Forty Years Ago.

Taken from The Carleton Sentinel of Sept. 9th, 1865.

At the Wesleyan tea meeting Tuesday evening there was a choir under the leadership of L P Fisher Esq with melodeon accompaniment by Miss Connell and Miss Baird and violin by Mr McKenney. Mrs John Leary sang a solo, "Tenting on the Old Camp Ground," which elicited great applause. Speeches were made by Hon Chas Connell, Rev Messrs Bleakney, McLardy, Simpson and Glass, and Messrs J R Hartley, W Lindsay, Johnson of Halifax, Sam Watts, R A Hay and L P Fisher.

Here is a notice that appeared in the SENTINEL of Sept 16th 1865.

MARRIED.

At Houlton on the 13th inst, by Rev. Geo. F. Piper, Mr. J. Holland Knight, to Annie E. T. youngest daughter of Stephen Parsons, Esq., of Woodstock. (No Cards.)

[This notice was accompanied by a remembrance from the bride's lot. Our best wishes for a long and happy life are tendered.]

The "best wishes" seem to have borne fruit. The SENTINEL is still a weekly visitor in the now far western home of the couple.

SAKHALIN A TRAGIC ISLAND.

Sakhalin is the place to which Russia sends her violent convicts. The convict at Siberia has some liberty to console him for his detention, but the convict at Sakhalin none. When a party of convicts (having been pronounced "violent" by the governor of the Siberian station) is landed at Sakhalin the procession to the jail is as follows—First among the prisoners come men with fetters on their legs linked together in pairs, the clanking of their chains making a lugubrious noise. Next come half a dozen men, each without fetters, but secured by the hands to a long iron rod. Then follow female prisoners and after them the most effecting part of the whole—the wives and children who have elected to accompany into exile their husbands and fathers. Behind them rumble 'telegas' or rough waggons, wherein are transported baggage and those children who are too young or infirm to walk.

When on the march the prisoners are allowed three pounds of bread and one half pound of meat each day, and they are not forbidden to eat. But when they arrive at their destination their lot is a pitiful one. Their cells are damp and fungus covered, their food is less than the allowance during the journey and their work in the salt mines is most exhausting. Many of the prisoners are very ignorant. Few of them can read except the Caucasians but they are all put to the same laborious work, and in the event of their being physically unable to perform their allotted tasks, punishments are very cruel. The English 'cat-o'-nine tails' is nothing to the tortures of the 'bodiga'. In this instrument of torture the prisoner is so fixed that he can neither move nor cry out and wire thongs bound at the end with pointed tins strike his back at frequent intervals. Other tortures to which prisoners are subjected are too dreadful to write about, and during all these tortures the prisoner is prevented by gags from obtaining the poor relief of a scream. Surely the horrors of the salt mines of Iletskaya are nothing compared with the abominations of Sakhalin.

Physical Training.

A physician points out in a contemporary that there is not the slightest need of girls to engage in elaborate gymnastic exercises or to practice beauty culture in order to obtain good complexions and healthy physiques. The very best training for the muscles is to be found in ordinary housework, and when the body perfectly healthy the skin will be cleared and the eyes brightened. It is not given to all girls to be able to indulge in outdoor sport, which is, of course, the ideal way of getting exercise, but all can perform simple household duties, and these, if done with open windows and in a brisk way, will do far more for those who perform them, says this doctor, than ordinary drilling.

Napoleon's Manners.

Napoleon was rude. His manners were coarse, and when at table he ate as fast as he could chew and swallow, shovelling the food into his mouth with his knife and using his fingers whenever they came into more convenient employment. When talking to his officers he often as a friendly favor pulled their whiskers or pinched their ears. To women he was almost invariably offensive, sometimes uttering language so coarse as to bring a flush of shame to their cheeks and tears to their eyes.

The SMALL & FISHER

Thresher, Separator and Cleaner.

These are Indisputable Facts.

We claim our Thresher and Power to be the most durable machine on the market. We do not ask intending purchasers to accept this statement without proof, so, to get at the average cost of repairs on our machines, we selected recently the accounts of twelve men who purchased machines from us twelve years ago. These parties live so far away that they could not get repairs without ordering by letter or telegram, and having the account for repairs charged on account, the total sum of these twelve accounts amounted to \$168.94. Fearing some parts might have been obtained through agents, we added to the above sum all repairs purchased by them (some of which no doubt were for other machines than the twelve), amounting to \$65.95, making a total of \$234.89 for seven years, being \$33.55 per year for repairs, including teeth for twelve machines, and only the small sum of \$2.78 per year for each machine. We do not doubt but what some repairs have been made by carpenters and blacksmiths near where the machines have been working, but if so it is not an advantage for a man to own a machine that does not require him to send perhaps 100 miles or more to the factory for repairs, at great expense of time and money.

Red Rose Tea Uniformity

A TEA that is good to-day and poor to-morrow is unreliable.

Have you ever noticed variations in the quality of the tea you use? One package good, the next bitter, herby, perhaps weak and insipid.

A lack of expert knowledge by the tasters and blenders of that tea produced that result. There was a failure at a vital point, an ignorance of combining qualities in teas, poor judgment in the blending of that maker's teas, a weakness which invariably gives just such results as your poor tea.

Every chest of Red Rose Tea is tested at the gardens, again by the Eastern Red Rose shippers, then at the Red Rose warehouse upon its arrival before blending; after that an experimental blend is tested, and the final or actual blend is also tested before being packed.

Nothing is left to chance.

That is why that "rich fruity flavor" is always present in Red Rose Tea.

Why Red Rose Tea is always uniform, why

Red Rose Tea

is good Tea
