D & A CREST CORSET

insures the straight front effect, the flat abdomen, the gracefully rounded hips, in a word that charm of figure which every woman desires. The upper section overlaps the under section, giving double bones, and so double strength where most needed. When the body is bent in any direction these sections give slightly on each other, which prevents the corset breaking at the waist line. All bones and steels absolutely rust proof.

THE ONLY CORSET IN THE WORLD
THAT CANNOT BREAK AT THE WAIST
