May Net Salmon Now.

In this issue we give the official text of the new regulations under which salmon may be caught with nets in the St John River between Crock's Point, York Co, and a point just below Audover. This great boon has been conferred thanks to the persistent efforts of Mr F B Carvell our federal member, backed by Mr Whitehead of York. These gentlemen deserve much credit in connection therewith. The regulations are plain, and we expect them to be carefully enforced by the department.

Later on, in discussing the decline of the sheep industry when a lot of blame had been laid to the dogs, Mr Hubbard seriously asked if there were any other causes for the decrease. Mr Gartley at once volunteered the information that a couple of bears in his section Trustee Thorne in a sence of Trustee Mair. were on the warpath. This brought

J Frank Tilley, discussing the dairy industry, laid the blame for its decline at the feet of the farmers themselves who have generally pursued a vacillating policy in regard thereto. WE REPEAT.

We repeat that if a poor watch i investmenta good watch is a good one. It is as two and two. We have never carried is as two and two. We have never carried the cheap, bargain counter watches, not because of any "foolish" reasons, but for the very good reason that we know there is no money in them. We have a reputation to sustain and every one we would sell would be the making of one certain enemy and that one would make many more—the result would do us more harm than ten times the profit on the watch. We make a most reasonable profit on good, standard watches and every purchaser is a life-long advertisement Don't you think we have it figured out about right? From \$10 up.
