

The C. P. R. and Immigration.

Telegraph

Although the C. P. R. owns no land in New Brunswick, it is now intimate that it may act as a medium through which the local government may secure immigrant farmers by applying the plan which is to be worked out in the C. P. R.'s irrigated territory in Alberta. Sir Thomas Shaughnessy the other day in London announced that next season in Alberta the C. P. R. would prepare small holdings, in the irrigation belt ready for occupation ploughing the land, sowing the grain and building the house. English farmers, accustomed to intensive cultivation will be placed on these little farms, and men who only have \$500 capital will be able to enter immediately into possession of their own plots, and pay for them by instalments. Thus instead of having to do pioneer work, they will be able to supplement the profits of their own small holdings by working on the larger farms in the irrigation belt, where labor is in great demand at certain seasons of the year.

Montreal newspapers which inquired at C. P. R. headquarters in Montreal regarding these plans for the West, were informed that a somewhat similar scheme is under consideration for parts of Quebec and New Brunswick, as "in various parts of Quebec," as well as in the St. John Valley district of New Brunswick, there are ample opportunities for the Old Countrymen of small means to become possessed of prosperous little farms, and a scheme is now being worked out whereby the immigrant will be able to obtain such farms through the medium of the C. P. R.

It will be recalled that soon after the Hazen government came into power one of its spokesmen announced that the administration and the C. P. R. were going to co-operate in

building up New Brunswick. The building up process has not yet commenced, but the Montreal statement we have quoted may indicate that an attempt to do something has finally been decided upon. Efforts to apply in New Brunswick the plans outlined for irrigated land in Alberta would be watched with no little interest. Any real movement to bring more land under cultivation in New Brunswick, or to increase the agricultural population by placing a desirable class of settlers on farms now vacant, would be welcome. It takes the Hazen government a long time to get up steam.

In the experiments of H. E. Willis and J. Doyle, Jr., solar heat has been collected by passing water through a glass covered heater exposed to the sun's rays. The heated water was stored in a well insulated tank, and drawn off to circulate around a sulphur dioxide boiler, then, after giving up its heat, was again passed through the heater. It was calculated that in latitude 34 degrees a square foot of water surface would take up about 2,300 British thermal units on a June day and 1,600 on a December day. Using two heater sections exposing 1,000 square feet to the sun, the heat collected was made to run a 20 horse power sulphur dioxide engine, and at time developed about 15 horse power, with a boiler pressure of 245 pounds per square inch. Reviewing the results, Mr. Willis has found the cost per horse power of the solar power plant to be about \$184, rather more than four times the cost of a steam power plant. He makes due allowance for this difference in first investment, but sanguinely concludes that in a suitable region—like California—sun power can compete in cost with steam power so long as coal costs more than 65 cents per ton, and with producer-gas power using coal at \$2 per ton.

Mars Hill.

We are entering the close of 1909 and as we are again on the dependent line to other publishers to get any communication of interest to our people regarding our public work, we humbly ask for a little space in the columns of your old paper that we have been reading for over fifty years and expect to read it while we live. The interest among our churches is not up to as high a standard of spiritual life and strength as we would like, but all things considered, we have no reason to complain, as we hear from the brethren occasionally in regard to their work and the interest in their field of labor. We are well pleased and better satisfied than we would be with an overdrawn statement or a spirit to enlarge on the tree and correct condition of the cause.

Brother Foster is yet laboring in York Co. with good results at Canterbury Station, Temple, Harfield and Hainesville. Brothers Stairs and Brown live in York Co. and are giving timely help as they have opportunity. Brother Stairs spent some time in Nova Scotia since the October quarterly. Brother Brooks has been laboring some with his home church at Bristol and other churches. Brother Giberson as usual has been visiting his churches where he holds pastoral care, Windsor, Carlisle, Perth, Hemesville, Monquart, Carleton and extended labors with some other fields of labor. Brother Malory labors at Simonds where he lives, Hartland, Lansdown and Lower Wakefield besides other calls. Brother Hart labors at Pembroke, Wilnot and several other places. Brother Doody labors in the upper part of our field, Carleton, Me, California, Vic. Co. Tilley, Vic. Co. and some of the other P. B. Churches. Brother G. E. Orser has been laid off from active labor for some weeks since and before the Oct. quarterly. Brother Archie Hatfield of N. S. P. B. has been extending profitably on the Tobique. Quite a number of conversions and baptisms as the result of his work. This speaks well for a young minister. We wish him every prosperity in his calling to the Gospel ministry. We are very glad and thankful to the great head of the church for sending us these strong young men. Brother Quigg, who lives in York Co. has visited some of our Car Co. churches and we hope that he had a pleasant and profitable visit. He thoroughly believes in the P. B. faith and doctrine and also believes in God calling men into the Gospel ministry. He no doubt will prove a profitable innovation to the P. B. body. Brother Geo. Tompkins of Perth, we understand, has united with the P. B. church at Perth since our early meeting and has been preaching some on the authority given him from that church. We are not in receipt of any statement in regard to his labors, but hope that he has proved beneficial to the churches where he has labored. Brothers H. Giberson, James Sprague, and brother E. W. London who has been on the sick list for over a year we cannot expect any amount of work from him we are only sorry for brother London and hope that his dear Saviour will be his comfort in his long sickness. Brother Kilcollins labors in Aroostook Co. chiefly and is one of the standard bearers with us in adversity or prosperity. He trusts and labors as he has opportunity. Brother Dalbeck writes us that he is breaking up some new ground in N. S. Kemptville and another place. He has baptized several on his new ground and expects to enlarge the P. B. field in N. S. and we pray for his success in saving the unsaved; this should be our highest aim in life. In concluding this letter I would say to all of my brethren in the ministry and of our laity: Be of good courage and He will strengthen thy heart, aim a little higher, be accurate in your work and high calling, stay with the old cardinal doctrines that has given us such prosperity; preach them, pray them, sing them, and live them. On no other line of Christian work could we hope or expect to do as well. Stay with the spirit of labor that gathered what we have gathered in the last thirty-five years, and if we only can do as well in the next 35 years how many precious souls will tally up for heaven and glory. For that seventy years labor by us, God's humble people, we shall never know here, but we may know when they all get home. Death has entered the ranks of our brothers and sisters during the year of 1909 and many homes are saddened on account of those that we have been obliged to part company with; but our ministerial ranks have not been broken during the year. But God we trust has added two or more to us in the gospel work and we are looking for more in the mean future. If we should live until the new year let us all consecrate ourselves anew to God and his work. Press and Dispatch and Fredericton and Hartland papers please copy this communication and oblige yours,

REV. C. H. ORSER,
Chairman of P. B. Conference.

HER DEATH WAS HOURLY EXPECTED

Enterprise, Ont., Oct. 1st, 1908.
"For seven years I suffered with what physicians called a 'Water Tumor.' I could neither sit, stand, nor lie down. Hypodermics of morphia had to be given me to ease the pain.

MRS. JAMES FENWICK

My cure seemed hopeless, and my friends hourly expected my death. I was so bad that I wanted to die, and it was during one of these very bad spells that a family friend brought a box of 'Fruit-atives' to the house. After much persuasion I commenced to take them, but I was so bad that it was only when I had taken nearly two boxes that I commenced to experience relief. I kept up the treatment, however, and after taking five boxes I was cured, and when I appeared on the street my friends said, 'The dead has come to life,' and this seemed literally true, because I certainly was at death's door."
(Signed) MRS. JAMES FENWICK.
'Fruit-atives' are sold by all dealers at 50c a box—6 for \$2.50, or trial box, 25c, or sent post-paid on receipt of price by Fruit-atives Limited, Ottawa.

Hartland.

(Crowded out last week.)

Weather mild and pleasant; fair sleighing although more snow is required to make roads for heavy loads. Ice in the river is floating carelessly along. A few cold days and nights will give us an ice bridge. Such weather means a saving of fuel.

Very few potatoes are coming in, and prices are low. Hay is held back for better roads and prices.

The closing exercises of our school showed good results in standing of pupils.

Joel Ellis was in the village on Saturday last and took home with him a splendid cow, purchased from W. P. McMullin.

There are many millions of logs yarded in the woods in but not sufficient snow to make good hauling roads to the landings.

Several shipments of manufactured lumber sent south from Sawyer's mill during the last ten days.

Page Boyer has accepted a position, as engineer in the steam mill at Plaster Rock for the winter months.

Boys make money! Harry Gillin will pay you a good price for all the rabbits you can snare.

Herb Boyer narrowly escaped serious injury a few nights since by the captizing of his waggon. The horse was thrown and pinioned and Mr. Boyer was fastened under the waggon. Timely assistance arrived.

Our new councillors are making themselves familiar with parish wants preparatory to their first meeting at the board, 2nd Tuesday in January, 1910.

Many names, especially among constables, may well be dropped from the list and men appointed who are willing to serve.

Placard "For Sale" on Solomon McFarlane's residence.

The Florenceville Dramatic club gave a highly satisfactory entertainment in Hagerman & Bairds hall on Friday evening last. Full house.

A missionary entertainment of a rather literary character took place in the hall at Victoria Corner last Friday evening, fancy goods were sold and a good time generally is reported.

Mr. and Mrs. Joseph McGee of Somerville will spend a portion of the winter in visiting members of their family and friends to Maine and Massachusetts.

The ministry of Rev. George Somers is materially increasing the congregation in Methodist church, every Sunday evening. All are invited.

Your correspondent says, a happy New Year to Sentinel staff from Editor to Devil.

REFORM SPELLING.

(Bulletin, Winona Technical Institute.)

There is a farmer who is YY's
Enough to take his EE's
And study with his II's
And think of what he OO's.
He hears the chatter of the JJ's
As they each other TT's.
And OO's that when a tree DK's
It makes a home for BB's.
A yoke of oxen he will UU's
With many haws and GG's,
And their mistakes he will XQQ's
When plowing for his PP's.
He little buys, but much he sells,
And therefore little OO's,
And when he hoehis soil by spell's
He also soils his hose.

Wicklow.

Mr. and Mrs. Theodore Estey and Miss Marion Estey left on Tuesday for West Branch, Mi. higan to spend Xmas with Frank Estey.

ER Squires left on Monday to spend Xmas in Boston with S. N. Raymond.

Mr. and Mrs. Hugh Tweedie will spend Xmas with Mr. and Mrs. Barrie Tweedie, Lakeview, Me.

Mrs. Mary Hutchinson left on Thursday to spend the winter with her daughter Mrs. Stevens, of Lynn, Mass.

Mr. and Mrs. Clarence Estey and family left on Wednesday for St. Cloud, Florida, where they will spend the winter.

Stanley White and George Maddox, each purchased pure bred mares at the recent sales in St. John.

Miss Lizzie Maddox will take charge of the school for the winter term.

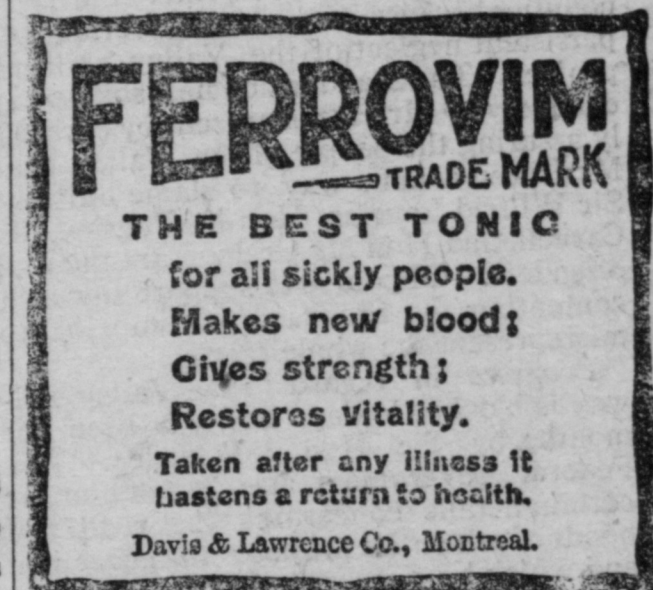

Miss Gladys Estey of the P. N. S. is spending her Xmas holidays at the home of her parents Mr. and Mrs. Charles Estey.

Andrew Shaw is slowly recovering from his recent illness.

Miss Helen Estabrooks leaves for Boston the first of Jan. where she will take a course of music at the Boston conservatory.

This paper is anxious to issue a spicy and interesting local page each week. If each of our subscribers would hand us in one news item, what a newsy paper we could issue. Try it for a few weeks, friends. You'll enjoy it yourself.

Don't let an unscrupulous dealer force on you an imitation of the "D. & L." Menthol Plaster. Look for the "D. & L." trade-mark on the tin. It guarantees the genuine and the most effective remedy for Rheumatic aches and pains, Lumbago, Sciatica, Backache, etc. 25c. each. Yard rolls equaling seven of the regular size \$1.00.

Twenty dancing and fasting missionaries of the sect who call themselves "Pillars of Fire" have arrived in Liverpool from New York, and will endeavor to convert London.

I've often marvelled at you brilliancy, your aptness at repartee, your—

If it's more than five dollars, old man, I can't do a thing for you. I'm nearly broke myself.

HOW STEEL SHOULDER-STRAPS ORIGINATED.

The story goes that the steel curb shoulder-strap of the British cavalry originated in a woman's wit and resourcefulness. Of course, chain armor is an ancient thing; but when Sir George Luck was setting out for Kandahar during the first operations against Afghanistan, Lady Luck knowing something of the fighting methods of the tribesmen, whose four-foot knife can cut clean from shoulder to belt, sewed a couple of steel curb chains under each of the shoulder-strap on her husband's tunic. As a protection from sword cuts these proved so effective, that at the end of the campaign Sir George made a report in relation thereto with the result that they were adopted as a permanent feature of the cavalry uniform.

The system of electric agriculture developed by Sir Oliver Lodge, aided by J. E. Newman and R. Bomford, is now in use on several farms in Holland. A network of galvanized iron wires is suspended at a height of 18 feet on wooden posts 70 yards apart, one post per acre being needed, and an induction coil, supplied with continuous current by an ordinary dynamo, positively electrifies the wires to 60,000 to 100,000 volts. This electrification of the air over the soil continues 8 to 10 hours a day for 5 or 6 months. Very little power is needed, and the yield per acre is increased 30 per cent, and even more under some conditions.

A. J. DAY, Manager.

You Want to Sell

Your Property!

I Want to Help You!

I have made a careful study of the problem of bringing the man who desires to buy into communication with the man who desires to sell, and I accomplish results through an extensive advertising system. If you want to sell I can find the man who wants to buy. I make this my business. If you have the confidence in your property, and if it is worth the value you place upon it, I can get the price for you, and I can do it much quicker and cheaper than you can.

A. D. HOLYOKE,

REAL ESTATE AND INSURANCE,
Woodstock, N. B.

We receive 3 times as many calls for office help as any school in the State on a basis of enrollment. Had 14 more positions than we could fill within two weeks. A good position has been secured for every graduate and they are giving satisfaction. We offer you the best course of study and instruction that can be arranged. Now is the time to prepare. Write for catalog and interesting information. Houlton Business College, Houlton, Maine.

The Splendid Reputation the
FREDERICTON
BUSINESS
COLLEGE

has gained for itself among business men means a great deal to the young man or woman who secures its Diploma. Large numbers will be entering in September, but if you cannot come then, come when you can. Send for free catalogue.

Address,
W. J. Osborne,
Fredericton, N. B.

Why They Fell.

"The shades of night were falling fast—
But not with Paul Revere;
This happened night before the last—
And all of you should hear.
A stranger came through spoony town
And ere that he got past
The spooners pulled the curtains down—
"The shades were falling fast."

Sewer air has been robbed of much of its terrors as accurate investigation has shown that it cannot spread disease in the wholesale manner formerly attributed to it. The evidence tends to show that the germs of sewer air are those of street air, and that only very rarely are any germs taken up from sewerage.

No Surrender!

The Stranger—And who are the Murphys' ancestors.
Mr. Murphy—Ancestors! What's that?
Mrs. Murphy—The Murphys spring from no one. They spring at them!
