A farmer coming home late one night met one of his male workers carrying a lantern and accompanied by a village damsel.

"Hello, John," said the farmer, "what are you doing at this hour?" "I'm courting, sir," was the reply. "Courting, and with a lantern? Why, when I was courting I didn't take a lantern."

"No, maister, I should think you didn't from the looks of the missus."

An Irish advocate was representing a plaintiff who was trying to recover the price of a pig which a neighbor had killed. The pig had broken loose and trespassed on the defendant's property. An Irish contemporary gives the lawyer's argument thus: "Gentlemen, is there no protection for a man and his property in this country? Do you twelve intelligent men think the defendant was justified in killing the pig? It was nothing more than robbery. If you find for the defendant, the toime is fast approaching when none of you will be safe in leaving your own dooryard."

"Magistrate—Will you tell the jury what the prisoner said to you, Mr. O'Hanlan?"

Witness—Yer honor, if wan of the juryman will stip over a front of me from beyant there it's with pleasure I'll tell him that same.

Magistrate—Come! no nonsense! Tell the jury from where you are what the prisoner said.

Witness—And, faith, how can I, sor? The wretch only spoke to me wid his boot.

An old bachelor in Scotland, who had been sweet on a bonnie lass in his young days, but was not lucky enough to get her, met a daughter of hers long afterwards and looking at her he said with a sigh—"Ay, lassie, if a' things had gane richt wi' me I wad ha been your father!"

News Too Good to Keep.

Persons who have used Dr. Chase's Kidney-Liver Pills are usually so well pleased with the benefits derived that they tell the good news to their neighbors. There is no medicine which so promptly awakens the action of the liver, invigorates the kidneys and regulates the bowels as Dr. Chase's Kidney-Liver Pills, and for this reason they are unapproached as a family medicine. One pill a dose, 25 cents a box, at all dealers.

TO STAMP OUT CONSUMPTION.

Many of the most thoughtful and public-spirited men of the Dominion are numbered among the officers and members of the Canadian Association for the Prevention of Consumption, which held its fourth annual meeting in Ottawa on April 26th and 27th. Every thinking man and woman must be impressed with the necessity for united action to check the ravages of a disease which causes one death in every eight in this country, and gives rise to a vast amount of suffering and permanent ill-health. It is calculated that in Canada at the present moment between 30,000 and 40,000 persons are suffering from it, yet it is undoubtedly a preventable disease, and one that is curable in its earlier stages.

AROUSING THE PUBLIC.

The report of the executive council pointed out that the operations of the association have combined with other influences to concentrate public attention in some degree upon consumption and to awaken a desire for information regarding the measures which should be taken to stay its ravages. The Secretary, Rev Dr Moore, of Ottawa, during the year distributed by mail and otherwise over 100,000 leaflets on "How to Prevent Consumption," "Rules for Consumptives," etc. Many lectures were also given, with the hearty co-operation and sympathy of medical health officers and other members of the medical profession; the mayors and members of municipal councils, the clergy of all denominations, and the proprietors of newspapers. As the president, Hon Senator Edwards, pointed out, literature such as the association distributes should be in every home, so that the people might be taught the simple means by which the scourge may be avoided. While sanatoria were helpful in the case of those who had the disease, he believed that the great means of its prevention was in education.

INFECTION FROM ANIMALS.

A phase of the question in which farmers are particularly interested was discussed by Dr Ravenal, an eminent United States authority, who is assistant medical director of the Henry Phipps Institute at Philadelphia, in an able address on "Animal Tuberculosis in its Relation to Human Health." Dr Ravenal detailed with exactness the advancement made in the study of consumption since Koch of Berlin made his famous discovery of the tubercle bacillus, and said that in the course of many years experimenting he had not found any animals that were immune from tuberculosis. The lecturer vigorously combated the opinion of Koch and others that there is an essential difference between human and bovine tuberculosis, and cited a large number of experiments in support of his view that these were practically identical. While admitting that the majority of cases of consumption were due to infection by inhalation, he claimed that a considerable percentage could be definitely traced to infection through the digestive tract by food, particularly milk and meat. The few figures available seemed to indicate that about 25 per cent of children's cases were due to the latter cause. He had no knowledge of any case of an adult becoming consumptive in this way. In conclusion, Dr Ravenal urged that while it is important to educate the public, to build sanatoria, and to establish large institutes for the treatment of advanced cases the whole duty of prevention was not being done if the possibility of infection from animal sources were neglected. The speaker was most favorably received, and at the close of the lecture was accorded an unanimous vote of thanks on the motion of His Excellency, the Governor General, who has always taken a great interest in the work of the association.

FRESH AIR, LIGHT AND SUNSHINE.

The keynote of the convention was "Live as much as possible in the open air." Fresh air, light and sunshine are most important preventives of consumption, and all rooms occupied by consumptives should be as well lighted and ventilated as possible. Living in over-crowded, ill-ventilated, dark, dirty rooms, insufficient or bad food, dissipation, or anything which enfeebles the constitution and thus impairs its power of resistance, is likely to facilitate the invasion of the system by the germs. These are found in vast numbers in the dust particles of the dried spit of the consumptive, and in the minute droplets sprayed into the atmosphere by the consumptive in coughing, consequently spitting about the streets or in buildings (churches, schools, theatres, railway

stations, etc.) is a dangerous as well as a filthy habit.

THE SANATORIUM TREATMENT.

The ideal place for treating incipient cases of tubercular disease is in the municipal fresh air sanatorium where the patients may enjoy the best of care, without being altogether removed from the watchfulness of their friends and family physicians. Every patient who is cured in the sanatorium becomes an apostle of the gospel of fresh air, hence these institutions serve as object lessons of the greatest value. It is for this reason mainly that the Nova Scotia Government has just erected a sanatorium at Kentville with a capacity for 18 patients. In the whole Dominion there are only four other institutions devoted to the treatment of consumption. Three of these are under private control and management, and one is the property of the National Sanatorium Association of Ontario. The total accommodation in all of these, with that in hospitals to which consumptives are admitted, probably does not exceed 200 beds. We are indeed poorly equipped for the fight, since the sufferers are so vast in number and so widely distributed as to require a home for consumptives in nearly every county. Only the hearty co-operation of the Dominion and Provincial Governments with the municipal councils seems likely to afford a satisfactory solution of the problem of dealing with what should be no longer the "great white plague."

A Farmer Cured of Rheumatism.

"A man living on a farm near here came in a short time ago completely doubled up with rheumatism. I handed him a bottle of Chamberlain's Pain Balm and told him to use it freely and if not satisfied after using it he need not pay a cent for it," says C. P. Rayder of Pattens Mills, N. Y. A few days later he walked into the store as straight as a string and handed me a dollar saying 'give me another bottle of Chamberlain's Pain Balm. I want it in the house all the time for it cured me.' For sale by all druggists.

Constant Dread of Paralysis

Left arm got numb—Doctors said nervous exhaustion—Remarkable cure by Dr. Chase's Nerve Food.

Mrs. CHAS. S. CHAYEN, North Gower, Ont., writes:—"I do not hesitate to recommend Dr. Chase's Nerve Food and would not begrudge fifty dollars for the good it has done me."

For six years I suffered with severe pains in my right shoulder and numbness in my left arm. No tongue can tell what I suffered. The doctors said the trouble was from the nerves but their medicines proved of no avail so I resolved to give Dr. Chase's Nerve Food a trial. After using six boxes of this medicine my health was so greatly improved that I got more rest and I used in all twenty-eight boxes with the result that I am completely cured. I do not feel that I can use strong enough words in recommending this medicine to all who suffer as I did."

Dr. Chase's Nerve Food 50 cents a box. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box of his medicine.

GREATLY ALARMED

By a Persistent Cough, but Permanently Cured by Chamberlain's Cough Remedy.

Mr H P Burbage, a student at law, in Greenville, S.C., had been troubled for four or five years with a continuous cough which he says "greatly alarmed me, causing me to fear that I was in the first stage of consumption." Mr Burbage, having seen Chamberlain's Cough Remedy advertised, concluded to try it. Now read what he says of it: "It soon felt a remarkable change and after using two bottles of the twenty five cent size, was permanently cured." Sold by all druggists.
