STARTLING ATTRACTIONS AT THE ST JOHN EXHIBITION.

The amusement which have been announced by Mr Spencer are certainly the greatest that have ever been gathered under one roof at any Fair. The big hall will be converted into a Hippodrome, where the head line act will be Barlow's famous performing elephants, four in number. These were the leading attractions at the New York Hippodrome, and constitute perhaps the most celebrated animal act in existence. They are certainly wonders, performing an infinite variety of tricks, including a barber shop scene, where one elephant shaves another, and the final act as performed at the Hippodrome was "chuting the chute" where the elephants slide down a steep incline into a big tank of water. The New York Hippodrome where these tricks elephants played all this year, and created a perfect furor, is the biggest amusement place in the world.

In order to get these elephants into the amusement hall, which is on the second story, it will be necessary to have them, at each performance, walk up stairs on their hind legs, just like human beings.

The second act in the Hippodrome is Wormwood's Animal Circus, composed of twenty dogs, twenty monkeys, two bears and two humans. This great act, unique of its kind, has just returned from a six months' tour in Europe, and these clever animals will make a whole show in themselves, performing in a way that is scarcely credible. It is the cleverest animal circus in existence.

The third act in the big hall is Montague's Cockatoo Circus, consisting of fifteen large white cockatoos, who perform a programme of amazing acts, including Roman Chariot Races, horizontal and triple bar work, balancing a barrel on wire in mid-air, and a remarkable exhibition of a very sensational success entitled "Fighting the flames." In this feature of the act a small house is seen in flames upon the stage. The Cockatoo Fire Department rush to the scene with all the necessary apparatus. Some of the active birds raise ladders to the burning building, and climbing to the upper story, throw all the furniture from the window, and after much effort, this novel fire department finally extinguish the flames. This Cockatoo Circus forms a show by itself, and is at present showing at Atlantic City, being the only act in a specially constructed theatre there.

The magnitude of these Hippodrome acts can be understood better from the statement that the cheapest of them is costing the St John Exhibition more than Adgie and the Lions cost them at the last Exhibition. It will cost three or four hundred dollars to transport the elephants alone to St John, the only way of shipping these animals being by express, as no railway will handle them in their ordinary freight cars.

The elephant act will have with it a pony and two leaping greyhounds, which are not in the original act, and in addition to Pete Barlow, the most noted of living elephant trainers, there will be several attendants, and Mr Barlow's wife, who does the celebrated tight wire walking on a wire held by an elephant at either end, and perhaps the most novel wire balancing act that is in existence to-day.

Wormwood's Circus will have 4000 lbs of excess baggage, which will give some ideas of the magnitude of the performance.

The smaller amusement hall will have equally big attractions of a vaudeville nature, headed by Dida, the world's most celebrated delusion, in which a beautiful woman is created before the eyes of the spectators, from nothing. In order to make the mystery more complete, a second woman of any complexion desired, is created before the public gaze, at the will of the magician. This act created the sensation of the year at Hammerstein's, New York, the leading vaudeville theatre of America.

In the small hall will be Hellman's greatest of living Magicians, who is bringing with him to St John a number of acts which have never been shown before.

Mr Spencer, who is in charge of the amusement end of the St John Exhibition, has certainly outdone himself in his efforts to produce something that would startle the Maritime Provinces, for not only have none of these acts ever been seen here, but as a matter of fact, none of these big acts have ever been seen nearer than New York.

The St John Exhibition Amusement Attractions are certainly as strong as any that have ever been seen at any Exhibition in America.

With his new diving suit, M de Pluvy, the French hydraulic engineer, has made considerably more than 100 descents, reaching depths of 150 to 300 feet—much below the limits of ordinary diving. No air is received from the outside. The dress consists of an armor of sheet metal from one-fifth to one-third

Boils and Pimples

Red Rash, Eczema, in fact any skin disease, disfigures the complexion because the bowels are constipated—or because the kidneys do not rid the system of waste—or because the skin itself is unhealthy.

Ointments, salves and soaps are useless. Because the trouble is with the blood.

Owing to defective action of bowels, kidneys or skin, the blood becomes tainted with impurities. It is these impurities—deposited by the blood—that make boils, pimples, and painful, disfiguring skin diseases. It is because the trouble is with the bowels, kidneys or skin, that FRUIT-A-TIVES cure these diseases.

Fruit-a-tives

OR "FRUIT LIVER TABLETS"

act directly on the eliminating organs—correct their irregularities—strengthen them—and thus clear the skin and make the complexion clear and soft.

If you have any skin trouble—or any fault with constipation, liver trouble, biliousness, headaches, indigestion, rheumatism—cure yourself with Fruit-a-tives. They are made of fruit juices and tonics—and never fail to cure.

Get a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED, OTTAWA.

of an inch thick, with joints and coupling points of pressed leather and rubber, and a helmet with two cylindrical regenerating chambers attached. The air, circulating through the helmet, has its oxygen continually renewed by chemicals in these chambers, regulating valves keeping the pressure in the helmet constant at all depths. Mounting and descending are effected by a cable carried on a drum driven by an electric motor, and this cable also carries the current needed for the respiratory apparatus. The diver communicates with the surface by telephone, while wires run from the armor to electric lights that show the working of the different parts of this complicated "dress."

High School Matriculants.

List of those who gained First and Second Division.

DIVISION I

Ralph Allingham, 715.
Ruth Harper, 667.
Donald Manzer, 699.
Faye Plummer, 685.

Twenty-eight secured Third Division, and seven failed to classify.

POLITICS IN MANITOBA.

(From the St John Globe.)

It is considered probable that a general provincial election will soon be held in Manitoba. The Roblin Ministry has been in power since 1900. It was endorsed at the polls in 1903, thirty one of the forty members of the Legislative Assembly belonging to the dominant party. An election is not due for another year, but that of course is no reason why it should not be held now if circumstances are considered favorable. It is said that Attorney General Campbell, who figured to some extent in the Sbarretti incident last year, is to be retired, and that the building of a railway line to Hudson's Bay is to be one of the principal plank in the Conservative platform.

Winnipeg, Man, June 23rd, 1906.

Dear Highway,—I wish through your columns to make brief statement of my whereabouts and plans. Having had presented to me on opportunity of visiting our Canadian West and spending a few months there, I have availed myself of it. I was influenced to this decision by the ill condition of my throat which throughout the past winter and spring had been troubling me somewhat while labouring in Nova Scotia. I am sorry for the necessary separation from our beloved brethren and work for a time but hope to return to it with renewed health and vigor of body and soul. I expect to work for the Master as opportunity may open before me. My address for the present is Strassburg, Saskatchewan.

Yours in fellowship,
(Highway) G B MACDONALD.
