

BLACK KNIGHT

STOVE POLISH

is a revelation to housekeepers. Nothing like it has ever been made before. It means less work, because it does not get dull or brown. The hottest fire can't burn it off.

It means less work, too, because just a few rubs bring a bright, brilliant polish that always looks fresh and clean.

It is cheapest, because you get a bigger can for the money.

If your dealer does not handle Black Knight, send his name and the for full sized can.

LOOTING THE PUBLIC DOMAIN.

Mr Ames and those of his school of argument declare the public domain has been "looted" because the timber limits disposed of did not bring more money to the treasury. Very well, let us see when the looting was done and whose business it was to prevent it.

Following is a list of the timber areas disposed of by the three Governments who have held office since 1873, with the prices they received for them:—

MACKENZIE GOVERNMENT (1873 to 1878).	
Area.....	310 square miles
Bonuses.....	\$7,150.00
Average per mile.....	23.06
CONSERVATIVE GOVERNMENT (1878 to 1896).	
Area.....	27,323 square miles
Bonuses.....	\$121,219.00
Average per mile.....	4.13
LAURIER GOVERNMENT (1896 to MAY 1907).	
Area.....	6,456 square miles
Bonuses.....	\$528,878.00
Average per mile.....	31.92

Comparative statement showing the total area of timber berths granted within the railway belt in the Province of British Columbia, and the bonuses, received therefore during the Conservative and Liberal administrations respectively:—

CONSERVATIVE ADMINISTRATION (1885 to 1st. July, 1896).	
Area.....	1,114 square miles
Bonuses.....	\$56,213.00
Average per mile.....	49.10
LIBERAL ADMINISTRATION (1st July, to 31st May, 1907).	
Area.....	1,401 square miles
Bonuses.....	\$463,565.00
Average per mile.....	330.75

The late Conservative Government disposed of 29,322 square miles of timber; the present Government of 6,456 square miles.

The Conservative Government for 29,322 square miles received \$121,219; the present Government for 6,456 square miles received \$528,878; together with annual ground rent amounting to \$30,000 per year and 50 cents per thousand stumpage dues.

The Conservative Government received from the timber disposed of an average of \$4.13 per square mile; the present Government has received for the timber disposed of an average of \$81.92 per square mile.

The Conservative Government received for the timber one-fifth the average received by the Mackenzie Government, who preceded them, and one-twentieth the average received by the present Government.

Had the Conservative Government received as much per mile for timber as the Mackenzie Government, who preceded them, they would have put \$676,265 into the treasury instead of \$121,219, for the disposal of timber.

Had the Conservative Government received as much per mile for the timber they sold as the present Government they would have put \$2,402,058 into the treasury instead of \$121,219.

Had the Mackenzie Government of 1873 to 1878 disposed of timber at the price received by the Conservative Government, who followed them, they would have put into the treasury only \$3,320, instead of \$7,150.

Had the present Government sold timber limits at the average price received by the Conservative Government who preceded them they would have put into the treasury only \$26,663, instead of \$528,878.

In one year the Conservative rule, 1893, 10,326 square miles of western timber limits were given away without bringing one cent of bonus into the treasury.

This area consisted in 312 limits averaging about 50 square miles each. This is 50 per cent more timber than the present Government has disposed of in the 12 years from 1896 to 1908.

This area is equal to a belt of timber 25 miles wide extending from fifty miles north of Edmonton to the international boundary.

It is equal to a belt 48 miles wide from Edmonton to Battleford. It would make a strip 36 miles wide from Edmonton to Saskatoon. It equals a belt 12 miles wide from Edmonton to Winnipeg.

It is equal to a strip of 3 miles wide from Halifax to Vancouver. It would make a belt of timber one mile wide reaching from Icy Cape on the Arctic Coast of Alaska to Cape Horn, the southern extremity of South America.

Sold at the average price the Mackenzie Government received for timber limits this area would have put \$237,108 into the public treasury.

Sold at the average price received by the present Government it would have put \$845,905 into the public treasury.

Its disposal did not bring one dollar into the treasury. It was a free gift—without money and without price.

The present Government has not given away an acre of timber in 12 years. Every acre sold has been sold in open competition to the highest bidder and in every instance notice of intention of sell has been advertised as long as the longest period allowed by the Conservative Government.

If the public domain has been "looted" by timber limits being sold too cheap, the "looting" was done between the years 1879 and 1895, when the Parliamentary colleagues of Mr Ames had the management of the timber.

Todd Has Made Gains

ST. STEPHEN, N. B., Oct. 16.—Mr Todd has made considerable gains in nearly every section of Charlotte county, especially in St Stephen and the surrounding country. A great many who have always been Conservatives have announced their intention of voting for him. No losses to offset this are known to have been made in any part of the county so that Charlotte will be found in the Liberal column on the 26th in all probability.

Irving R Todd is one of the prominent citizens who are working for Mr Todd and who did not support the Liberal candidate in 1904. For the first time in many years the Liberals in the country districts seem to be more active and confident than the Conservatives. The outside speakers brought into the county by the Conservatives, including Messrs Hazen, McInerney and Powell, have been listened to by good crowds, but have not made any converts.

Paper by Mrs Myles, of St John, intended for W C T U Convention.

I have been asked by our president to say a few words in connection with our young people's work. A good deal might be said if time was given, but five minutes is all we are allowed. I have held the office of Secretary for three years. It has been my delight and pleasure to band young women into Young Women's C T U. We deem it necessary that our daughters shall be possessed of such qualities that will grace the home and society and render them attractive and influential. We desire that they shall be equipped to take our places in the struggle for right, and we also wish them to take advanced ground. We are hoping our daughters and son to order their lives, govern their homes and mould society and public opinion as we have never been able to do. We do recognize the immense power stored in the young womanhood of our country. Who is it that sways and influences the habits of our sons so much as our daughters? How soon would many of the social customs and abuses now tolerated be abolished if the daughters of our land but issued an edict. Our young women are active in every church and missionary work found. Women largely teach our sabbath schools, and young women have charge by a large majority of the children of our land in the public schools. Young women are the very life and soul of the various Temperance Societies that are doing noble work, and yet in much the larger numbers of our church and unions, we fail to organize their enthusiastic force which stands at our call to go into the work. Now I would ask that all church members unite with the Women's Christian Union, and that all unions form up by societies. The work has been so gratifying where it has been taken up, and the results so precious that no words can be too strong to urge every union to do something. Remember our girls will

be matrons soon. It is the God given mission of our army to see that every new home in Canada is pure, and that hearts loyal to God and humanity are united under the knot of white ribbon. May richest blessings follow the twenty thousand Y's and let us not rest content until a Young Women's Temperance Union has been formed in every town and city in Canada.

The above paper was prepared by Mrs W H Myles of St John, and was to have been read the last night of the meeting of the W C T U Convention, but owing to the lack of time was crowded out. We deem it worth of notice.

Send this advertisement, together with name of paper in which it appears, your address and four cents to cover postage, and we will send you a "Complete Handy Atlas of the World."

GREAT MEDICINE.—Toult, one of the pioneers of French Canadian lost a hand and wore an iron hook as a substitute. He was in the habit of boxing the ears of refractory Indians with this iron hand, and they have remarked that it was "great medicine." Dr Thomas' Electric Oil is great medicine; it takes hold of pain with an iron hand and knocks it out of the system.
