# Grand Mid-Summer CARNIVAL!

WOODSTOCK, N. B.,

**August 12 & 13.**

Polymorphian Parades,  
Horse Races,  
General Illumination,  
Band Concerts, Etc. Etc.

TWO DAYS OF CONTINUOUS ENJOYMENT!

The Great Tight Wire Performance, Seventy Feet in the Air, will surely be given each day.

**\$1200 FOR HORSE TROTS.**  
EXCURSIONS FROM ALL POINTS.

Cash Prizes amounting to \$75 will be given in connection with the Parade on the Opening Day. Everyone has a chance to win.

Read the papers next week for particulars.

HIS WORSHIP MAYOR BELVEA, N. FOSTER THORNE,  
Chairman Executive Com. General Secretary.

About a million cotton spindles in Fall River will be idle this week, throwing about 12,000 operatives out of work, all due, millowners say, to the price of cotton.

Mr Brown, the American cotton cornerer, has paid cash for 88,900 bales, valued at \$8,753,500. It is the biggest transaction in the history of the cotton trade.

## MOUNT ALLISON'S URGENT NEED.

At the recent annual meeting of the Mount Allison Board of Regents, a committee was appointed to present a statement for the Eastern Conference, showing the urgent need of larger funds for the consolidation and extension of our educational work at Sackville.

It is felt by the Regents that a forward movement is loudly called for. At the Ladies' College measures are being adopted for establishing a School of Domestic Science. It is not proposed that this departure shall be a mere duplicate of the work done in the Public Schools throughout the country. The design of Principal Borden is to found a school of higher order than has yet been attempted in the Maritime Provinces, the best that Canada can give, with a Normal Department for the training of teachers.

This movement accentuates still further the need of larger accommodation. The Ladies' College has a roll of 140 residents, and a total for the year of 210 registered students. For the comfort of inmates, the residence is unduly crowded. Both Class-rooms and Library are in need of enlargement. Under pressing exigencies 42 pianos have to be so distributed through the building as to interfere with the work of study.

To relieve the congestion of the present building it has been decided by the Board of Regents to erect a new structure of brick and stone; the design being to replace at some future time the Ladies' College wooden building on the same plan. A contract has been signed and the work begun. The basement of the new building will afford a suite of rooms for Domestic Science, boiler rooms, lavatories and men's quarters. The ground floor will give two large school rooms, a dining hall with capacity for seating 230 persons, and a complete suite of kitchen, pantry and store rooms. The floors above will contain residential space for 45 additional students, 3 teachers, 20 maids, infirmary with ten beds and lavatories on each floor.

Such a building, up-to-date in architecture and equipment, is estimated to cost \$40,000, and \$20,000 should be at hand within six months from now.

Patrons and friends are assured that this building project has not been undertaken except as an urgent necessity. Shall the Mt. Allison Ladies' College continue to hold a first place in this part of Canada, or surrender its splendid position, fall into the background, and hand over a great educational work to more worthy competitors? It is believed that the Methodist people of the Maritime provinces will not allow this hitherto successful institution to suffer failure for want of funds.

The Board of Regents earnestly recommend that the Conferences of Nova Scotia, New Brunswick and Prince Edward Island, with such aid as Newfoundland may be able to give, at their ensuing annual meetings, shall adopt such prompt and practicable measures as in their judgment may ensure a thorough canvass of the several districts and circuits of our eastern territory. As an incentive to liberality, two gentlemen of Sackville, N. B., have generously promised, up to a considerable amount, each to add ten per cent to all amounts Principal Borden may realize as the result of organized appeal.

The payment of contributions may have to be extended over a period of not less than two years, and methods adopted for raising funds ought to be framed with a view of obtaining the full \$40,000 required for the Ladies' College building.

An experience of strenuous finance is not a new or strange thing in our denominational history. "Our fathers passed under the cloud." The withdrawal of government grants, New Brunswick in 1872, and Nova Scotia in 1881, not to speak of costly building efforts, called for an endowment of \$100,000 to save the work from collapse. The scheme was launched at conference by a contribution of \$12,000. The indefatigable exertions of Dr Pickard, followed by the personal canvass of Drs Inch and Stewart brought up the endowment

fund, at that time, to the required amount. Another crisis confronts us in the prosecution of our educational work. Shall we be found less capable than our predecessors of noble and generous deeds of self-sacrifice? May the spirit and holy heroism of the past still stand forth in our midst.

Signed on behalf and by order of the Board of Regents.

JOHN LATHERN, Chairman.  
CRANESWICK JOST, Secretary.

## HAYDEN'S NEW MILL.

J A Hayden with commendable energy and enterprise has his new mill near to completion. Only on the 10th of June last was his mill, together with his factory burned to the ground destroying engine and all other machinery in connection with mill and factory making it necessary to equip his new mill with new machinery which he has done with all the modern improvements having installed an engine of the latest design with capacity of 260 horse power which will run rotary shingle, clapboard, and lath machines together with patent edger and cut off saws. Steam is carried from the old boiler which has been thoroughly overhauled, repaired by competent workmen and pronounced as good as new. The new mill is differently located sitting almost parallel with the river, the slip being on the down river end and manufactured lumber will consequently come out of the opposite end near where the old factory was, where it will be taken on rollers to the large new wharf he has under erection. He purposes in the near future to extend his railway siding up to his old warehouse that escaped the fire.

The new mill is quite an imposing building looked at from any quarter, and is a decided improvement both in appearance and appointments. The main is 125x40, 20 foot posts, which form the first or rotary floor, upon this sets another story having 12 foot posts. The roof has a square pitch with 5 windows on each side near the peak; with 6 windows on each side on the rotary floor; with 4 windows in the ends.

The boiler and engine are in separate buildings. Just now men are putting the finishing touches on. Mr. Hayden expects to have the mill going by the 15th inst. He intends replacing his factory at once and has the old grounds cleaned up and the injured or destroyed machinery moved, and has men at work laying the new foundations. Judging from the amount of work accomplished in the last 6 weeks we venture the opinion that from observation point of view a stanger would not know that such a destructive fire had occurred in our midst.

J. A. Hayden is of the material that any business town should be proud of and lend every encouragement they possibly can in the way of business patronage, etc. He has upwards of 2 million feet of lumber to be sawn yet before the river freezes up, which will make work plenty in that part of the town.

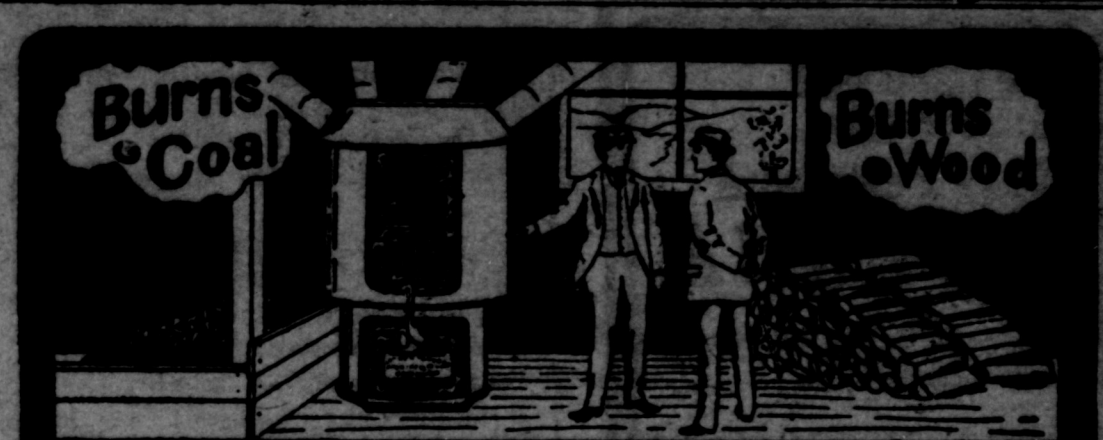

## BABY'S OWN SOAP

prevents roughness of the skin and chapping.

Best for toilet and nursery use. See ALBERT TOILET SOAP CO., LTD., MONTREAL.

In closets devoted to shelves the shelves should have spaces between them of not more than fifteen inches, this space allowing sufficient room for most practicable purposes.

Don't tip the shoulders from side to side when walking. It is an exceedingly ungraceful habit.

## Sunshine Furnace

No need to worry about coal strikes if your home is heated with a "Sunshine" Furnace.

By placing our patented wood grate over the coal grate it will burn wood or coke and give as perfect satisfaction as with coal—also saves starting a coal fire in spring and fall when a wood fire will take the chill off the house in a few minutes.

Feed-doors are double and extra large—will admit rough chunks. Radiator is made of heavy steel plate and encircles the dome in such a way that it leaves a wide space between the two for the circulation of air and gives an immense radiating surface.

The "Sunshine" is the only Canadian heater which will burn coal, coke or wood with entire satisfaction.

Sold by all Enterprising Dealers. Booklet Free.

LONDON, TORONTO, MONTREAL, WINNIPEG, VANCOUVER, ST. JOHN, N.B.

H. E. Burt, Sole Agent.

From New Limerick to Fort Kent.

To the Editor of Carleton Sentinel:

As the B. & A. announced an excursion from Houlton to Fort Kent, on the 23d July, the writer improved the opportunity and joined the happy party, the train pulling into New Limerick station at 7.13 a.m., just on time. We soon were all on board and started west for the old Fort.

As the writer was through the country some thirty six years ago he would like to speak of some of the industries which are here now but did not exist at that time, and as I started from New Limerick, I will commence here. In this town there is a large tannery built some 28 years ago, now owned and operated by W T Shaw. About one year ago this tannery was completely destroyed by fire; the work of rebuilding was soon commenced and on the 1st of January, 1903, it began rolling out leather. It will be some months before it will all be completed, but when done will be one of the finest tanneries in the State. The construction work is in charge of Mr Charles Rogers, who well understands his business and is in every respect a gentleman. A saw mill in this town, 2½ miles from the B & A station, situated at Drew's Lake, owned and operated by Hudson Drew. The output of this mill is about one million a year. Mr Drew had placed in his mill this spring a Buchanan water wheel that gives good satisfaction. Here also is the starch factory of John Watson of Houlton. Mr Watson is a large manufacturer of starch, owning quite a number of factories. He is a Province man, being born on the St John river between Arcoostook and Andover and came to this country about the close of the Civil War.

Leaving the station we soon arrived at Smyrna Mills; here quite a number joined our party. Since the building of the B & A, there has been quite an improvement in this place. From here we soon came to Flow Brook, where there is a large mill owned by Burleigh & Cushing. One hundred men are employed at this mill and it runs the year round. At this station forty more joined our party.

The warning note, "all on board," being given, our train steamed away from this station, soon arriving at the mill built by the late Fred Moore of Woodstock, now operated by his sons Miles and George. Our number was again increased with happy faces and well filled baskets. Passing several more mills we soon arrived at Ashland Station. This is a very pretty place situated between Ashland village and the Arcoostook river. Near by this station is the farm property of the late Elbridge Dunn, one of the finest farms in Arcoostook county. Mr Dunn was well known on the St John river; being in the lumber business at what

was known 40 years ago as Arcoostook pine. A short distance from here is the farm and mill property of the late Charles Clayton, now owned and operated by Randolph Ketchum, formerly of the town of Woodstock. Our number here was increased by 150 more. Our train now consisted of ten cars well filled.

We now leave the Arcoostook river and 12 miles brings us to the waters of Fish river, Portage lake. At this place is the mill of Henry Sharp, well known in Carleton county. To all appearances Mr Sharp is doing a large business; being here less than one year he has built quite a village and there are several more houses in course of erection. From Portage lake we passed Long lake. Along the lake there are no mills and only one station. We soon came to Eagle lake—here it is all a hum. The Fish River Lumber Co., under the management and direction of Parker Burleigh, of Houlton, commenced operations in June, 1902. In a short time they will have two mills in operation, quite a number of houses built and a well filled lumber yard. This Co. has an act of the Legislature to place docks in Fish river waters at the lakes, in order to hold lumber and the water, and move from lake to lake at any time during the summer; this work will be commenced at an early date and when completed will be the greatest water way in Arcoostook county for moving lumber, if not in the state of Maine. From here we soon arrived at Fort Kent and between 600 and 600 anxious sightseers made their way from the B & A station in all directions.

Now, Mr Editor, I have arrived at Fort Kent and if this is not consigned to the waste basket I will try and get back next week. J. N. S.

Woodstock Summer Carnival—Aug. 12th and 13th, 1903.

For the above, the Canadian Pacific Railway will issue tickets from St. Stephen, St. Andrews, St. John, Fredericton, Plaster Rock, Andover and intermediate points on August 12th and 13th, and from Edmundston and Presque Isle Branches on August 11th and 12th, all tickets good to return up to and including Aug. 14th at rate of one fare for the round trip; and for bands of ten or more in uniform and carrying instruments, agents will, on prior application, issue at one-half above rates. This Carnival has become an annual affair, and everyone visiting Woodstock is assured of a good time.

Among the many family reunions to be held at the World's Fair next year will be that of the Wing family of America. At the recent annual gathering of this family at Sandwich, Mass., it was decided to hold the 1904 meeting in the World's Fair City
