

## PURITY FLOUR

### And Its Keeping Qualities

SOME people find it necessary to buy a considerable quantity of flour at one time—sufficient to last for a long period. Naturally they are anxious to procure a flour of the kind best adapted to lengthy storage.

There are two important reasons why PURITY FLOUR possesses these qualities. One is that it is made entirely from Manitoba Hard Wheat. The other lies in the fact that the careful milling necessary to produce "Purity" absolutely excludes all low-grade particles of the wheat berry. It's the high grade Manitoba Hard Wheat Flour that keeps—stands longest storage. That's "Purity."

"Purity" flour may cost a little more, but is more than worth the difference. Try it. Watch results both for quality and yield.

You Want to Sell

Your Property!

**I Want to Help You!**

I have made a careful study of the problem of bringing the man who desires to buy into communication with the man who desires to sell, and I accomplish results through an extensive advertising system. If you want to sell I can find the man who wants to buy. I make this my business. If you have the confidence in your property, and if it is worth the value you place upon it, I can get the price for you, and I can do it much quicker and cheaper than you can.

### Canterbury

A very successful and enjoyable 'Social' was given in the Orange Hall, by Miss May Scott and Mrs. Mac Dougal to quite a number of their friends both young and old, about 60 being present. Various card games and crokinolo too were indulged in during the early part of the evening and after an elaborate lunch the usual juvenile games were in evidence.

Miss Selina Law gave a little dinner party to a few of her friends on Friday evening.

Mr. Frazier of the firm of Frazier & Thornton Cookshire, Quebec, made a most picturesque entry into our village, with his trained mares, riding one a la cow-boy with all the trimmings and minus a bridle, while the other, harnessed with a pack saddle, followed, free and unbridled. He hopes to be in Woodstock during the present week.

On account of the condition of the roads the Rev. J. E. Fleming had quite an exciting time on Sunday in getting from North Lake to Canterbury for the evening service, and he got there in time too.

Great unrest is being felt amongst the lumbermen here as nearly all have been driven from the camps by the unseasonable weather.

The Canterbury and North Lake Telephone Co. were busy last week extending their line to Grants crossing. We wish them every success in their undertaking.

### How To Tell Catarrh

An Experienced Physician Says the Following Symptoms Are Sure Signs:

You can always tell catarrh by the following well known signs:—

Eyes red and watery?  
Difficulty in breathing?  
Are the nostrils stuffy?  
Do you sneeze frequently?  
Is your throat hoarse?  
Do you spit phlegm?  
Oppression in the chest?  
A ringing in the ears?

If you have any of these indications of Catarrh cure the trouble now—stop it before it gets into the lungs or bronchial tubes—then it may be too late. The remedy is "Catarrh-zone," a direct breathable cure that places antiseptic balsams and healing medication on every spot that's tainted by catarrhal germs.

There can be no failure with Catarrh-zone—for years it has successfully cured cases that resisted other remedies. "No one can know better than I the enormous benefit one gets from the very first day's use of Catarrh-zone," writes T. T. Hopkins, of Westvale, P. Q. "I had for years a stubborn case of Bronchial Catarrh, ear noises, headache, sore eyes, stopped-up nose and throat. It affected my appetite and made my breath rank. Catarrh-zone cured quickly."

Get Catarrh-zone, use it and you are sure of cure—beware of imitations and substitutes. Large size Catarrh-zone with hard rubber inhaler lasts two months and is guaranteed. Smaller sizes 25c and 50c. By mail.

The manufacture of concrete houses may very shortly become an active industry in St. John, as the City Council and representatives of the David Craig Company of Boston have decided upon leasehold arrangements at a nearby point on the St. John River where valuable limestone privileges are abundant. Sample houses of concrete have been erected in the city and those interested predict big things in this venture. No less a personage than Thos. A. Edison looks to concrete houses as the cheapest, healthiest, and most lasting abode for the working man of the next decade.

### Mrs Arthur Haverstock Makes Public Statement

Tells of Her Belief in the Undying Merit of Dr. Hamilton's Pills. Halifax N. S., Feb. 11th. When interviewed at her home at 194 Argyle St., Mrs. Haverstock was quite willing to talk of her peculiarly unfortunate case. "I was always 'blue' and depressed, felt weak, languid and utterly unfit for any work. My stomach was so disordered that I had no appetite. What I did eat disagreed. I suffered greatly from dizziness and sick headache and feared a nervous breakdown. Upon my druggist's recommendation I used Dr. Hamilton's Pills.

"I felt better at once. Every day I improved. In six weeks I was a well woman, cured completely after different physicians had failed to help me. It is for this reason that I strongly urge sufferers with stomach or digestive troubles to use Dr. Hamilton's Pills."

Dr. Hamilton's Pills strengthen the stomach, improve digestion, strengthen the nerves and restore debilitated systems to health. By cleansing the blood of long-standing impurities, by bringing the system to a high point of vigor, they effectually chase away weariness, depression and disease. Good for young or old, for men, for women, for children. All dealers sell Dr. Hamilton's Pills of Mandrake and Butternut.

**Chase & Sanborn's Seal Brand Coffee**

Thousands of women buy coffee by the "Seal Brand" Trademark.

They know that "Seal Brand" stands for quality—that it goes only with good coffee.

They know that "Seal Brand" Coffee is always the same—whether they buy it in Halifax or Vancouver or anywhere between, because the sealed tins preserve the flavor and aroma.

Buy your coffee by the "Seal Brand" Trademark and you are certain to get the very best coffee at the price. In 1 and 2 pound tins—never in bulk.

CHASE & SANBORN, - MONTREAL.

### Re Training The Colt.

In answer to comments by J. E. M. on the decision of the judge in the "Colt-training Competition," I would like to say that the awards, made by the writer, were made with the idea that colts should be trained or educated, not "broken." As to whether the colt should be hitched double or single, first, opinions will continue to differ, and while personally I prefer educating a colt to single harness first, I have no quarrel with him who prefers double harness, but in either case we claim that there should be preliminary education, and the essays were judged on this principle. J. E. M. writes: "I have 'broken in' five young horses, four of them being hitched double the first time the harness was put on them." Now, sir, this is exactly what we object to, and may properly be called "breaking."

We think, sir, that no colt should be hitched, either double or single, "the first time the harness is put on him." While the "breaking system" can be carried out, and especially with heavy colts, with generally fair results, we claim that it is irrational, and with lighter colts often harmful and expensive, and that in no case are the results as satisfactory as when some trouble and time has been spent in education. It would seem about as reasonable for a man to expect his uneducated colt to give reasonable service if "hitched double the first time the harness was put on him." Those who have followed this interesting, and, we trust, instructive competition, will have noticed that Clark Hamilton, the winner, did not hitch his colt "the first time the harness is put on him." He educates the colt before hitching him. J. E. M. states that when a colt is being "broken" in double harness "the driver can compel him to do it through the help of the other horse." Here, again, we take exception. Colts that have been properly handled do not require the aid or force of another horse to "compel" them to obey the will of their driver. He again states: "In every single situation that can arise in the training of a colt that I can conceive of, the second horse is almost indispensable, until such time as the colt has learned to obey the commands of his trainer in stopping, starting, etc." Now, sir, here again we disagree with J. E. M. Clark Hamilton's method appeals to us. He teaches his colts to obey the words of command, as whoa, get up, steady, back, etc., etc., before he hitches them. I might here say that I did not expect the awards in the competition under discussion would meet with the approval of all. Each man thinks that his method of handling colts is the best, and in many cases, will continue to think so. But, as stated, the essays were judged on the principle that colts should be educated, not "broken," and the places were awarded to those who, in our opinion, had the best ideas of how this education should be carried on, and gave good, common-sense details of the same. Some competitors gave details of elaborate fixings in ropes, straps, etc., and gave details of their application and use in conquering colts. Others gave more simple, but probably not the less effective, methods of subduing the animal; but as we do not consider these conquering methods necessary in colts that have been intelligently handled, we did not place such essays. To sum up in a few words, we consider a colt should be gradually educated, the earlier in life the education commences the better; that it is wise, if possible, to avoid conflict of opinion or will between the colt and the trainer, but that all harness, rigs, etc., used should be strong and that the trainer should, in all cases, be in position, by virtue of his knowledge, skill and tackling, to gain the mastery over the brute force and will of the colt, should such conflict occur.

No matter how deep-rooted the corn or wart may be, it must yield to Holloway's Corn Cure if used as directed.

Minard's Liniment Relieves Neuralgia.

### Northampton.

While the weather is extremely fine and mild, the roads are hardly passable for sleighs or sleds, and is rather rough wheeling.

Donald Dibblee, youngest son of the late Alfred Dibblee who has been home for some months on a visit to his old home, left for Spokane last Friday.

Chas. P. Bull who has been confined to the house for some weeks is some what improved and able to be about again.

Work in Dominion No. 1 has been suspended for the winter. Work will be resumed with increased vigor the coming spring.

Through the inclemency of the weather the extensive lumbering operations of Mr. H. S. anley Patterson has been seriously impeded. In addition to large quantities of pine and spruce it is rumored that Mr. Patterson intends getting out large quantities of cedar fencing to be erected the coming spring.

Considerable hostile criticism has been aroused among the older settlers here owing to the rumored action of our County Councillors in giving away the very lucrative positions of emolument to comparative new comers. It is repeatedly asserted by the men on the road that.

Mr. Chesley Estey has been appointed Pound Keeper and Mr. Malcolm Orford field driver for this particular locality. We trust that there is no truth in these assertions.

That Mr. and Mrs. James Clowes still have their pretty home over their heads is due entirely to the heroic efforts of their daughter Blanche, who recently, alone with her sick mother, combatted a serene blaze on the roof of the house for about an hour, until the school children in the neighboring school house attracted by her cries came to her assistance and succeeded in putting out the flames.

The young people gathered in considerable numbers one night last week to do honour to Mr. and Mrs. Alexander Tres, who were quite recently married. After being heartily regaled on candy and peanuts the happy gathering dispersed to their homes to await the next event.

The oldest of the old landmarks in this parish was removed last Thursday in the demise of Joseph Hemphill at the ripe old age of 95 years. Mr. Hemphill came from Ireland at an early age and was one of the pioneers of this parish. His remains were interred at Greenbank last Saturday.

### DOES YOUR HEART FLUTTER

Short Breath. Easily Fatigued. Rush of Blood.

It's in this condition that sudden and unexpected death comes.

The heart is an unfailing index of strength. Bodily vigor and a strong heart go hand in hand.

A slight fluttering and shortness of breath is a sign of failing strength, arising from weakened digestive power, or from weakness of the nervous system.

The organic and dangerous affections of the heart seldom manifest themselves until the climax is reached, when death usually supervenes. Even a small variation in strength renders the heart susceptible on the emotional side, and a little fright, anxiety or haste will set it going at a frightful rate.

You ought to know that when your heart flutters easily, when your breath comes in gasps, when you tire quickly upon exertion, and rest does not recuperate, you have allowed yourself to run down.

It is under these conditions that Ferrozone acts like magic in its strengthening power. Tens of thousands of Canadians can testify to the marvelous curative power of Ferrozone.

When it's remembered that Ferrozone has the power of making rich, red blood, of giving tonic to the system, of vitalizing all the functional powers of the body, it will be easily seen in cases such as yours, in which these fluttering sensations are present, Ferrozone will speedily restore you to health.

Ferrozone makes you strong because it enables you to digest your food, because it makes rich, red blood—because it tones, strengthens, reinforces the whole system. "It was so overcome with heart fluttering and acute indigestion I could scarcely walk upstairs without panting and catching for my breath," writes E. K. Young, a well-known merchant in Augusta. "After using one box of Ferrozone I improved, and after two months I was cured and am sound and healthy as ever to-day."

The best proof of Ferrozone's merit is the enormous good it will do you. In your own case; try it, 50c per box or six boxes for \$2.50, at all dealers.

For sixteen years the name "Salada" has stood for the maximum of quality, purity and flavor in blended Ceylon Teas, so that the only thing you need to look out for is the "Salada" label on every package of tea you buy.

## Women Who Suffer

from woman's ailments are invited to write to the names and addresses here given, for positive proof that Lydia E. Pinkham's Vegetable Compound does cure female ills.

These women are only a few of thousands of living witnesses of the power of Lydia E. Pinkham's Vegetable Compound to cure female diseases. Not one of these women ever received compensation in any form for the use of their names in this advertisement—but are willing that we should refer to them because of the good they may do other suffering women to prove that Lydia E. Pinkham's Vegetable Compound is a reliable and honest medicine, and that the statements made in our advertisements regarding its merit are the truth and nothing but the truth.

### SAVING MONEY.

Most men intend to save money, but with the average man this intention is never realized. One of the surest and best methods of saving money is presented by means of Life Insurance, as the amount regularly paid by way of premium on a policy is actually saved, while the additional benefit of protection for the family or dependent ones is afforded by the policy. It will be greatly to your advantage to begin saving money at once by procuring a policy from the

**PAINTING a roof is work.**  
Buying the paint is expensive. Both are needless if your roof is Amatile.

When you finish laying Amatile, take away your ladder, pick up your hammer and knife, go away and leave the roof to take care of itself. A few years later you may go back and look at it if you care to, but it won't be necessary, and there won't be anything to do.

This is due to the fact that Amatile has a real mineral surface—a surface that is too strong to need protection—too durable to require painting.

If you buy one of the smooth surfaced roofings you will have to paint it every two or three years to keep it from leaking. In fact, such roofs depend on the paint almost entirely for their waterproofing qualities.

Amatile on the other hand depends for its waterproofing on double layers of Coal Tar Pitch—the greatest known enemy to water.

Amatile comes in rolls of 110 square feet ready to lay. No special tools are required, and anyone can lay it properly.

A sample of Amatile will be sent free on request. Send for one and see how much better it is than the kind which requires painting to keep tight.
