The Girl Who  
Handles the  
Correspondence

Is often the most valued employee—Alertness, a comprehensive knowledge of shorthand and typewriting and a competent grasp of the business in which the business is conducted are the prime requisites of advancement in commercial life. The Managing Editor of the Carleton Sentinel, Isaac Pittman, is a prominent business man with 18 years experience on a New Brunswick farm. It will be complete in all its departments, and illustrated with cuts descriptive of farm work, live stock, the farmers themselves and all matters of interest.

Address all orders to

### General News Items.

A Massachusetts justice has fined a man \$50 for opening his wife's letters.

The largest schooner ever built in Canada was launched at Halifax Saturday.

The average pace at which a thunderstorm travels is 23 miles an hour.

A stream 5 feet wide and 1 foot deep, and running at 20 feet a minute, will provide water for 90,000 men.

For a quarter of a century no new houses have been built in the Sussex, England, village, of Slindon.

A nugget weighing over nineteen pounds, the biggest recorded in the Yukon, was found in Bonanza Creek. Its estimated value is \$3,000.

Under a special dispensation from Pope Leo, Catholics in the British Empire need not fast on June 25 and 26, during the coronation festivities.

A Chicago woman has declined a proffered nomination of school trustee on the ground that her 2 year old baby requires all her time.

The largest cash transaction in New York, real estate has just been concluded by the purchase of the Plaza hotel property, at the Fifth avenue entrance to Central Park. The land cost \$3,000,000 and a \$7,000,000 hotel will be erected there.

Japan exported last year \$10,244,715 worth of coal and \$6,499,525 of copper. The copper of Japan is by far the most valuable for electrical purposes of any in the world, it having the greatest electrical conductivity of any specimens of the metal procurable.

Unique properties are possessed by the river Tinto, in Spain. It petrifies the sand of its bed, and if a stone falls in the stream and alights upon another, in a few months they unite and become one stone. Fish cannot live in its waters.

Stunted dogs are very much admired by Parisian ladies. The demand for them is met by at least forty professional "dog dwarfs," who bring up the pups on an alcoholic diet, which has the effect of stunting them.

Minard's Liniment for Rheumatism. During May there were opened in Canada 36 new post-offices.

For pimples, blotches, bad complexion, Hood's Sarsaparilla is the medicine to take—it has established this fact.

Now automobiles are accused of causing earache, a complaint said to be common in New York among devotees of the sport.

Sovereign Fruit Syrups are the pure Fruit Juice preserved with granulated sugar. They make delicious drinks.

About 83,000 immigrants came into the United States during May.

TO CURE A COLD IN ONE DAY  
Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c. —1744.

A Canadian society has been formed in Paris to make Canada better known throughout France and to secure French settlers for the Dominion.

A Family Necessity.  
"Owing to artificial modern life, almost everybody suffers more or less from constipation, torpid liver and sluggish kidneys, and as Dr. Chase's Kidney-Liver Pills are the most prompt and thorough cure for this derangement, they have come to be considered a family necessity. Hosts of families would not think of being without them. One pill a dose, 25 cents a box."

It is reported that many fields of early planted potatoes in Caribou, Me., will have to be replanted on account of the cold weather and backwardness of the spring.

Minard's Liniment is the best.

The bells of St. Paul's will be rung on Coronation day by James Hawthorn, who rang them for Edward's accession, as he did for the accession of the late Queen, the birth of all her children and her two jubilees. He was in his 17th year when William IV died and Victoria succeeded him; he is now 81, but good for an occasion or two yet.

The Evils of Constipation.  
This dangerous condition causes sick headache, abdominal pains, piles, and in severe cases insanity and apoplexy. The most agreeable and satisfactory remedy is Ferrozone, which makes the bowels so well ordered that natural and unassisted action is established. It is mild and certain in action and never causes distress or inconvenience, and may be taken as long as required. Pains in the stomach and intestines, piles, biliousness and headache disappear at once when Ferrozone is used. Recommended and sold by Druggists, price 50c. By mail from N. C. Polson & Co., Kingston, Ont. Sold by Garden Bros.

NO PILLS LIKE DR. HAMILTON'S  
The wheat farmers of Kansas who were so successful last year in their skirmish with the "middlemen" mean to wage war in earnest this year. It is said that grain elevators and warehouses are being erected throughout the wheat belt so that wheat can be stored and held as long as the owners wish. If the farmers have their way Wall street will not dictate to them as to the price of grain.

### Change of Life.

A Time of Interest and Great Importance to all Women.

Wrecked health is produced by neglect during this trying period, and small wonder that women look forward with dread to its coming, for, if not properly passed, it is but the beginning of an endless chain of troubles.

As soon as the unmistakable signs known to all women make their first appearance, Ferrozone should be used regularly, and, if persistently taken, will be a guarantee of happy, healthy, old age.

Nothing can bring more pleasure than to know that the days of sickness and suffering are over. This can best be accomplished by building up the system with Ferrozone, which produces blood, muscle, tissue and strength to resist and ward off disease.

Ferrozone increases the appetite, strengthens and improves nerve tone, and digestive processes, thereby strengthening and invigorating the whole system. It gives tone to the heart, regulates its action, removes distressing palpitations, and it lays the sound foundation of perfect health.

Ferrozone is a sensible and efficient tonic; it brings back strength very quickly, and few people are so strong and healthy that they would not be benefited by using it.

Be advised and try Ferrozone. It is very pleasant to take—one tablet after each meal. All reliable druggists sell it for 50c per box, or three boxes for \$1.25. By mail from N. C. Polson & Co., Kingston, Ont.

### Volcanoes and their Cause.

There does not seem much doubt that the ultimate cause of a volcano is the cooling of the earth. Year by year, as our tiny globe loses some part of the heat that it brought with it from its parent the sun, it shrinks in an infinitesimal degree, and this increases the pressure upon the masses of rocks, metals and other elements stored in the interior of the earth. The older notion that these were all in a state of fusion is now abandoned in view of the extreme rapidity with which vibrations, such as those caused by earthquakes, travel through the earth, which argues, it is said, a far greater rigidity for the earth's centre than is to be found in a bar of steel. But there are to be found places immediately below the earth's crust where—thanks no doubt to the wrappings or folds caused by the earth's contraction—the enormous pressure exercised upon the central mass is comparatively relaxed, and in these pockets there are certainly huge molten masses of silicon, aluminium, magnesium, calcium, iron, sodium and potassium. The enormous heat which keeps these refractory substances in a liquid state beggars description, and can only be equalled on the surface by that of the electric arc. In ordinary times, the retaining skin of earth is quite equal to the task demanded of it. But when water trickles through into the fiery lake from the melting of surface ice and snow, as in the case of Hecla and the gigantic volcanoes of the Antarctic Continent, or by some hidden inlet from the sea, as with Vesuvius and Stromboli, or from the bursting of some subterranean reservoir as with the inland volcanoes of China, then the rebellious forces within receive the addition of cubic miles of superheated steam, and develop an energy which enables them to break down every obstacle. Seeking for the point at least resistance, they at length find the spot where some such cause as the denuding action of glaciers has reduced the earth's crust to its thinness, and then they burst through by cataclysms which in a bygone period of the earth's history must have frequently changed the face of continents. If the ultimate cause of the formation of volcanic activity be the pressure caused by the earth cooling, the proximate is certainly the infiltration of water from its surface.—F. Legge.

Paper from Wood Pulp.  
Few people have any idea of the amount of wood which is consumed every year in the production of pulp for paper. In the United States alone 63,000,000 cords of wood are converted into paper. New York daily papers take over 135,000 tons annually. It may readily be imagined that the United States itself cannot supply this immense quantity and, as a matter of fact, about 7,000 cords of wood are imported daily for this purpose. Canada with her vast ranges of forests, offers a great field for the pulp manufacturer and where this timber is situated near tide waters it is, of course, most valuable.

S. Charles Philips, of London, England, proprietor of the British Paper Trade Journal, says: "Canadian pulp is much preferred to the Scandinavian variety. Only a few years will elapse till she will supply the greater part of the ground wood pulp supplied in Great Britain, and in addition to that, a large percentage to European countries."

### DON'T BE AFRAID TO WORK.

One thing that keeps young men down is their fear of work. They aim to find genteel occupations, so they can dress well, and not soil their clothes, and handle things with the tips of their fingers. They do not like to get their shoulders under the wheel, and they prefer to give orders or figure as masters, and let someone else do the drudgery. There is no doubt that indolence and laziness are the chief obstacles to success.

When you see a boy who has just secured a position, take hold of everything with both hands and "jump right into his work," as if he meant to succeed, we have confidence that he will prosper. But if he stands around and asks questions when told to do anything, if he tells you that this or that belongs to some other boy to do, for it is not his work, if he waits a thousand explanations when asked to run an errand, and makes his employer think that he could have done the whole thing himself—one feels like discharging such a boy on the spot, for he is convinced that he is not cut out for success. That boy will be cursed with mediocrity, or will be a failure. There is no place in this century for the lazy man. He will be pushed to the wall.—Success.

### THE BRITISH WOOD MARKET.

LIVERPOOL, Eng., June 2, 1902.—The arrivals from British North America during the past month have been 18,587 tons register, against 12,605 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1900, 1901 and 1902 has been 119,401, 117,416 and 137,121 tons respectively.

The business during the past month has on the whole been of a satisfactory character, the deliveries have realized expectation, and values have been well maintained; stocks, with the exception of pitch pine, are within a moderate compass.

New Brunswick and Nova Scotia spruce and pine deals—The import, amounting to 8,870 standards, is considerably in excess of the quantity imported during the corresponding month last year, the deliveries have been satisfactory, and the present stock, amounting to 9,450 standards, is light; values are well maintained. Pine deals continue in fair request, stocks are moderate; prices firm.

Birch—Logs have been imported on a moderate scale, the consumption has been satisfactory, and the stock is not excessive; values remain unchanged. Planks have been imported more moderately; there has been a good consumption, but the stock is still heavy.—Farnworth & Jardine's Circular.

### DANGERS AND PERILS AHEAD.

#### Paine's Celery Compound

Purifies the Blood, Fortifies the System and Provides that Vigorous Health that Resists Disease in the Hot Weather.

The deadly dangers and perils of the hot weather will soon be with us. The weak, nervous, sleepless, run-down, rheumatic, neuralgic, and those burdened with diseases resulting from impure and stagnant blood, will be sure victims of the enervating weather; they will be the first to be cut down by pestilence and epidemics.

Are you, dear reader, properly fortified in health and strength to meet the coming perils and dangers of the heated term? If not, make preparation at once for banishing the troubles that are a positive source of danger in July and August.

If Paine's Celery Compound be used at once, it will give you pure, fresh blood, strong nerves, new strength and vitality and an increase in firm flesh and muscle. If you are weak, ailing, sleepless and despondent, we urge you to try the invigorating virtues of one bottle of Paine's Celery Compound. In these June days the great medicine will bring you the happiest results. Be wise to-day; delay not the good work.

### HOW CONTAGION SPREADS.

THE WAY TO AVOID THE TRANSMISSION OF DISEASES.

In these days we have most of us learned the lesson that contagion—that is to say the "catching" quality of a disease—is in every case a matter of a specific microbe or germ. By specific is meant that each disease has its own microbe, and one cannot catch the disease except by receiving in one way or another that particular germ.

These germs have their own manners and customs, means of travel and prescribed length of life, and it is by the study of these details that we learn how to avoid the transmission of contagious illnesses. We know, for instance, that to get typhoid fever or cholera the microbe has to be taken into the system in the form of impure food or water, and so every year one or more precautions are taken to have the water

**Indigestion**  
and nervousness are often the result of hurried meals.  
**Abbey's Effervescent Salt**  
stimulates and tones the digestive organs enabling the stomach to digest perfectly.  
Those who suffer will find Abbey's Salt a perfect corrective of all stomach disorders. Dyspepsia cannot be cured by doctoring the effect. Abbey's Salt removes the causes by enabling the stomach to do its work properly.—A mild laxative.  
At all druggists.

supplies of big cities free from contamination, and stricter attention is given to the purity of our food. An outbreak of typhoid fever is no longer considered, in the old sense, a "visitation of Providence," but is recognized as a shame and a reflection on local conditions, wherever it occurs.

Consumption and whooping cough, we know, are passed from one person to another by means of the expectorations, and it is to be hoped that in the near future we shall put this knowledge to better use than we do at present, and protect ourselves by much more stringent rules. General expectoration is a public offence and menace, and should be made a penal matter. The danger with expectorated matter is that it dries and then is scattered by the wind so that one and all must take the risks. This outrage should be so handled by all in authority that, in the near future, the present condition of our cars and streets will seem like an evil nightmare.

Scarlet fever and diphtheria are caught by any emanations from the body, especially by saliva. The poison can cling for months and years to clothes and toys and books, and these things should always be destroyed if they have come in contact with the sick, and sick rooms should be fumigated and made scientifically clean before they are again occupied.

Notwithstanding all our precautions there will always be disease germs, but the most virulent germ can do no harm unless it finds its proper soil, and there is no armor to compare with the resistant power of perfect health.—Youth's Companion.

A plague of ants has appeared in the northern central counties of Kansas, and the insects are destroying the alfalfa and wheat crops. All vegetation within a radius of several feet of their hills, is killed. The ants are a larger variety than has ever been seen in the State before. They multiply very rapidly, and the farmers are using every means to exterminate them. The insects have invaded the cities and towns, and are making life miserable for the inhabitants. They are very vicious, and do not hesitate to attack either person or animal interfering with them.

The body of a young woman sawed and chopped into a dozen pieces, and apparently boiled and baked, was found in the Lambeth district, London.

**"DO IT NOW"**  
TAKE  
**Doctor HERBINE BITTERS**  
FOR WOMEN.  
Run down, pale, weak, over-worked women, nervous and tired out with household care; constipated, liver torpid, with bloated, sallow, muddy complexion, blood thin and impure, need building up and a thorough renovation of their systems. Herbine Bitters, the great blood purifier, is your best friend. It gently moves the bowels and thus removes the cause and acts directly on the liver and kidneys, keeping them active and strong, while at the same time it renews the complexion, increases the flesh, brightens the eye and gives strength and vigor to the whole system.  
At all druggists or of BRAYLEY, SONS & CO., Montreal.
