### Removed Man's Heart.

One of the most extraordinary operations known to medical science was performed at Germantown, Philadelphia on Monday last. In fact the operation was the removal of a man's heart from his body and its replacement after a bullet had been extracted from the region adjacent to it. Frank Robinson, 23 years old, of Germantown, was shot on September 7 by policeman Morley while the latter was trying to arrest him. The bullet entered Robinson's chest on the left side. He was hurried to the Germantown hospital where it was believed that his heart had been struck. Some of the most eminent physicians of the city were called into consultation. Portions of two ribs were removed exposing the heart to view. No evidence of a bullet could be seen so the surgeon with great care partly removed the organ from the body. The bullet was found imbedded in the flesh within a fraction of an inch of the heart, upon which it has caused pressure. The heart was then replaced and the ribs returned and covered with flesh. There is every probability that Robinson will entirely recover. The operation is regarded as one of the greatest surgical triumphs of the present age.

Fifty farms, varying from 200 to 300 acres, have been set aside by the Government of New South Wales for allotment to the first British applicants on easy terms.

### What the Saleswoman Said.

"Yes, we like to sell Stanfield's Truro-Knit Ladies' Underwear, as we know our customers will be delighted with it. We feel so safe with Stanfield's, too. We guarantee it not to shrink. If it does, we return the money, and the makers reimburse us."

### Stanfield's Truro-Knit Underwear

is made of the finest non-irritating yarns. All the wool is of uniform length. So carefully is this underwear made that even every thread is tested before being woven. That is why Stanfield's "Truro-Knit" is so soft, light, warm and durable.

We have Stanfield's "Truro-Knit" in such a range of sizes that we can perfectly fit every figure. And it wears so well that while a little more expensive to start with, it is really the cheapest in the end."

William Adams, life saver at Gorseston, an English seaside resort, has saved the lives of 74 persons, besides rescuing hundreds of others from perilous positions. He has been presented with gold, silver and bronze medals, several of the Royal Humane Society's certificates and numerous private tributes to his bravery.

Cornhill, Piccadilly, is the highest rented spot on earth. A single room was let not long ago for between £2,000 and £3,000 a year. In the West End a small shop with basement, fetches over £1,000 a year in Bond Street, and the remainder of the house lets at proportionate sums. The rateable value of London is about £40,000,000, of which sum £18,000,000 is represented by the value of sites.

It is believed that Argentina will one day be the world's great dairy region. At present there are over 1,800,000 cows in the republic.

### A BABY CHANGED.

"One could hardly believe the change Baby's Own Tablets have wrought in my child," says Mrs. Angus Morrison, Port Caldwell, Ont. "He suffered terribly while teething, vomited his food and was weak and puny. One box of Baby's Own Tablets made him a changed child. They eased the pain of teething, strengthened his stomach, and he is now a big, healthy child, growing finely and never sick a day." The experience of Mrs. Morrison is that of thousands of other mothers who have found health for their little ones and comfort for themselves in the use of Baby's Own Tablets. Mothers need not be afraid of this medicine, it is guaranteed not to contain an atom of opiate or strong drug. They could not harm a child of any age, and they are good for number one, too, as they are good for Baby's Own Tablets or send 25 cents to The Dr. Williams Medicine Co., Brockville, Ont., and get them by mail.

### PREVENTING FROSTS.

Orchardists will be interested in learning of results accomplished in the Middle West to prevent damage from frost as described by C. W. Williamson of Quincy, Illinois, who is president of the Mississippi Valley Apple Growers' Association.

Mr. Williamson's report was continued to only one of his orchards, which is located within a few miles of Quincy. He had no more special information in advance of the April freeze than any other apple grower, and yet anticipating what might happen, he used the precaution early in April of starting smudge fires. In preparing for such fires, the inexpensive material consists of using brush at the bottom, which makes a draft, and then a covering of cheap straw and the third covering of stable manure, all of which can be procured without much cost on any farm.

When such fires are started they will burn and smoulder for weeks, and if they send up nothing but smoke this alone is quite a sure preventive of damage from frosts. It was further interesting to know that Mr. Williamson put a watchman in his orchard at night with instructions to record the temperature at every passing hour. On the night of the freeze, April 27, at 11 o'clock, the mercury registered 51 degrees. This being 22 degrees above freezing, the watchman naturally anticipated a comfortable night and was about to retire, but a sense of duty influenced him to stay up a while longer.

At 12 o'clock he noticed a rapidly falling temperature and in the early hours of the morning the mercury registered 27 degrees, which is 5 degrees below the freezing point. At 7 o'clock on the following morning the mercury registered 40 degrees.

### Rheumatism

Ought to be called by its right name—Kidney Disease. Uric Acid gets in the blood, because the Kidneys are too weak to filter it out. "Blood purifiers"—"salts"—only relieve temporarily. Strengthen the kidneys to do their work, and there will be no more excruciating rheumatic pains. And until

you do cure the kidneys you will suffer with Rheumatism.

### GIN PILLS

cure Uric Acid Rheumatism by curing the Kidneys. They clean and purify the kidneys—make them strong enough to do nature's work as it should be done.

We have such implicit confidence in the remarkable virtues of GIN PILLS that we authorize druggists to refund the money if they fail to cure.

At all druggists, or box, 6 boxes for \$1.00. We will send you a free trial box if you will write mentioning this paper.

## The Pandora Thermometer

The thermometer on the Pandora range oven means precisely in accuracy to the cook what the square and compass mean to the draftsman. Without the square and compass the draftsman would have to work entirely by guess, just as you do without an accurate and reliable thermometer on your oven.

The Pandora thermometer reduces cooking to an exact science. You know precisely how much heat you have and what it will do in a given time. It is one of the small things which makes the Pandora so much different and better than common ranges.

### Burglars and Chloroform.

Doctors agree that the public is wrong in the popular conception that burglars sometimes chloroform the inmates of a house before committing a robbery. The usual story is that the anaesthetic was squirted into the sleeping room through keyholes. A Kansas City surgeon who has had occasion to administer chloroform or ether 500 times says that chloroform administered in this manner would put a quietus on the burglar as well as the inmates of a house. Physicians have tried many times to administer chloroform to sleeping persons and have met with very poor results. The first effect of an anaesthetic is not to lull to insensibility, but to arouse all the mental and physical vigor of the person to whom it is given. —Kansas City Journal.

### Notice to Subscribers.

It is now September. According to the terms of notice already given, we are gradually commencing to weed out those who are in arrears, sending the statements of amount due us to our solicitor for collection. This week more than thirty accounts have been put in his hands, and the work will proceed until we have placed our list on the sound and practical basis intended.

Every twenty-three minutes some New Yorker dies of consumption; every two days one is murdered; once every two weeks occurs a murder that baffles solution; in one out of every twenty marriages the bond is broken in divorce; somebody fails in business every six hours.
