An Infallible Cure For Sprains, Ringbone, Splint, Curb weeney, Lameness and Soft Bunches Kendall's Spavin Cure has no equal MONTREAL, P.Q., Sept. 12, '06.

"I have the care of a number of horses and have used your remedies, which always proved infallible." D. Baillergeron.

Be prepared—keep Kendall's always in the stable. Our book "Treatise on the Horse" free from dealers or \$1 a bottle-6 for \$5.

Stomach trouble is but a symptom of, and not in itself a true disease. We think of Dyspepsia, Heartburn, and Indigestion as real diseases, yet they are symptoms only of a certain specific Nerve sickness—nothing else.

It was this fact that first correctly led Dr. Snoop in the creation of that now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Withand favor to Dr. Shoop and his Restorative. With out that original and highly vital principle, to such lasting accomplishments were ever to be had For stomach distress, bloating, biliousness, back breath and sallow complexion, try Dr. Shoop's Restorative—Tablets or Liquid—and see for your-self what it can and will do. We sell and cheer-

VAUGHAN'S REPORT.

(Continued from last week.) I also wish to add before closing this report a few notes with regard to the grounding of Alternating Current, Secondary Systems as it has some bearing on the above.

If the Primary and Secondaries of a Transformer come into contact electrically, the high voltage primary current may flow to the second ary system. If this should happen the life of any one handling any part of the secondary system would be endangered and fires would probably be started by Arcs caused by breaking down of the insulation of the wires or fittings on the secondary system. If however, the Secondary Coil is grounded, a break down in the Transformer cannot cause a dangerous difference of Potential between the secondary system and ground and only with certain unusual combinations of contacts between the primary and secondary wires outside of the transformers, will this protection fail to prevent the voltage of the Secondary System from being raised above its normal

In order to secure the full benefit proper point to ground, as there is voltage between either side and the offire if a break down does occur.

There is an objection to grounding the secondary on the other hand, for when this is done, the fire break down of the insulation may mean a short circuit and possible fire, with a system free from grounds, a break down must exist on each side of the first can generally be discovered and remedied before the second occurs.

Grounding is therefore a choice of evils but in many cases it is believed to be a lesser one than to risk getting the Primary current on the Seconddary System.

This is especially true where the Primary Voltage is high, say 3,500 or over. For this reason it is advised that all transformers be so designed and connected, that the middle point of the Secondary Coil can be reached, if at any future time, it should be desired to ground it. After the Transformer Secondary has been properly grounded, a test should be made especially if the Transformer is some distance from the building supplied, in order to determine if the protection expected from the ground connection at the Transformer is really effective inside the building in question, and if not, the connection should be extended to

accomplish the desired result. Cases have been known where the effectiveness of a ground connection has been limited to a comparatively small area due to the exact conditions of the earth in the neigh. borhood of the ground plate and between it and the point where the protection due to the grounding was desired. The entire ground connec-

at least once a year. (For further information see National Code Rules and Require-

Saves Little Lives.

Most liquid medicines advertised to cure stomach and bowel troubles and summer complaints contain opiates and are dangerous. When the mother gives Baby's Own Tablets to her little one she has the guarantee of a government analyst that this medicine does not contain one particle of opiate or narcotic. Therefore, she can feel that her little ones are safe. There is no other medicine can equal Baby's Own Tablets in preventing summer complaints or curing them if they come on suddenly. Keep a box of Tablets always at hand-they may save your child's life. Mrs C E Hancock, Raymond, Alta., says: "I have used Baby's Own Tablets for summer complaints, constipation and sleeplessness, and always with the best results." Sold by all medicine dealers or by mail at 25 cents a box from The Dr Williams' Medicine Co., Brockville, Ont.

Interesting Suit.

Mrs Tappan Adney has laid information before Magistrate Dibblee against Lemuel Kelly and Church Morse, employes of J N & S B Chute, charging them with violating the provisions of the Fruit Marks Act. It is understood that the specific charge is that of labelling apples of the "New Brunswick" variety so called, as "Duchess." Of late there has grown up a disposition on the part of many to regard the two species as identical. Mrs Adney's father, the late F P Sharp, was the discoverer of the "New Brunswick" apple, and it is to protect the identity of the species, as well as to ensure the carrying out of the law, that this action has been entered. Recorder Skinner has been engaged to represent the plaintiff, and it is understood his instructions are to enter suit against all violators.

"My department in the Woman's HOME COMPANION, 'For the Girl Who Earns Her Own Living," says Anna Steese Richardson in her September contribution, "brings to my desk from would-be wage earners hundreds of letters every month. Less of the ground connection, reliable than five per cent bear the postprimary fuses of proper carrying office stamp of large cities. About capacity must be provided. The fifty per cent come from small cities, middle of the secondary coil is the towns and hamlets, and contain inquiries about business colleges. then only half the normal secondary training schools for various trades and avenues of wage earning in ground, thus reducing the liability larger cities. The remaning fortyof a break down on insulation and al- five per cent come from farms, and so materially lessening the danger their burden is: 'I cannot stand the monotony of farm life, and in this small community there is absolutely no way in which I can earn enough money to escape.'

"Escape!" That is the war cry of the inexperienced, restless, intractable girl of to-day. She has vague ideas of what she is trying to escape system, to cause a short circuit and but generally speaking it is what she with proper ground detectors, the terms the monotony of a domestic existence, which is in reality her apprenticeship in the art of home

making. "This article is not intended as a reproach upon the girl herself, but rather upon the false system of education, the abnormal economic conditions which force her into such a position and such beliefs.

"Study the average household in cities, large and small, in county seats or in towns which can boast of unimportant industries giving employment to women. To what end is the girl given an education? Almost invariably to fill some position in the commercial or professional world. Statistics prove that comparatively few girls go beyond the grammar grades. At sixteen they graduate into a business college, shop, factory or office."

Canadian Distances.

Canada is a country of magnificent distances, but almost every mile of the distance is something worth while-something demanding, and promising fruitful repayment of means of development by the railways now existing, under construction, and located. The Department of the Interior has just issued a railway map of the Dominion of Canada. This tions should be carefully examined map contains a table of distances which will be of interest to all Canadians, who can see, in tabulated form, the distances that separate important parts of the country. Here is a table of distances, in statute miles from Montreal to

Next Saturday night and all day on Sunday, Brigadier and Mrs Turner of the St John Headquarters and Leader of the Salvation Army in the Maritime Provinces will conduct services and very special meeting in the Citadel on King. The Brigadier has a warm spot in his heart for the people of Woodstock and it will be remembered that it was through the great effort put forth by him that the Army of this town has a building of its own. As the Brigadier seldom comes this way on account of the large Field of labor to which his time is fully occupied, everyone should appreciate it and attend the meetings. Remember the dates, next Saturday night and all day Sunday.

Itch, Mange, Prairie Scratches, Barber's Itch and every form of contagious Itch on human or animals cured in 30 minutes by Wolford's Sanitary Lction. It never fails. Sold by CHAS A McKEEN.

# RED ROSE TEA" IS GOOD TEA"

Girls are neater, more careful, and more cleanly than boys, so they are employed in the Red Rose factory to do all the packing and labelling.

It is a factory girls like to work in, and Red Rose Tea is a tea you will enjoy drinking. Everything is done to ensure it being absolutely pure and clean.

Will you try a package? Ask your grocer for it.

## Dyspepsia

Is Positively Cured by Taking

## HERNER'S DYSPEPSIA CURE

It acts on the food and not on the stomach. Eat what you like, it will cure you. Trial size 35 cents. Regular size, 100 doses, \$1.00.

Sold at all good stores throughout the country, and in Woodstock by
