

## Not Only Relief; A Cure.

### ASTHMA

Many discouraged Asthmatics who long for a cure or even relief have failed to find one. It is a cure impossible. HIRSH'S ASTHMA CURE is a true and reliable remedy and possesses a virtue unknown to other remedies that not only instantly relieves but cures.

The late Sir Dr. Morrell McKenzie, England's foremost physician, used HIRSH'S ASTHMA CURE constantly in his private practice. If you are discouraged send for a generous free sample. It will not disappoint you.

HIRSH'S ASTHMA CURE is a standard remedy prescribed by many eminent physicians and sold throughout the world for over a quarter of a century. A truly remarkable testimonial in itself.

HIRSH'S ASTHMA CURE, 14-16 West 8th St., New York.

For sale by all druggists.

Wood's Phosphorine.

The Great English Remedy, is an old, well established and reliable preparation. Has been prescribed and used by the most eminent physicians in the Dominion of Canada and is recommended as being the only medicine of its kind that cures and gives universal satisfaction. It promptly and permanently cures all forms of Nervous Weakness, Emissions, Spermatorrhea, Impotency, and all effects of these or excesses; the excessive use of Tobacco, Opium or Stimulants, Mental and Brain Work, all of which lead to Early Grave, Insanity, Consumption and an Early Grave.

Price \$1 per package or six for \$5. One will please, six will cure. Mailed promptly on receipt of price. Send for free pamphlet. Address The Wood Company, Windsor, Ont., Canada.

Wood's Phosphorine is sold in Woodstock by all Druggists.

REPAIRING DONE TO ORDER.

M. BREWER,

No. 6 Connell St., Woodstock, N. B.

India's population is 300,000,000, one fifth of all the people in the world.

Husband—Well, dearest, did you get your hat?

Wife (just home from shopping)—Yes, darling, and it is a beauty, and just think, it cost only \$22.50. I'm ever so much obliged to you for the money, and in return for your kindness I have bought you a new necktie. It's very pretty, isn't it?

Husband—It is, indeed, darling. What did you pay for it?

Wife (blushing)—It isn't the cost that makes the thing valuable, you know, but the spirit in which it is given. It cost nineteen cents.

Madge—It must be just lovely to be a millionaire.

Marjorie—Oh, I don't know. There isn't half as much pleasure in buying things when you can afford them.

Green—Say, do you know how it feels to be kicked by a mule?

Brown—No, I don't—and what is more, I don't want you to show me.

Minard's Liniment for sale everywhere.

Window (tearfully)—Yes, my daughters now are my only resources.

Friend—Take my advice and husband your resources well.

Port Mulgrave, June 5, 1897.

C. C. RICHARDS & CO.

Dear Sirs,—MINARD'S LINIMENT is my remedy for colds, etc. It is the best liniment I have ever used.

MRS. JOSIAH HART.

Keep the Balance Up.

It has been truthfully said that any disturbance of the even balance of health causes serious trouble. Nobody can be too careful to keep this balance up. When people begin to lose appetite, or to get drowsy, the least impudence brings on sickness, weakness or debility. The system needs a tonic, craves it, and should not be denied it; and the best tonic of which we have any knowledge is Hood's Sarsaparilla.

What this medicine has done in keeping healthy people healthy, in keeping up the even balance of health, gives it the same distinction as a preventive that it enjoys as a cure. Its early use has illustrated the wisdom of the old saying that a stitch in time saves nine. Take Hood's for appetite, strength and endurance.

I hope you try to push business, John even after office hours,' said a coal dealer to his clerk.

'Up, sir,' replied John. 'I call upon a different girl every night and never leave before twelve, and have a big fire going all the time.'

WANTED—FAITHFUL PERSON TO TRAVEL for well established house in a few counties, calling on retail merchants and agents. Local territory. Salary \$1024 a year and expenses, payable \$10.70 a week in cash and expenses advanced. Position permanent. Business successful and rushing. Send self-addressed envelope. Standard House, 315 Caxton Bldg., Chicago—161-16.

'Dickie, what did your mamma say when she saw us coming along the walk?' asked his papa's company.

'She said; 'Well, well, who on earth has your father picked up now?'

Minard's Liniment Relieves Neuralgia.

Johnnie—Good gracious, Gussy, whatever is the matter with you?

Gussy—Not much, old fellow; but I have just left Miss Brown's. I was going to propose to her when her father came in and asked me my business. I told him, and he laughed at me, made a corkscrew of my hair, slapped me on the face, made a doormat of me, turned me upside down, and then threw me in the street and set the bulldog on me; but, by Jove, if he'd done it again he would have roused the British lion within me.

'Rather absentminded isn't he?'

'Extremely so. Why, the other night when he got home he knew there was something he wanted to do, but he couldn't remember what it was until he had sat up over an hour trying to think.'

'And did he finally remember it?'

'Yes; he discovered that he wanted to go to bed early!'

At last the stern parent came up with the eloping couple. 'Do not take her back,' pleaded the young man, 'trembling almost as much as the motor in his automobile.'

'Take her back?' echoed the stern parent. 'Why? I have come to bring her perfume and chewing gum so she would never have an excuse for coming back.'

Sunday School Teacher—Well, who was sorry at the return of the prodigal son?

Little Girl—The fatted calf.

'Maggie did you make that chicken broth?'

'Oid, num.'

'I can't find it anywhere about; what did you do with it?'

'Sure and that Ise would Oid do it but fade it to the chickens, mum.'

'How do you know it is rheumatism?' asked his friend. 'You haven't seen a doctor.'

'I know what it is, all right,' replied the victim. 'Rheumatism is one of the things that don't need an introduction.'

Utilizing Waste In Slaughter House.

The Saturday Post, in describing how waste is avoided in big American slaughter houses, says: The horns are cut off close to the head, and the pith is removed, to be sent to the glue-pot, while the horns themselves are dried, sorted into various grades, and eventually converted into combs and buttons. Most of the so-called tortoise shell on the market is a really beautiful and very accurate imitation made from cattle-horns, which are reduced to flat sheets with the help of steam, and afterwards colored. The tips of the horns are converted into mouthpieces for pipes, and the scraps left over are sold to the florist as a superior kind of fertilizer.

The bones are utilized in a variety of ways, the knuckles from the feet and shanks being transformed into knife handles, toothbrushes, and buttons. The hard bone takes a high polish and is hardly distinguishable from ivory; the scraps are used by manufacturers of bicycles for case-hardening steel, as well as for poultry food. As for the hoofs, they go to make buttons, glue, and gelatine.

From the blood, albumen is extracted for calico-printing and for finishing leathers. Such portions of the hide as are not utilized for leathers, furnish isinglass, and such of the fat as will not saponify is converted into glycerine and nitro-glycerine. From the fat also is obtained oil for oleomargarine and butterine; the feet yield neat's foot oil, and the tails afford material for curled-hair mattresses. The rest of the hair is transformed into felt, cheaper grades of which are used for insulating refrigerator cars and ice-boxes, as well as for under-carpeting, while the better qualities are employed for horse-blankets, saddlery and hats.

Glycerine, which is now so important a by-product of the packing-house, and for which so many valuable uses have been found, was formerly a waste substance evolved incidentally in the manufacture of candles from palm oil. It was thrown away in quantities. But today the problem of utilizing every portion of the slaughtered animal has been solved so completely that absolutely nothing is lost. Even the gray brain-stuff of the calf furnishes a substance valuable in the treatment of neurasthenia and other nervous diseases, and the stomach of the pig yields pepsin for the benefit of persons with weak digestions. All parts of the beast that are not utilized for food or manufacture find their way back to the farm as fertilizer.

The profitable utilization of the water of cities has been one of the most difficult puzzles in these modern days. Though it has not yet reached its final solution, much has already been accomplished in this direction. In New York, which in this respect is ahead of any other center of population in the United States, all of the refuse collected from house to house is thrown into great iron receptacles and "digested" by steam, after which the cooked material is separated into greases and fertilizer stuff. The greases are shipped to Germany, where the art of treating them is better understood than in this country, and are refined and converted into lard-oil, glycerine, and other valuable commercial substances. The fertilizer stuff is dried and ground, after which it is put up in bags for market, much of it being sent to the Southern States, where it seems to find a special adaptation to the requirements of cotton-planters.

ST. JOHN LETTER.

An election row at Musquash, April 21, is responsible for the death of John Mangan, of Chance Harbor, and the incarceration of Peter Devine, of Dipper Harbor, who is charged with his murder. So far as can be learned politics had nothing to do with the fracas, for which it is alleged that rum and an old grudge are responsible. Mangan, it is said, had been annoying Devine's younger brother when the elder attacked him. When he was picked out of a ditch, into which he had been thrown, or had fallen, it was found his neck was broken. The enquiry into the tragedy begins to-day.

Joseph Cairns of this city, steward of the steamer Yarmouth, was held up by two thugs last Monday night, as he was passing along Water St. When he demurred to their demand for his money he was assaulted and stabbed three times in his left arm. His injuries will lay him up for some time, but are not likely to prove fatal. The highwaymen are still at large and any one who ventures on the street in the evening does so at his own risk.

John Thallon is under arrest for burglarizing the house of John O'Regan, April 22. He has been identified by the shopkeeper to whom he sold his plunder.

While Union Blend Tea in its various grades is Mr. Harry W. deForest's leading production, in deference to the wishes of many of his customers, he is now placing on the market a blend of India and Ceylon teas which has been christened, 'Cash Box Tea.' Three pounds of this blend are packed in a strong iron box, with lock and handle, and it is sold by the grocer for one dollar, which is only a fair price for the tea alone, while the box would cost at the hardware dealers from 50 to 75 cents. It is with considerable effort that pace is kept with the rapidly growing demand in the Maritime Provinces, Newfoundland, Quebec and Maine for these favorite teas.

The criminal record of last Tuesday and Wednesday nights include unsuccessful attempts to burglarize the houses of three residents, one in the west end, one in the north end and one in the south end of the city.

Last Wednesday was the warmest day of the season for many years the thermometer registering 80 degrees in the shade.

Last Thursday a little daughter of Theodore Vanwart of the North End, got hold of some patent pills which she swallowed and died in convulsions soon after.

It is proposed to establish a railway car and steel rail manufacturing plant in this city.

EDWARD EDWARDS.

St. John, May 2.

1840. 1903.

During this period

Painkiller

(PERRY DAVIS)

has cured more cases of sickness than any other medicine. It's the best remedy in the world for

Cramps.

Colic.

Diarrhoea, Etc.

A household remedy.

Miss Slique—I didn't know that Professor Diggs was a woman hater.

Mr. Slabber—Well, what makes you think he is?

Miss Slique—Why, there he is trying to persuade Sapley to get married.

People With Bad Breath.

Generally suffer from Catarrh and should use Catarrhine Inhaler four times daily, and be cured. The pleasant scented Catarrhine vapor spreads through every air passage of the breathing organs, and reaches the very root of the disease at once; it kills the germs, purifies and cleanses the mucous surfaces, and eradicates every vestige of catarrh in a short time.

Pure, sweet breath, free from headache, sneezing and discharge are quickly derived from the use of Catarrhine Inhaler. Complete outfit, guaranteed to cure, costs \$1, trial size 25c. Druggists, or N. C. Polson & Co., Kingston, Ont.

DR. HAMILTON'S PILLS STIMULATE THE LIVER.

Ever with him.—Mr. Flirty (tauntingly)—I saw Mrs. Berryman on the street to-day. She looked charming in her mourning gown.

Mrs. Flirty (sarcastically)—Indeed! It's a pity we all can't be widows.
