Cape Colony, the eastern half of the Free State is cut into three sections by the Bloemfontein, Thaba, N'Chu and Kronstadt-Bethlehem lines. The Transvaal lines completely encircle Johannesburg at a distance of about fifty to a hundred miles. These blockhouses have, generally, been placed at intervals of a little less than a mile, but the London Times' correspondent urges that they should be placed at intervals of one-third of a mile, with wire entanglements between. Blockhouses at such short intervals, however, would be extremely expensive over such long lines. Even the present system is maintained at great expense, and enforces idleness on tens of thousands of troops. Lord Kitchener finds it useful, otherwise he would not persist in the system. It may not prevent a commando from crossing the lines between two blockhouses at night, and though a sentry might see them and give the alarm, the Boers might be a mile away before the men from the blockhouses could reach the spot, where they might find the Boer commando ten times their strength; still, the blockhouses must be effective in at least preventing spies getting in and out of the districts, and in keeping stragglers from going freely about the country. Of course, if the blockhouses were trebled in number the system would be more effective, but then it might as well be said that a continuous unbroken line of blockhouses, like the wall in China, would

Torpid Liver

Is sometimes responsible for difficult digestion, that is, DYSPEPSIA.

When it is, What headache, dizziness, constipation, What fits of despondency, What fears of imaginary evils, conduce with the distress after eating, the sourness of the stomach, the bad taste in the mouth, and so forth, to make the life of the sufferer scarcely worth living!

Dyspepsia resulted from torpid liver in the case of Mrs. Jones, 2320 N. 12th St., Philadelphia, Pa., who was a great sufferer.

Her statement made in her 77th year is that she was completely cured of it and all its attendant aches and pains, as others have been, by a faithful use of

Hood's Sarsaparilla

That acts on all the digestive organs, cures dyspepsia, and gives permanent vigor and tone to the whole system.

be more effective still. Lord Kitchener can only use the limited means at his command, and there is no question that with these he is doing most effective work.—S. American Journal.

CHASE'S 25c.

is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Flower All Dealers or Dr. A. W. Chase, 100 N. 1st St., Toronto and Buff. N. Y.

The Greatest Event of Its Kind.

"Within little more than ten years from the day on which during his visit to the East, Nicholas II., then Czaravitch, turned the first sod of the Eastern section of the great Siberian Railway at Vladivostok, the gigantic undertaking has been completed and through communication has been established between the capital of the Russian Empire and its remote dependencies on the Pacific." With these words the London Times begins its impressive comment upon what it terms "one of the greatest railway undertakings in the world." The great English daily adds: "It is a tremendous factor in the political, military, and economic expansion of one of the greatest Empires that the world has ever seen. No ruler has ever held sway over such a continuous expanse of territory as the Russian Empire, and never have the shores of such distant seas as the Baltic and the Pacific been connected by an iron band under the hand of the same master."

A Grand Clubbing Offer.

A \$3 DAILY PAPER, THE SENTINEL AND A PORTRAIT OF THE KING FOR \$1.75.

THE SENTINEL has succeeded in making arrangements whereby it can furnish The Montreal Daily Herald, one of Canada's best known and brightest daily papers, a portrait of His Majesty King Edward VII., and the CARLETON SENTINEL, all, one year, for \$1.75. Payment must be strictly in advance.

In these days people see trouble too far ahead. The people of Maine are most agitated over the prospect of a short ice crop. A famine in coal ought to more trouble some at the present time.

HER FATHER WAS A DRUNKARD

A Plucky Young Lady Takes on Herself to Cure Her Father of the Liquor Habit.

STORY OF HER SUCCESS.

A portion of her letter reads as follows: "My father had often promised mother to stop drinking, and would do so for a time, but then returned to it stronger than ever. One day, after a terrible spree, he said to us: 'It's no use. I can't stop drinking.' Our hearts seemed to turn to stone, and we decided to try the Tasteless Samaria Prescription, which we had read about in the papers. We gave him the remedy, entirely without his knowledge, in his tea, coffee, or food regularly, according to directions, and he never knew he was taking it. One package removed all his desire for liquor, and he says it is now distasteful to him. His health and appetite are also wonderfully improved, and no one would know him for the same man. It is now fifteen months since we gave it to him and we feel sure that the change is for good. Please send me one of your little books, as I want to give it to a friend."

FREE SAMPLE particulars, testimonials, and price sent in plain sealed envelope. Correspondence sacredly confidential. Address THE SAMARIA REMEDY CO., 23 Jordan street, Toronto, Canada.

For Sale by all Druggists.

SHOWING OUR BEAUTIES

In the NEW FALL FABRICS

To our patrons is a pleasure, when we have such a matchless stock of fine Foreign and Domestic Woollens in finer grades and more variety of styles than we have ever offered before. We will make you a suit to order, perfect in fit and nobby in style, from any fabric your fancy may dictate; or a handsome silk-lined Fall and Winter Overcoat.
