

BALD With-out help, a bald spot never grows smaller. It keeps spreading, until at last your friends say, "How bald he is getting."

Not easy to cure an old baldness, but easy to stop the first thinning, easy to check the first falling out. Used in time, **AYER'S HAIR VIGOR** makes baldness impossible with—

It stops falling, promotes growth, and takes out all dandruff. It always restores color to faded or gray hair, all the dark, rich color of early life. You may depend upon it every time. It brings health to the hair.

\$1.00 a bottle. All Druggists.

"I have used your Hair Vigor and am greatly pleased with it. I have only used one bottle of it, and yet my hair has stopped falling out and has started to grow again nicely." JULIUS WITT, Canova, S. Dak. March 28, 1899.

Write the Doctor. If you do not obtain all the benefits you expect from the use of the Vigor, write the Doctor about it. Address, Dr. J. C. AYER, Lowell, Mass.

Chief Commissioner of Public Works at Madawaska.

The friends of Hon. C. H. LaBillois profited by his official visit to Madawaska county to tender him a banquet at the Royal Hotel here last night. N. A. Gagnon, M. P. P., presided. Addresses in French and English were read to him referring to his business-like way of managing the department of public works and the general satisfaction given throughout the province by the manner in which he dealt out justice to all classes and creeds. His Madawaska friends also presented him with a gold-headed cane as a souvenir of his 20th anniversary of active participation in public matters in his native province.

The chief commissioner spoke at length in both languages in reply to the addresses. He thanked his friends for himself and for the government of which he was a member. He referred to the progress the river counties had made under this government's agricultural policy, especially Madawaska, which had gone ahead by leaps and bounds. He regretted the loss by fire of the modern wheat mill erected here some years ago by two progressive young men and was glad to learn that there was a movement on foot to build another in time to grind this year's wheat crop. He spoke of the pleasure he had during the long 20 years he had been honored with the confidence of the people of his native county. He referred to the coronation of the king, the happy circumstances of peace being restored in South Africa and said that the Boers would soon acknowledge as Canadians did, that all the privileges that man required exist under the British flag.

Brief addresses were made by M. Gagnon, M. P. P., H. Lawson, B. R. Plant, Doctor Guy, Doctor Main, Levite J. Cyr, Pius Michaud, John M. Stevens, J. Angure Bernier and others.

WORLD'S FAIR.

General Press Bureau,
World's Fair Grounds,
St. Louis, June 14.

DEAR SIR.—One remark is common to all visitors to the World's Fair grounds, namely, that they had no idea of the unprecedented scale of magnificence upon which the great Exposition is being constructed. The grounds acquired to date comprise 778 acres, being nearly two miles long and a mile wide in the eastern part. Negotiations are pending for an additional four hundred acres. The north frontage of four buildings takes in a sweep of more than one mile, and there are to be not less than fifteen large exhibit buildings. Half the states and territories have taken official action looking to an enterprising exploitation of state and territorial interests and resources. The total cash available to date, including state and national appropriations, approximates twenty million dollars. The fifteen great departments of exhibits provide a place for complete exhibits of the resources and products of all countries and all peoples. Every day shows definite progress and the giant enterprise grows amazingly and wonderfully.

This week has been marked by the beginning of the staff construction of the World's Fair. Five large pieces of this ornamental plaster work were set in place sixty-five feet above the ground on the Varied Industries building. The staff ornamentation is now nearly complete for three large buildings, the Varied Industries, Textiles and Electricity.

The question of the Sunday closing of the World's Fair was practically settled at time the Government appropriation of \$5,000,000 was made, and the board of directors of the Exposition last November provided for Sunday closing in the rules and regulations. This week, however, a contract authorized by the directors was prepared and sent to the Secretary of the Treasury, the Hon. Leslie M. Shaw, which guarantees that the Exposition shall not be open to visitors on Sundays.

Plans of the Art Palace have been delivered this week to the contractors who will put in their bids within ten days. The approximate cost of the Art buildings is one million dollars. The buildings are three in number, to be of fire-proof construction. They will stand at the apex of the fan-shaped group of main buildings on a plateau sixty feet above the general level of the large buildings. Abundant space will be provided for the selected art productions of all nations.

The first official act of the new United States Minister to Cuba, Herbert G. Squires, was the presentation of President Roosevelt's invitation to Cuba to participate in the Louisiana Purchase Exposition at St. Louis. Mr. Squires delivered the invitation to President Palma on June 9. The Cuban government is much interested in making a prominent showing at the World's Fair, this being the first opportunity of the island to appear at an exposition.

Respectfully yours,
MARK LENNITT.

IT-LEADS AND SAVES.

Paine's Celery Compound

DR. PHELPS'
WONDER-WORKING MEDICAL PRESCRIPTION.

Paine's Celery Compound is the world's great leading medicine and life saver. It has no equal for feeding exhausted nerves; it stands first as a builder of the weak and shattered nervous system.

Paine's Celery Compound has long ago proved its power as a banisher of dyspepsia, rheumatism, neuralgia, kidney disease, liver complaint, and as a purifier of the blood. Thousands of men and women, tired out, sleepless, nervous, morose and despondent, have been given perfect health, strength and buoyancy of spirits through the well-advised use of Paine's Celery Compound. It has given a new and happy life to a vast number of people who once were tired of life and suffering.

If your health is impaired; if you are burdened with any weakening or painful malady, use Paine's Celery Compound today; it is specially adapted for your case; it will make you well and strong.

Mr. H. Ball, Chatham, Ont., says:—"I was so seriously ill I was obliged to take to my bed, where I laid for four months. The doctors here and in Toronto said my trouble was Addison's disease of the kidneys, and told me I would never walk again. In November I commenced to use Paine's Celery Compound. After having used a number of bottles I was enabled to attend to business, and felt like a new man. I can affirm with confidence that Paine's Celery Compound saved my life."

The Influence of Religion.

The worst kind of religion is no religion at all; and men living in ease and luxury, indulging themselves in "the amusement of going without religion," may be thankful that they live in lands where the Gospel they neglect has tamed the beastliness and ferocity of the men who, but for Christianity, might long ago have eaten their carcasses, like the South Sea Islanders, or cut off their heads and tanned their hides, like the monsters of the French Revolution. When the microscopic search of scepticism which has hunted the heavens and sounded the seas, to disprove the existence of a Creator, has turned its attention to human society, and has found a place on this planet ten miles square where a decent man can live in comfort and security, supporting and educating his children unspoiled and unpolluted; a place where age is revered, infancy loved, manhood respected, womanhood honored, and human life held in due regard. When sceptics can find such a place ten miles square on this globe, where the Gospel of Christ has not gone and cleared the way, and laid the foundation, and made decency and security possible, it will then be in order for the sceptical to move thither, and there ventilate their views. "But so long as these men are dependent upon the religion which they discard for every privilege they enjoy, they may well hesitate before they seek to rob the Christian of his hope, and humanity of its faith, in that Saviour who alone has given to man that hope of life eternal which makes life tolerable and society possible, and robs death of its terrors and the grave of its gloom."—James Russell Lowell.

Baptized with Blossoms.

Flowers instead of water were the main features of a christening ceremony which recently occurred at Englewood Spiritual Union, the Rev H. J. Moore officiating. Four girl infants were christened by being crowned with roses and carnations. "While our custom is not of recent adoption, it is new and novel to the generality of the people," said Rev Mr. Moore in talking of the services. "Our use of flowers instead of water is because we believe the effect is more beautiful and fully as significant. The roses and carnations used are not formed in any specific design. I simply place them sometimes in the form of a wreath upon the head of the infant, and bless and name it. These flowers signify on the part of the parents the desire to have their child's life as pure, bright and fragrant as the flowers which crown them. It is a pretty ceremony and, to my mind, contains all the true elements of baptism. We have no dispute with those who believe in baptism by water. All such are as much entitled to their views as we are to ours. Originally baptism was by fire. I am not sure but this form is still practised in some parts of Persia. Then came baptism by water. The people came to believe that the waters of the Nile and the Ganges were sacred and baptisms in and by these waters was in vogue for a long time. Now we adhere to the principle that all water upon the face of the earth is blessed. It is all here under the beneficent graciousness of a wise Providence, who makes no distinction among men or creeds."

ST. JOHN EXHIBITION.

The St. John Exhibition Association evidently recognizes just how vitally a nation's hope centres on her rising generation. This year a special effort will be made in the way of educational features of practical usefulness to the young, and calculated to awaken their interest in the products and industries of their country. And the children are being told all about it, for Exhibition Blotters have been dispatched to the head teacher of each school throughout the Province, with the request that these be distributed among their scholars. This will tell the story to the children in a unique and practical way.

The unusually large entries for Carriages have compelled the St. John Association to make more room for this Department than was allotted in 1900. With this object, a new Amusement Hall is now being fitted up in the Agricultural Building, and the Carriage Department will be placed in its entirety in the Drill Shed which has a floor space of 80 by 210 feet, or nearly 17,000 feet. From present indication, this space will be entirely filled with the newest and best in carriages and sleighs.

ROMANCE IN THE RAW.

A remarkable story of an Indian girl's love and devotion is revealed in a letter which M. F. Gordon, a mining man of British Columbia, received recently. He is now said to be en route to Corpus Cristi, Texas, where he will join the Indian maiden and probably marry her.

A number of years ago Gordon became lost in the mountains of Western Mexico. For eight months he saw no human being, subsisting on wild game and berries. At last he was rescued by two Indian girls, one of whom fell in love with him. Her companion became jealous, and when they approached the borders of civilization the latter made her way to an Indian village and notified the braves that Gordon was running off with one of the squaws. A party gave chase captured him and was to have burned him to the stake on the arrival of the tribal chieftain. The night before the date set for his death Gordon escaped.

He has told the story many times, but did not know until this week that the Indian maiden who loved him made his escape possible. For years she waited vainly for his return. Finally seeing his picture in a Dawson paper, she wrote him at Alaska and finally at Seattle. This last letter he received. In it the girl explained that after meeting him she could love no one else. She declined to marry any of her tribesmen and decided to educate herself that she might be his equal. This she accomplished at a mission, later becoming a teacher in an Indian school at Corpus Christi. Meantime her father, a chieftain, had died, leaving her property, including a gold mine. In conclusion she asked Gordon to return and keep the promise made her years ago.

Building up the Mind.

Many people are great readers. Now, reading does not build the mind; thought alone builds it. Reading is only valuable as it furnishes materials for thought. A man may read much, but his mental growth will be in proportion to the amount of thought he expends in his reading. The value to him of the thought which he reads depends on the use he makes of it. Unless he takes up the thought and works on it himself its value to him will be small and passing. "Reading makes a full man," said Lord Bacon, and it is with the mind as with the body. Eating fills the stomach, but as the meal is useless to the body until it is digested and assimilated, so also the mind may be filled by reading, but unless there is thought there is no assimilation of what is read, and the mind does not grow thereby. We should read less and think more if we would have our minds grow and our intelligence develop.—Mrs. Beasant.

Never Had A Carriage Drive.

(New York Times)
Apropos of those who never enjoy the luxury of a carriage, save when the death of some one makes for a free ride to the cemetery, the Rev. John Watson (Ian MacLaren) told of a little girl standing at Fifth avenue and Thirtieth streets. She was a ragged little thing, and she was watching the carriages rolling past with the most wistful eyes. "Well, little one," he said, "would you like to own one of those carriages?" The blue eyes turned up and there were tears in her corners. "I never rode in a kerridge," she said softly, "me little brudder died afore I was born."

Owning to a plague of rats and mice, cats sell at \$25 apiece in North Yukon Territory. Here seems an excellent chance for a modern Dick Whittington. The dog there is still a beast of burden.

Itching Skin

Distress by day and night—

That's the complaint of those who are so unfortunate as to be afflicted with Eczema or Salt Rheum—and outward applications do not cure. They can't.

The source of the trouble is in the blood—make that pure and this scaling, burning, itching skin disease will disappear.

"I was taken with an itching on my arms which proved very disagreeable. I concluded it was salt rheum and bought a bottle of Hood's Sarsaparilla. In two days after I began taking it I felt better and it was not long before I was cured. Have never had any skin disease since." Mrs. Ida E. Ward, Cove Point, Md.

Hood's Sarsaparilla ride the blood of all impurities and cures all eruptions.

London, June 20.—There is practically no doubt in the minds of those in a position to know that at least three knighthoods will be meted out to Canada at the coronation, and that in such case the recipients will be Hon. Wm. Mulock, Hon. W. S. Fielding and Hon. F. W. Borden.

An ingenious chemist has made the claim that the average human being is worth about \$18,300 from the chemical standpoint. His calculations are based on the fact that the human body contains three pounds and thirteen ounces of calcium, and calcium just now is worth \$300 an ounce.

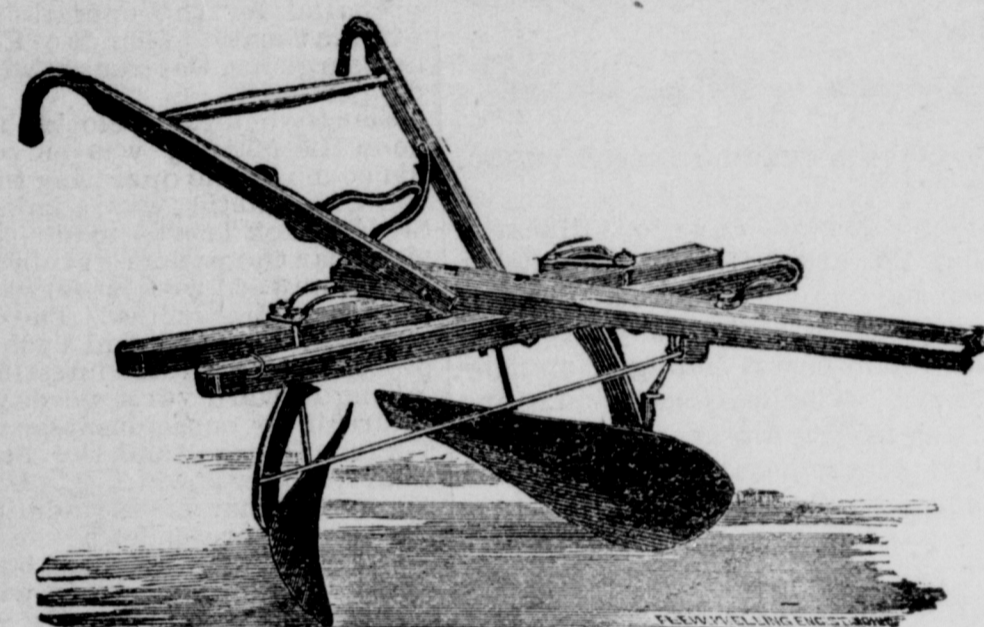

The German Emperor ascribes his good health to abstinence from tea and coffee, but he says never a word about beer.

Britain's Wealth in Coal.

There are three extensive coalfields in the Kingdom; the northern, embracing the beds of Fife, Stirling, Ayr, Cumberland, Newcastle and Durham; the midland, comprising the great coalfields of Yorkshire, Derbyshire and Staffordshire, as well as Shropshire, Flint and Denbigh; and the southern, which includes the rich steam coal deposits of South Wales, and the seams in the Forest of Dean, and at Bristol and Dover. Roughly, the seams producing coal of infinite variety, vary in thickness from 200 feet in Lanarkshire, which gives more than half of the Scotch supply, to 100 feet in Lanarkshire and 47 feet in Northumberland and Durham. The yearly output from these seams is enormous, bulking to 225,000,000 tons, of the value of nearly £125,000,000 sterling. The most pessimistic experts admit that though the demand for household, manufacturing, export and coal station purposes is still increasing, the available coal supply of the Kingdom will not be entirely exhausted until 300 years hence.

July 10th is the limit in which Boers who surrender will receive the benefit of the peace terms and all surrendering before that time will be merely disfranchised for life. Rebels who hold out after that date will be subject to the extreme penalty for high treason.

It is estimated by the French post-office that 93,000 letters were stolen from pillar boxes last year and now boxes with steel teeth to prevent extraction of letters, are being considered.

According to estimates there will be 100,000 American visitors in London during Coronation week.

During the month of May, 50 persons committed suicide in Chicago, the greatest number ever recorded in the same length of time.

The government crop report shows an increase in the total acreage in Manitoba grain crops of 253,140 acres of wheat. The acreage is 2,039,940.
