

Jim Dumps' physician once fell ill. Said he: "I'll have no draught or pill." Said Jim: "Ho, ho, you're on the shelf. You who cure others, cure yourself." Then Jim sent up some "Force" to him. "That's what he needs," quoth "Sunny Jim."

Force

The Ready-to-Serve Cereal

for doctor and patient.

Has Eaten Three Cases.

"I was attacked last May by appendicitis. As I showed signs of recovery doctor and I began to cast around for a suitable diet and as a result we fell upon 'Force,' which has been a wonderful boon to me. I have eaten almost three cases. H. H. MILLER."

THE FISCAL BATTLE.

The upheaval in public opinion in Great Britain has produced some quite interesting results. One form of them is that publications which never found themselves in agreement on any subject hitherto now find themselves ranged on this issue side by side. Papers which warmly supported the Unionist Government now find themselves constrained to hold it in suspicion. One of the most notable of these is the *London Spectator*, which utters no uncertain note on the trade issue. One of the lines it has taken is to challenge

anyone to show that a single British industry has been materially or permanently injured by the free trade policy. Some instances have been pointed out in response to this challenge. The tin-plate industry was one of these. When Americans determined to establish a tin-plate industry within their own borders and raised their duties to a prohibitive pitch for that purpose, there is no question the Welsh tin-plate industry suffered a staggering blow. But, the *Spectator* tells us, it has bravely recovered. Soon after the American door closed, other doors opened. Even the American door was not wholly closed. The exporting industries which use tins of one kind or another procured a clause in the tariff act by which almost the whole of the United States import on tin plates is refunded when they are re-exported in the shape of tin vessels or cans. The effect of this provision is still to leave the British with a considerable share of the tin-plate market.

Another industry that has been ruined by free trade, according to some correspondents of the *Spectator*, is that of flour milling. One letter writer closed a lugubrious communication with the sentences: "First we cease to grow our wheat; next we cease to mill it. How long shall we be able to buy it? and who will supply it when we have to beg it?" The letter was noticeable for its lack of convincing facts, and it drew from another correspondent the statement that, although the flour milling industry had suffered in the interior towns, it was flourishing at the great seaports. Liverpool has become one of the greatest milling centres in the world, second

only, it is said, to Minneapolis, and the English millers are underselling the American millers in the neutral South American markets.

Even agriculture, which is usually considered to have been most hard hit by free trade, is not the totally ruined industry which it is sometimes represented to be. Rents, of course, have fallen, but the enterprising, wide-awake and industrious farmer makes more than a good living. The correspondents who complain of the state of agriculture indulge for the most part in general terms, while those who claim that intelligent farming is well rewarded in Great Britain give specific instances and localities in proof of what they assert.—*Toronto Globe*.

FARM AND GARDEN.

Wild roses are found on every continent in the world excepting Australia.

Strophantidin is said to be the most deadly poison on earth. It is made from an African plant by ether and alcohol.

Cows fed with ensilage will give one-third more milk than if fed on dry food. The proper amount is thirty pounds twice a day.

All birds, when perched on trees or bushes, serve as weathercocks, as they invariably arrange themselves with their heads to the wind.

In 1840 beet root supplied 4.35 per cent. of the world's sugar. Now nearly sixty eight pounds in every one hundred pounds of sugar come from beet.

Bekimo dogs have been driven forty five miles over the ice in five hours. A picked team of these dogs once travelled six miles in twenty eight minutes.

Wild larkspur and poison camass, two plants found on the prairies of Western America, are responsible for the poisoning of at least one hundred thousand cattle yearly.

A cloudburst in Kansas last week compelled people to take to the tree tops.

HEALTHY, HAPPY BABIES.

Every mother most earnestly desires to see her little ones hearty, rosy and full of life. The hot weather however is a time of danger to all little ones, and at the very first symptom of uneasiness or illness, Baby's Own Tablets will keep little one healthy and happy. If sickness does come, there is no other medicine which will so quickly cure the minor ills of babyhood and childhood—and you have a guarantee that it contains no opiate or poisonous stuff.

Mrs. John Nall, Petersburg, Ont., says: "I have used Baby's Own Tablets and find them a superior remedy for troubles of the stomach and bowels. From my own experience, I can highly recommend the Tablets to other mothers."

Mothers should always keep these tablets in the house, ready for any emergency. Sold by medicine dealers or sent postpaid at 25 cents a box by writing the Dr. Williams' Medicine Co., Brockville, Ont.

AFTER SHAVING

POND'S EXTRACT

COOLS, COMFORTS AND HEALS THE SKIN, ENABLING THE MOST TENDER FACE TO ENJOY A CLOSE SHAVE WITHOUT UNPLEASANT RESULTS.

Avoid dangerous, irritating Witch Hazel preparations represented to be "the same as" Pond's Extract, which contain "wood alcohol," a deadly poison.

Nearly 800 patents have been granted to Edison.

PALE FACED

NERVOUS WOMEN

Always Grow Strong and Have a Rosy Complexion by using

FERROZONE.

Ferrozone is by long odds the best tonic for pale faced girls and exhausted women. It forms the right kind of blood and tissue for rebuilding the system. It replaces tiredness by energy and vim, and adds nerve force and staying power.

Miss Dorothy E. Leduc, of Chester, gives the following convincing evidence of Ferrozone's power: "My work compels me to rise early in the morning and work ten hours daily as a saleslady. Last spring I was run down, lost my color and fell off in weight. I seemed to lack ambition and the life was out of me. A friend recommended Ferrozone, and I took one tablet after meals with wonderful results. Ferrozone brought back my complexion and has given me new strength and abundance of energy and spirits. I would advise all young ladies to use Ferrozone."

Mrs. H. G. Wilder, of Dexter, says: "My daughter was not very well last summer and had lost her strength completely when the hot weather came. I gave her Ferrozone and am glad to say it did wonders. After six boxes were used my daughter was strong and looked the picture of health. I can recommend Ferrozone to all mothers, both for themselves and daughters."

Go to your druggist to-day and get a supply of Ferrozone. Price 50c. per box, or six boxes for \$2.50. By mail from The Ferrozone Company, Kingston, Ont.

NOT FOR GRAIN ALONE.

Much of the argument for and against the Grand Trunk Pacific scheme assumes that the main purpose in building it is to provide an outlet for the export of wheat. It is expected of course that the road will carry great quantities of grain at certain times in the year, but if there were nothing else for it to do than that it would never be built at all. It is not merely misleading but mischievous to fix attention too exclusively on one function of the completed railway, especially when that is by no means its most important function.

The fact is that the Grand Trunk Pacific will be a road with an extremely varied and general traffic. It will be peculiarly a colonization railway, carrying into various localities the effects of intending settlers, keeping them supplied with the means of life while they are making a start, and carrying to market their produce after they have a surplus to dispose of. It will be also a great tourist railway, traversing new, vast and picturesque regions which will attract hosts of visitors from all over the civilized world. It will be a transcontinental railway connecting with fleets of steamers on the Pacific and Atlantic Oceans, and thus forming an essential link in a new and important route round the world.

Besides the grain of the northwest it will have to carry the products of British Columbia, which is not expected to be peculiarly a wheat growing district. It will traverse vast forests in Ontario and Quebec, and these will furnish it with traffic for many years to come, until there grows up in each Province a large farming population not depending at all on wheat raising for a living. It will probably be found that in northern Ontario and Quebec, as well as in much of the northwest, cattle raising is safer and more profitable than wheat growing, and the export of cattle must be by rail, not by steamer. The new railway would be a great and profitable enterprise, if it never carried a bushel of wheat, as an all-rail route. Its chief justification in the eyes of its promoters is general traffic, not a special article of transportation, and to ignore this in the preliminary discussions tends to obscure altogether the real issue.—*Tor. Globe*.

"Why do they call this a free country?" asked the unwashed anarchist. "Because," answered the respectable citizen, "you are at liberty to leave it if you don't like it."

The United States Geological Survey show the copper output in this country last year to have been 294,423 tons. Montana produced almost 41 per cent of the total.

In 1902 the number of lynchings for criminal assault in the United States was nineteen, and for attempts to commit it eleven.

News from the Country.

Four Falls.

The old friends of Charles H. Montgomery of Chewelah, Wash., U.S., are glad to learn that he is expected home soon.

Mr. Sherwood of St. John County was a guest of the Four Falls House Wednesday evening. He intends coming back later on and establishing a Foresters' Court in this place.

Mr. and Mrs. Laten of Van Buren were in town Friday on their way home.

Walter Shaw, The Baird Co's traveller, and H. W. Beveridge of Andover took dinner here on Wednesday last.

Rev. Mr. Demmings of Andover called here on Friday.

The Telephone Company is certainly a hustler. The poles and cross bars have already reached this place. It means business to have an office here, as all parties seem glad of its coming.

C. W. Barker, his daughter Ethelyn and Mr. H. A. Mosher were calling on business at Councillor Charles Mulherin's home on Saturday. Mr. Mulherin and his wife are noted for their genial hospitality. It is regretted that Mrs. Mulherin is still an invalid.

It is matter of much regret to the many friends of Frank Gillespie, that there is no visible improvement in his case. Mr. Gillespie was one of the early pioneers of the settlement and is very highly esteemed as a man and a citizen by all who have known him.

East New Bridge.

We are glad to hear that Miss Cassie McDade is recovering from a severe injury caused by the horse taking fright at a bike while on her way to church.

Mr. G. Lawrence and Mr. S. Kitchen of Green Lake are spending a few days with relatives at Lake George.

Our popular teacher, Miss Dibblee, has taken charge of her school again to the delight of everybody.

We understand that Miss Monteith will take charge of our school in the near future.

The farmers have got on successfully with their haying and some are beginning to harvest.

We had a party at Mr. McCarty's last Monday evening. There were quite a number of young folks who spent a very pleasant evening, tripping the "light fantastic" to music rendered by Mr. Wilson, until dawn broke in the east, and then the happy people returned to their homes well pleased with the evening's, or rather, night's enjoyment, but sleepy and tired.

ONLY ME.

BABY'S OWN SOAP

used by particular people both young and old. Keeps the skin soft, clear and white.

No other Soap is just as Good. ALBERT TOILET SOAP CO., LTD. MONTREAL.

Mrs. Jones—Dear me! Just see how that lawyer is sneering at that poor prisoner. It's a perfect outrage!

Mr. Jones—Hush, Maria! That ain't the prisoner—that's the magistrate.

Hacking

There is nothing so bad for a cough as coughing. It tears the tender membrane of the throat and lungs, and the wounds thus made attract the germs of consumption. Stop your cough by using the family remedy that has been curing coughs and colds of every kind for over sixty years. You can't afford to be without it.

Ayer's Cherry Pectoral

loosens the grasp of your cough. The congestion of the throat and lungs is removed; all inflammation is subdued; and the cough drops away.

Three sizes: the one dollar size is the cheapest to keep on hand; the 50c. size for coughs you have had for some time; the 25c. size for an ordinary cold.

"For 15 years I had a very bad cough. The doctors and everybody else thought I had a true case of consumption. Then I tried Ayer's Cherry Pectoral and it only took a bottle and a half to cure me."

Oct. 28, 1895. E. MARION MILLER, Canada, N.Y.

Write the Doctor. If you have any complaint whatever and desire the best medical advice, write the Doctor freely. Address Dr. J. C. AYER, Lowell, Mass.

DOMESTIC HINTS.

Out of one pound of cotton 4770 miles of thread have been spun.

According to Chinese law, a wife who is too talkative may be divorced.

A pound of prunes is said to be equal in value as regards food to a gallon of milk, and is far more healthful.

A Nuremberg merchant has invented a new kind of boot, with an apparatus in the heel by means of which the whole foot can be warmed.

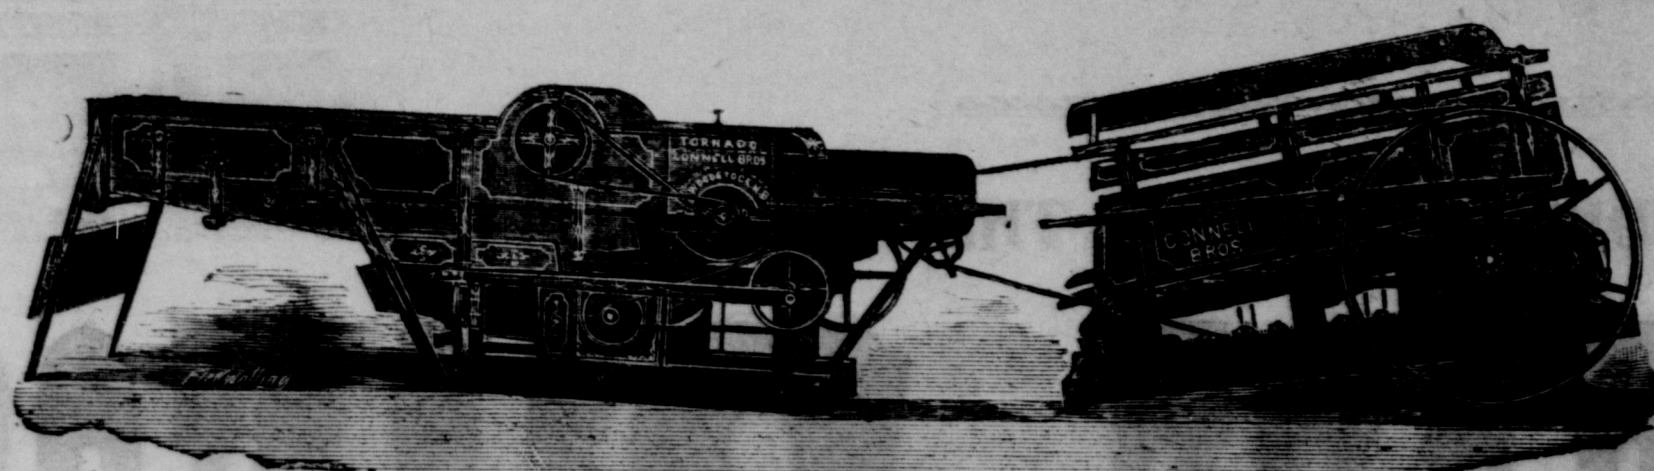

Regarding warts, it is said that it is now fairly established that the common wart can be easily removed by small doses of sulphate of magnesia taken internally.

To make egg sauce put a piece of butter in a saucepan and mix with a little flour till smooth. Add 1 teaspoonful of milk and stir till it boils and thickens. Season and stir in a hard boiled egg chopped small.

When wooden tubs or pails have to stand for some time, instead of filling them with water, which is sure to become stagnant, try painting them over with glycerine. The wood will not shrink until the glycerine dries on, and that will not happen for months.

This is said to be a good remedy for red hands—Rub into the hands every night after washing a little of the following mixture, well shaken at first:—Equal parts of rose water, glycerine and lemon juice. Pressure on the arm is sure to make the hands look red and swollen.

"TORNADO" THRESHING MACHINE,

With "Direct Gear" Horse Power.

TESTIMONIALS:

BRISTOL, N. B., January 14th, 1903.

MESSRS. CONNELL BROS., Woodstock, N. B.:

GENTLEMEN,—I suppose you are anxious to hear from the Threshing Machine. She has been tried and came out with the following results:—In 32 minutes, 34 bushels by measure; in 62 minutes, 581 bushels by measure; by weight 641 bushels; this is an accurate statement. Threshing capacity 60 bushels per hour; this Mr. Curtis and myself have decided as correct. She was not forced to run beyond the ordinary rate of speed, cleaned the grain very nice, no clogging, none thrown over, none carried out in the straw. Now, gentlemen, there is something more that I will tell you: it would be impossible for one crew of men to tend this machine, they could not stand it at that rate of threshing. Give her grain that has been reaped with a Reaper, and put in the barn in good shape, and she will thresh 600 bushels in ten actual hours, and do her work with ease, and clean in good shape.

Yours truly,

EDWIN PHILLIPS.

SPRINGFIELD, KING'S CO., OCTOBER 11, 1902.

MESSRS. CONNELL BROS., Woodstock, N. B.:

DEAR SIR,—I suppose you are anxious to hear from the Machine. To tell you the truth, I think her the most perfect I have ever seen—runs smooth and does her work complete; will not waste, no matter how fast you thresh; can take care of a bushel per minute with all ease. I am running her with a very light team, and every day I use, she seems to run faster.

Yours truly,

JAMES H. PICKLE.

Messrs. Cross & Gillis, Lakoville, N. B., Threshed 610 Bushels Grain in one day.

CONNELL BROS., Limited,

WOODSTOCK, N. B.

THE SHERWIN-WILLIAMS FLOOR FINISHES

are good floor finishes. They're made to wear and to stand the racket to which a floor is subjected. They cover right, spread right, dry right, wear right, are right, always. They're most economical, too.

THE S-W. INSIDE FLOOR PAINT FOR INSIDE USE ONLY.

THE S-W. PORCH FLOOR PAINT FOR PORCH FLOORS.

THE S-W. FLOOR LAC FOR STAINING FLOORS.

MAR-NOT A DURABLE FLOOR VARNISH.

THE S-W. FLOOR WAX FOR POLISHING FLOORS.

THE S-W. CRACK & SEAM FILLER FOR FILLING CRACKS AND UNIGHTLY CRACKS.

You choose the style of finish—we give you the best goods for the purpose.

Color cards and full information can be had at our store.
