

The recent marriage of a couple of cripples, each having only half the proper complement of arms and legs, was noted by the press as a "sensational curiosity." But who notes the marriages which occur daily in which both parties are cripples in health.

Crippled health means, as a rule, insufficient nutrition, and lack of nutrition points to disease of the stomach and digestive and nutritive tract. Doctor Pierce's Golden Medical Discovery cures disease of the stomach and other organs of digestion and nutrition, and the perfect nourishment of the body, and as a result it up in sound health and strength.

"I had been a great sufferer from indigestion for the last nine years," writes Margaret Stingle, of Oswego, N. Y., "but today can say I feel like a new woman. I have received much and lasting benefit from Pierce's Golden Medical Discovery. I have followed the advice of Dr. R. V. Pierce, and am happy to say that he is a great doctor now. A thousand thanks for your medicine."

Do not be excited by reading a substance for a shadow. Any substance offered as "just as good" as "Golden Medical Discovery" is a shadow of that medicine. There are cures behind every claim made for the "Discovery."

The Common Sense Medical Adviser, in paper covers, is sent for on receipt of 31 one-cent stamps to pay expense of customs and mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.

GREAT DEMAND FOR CHICKENS.

Department of Agriculture, Commissioner's Branch, Ottawa, June 16th, 1908.

The present time is most favorable for the production, fattening and marketing of farm chickens. There has been such a substantial increase in the consumption of chickens and eggs within the last few years that it is not possible to rear a greater number of suitable market chickens than can be sold with profit. Last year there were not sufficient chickens sold in Canada to supply the home markets. As a result of the shortage of chicken the trade with Great Britain was lessened. This is unfortunate on account of the great demand for Canadian chickens in Great Britain and the good prices that are paid.

The Chief of the Poultry Division, Mr. F. C. Hare states that numerous letters have been received from produce merchants, poultryers and commission merchants, who desire to learn in what localities chickens can be bought in great numbers and at reasonable prices. From several Canadian cities, and especially from Montreal, produce firms have asked to be informed where market chickens suitable for shipping to Great Britain could be obtained in the greatest numbers. British poultryers and commission merchants have repeatedly asked for the same information. The letter of a well established produce house in London, England, was received last week. This firm wished to "start an undertaking for the purpose of importing Canadian poultry to Great Britain." They desired information as to the probable success of such a project and the possibility of obtaining poultry, (especially fowls), in large quantities, and the best districts for the collection, etc., of them. Last fall a firm in Cape Colony wished a poultry trade developed with that Colony. One shipment of Canadian chickens was made to Cape Colony, which arrived in a satisfactory condition and pleased the trade. A New York firm wrote that they desired to import Canadian chickens and were recommended by the Department to a firm in the Maritime Provinces, from whom they purchased chickens and were impressed favorably by them.

SAFE In any Climate and at any Season McGALE'S BUTTERNUT PILLS

They stimulate the Liver and Kidneys; Cure Stomach, Bowel or Biliary Disorders, Biliousness, Constipation, Glaucoma and Purify the Blood and render the Skin clear and Healthy. They are purely vegetable.

FOR SALE EVERYWHERE 25c PER BOX OR BY MAIL ON RECEIPT OF PRICE.

STANTON'S PAIN RELIEF, THE KING OF ALL PAIN REMEDIES. Cures Rheumatism, Colic, Sprains and Neuralgia.

For sale everywhere, price 25c per bottle. Sole proprietors, THE WIGGATE CHEMICAL CO. Limited, Montreal, Canada.

The above and similar requests are difficult of solution even by one in touch with the Canadian produce firms and packing houses that are buying and marketing chickens. The majority of our established firms are equipped with a complete plant for marketing in Canada or Great Britain several times more chickens than they can buy. Their profits are diminished through scarcity of chickens. Nevertheless merchants in Great Britain, Cape Colony, the United States and even in Australia are looking to a supply of Canadian chickens to satisfy their growing trade.

The problem of supplying this wonderfully increased demand for chickens can be solved by the farmers alone. Instead of the farmer rearing fifty or a hundred chickens that receive little attention or feed, he should rear from 200 to 1000 chickens annually. These should be of a utility type, such as can be found in the popular breeds Plymouth Rocks and Wyandottes. The chickens should be hatched and reared by incubators and brooders, and when ready for market the cockerels should be placed in fattening crates and fatted. The equipment required to do this work is not an expensive one; \$200 to \$250 is the cost of incubators, brooders, houses and fattening crates for finishing 1000 chickens. It is as necessary for realizing the greatest profits from the poultry business as threshing and mowing machinery is for general farming. The work connected with finishing 1000 chickens with the proper appliances is no more than is necessary for rearing 200 chickens by the natural means. Poultry farming is a business that requires to be developed in the same manner as the butter, cheese and fruit branches. A substantial profit can be made from the poultry business, when it is carried on as an adjunct to farming, and with the same careful attention and financing.

The Dominion Department of Agriculture is endeavoring to increase the poultry trade of Canada; to encourage the growing of the greatest number of high class chickens, and to assist in the marketing of them. A revised edition of the bulletin "Profitable Poultry Farming" has just been issued, and will be mailed without charge on application to the Commissioner of Agriculture and Dairying, Ottawa. The information it contains is of great value in the poultry work, and it should be in the hands of every interested poultryman in Canada.

ST. JOHN LETTER.

Among the first necessities of civilization are a church, a cemetery and a jail. Soon after the loyalists landed here, St John was provided with all three. People go to church for a variety of reasons; to the cemetery and jail it is generally supposed they go for only one which is, because they are compelled to. When the Old Burying Ground, between Sydney and Carmarthen streets was staked out, our fathers thought only of providing a suitable resting place for their dead, but after a little more than a hundred years, it, with King square close by, has become a sanitarium of untold value for hundreds of children and tired shopgirls and domestics, who have no opportunity except at very rare intervals to breathe the uncontaminated air of the fields and woods. But after all the city park or square is not the genuine thing; it lacks the abundant generosity of nature which is displayed in the fields and woods, almost anywhere beyond the outskirts of the city. Last Sunday was spent by the writer and a little tot of five or six years, on the western shore of Kennebecasis bay. Three churches, within gun shot, invited us to worship; so did a hammock, the shade of a lilac bush and a trout stream, where we found very good fishing. (To the printer: draw a blue line through the last six words.) Of course we did not fish, and of course we enjoyed ourselves amazingly; and when we set out for home the little one cried, not wanting "to go back to the nasty city any more." Bye and bye we shall be wiser. Trolley lines will extend into the country in every direction; every one will have his suburban home and none except firemen and watchmen will think of sleeping in the city (no satire intended) any more than the coal dealer now thinks of sleeping in his coal yard.

The promoters of the Alliance Bank at Halifax propose to absorb several of the leading banks in the Maritime Provinces, including the Bank of New Brunswick.

George H Ham, of the C P R, says the Americans who are settling in the Northwest, "will be good Canadians." It was not necessary for George H Ham to come all the way to St John to say this. Like all good Englishmen all good Americans are loyal to the flag under which they live.

George H McDougal, of this city, expects to inherit several millions left by a deceased relative in California.

All Stuffed Up

That's the condition of many sufferers from catarrh, especially in the morning. Great difficulty is experienced in clearing the head and throat.

No wonder catarrh causes headache, impairs the taste, smell and hearing, pollutes the breath, deranges the stomach and affects the appetite.

To cure catarrh, treatment must be constitutional—alterative and tonic.

"I was ill for four months with catarrh in the head and throat. Had a bad cough and raised blood. I had become discouraged when my husband bought a bottle of Hood's Sarsaparilla and persuaded me to try it. I advise all to take it. It has cured and built me up." Mrs. Hiron Redfern, West Liscomb, N. S.

Hood's Sarsaparilla

Cures catarrh—it soothes and strengthens the mucous membrane and builds up the whole system.

fornia. It is hoped he may get the cash.

One thousand dollars have been subscribed for the equipment of a school for the deaf and dumb in this city.

The marriage is announced of "a prominent member of the amateur base ball league." Of course the future of his wife and prospective children is assured. Good fortune and long life are assured to the prominent base ballist.

John H Stone of Moncton, 23 years old, a shunter in the C P R yard here, had a leg amputated by a car, under the wheels of which he had fallen, last Wednesday night. He displayed extraordinary fortitude after the accident and was taken to the hospital and died the following day.

Several large orders for Union Blend Tea from merchants in Maine and New Hampshire have been executed by Mr deForest during the present week.

Statistics show that the cost of living in St John is twenty per cent lower than it was twenty years ago, while the cost of labor is twenty five to thirty per cent higher.

A policeman shot a valuable dog in the park, the other day, and there is a great ado about it. If it was his duty to shoot a trespassing cur it was his duty to shoot a trespassing thoroughbred.

The labor unions of the city are endorsed by the Lord's day alliance and the Lord's day alliance is endorsed by the labor unions. Ten or fifteen years ago the reign of the Hooligan in the United States began at Homestead and now it is supreme pretty much all over the country. Will Canada take warning? It is doubtful.

EDWARD EDWARDS.
St John, June 27.

Pioneer Days in Canada.

A feature of the Dominion Exhibition at Toronto, to be held from August 27th to September 12th, will be a department representing "The Old Pioneer Days of Canada." In this department will be displayed as many relics of bygone times as can be collected. The secretary of this section is Mr M. Meyer, 408 Spadina Ave., Toronto, who says that the idea is receiving support and sympathy in every direction, and that he has already located and secured many intensely interesting articles for exhibition. He has also enlisted the assistance of many influential people. Mr Meyer will be pleased to receive information of any relic reminding of the Pioneer Days of Canada.

SHAKY NERVES.

Sufferers from Nervous Troubles Are in a State of Continuous Torture—Suggestions as to How the Trouble Can Be Overcome.

When your nerves are shaky your self-control is shattered—your will power is broken. Sudden sounds startle you; your temper is irritable; your hands tremble; there is weakness in your knees; your skin is pale and parched; you are restless at night and tired when you wake. It all comes from nervous exhaustion, perhaps due to overwork and worry, late hours, hot days and want of blood. Dr Williams' Pink Pills is the only cure. They make new, rich, red blood. They brace up jangled nerves and strengthen tired backs. They give health and energy to dull, weary, despondent men and women. Strong proof is offered in the case of Mrs William Westcott of Seaford, Ont., who says: "For a long time my health was in a bad state. I was subject to headaches, dizziness and nervous exhaustion. My appetite was poor, and I was so badly run down I could not stand the least exertion. I tried several medicines and consulted different doctors, but they did not help me at all. One of my neighbors strongly urged me to try Dr Williams' Pink Pills, and before the second box was finished the turning point for the better had been reached, and by the time I had used a half dozen boxes, to the surprise of my friends and neighbors I was again enjoying good health, and have since been strong and well. I do not know anything to equal Dr Williams' Pink Pills when the system is run down."

What the pills have done for others they will do for you, if you will give them a fair trial. Sold by all medicine dealers, or sent postpaid at 50c a box or six boxes for \$2.50, by addressing the Dr Williams' Medicine Co., Brockville, Ont.

Greatest Living All-Round Man.

Lord Kelvin, whose declaration in favor of creative design has come to stimulate waning faith among men of science, has felt a certain shyness in coming forward as an apologist, says *The Chronicle*. He is admittedly the greatest living all-round man of science. As a physicist and a mathematician he has dealt over a long course of years—he took his degree in his early teens, and he is now nearly eighty—with all problems and puzzles except those of life. His methods fail him when he faces the secrets that no physics or mathematics can solve. He estimated the age of the earth, rather to the confusion of geologists and many years ago he made the famous guess that the first life may have been brought to our earth by a meteorite. Fifty-four years of a professorship of natural philosophy in Glasgow have not supplied Lord Kelvin with a theory of life, such as Haeckel's exploded carbon theory, that dispenses with a first cause. Lord Kelvin, though soon to be four-score years of age, is generally recognized by scientists to be in his intellectual prime.

Lord Kelvin, though soon to be four-score years of age, is generally recognized by scientists to be in his intellectual prime.

Lord Kelvin, whose declaration in favor of creative design has come to stimulate waning faith among men of science, has felt a certain shyness in coming forward as an apologist, says *The Chronicle*. He is admittedly the greatest living all-round man of science. As a physicist and a mathematician he has dealt over a long course of years—he took his degree in his early teens, and he is now nearly eighty—with all problems and puzzles except those of life. His methods fail him when he faces the secrets that no physics or mathematics can solve. He estimated the age of the earth, rather to the confusion of geologists and many years ago he made the famous guess that the first life may have been brought to our earth by a meteorite. Fifty-four years of a professorship of natural philosophy in Glasgow have not supplied Lord Kelvin with a theory of life, such as Haeckel's exploded carbon theory, that dispenses with a first cause. Lord Kelvin, though soon to be four-score years of age, is generally recognized by scientists to be in his intellectual prime.
