

PANDORA RANGE

The Pandora oven is perfectly ventilated. The air in the oven is constantly being renewed with fresh air drawn through three vents between oven and fire-pot doors, and the cooking fumes carried out through another set of vents in back end of oven, as shown by illustration.

Moir's

Our Name on Bottom of Each Chocolate

To make it easy for particular people to avoid deception and to procure, with certainty, the finest flavored, smoothest coated, richest of all chocolate bonbons, we engrave the name **MOIR'S** on the bottom of each chocolate. None genuine without the name.

Each box is a series of continual surprises—so widely varied are the delightful flavors.

He who brings Moir's is assured "her" sweetest smile.

Rules for Repairing Roads.

Principles of importance in the repair of roads are.

(1) Use the same material in the repair of roads as was used in construction.

(2) When square shoulders of earth and sod form at the sides of gravel or stone roads, they should be cut away with a grader, turning this material outward—never draw it to the centre of the road.

(3) Never allow hollows, ruts or puddles to remain on the road, but fill them at once; if an earth road, use earth; if a gravel road use gravel; if a stone road, use stone.

(4) Deep holes in gravel and stone roads should have the earth and soft material cleaned out of them before putting in new metal.

(5) Ruts and holes should be filled a little above the surface of the road so that there will not be a depression when the material is consolidated.

(6) Loose stones should be raked into piles, to be taken up by a wagon and hauled away. This stone should be collected in a convenient place to be used afterward for crushing, putting into fills, or in such other manner as occasion may require.

(7) It is especially necessary that all ditches and drains shall flow freely in the early spring, so that the cold water may be drawn away as quickly as possible, permitting the frost to come out of the ground quickly. If the ditches are not in condition to drain the macadam promptly, heavy loads will cut through the macadam into the wet and soft subsoil, forming holes that are costly to repair.

(8) The ends of culverts should be watched to see that they are not obstructed by leaves, grass or other material. Snow and ice should be removed from culverts whenever there is an accumulation likely to cause obstruction in case of a thaw. Special care should be taken in this respect prior to the time of spring freshets.

(9) Water should never be allowed to flow in the wheel tracks, especially to steep grades, care being taken to preserve the crown so that the water will flow to the side ditches.

(10) Waste material from adjoining farms should not be allowed on the road. Any person using the roadside as a dumping ground for stone or other rubbish should be prosecuted. Noxious weeds and brush should be cut and removed.

(11) For the surface of a stone road never use stones larger than will go through a two-inch gauge; finer is preferable.

(12) Use chips or screenings as a binding material on stone roads. Earth, sod, dust and similar soft material will ruin the best road ever built.

(13) Do not allow dust and mud to lie on the surface of a gravel or stone road. Dust becomes mud in wet weather; and mud keeps a road in a wet condition for weeks, where it would dry in a few hours if the blanket of mud were removed.

(14) The rake is the most useful tool for making repairs, and should be frequently used on gravel and stone roads to keep wheel tracks filled with the metal forced out of them. This is especially true during the first year after construction.

(15) On earth roads, establish a system of regular treatment with the "split-log" or a similar implement.

(16) Smooth roads wear longest. They shed water quickly.

(17) Roads should receive constant attention. This is the most economical and satisfactory system of making repairs. Repairs should be made, not once a year, nor twice, but as soon as signs of wear appear. Special attention is needed in early spring and early fall, as at these two periods much can be done to prepare the roads for the ensuing seasons of particularly severe conditions.

Painless Teething.

There is no period in baby's life that mothers dread more than teething time. The little gums are tender and inflamed; the child suffers and is sleepless and cross, and the mother is usually worn out caring for the child. The use of Baby's Own Tablets allays the inflammation, softens the tender swollen gums, and brings the teeth through painlessly. Mrs. N. Sauve, St. Rose de Lima, Que., says: "When my baby was cutting his teeth he was feverish, cross and did not take nourishment. After giving him Baby's Own Tablets he cut six teeth without the least trouble. I have never used any medicine for children I prize so highly as the Tablets." Sold by all medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

White Wave Washing Powder removes grease spots and stains.

A Visit to Bangor.

On the 27th of Aug. Mr. and Mrs. Thos McGuire started to Bangor to visit their daughters, Mrs. Thomas Sullivan and the Misses Mary and Carrie. We arrived at Bangor, Tuesday at 3 o'clock. We were met at the Union Station by our daughters and son-in-law, Thos Sullivan. We took the car for 24 Spruce St and spent a very pleasant evening. On Wednesday we went to the fair which was very nice to see. They said there were 30,000 people at the fair. On Thursday we went to the Nickel and saw the moving pictures. Thursday night we went to the theatre. Friday we took the car for Mount Hope, a land of flowers. We saw the monument that marks the graves of the American soldiers that fell in the war of 1812. Saturday we went up Fruit St to see some old friends that once lived here in Newburg. Sunday we went to 7 o'clock Mass, then we took the car for Mount Pleasant. We saw Rev. Father Dollard's grave all covered with flowers. On Monday we took the car and went down to Main St where we saw the Labor Day parade. Tuesday morning at half past two we bid our friends adieu and started home well pleased with our visit.

THE STOMACH ON STRIKE

The Tonic Treatment for Indigestion is the Most Successful.

Loss of appetite, coated tongue, bad taste in the mouth, heavy dull headache and a dull sluggish feeling—these are the symptoms of stomach trouble. They indicate that the stomach is on strike, that it is no longer furnishing to the blood the full quota of nourishment that the body demands, hence every organ suffers. There are two methods of treatment, the old one by which the stomach is humored by the use of pre-digested foods and artificial ferments, and the new one—The Dr. Williams' Pink Pills method—by which the stomach is toned up to do the work nature intended of it. A recent cure by the tonic treatment is that of Mrs. Jas W. Haskell, Port Maitland, N.S. She says: "For years I enjoyed perfect health, but suddenly headache seized me. I had a bad taste in my mouth; my tongue was coated; I grew tired and oppressed; my appetite left me and such food as I did eat only caused distress. I had severe pains in my chest. I lost all strength and was often seized with vomiting. At different times I was treated by some of our best doctors, but although I followed their treatment carefully I did not get any better. One day while reading a paper I came across a case similar to mine which had been cured by Dr. Williams' Pink Pills. I immediately purchased a supply and it was not long before they began to help me. I grew stronger day by day till now I am as healthy as I ever was. I have a good appetite, am strong and active and can attend to my household duties without fatigue. I have no hesitation in recommending Dr. Williams' Pink Pills to all sufferers from indigestion."

Rheumatism, kidney trouble, neuralgia, St. Vitus' dance, headache and backache, palpitation, general weakness, and a host of other troubles, find their root in bad blood just as in the case of stomach trouble. That is why the Dr. Williams' Pink Pills treatment is always a success—they are a powerful blood builder and nerve tonic. Sold by all druggists or direct from The Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box or six boxes for \$2.50.

We Do.

The SENTINEL cannot seriously believe that the government party is in a satisfactory condition in this province or that it has the slightest hope of winning a majority of seats: it can't possibly believe it; we don't believe it, and the people by their votes will show that the Press is right and the SENTINEL as usual is wrong. [Press]

It is not within the memory of the present generation that the Press has been either fair or accurate. Occasionally by accident it stumbles upon the temporary winning side. How foolish the writer of that editorial will feel when the votes are counted!

Why?

Some of the extremists on both sides will be shocked by the Sentinel's venture in the field of prophecy. [St John Telegraph]

They need not be. One of these extremists is the Woodstock Press. Another is a gentleman writing from Sunbury, who says the tight little river county will defeat both Hazen and Glasier by a decisive majority. Men of moderate political bias are pretty well agreed that our estimate is a very reasonable prediction. Of course we knew there would be kickers on both sides.

Tooke BUSINESS SHIRTS
