News from the Country.

Peersville.
Sewing are all the order lately. The last was held by Thompson Fleming and was well patronized.

Miss Rachel Doye of Benton is visiting her sister Mrs Rankin Speer. The ladies auxiliary met at the home of Mrs W S Speer Thursday afternoon, much business being transacted. A special feature was the presentation of a life membership to Mrs Andrew Blackie. A carefully prepared address was read by Mrs L E Speer.

Mr and Mrs Blackie intend leaving in a few weeks for Lowell, Mass, where they will make their future home. They will be much missed in church and social functions.

We are sorry to have to report the critical illness of Mrs Thomas Fleming. But little hopes are entertained for her recovery.

Master Marvin Edwards of Eureka, Cal, is visiting his grandparents Mr and Mrs J Speer.

Miss Jean Paul who has been spending several days dressmaking in this place has returned home.

The interior of the Presbyterian church has been much improved by being newly papered and painted.

HUNTERS

Send for our price list of cash for your furs. Also our letter as to values. You miss an opportunity if you do not write at once.

REVELLON BROS. Ltd.
134 MCGILL STREET - MONTREAL.
Royalton.

Chas Robinson of Maine is doing an extensive lumber business at the Klondyke. Many of our young men are making their everlasting fortunes with him.

A certain young man tracked a deer from Boundary Line to Royalton but lost the scent.

Oyster stews seem to be the order of the day. The chief event of the season was at Wilfred Crawford's Friday evening; over thirty were present and a very enjoyable evening was spent.

There was a chicken supper on the evening of the 17th inst at the home of Councillor W J Owens. The proceeds are for the benefit of the United Baptist Church at Tracy's Mills. All are counting on having a good time.

The Reformed Baptists intend having a S S Convention in their church about the last of this month. Revs Ganong and Anderson and other S S workers will be in attendance.

Who smuggled a horse Sunday night?

We are sorry to say Miss Kate Weade is still in a feeble state of health.

"Wonder if 'Nig' has found his mate yet."

J A Owens has to haul water two miles for all his stock and house; rain is badly needed.

I wonder who heard the owls one night; they are very plentiful this season.

Our school buildings have been much improved; they have been painted. A very handsome flag has been purchased and a flag pole donated by C A Simonds is admitted by all the best in this part of the county. We understand the school teacher is learning the carpenter trade.

HAYNEED.

Lower Greenfield.

As this place is not heard from very often, a few notes may be of interest.

At one time it seemed as though we were to have winter in earnest, but since the rain of the 16th it looks as though we were going to have a few more Autumn days.

On the evening of the 15th there was skating on Tweedie's lake, though only a few took advantage of it.

Thos. Caldwell is getting wood for the school house and putting it in the shed which has recently been erected. He is wearing a very smiling face since the arrival of a girl baby in the family.

F B Meagher, Inspector of schools, paid a visit to this and the neighboring schools last week. Nothing is more sure than the unexpected. Our school is being taught by Miss Frances Kinney.

Miss Clara Shannon who is teaching in Summerfield spent Sunday at home. Were you at the grand Ball in Thos. Leith's unoccupied house? A large crowd chiefly from Summerfield and Back Greenfield gathered and there wiled away the golden hours till the wee small hours of the morning. C. Smith rendered music on the violin.

Mrs Belle Shannon is looking for her sheep that have been gone for several days.

Jno Holmes has been rearranging his buildings which adds to their appearance.

Mrs Smith of Houlton was visiting her sister, Mrs Basil Kilpatrick last week.

Should you find space for this in your valuable paper you may hear from me again.

TOBY

Bristol.

The book and literary club met at the home of Mrs Chalmers W Brittain on Tuesday evening. Mrs Geo Caldwell gave an account of the life of Dr Drummond. Biogenesis from

Natural Law in the Spiritual World by Dr. Drummond was the subject under discussion. Rev J H A Anderson, Mrs Dr. Wright, Miss Maude Hartley and others participated in an informal discussion. A few selections of music were given in closing.

Mr Ernest Carey having changed his residence has resigned his position as president of the club. Mrs Dr. Wright was elected to fill his place.

The financial standing of the club is good.

The meeting of Dec 5th will be called "An Evening with Tennyson" and will be held at Mrs A McLean's. In the near future a lecture under the auspices of this society will be given.

BLOODLESS GIRLS.

Find New Health Through the Use of Dr. Williams' Pink Pills.

When you see a young girl pale and ailing and wasting away, you know that budding womanhood is making new demands upon her blood supply which she cannot meet. Month after month her health, her strength, her very life, is being drained away. No food, no exercise can do her any good. Common medicine cannot save her from broken health and a hopeless decline. New blood is the one thing that can make her healthy, cheerful, rosy-cheeked girl. And Dr. Williams' Pink Pills actually make new blood with every dose. That is the whole secret of how they have saved thousands of pale, anaemic girls from an early grave. Miss Alice Chaput, aged 17 years, living at 475 St. Timothy street, Montreal, gives strong proof of Dr. Williams' Pink Pills cure. "A couple of years ago," says Miss Chaput, "I was an almost continuous sufferer; and became so weak I could hardly go about. I suffered from frequent and prolonged spells of dizziness, I had frightful headaches, and my stomach was completely out of order. The least exertion would make me worn out breathless, and I did not appear to have a drop of good blood in my body. I consulted a doctor who told me the trouble was general debility, but his treatment did not help me a particle. To add to the trouble my nerves gave way, and I became so nervous that I could not sleep. At this stage a friend advised me to try Dr. Williams' Pink Pills, and I got a few boxes. The first benefit I noticed from the use of the pills was an improved appetite, and this seemed to bring much relief. I continued taking the pills until I had used six boxes, when I was fully restored to health, and I have not had a day's illness since. I cannot praise Dr. Williams' Pink Pills enough for the great good they have done me."

A pale anaemic person needs only one thing—new blood. Dr. Williams' Pink Pills do one thing only—they make new blood. That is all they do, but they do it well. They don't act on the bowels. They don't bother with mere symptoms. They won't cure any disease that isn't caused by blood with good blood they strike right at the root and cause of all common diseases like headaches, sideaches, backaches, kidney trouble, liver complaint, biliousness, indigestion, anaemia, neuritis, sciatica, locomotor ataxia and the special secret troubles that every woman knows but that none of them like to talk about, even to their doctors. But you must have the genuine pills or you can't be cured, and the genuine always have the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around the box. Sold by all medicine dealers or sent direct by mail at 50 cents a box or six boxes for \$2.50 by writing the Dr. Williams' Medicine Co., Brockville, Ont.

STABLE THE STOCK.

To the Editor of Carleton Sentinel:-

In a journey through New Brunswick during the month of November the casual observer cannot help but be struck with the fact that much of the live stock kept on the farm is allowed to roam over the frozen fields, and a good deal of it looks as if it had never been near the stable this season at all. This is a great mistake for the stock, the owner and the fields. It takes off what little surplus flesh the cattle and sheep may have got during the summer and autumn and gives them a rough and staring coat indicating unthrifty condition, it is a direct money loss to the owner, and is very bad for next year's hay or pasture crop to have the grass gnawed down to the very roots and to have the surface cut up with hoof tracks every time the ground softens up.

The man who keeps his stock for profit will have his stables ready for them as the nights get frosty and put in his cattle also during cold rains. There is always a roughness of fodder about most farms at this season of the year which often goes to waste and which will help to keep the stock vigorous during the late fall and early winter. For instance there are the turnip tops which if carefully piled up when the roots are pulled, and later taken to the barn, are one of the best fodders to mix with some straw or hay on a frosty morning that can be found. In fact the tops of all vegetables are worth saving and will be relished by stock of all kinds. In France and Germany, these tops are carefully made into ensilage and in this form are preserved for winter feeding. Here we do not grow roots extensively enough to warrant ensiling them but what we do grow are well

worth taking to the barn for feeding. Turnip tops will keep for weeks if put up in small piles of a bushel or so. White turnips which can be sown almost any time through the summer and give a good yield are also good and cheap for November and December feeding.

The chaff from the threshing machine is another by-product, so to speak, which is wasted, so far as feeding is concerned, on many farms and which furnishes cheap and good fodder if fed mixed with a few pulped turnips and a handful of grain. The hay seed, clover heads &c on the barn floor so often allowed to get full of dirt and thrown out carelessly on the manure heap is a valuable feedstuff if preserved clean and dry, it may be fed the same as the chaff or moistened and slightly salted will give a change of diet much relished by cattle and sheep.

The writer knew a very successful calf raiser who always took pains to carefully gather up his hay and clover seed &c from barn floors and carefully store it away until his crop of young calves were able to eat fodder, when the hay seed was moistened, mixed with crushed grain and fed to great advantage from the time the calves were a month old until the supply was exhausted.

Our stables also will bear some improvements, more window glass, and tighter doors and walls are necessary for successful stock raising. In making the stables warmer however the mistake must not be made of preventing all escape of foul air. Every stable should have ventilating tubes, and if the doors and windows are made airtight there must also be means provided for admitting fresh air. Practically, as a general rule, ordinarily tight doors and windows and walls admit plenty of air and if there are ventilators to carry off the foul air they will be sufficient.

After cattle are stabled, care must be taken to see that they do not become infested with vermin. One of the easiest plans for prevention is to clip the hair off the back of a space about 3 inches wide on each side of the backbone and upon this smear a good coating of Black Champlion oil. If lice are afterwards noticed, these applications should be repeated at weekly intervals until all of them have disappeared.

If our St. John valley farmers are to make any money out of stock raising they must give the matter of feeding and care more attention, and when they are prepared to attend to these points it will pay them to invest in good bulls for the improvement of the size, milking and fattening quality of their stock.

About a fortnight ago a St. John firm got a shipment of 31 head of cattle from an upriver point. Yesterday a number of the firm in conversation with this said, although we have had this lot of cattle on our hands for two weeks we have only killed 10 of them and we find the carcasses practically unsaleable, no retailer wants to handle the beef at the price. There is no meat on the loin, there is less if possible on the loin. In fact the carcasses are more than 50 degrees bone and undesirable in every way.

Why will our intelligent farmers put such cattle as the above lot on the market? If there is any good and sufficient reason why New Brunswick cannot produce beef of good quality it is up to somebody to explain. St. John, N. B. H. W. G. 20th. Nov. 1905.

"SAVED MY LIFE"

—That's what a prominent druggist said of Scott's Emulsion a short time ago. As a rule we don't use or refer to testimonials in addressing the public, but the above remark and similar expressions are made so often in connection with Scott's Emulsion that they are worthy of occasional note. From infancy to old age Scott's Emulsion offers a reliable means of remedying improper and weak development, restoring lost flesh and vitality, and repairing waste. The action of Scott's Emulsion is no more of a secret than the composition of the Emulsion itself. What it does it does through nourishment—the kind of nourishment that cannot be obtained in ordinary food. No system is too weak or delicate to retain Scott's Emulsion and gather good from it.

We will send you a sample free.

Be sure that this picture is the form of a label on the wrapper of every bottle of Emulsion you buy.

A FINANCE REVIEW.

A prospectus emanating from the Albert Soaps Ltd, has fallen into our hands and has been perused with great interest. It is not often that companies take the public into their confidence so completely as has been the case in this instance. A more unreserved statement of facts than is usually given is to be desired. This Company, however, has clearly given the status of its business. The reader is struck at once with the fact that the vendors are taking their compensation by means of script in the company and have agreed to continue the management practically free, the only consideration being a nominal royalty on their "Baby's Own Soap" whilst the only cash payment they appear to be entitled to will be the value of the stock and the amounts due from their customers which latter the vendors guarantee. This arrangement on the face of it has every appearance of a sound commercial flotation. Continuing further a most satisfactory showing is revealed by the list of profits for the past four years. At January 1901 the net annual profit was \$11,519.00, whereas at the financial year of 1904 it has reached \$15,374.00, an amount

which would be sufficient to clear the mortgage, interest and carry 5 per cent interest to common stock.

The amount of trade done in the special "Baby's Own Soap" is also excellent reading. From a moderate turnover of 27,000 boxes in 1896 it has risen in 1904 to the magnificent total of 23,000 boxes.

The directors intention is to give the preference in allotment to their many trade clients, and by this means to insure increased interest in their sales, and at the same time securing to the shareholders an apparently thoroughly safe and profitable investment. The Canadian Grocer, Toronto, Oct. 8th, '05.

It is not certain that this stock will be offered to the public as it may be reserved exclusively for sale to the Soap Trade—but doubtless, should any readers of the CARLETON SENTINEL communicate with the Albert Soaps Ltd, 169 McCord Street, Montreal, full information will be supplied.

The succession duties on the estate of the late George Roach of Hamilton amount to \$7,500. Hon. Mr. Matheson has said nothing about his old policy of abolishing the succession duties since his return from Britain.

Gray's Syrup of Red Spruce Gum For Coughs and Colds.

"Where one fellow reads a man's character in his face, a hundred read it in his clothes."

How do the hundreds read yours—well dressed, therefore careful, has good taste, and is prosperous? Or badly dressed—therefore careless and "not doing well"?

Look for it

Take no other

"Progress Brand" Clothing

is the clothing for men who want their appearance to count FOR them, instead of against them. It looks good, and it makes the man in it look good.

There is success ahead for the man who backs up his good appearance in Progress Brand Clothes, with good work.

Clothes can't make a gentleman. But if he IS ONE, "Progress Brand" clothes will make him look the part.

Why Tea Quality Varies

YOU know how the quality of strawberries from the same patch will sometimes vary from one day to another.

One day sweet, compact, well ripened, well colored, richly flavored—next day it rains, is cloudy,—following picking is soggy, sour, green, coarsely-flavored, poor.

Tea, also, on account of its volatility of flavor, after picking and during the curing process is very susceptible to weather changes. A few hours of sunshine or bad weather after picking may make the difference between good and poor tea.

So that while one picking may be first class, the next from the same garden may be very poor.

I select only the pickings which come up to the Red Rose standards of richness and strength in Indian, and delicacy and fragrance in Ceylon teas, and thus that "rich, fruity flavor" of Red Rose Tea is produced and maintained.

Red Rose Tea

is good Tea
