**Developing Markets for Butter.**

The Dairy Division of the Department of Agriculture, Ottawa, has again this year operated a number of creameries in the North West Territories so that farmers in districts adapted to dairying might be able to obtain a cash income from their cows until such time as they are able to carry on the work for themselves. Considerable attention has recently been devoted to developing new markets for the butter produced, and the results have been quite satisfactory. In spite of the fact that the price of butter in Eastern Canada has been lower this year than last the patrons of the North West Creameries have received an average net price of 30.88 cents a pound for the butter manufactured from the cream supplied by them, over a cent a pound more than in 1903, and the highest price ever obtained for the season's output of the Government Creameries.

British Columbia has naturally been the chief market for Territorial butter in the past and still continues to take the bulk of the shipments. Freight rates and other expenses are so heavy that a satisfactory trade with Great Britain cannot be carried on at present, but a considerable export trade is being developed with Japan and other Oriental countries. Before the Osaka Exposition there was scarcely any Canadian butter sold to Japan, but in spite of the war some 34,000 pounds have been shipped to that country from the Government Creameries during the first ten months of this year. The total consumption of butter in Japan is not large, but there are indications of a decided increase in demand for the Canadian article at the close of the war.

The Yukon butter trade is also being recovered for Canada. The total amount consumed in that territory annually is over 500,000 pounds, of which nearly 200,000 pounds has this year been contributed by the Government Creameries in the North West Territories. When the country

was first opened several shipments of tinned butter sent up by Canadian firms were found to be very inferior in quality, and, consequently, the Canadian article got a bad name and the market was practically monopolized by the United States. Indeed, until 1903 about the only Canadian butter used in the Yukon was that sent to the Mounted Police. Meanwhile the Dairy Division had been testing various styles of tins and other packages, and had found that a first class article, properly packed, could be shipped there at a profit. Orders for 90,000 pounds were received last year and the amount has been more than doubled this season, as mentioned above.
