Grand Falls Power.

The Provincial Government of New Brunswick has extended until September the period during which the Grand Falls Power Company may deposit its bond as a guarantee of the development of the immense power at the Falls. In the meantime a new company will absorb the two which now have rival claims, and it is expected extensive development work will be commenced within a short time, resulting in the erection of a great power plant and large industries at the Falls.

More Work—More Help.

This is the condition of affairs in Western Canada as regards the harvesting of the crops this year. From reliable reports the like of the crops has never been known, and the demand for labor will be greater than in any previous year. The annual farm laborers' excursion will leave here in a few days—the exact date to be given out later. Watch for it, and in the meantime get ready, as the notice will be short.

YOU WON'T BE DISAPPOINTED if you get the genuine "D & L" Menthol Plasters for stiffness, backache, etc. Successful remedies are imitated, look out for the original "D & L" made by Davis & Lawrence Co.

0000000000 0000000000
SUMMER MONTHS FATAL TO SMALL CHILDREN.

Every mother must know how fatal the summer months are to small children. Cholera Infantum, diarrhoea, dysentery and stomach troubles are all common at this time and many a precious life is snuffed out after only a few hours illness. As a safeguard mothers should keep Baby's Own Tablets in the house. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes on suddenly, will bring the little one through safely. Mrs R E Sanford, Inverary, Ont., writes:—"My baby was sickly for over a week with stomach and bowel troubles and cried night and day. Nothing helped her till I began giving her Baby's Own Tablets, but they helped her right away and now she is a big healthy child with fine rosy cheeks. The Tablets are certainly a wonderful medicine and I recommend them to all my friends who have little children." Sold by medicine dealers or by mail at 35 cents a box from The Dr Williams Medicine Co., Brockville, Ont.;

"A Girl of the Mountains."

"A Girl of the Mountains" is something new, something worth seeing. It develops a strong plot with very dramatic situations in such a delicate and picturesque style that one must at once place it far above the ordinary drama. An especially strong scene, one that will grip its hearers, is brought about when Nellie, the Mountain Girl, discovers that she has been betrayed by Richard Thurston, a wealthy New Yorker. The scene is most graphic and most telling and bound to command unflinching attention. The play is in four acts and comes highly recommended by the press in the cities where it has been seen. It will be the attraction at the Hayden-Gibson Theatre on Aug 3rd.

First in The Field.

The farm laborers excursion from here will leave for the west in a few days—the exact date will be given out later. More men than ever before will be required this year. There is plenty of work and good wages for all who can go. And then there is the great opportunity of seeing the West at its best.

PEAT THE FUEL OF THE FUTURE

Will Be Dependent on it 100 Years Hence Says Hon Mr Sifton.

Ottawa, July 25—Inside of 100 years, all the coal will be gone and long before that it will be scarce. Fire wood will soon disappear from any general use. Water powers cannot be economically harnessed for the development of electricity to be used for domestic heating purposes. The solution of the problem of providing fuel for future generations lies largely in the exploration of the great peat deposits scattered throughout the country. That, in effect, was the thesis developed by Hon Clifford Sifton, chairman of the conservative commission, in his address this evening before an open meeting of the American Peat Association, which convened in fourth annual meeting this morning here with an attendance of about fifty of this continent's best known authorities on the commercial exploitation of peat beds.

Mr Sifton noted that hitherto there had been several attempts made in Canada to commercially develop the extensive peat deposits of Ontario and Quebec, but these attempts had proved unprofitable largely because of unscientific methods and uneconomic processes. At present, however, the problem was being attacked in a scientific and thorough way. The government's experimental plant at Alfred, near Ottawa, was exemplifying the best methods of handling peat for commercial purposes, and he believed that as a result of the present year's work there, the way would be cleared for the active commercial development of the many thousands of square miles of peat bogs scattered throughout the central portions of Canada now dependent on the Pennsylvania coal area for fuel supply.

Dr Eugene Haanel, dominion director of mines, gave some illuminative data as to the results of the past few months experiments at the government peat station at Alfred. Peat ready for fuel purposes was now being produced there, he said, at a cost of \$1.70 per ton. Though for domestic purposes it was not as good as anthracite in furnaces, it was quite as good for use in grates and ranges. As much heat could be produced from peat costing \$3.50 as from a ton of coal costing considerably more when delivered so far from the mines.

Dr Haanel also noted the adaptability of peat for use in connection with gas producer engines. Dr J A Mighill, of Boston, in a concluding address, dwelt on the uses of peat for industrial purposes. He believed that the best economic results could be obtained from using peat for generating gas in producer engines, the power thus generated being utilized both for heat and light.

This afternoon the members of the association were taken by special train to Alfred, where the government experimental plant was inspected.—Telegraph.

"The Busy East."

A new magazine, called the Busy East, is now published in St John by the H M McAlpine Directory Company. It is a monthly, and its watchword is "Watch us Grow!" The July number contains an article by Mr W S Fisher, giving a list of one hundred and thirty-six Maritime Province firms who are shipping goods to the Western market. Mr Fisher points out that this explodes the old theory that the long haul would prevent eastern manufacturers from doing business in the West; and he sets out very clearly the advantages which the eastern manufacturers possess. The same number of the Busy East contains an illustrated article on the gas wells near Mouncton. One of these illustrations shows a flame of gas rising to a height of nearly one hundred feet. In another illustrated article Mr W W Hubbard, Secretary of Agriculture, deals ably with farming opportunities in New Brunswick in respect to dairying, beef raising, pork production, the keeping of sheep, poultry and bees.

SAVED FROM THE KNIFE

Appendicitis Cured By "Fruit-a-tives"

NEWBURGH, ONT., Feb. 12th, 1910.

"Just about a year ago, our daughter Ella, (fourteen years), was taken with terrible pains in the right side. The pain was so severe that we had to carry her to bed. We at once put her under the care of a first-class doctor, who pronounced it a case of Appendicitis and advised an operation.

We took her to a hospital in Kingston where she was again examined by an eminent specialist. He said she had Appendicitis and must be operated on at once if we wanted to save her life. As we had taken her to Kingston to have this done, we were ready, but our daughter was afraid and cried and begged so pitifully, that we postponed for that day. Luckily for us and for her an uncle came in with some "Fruit-a-tives" and insisted on Ella taking them. Good results were apparent almost from the first dose, and the continuous treatment cured her.

"Fruit-a-tives" saved our daughter from the surgeon's knife and to-day she is enjoying the best of health." J. W. FOX, (Father). LILLIAN FOX, (Mother). Words cannot express the gratitude of Mr. and Mrs. Fox. And Miss Ella will always remember "Fruit-a-tives"—the discovery of an eminent physician, and the only medicine in the world made of fruit. 50c. a box, 6 for \$2.50, or trial box, 25c. At dealers, or sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

NOTICE!

We Shall Want a Large Supply of
