Sinking of a British Steamer.

London, July 28th—The British government is taking energetic action in the case of the sinking of the British steamer Knight Commander by the Vladivostok squadron.

All information received by the government tends to establish in the official mind a belief that an outrage has been committed for which no excuse exists in international law. Those aware of the feelings of the ministry said to-night that all the members of the cabinet are in accord regarding the principle of the inviolability of innocent neutral shipping, as well as upon the principle that a neutral ship cannot be destroyed even if carrying contraband of war.

The demands which will be made upon the Russian government will include compensation to the owners of the ship and to the owners of the goods on board the Knight Commander, an apology for the action of the Russian cruisers and an agreement that instructions be given which will prevent a repetition of such act.

British shipowners are up in arms over the dangers which shipping is now running, and are bombarding the government with representations looking to the thorough protection of their interests.

Skiff Lake and Canterbury.

The superintendent of the Skiff Lake Sabbath School is Andrew H Cunningham. About thirty scholars are enrolled. There are four teachers, Mr A H Cunningham, Miss M Cropley, Miss Maude McMullin and Miss Almada Cunningham. The new minister Rev C K Hudson preached his first sermon last Sunday. He had a good congregation and good attention and the people are very much pleased with him. Miss Ella McMullin is organist.

The Canterbury cheese factory is managed by J F Tilley of Woodstock with Tom Watters of Debec making the cheese. It is situated in a central place, but it is not patronized very well this summer, only having an average of about 1500 lbs of milk per day which will make 150 lbs of

cheese. The cheese factory at the Lane, so called, or in the vicinity of Canterbury, is first class in every respect and turns out good cheese. They only get 1500 lbs of milk; they should have 3000 lbs. If the farmers do not take more interest in owning cows and supplying more milk they are liable to lose the factory which would be a great loss. Kind friends think the case over.

Calvin Green saw the artificial leg made by me for a man. It is perfect in every point—equal to any imported leg. Any person in need of such, will be well satisfied by having me do their work. Will make satisfactory prices to all patrons.—Fred A Smith, manufacturer of artificial limbs, Canterbury Station, N. B.
