# Semi-Steel Fire-Pot-Not Gray Iron

A should be able to tremendous heat and to repel the attacks of sulphur

The material commonly used for a fire-pot is gray iron. The Sunshine fire-pot is Semi-

terms, gray iron has what may be called "open" pores. Through these "open" pores the destructive sulphur fumes attack the iron and hasten disintegration.

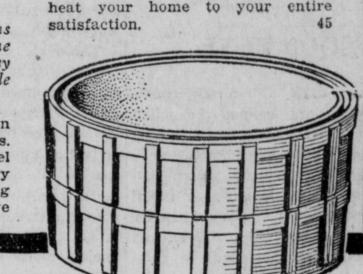

Steel is a close-grained ma-

terial, with a smooth-as-glass surface which practically seals or "closes" up the pores. Semi-Steel easily repels the attacks of gas fumes and thus greatly prolongs the life of the fire-

A Semi-Steel fire-pot weighs 20 per cent. heavier than the same size and pattern in gray iron. It is therefore better able

to endure tremendous heat. Semi-Steel is made by an exclusive McClary process. You can only get a Semi-Steel fire-pot with a McClary On the other hand, Semi- furnace. That is one strong reason why you should have

the Sunshine installed in your home Our agent in your locality will tell you many other reasons. Ask him.

This dainty English car is just as perfect as the genius of the carriage industry can make it. It is practically troubleproof and built to endure-built right here in Canada. The upholstering is Leatherette throughout and the body is adjustable to a bed or sitting position and finished in GENDRON Tan. There are lots of reasons why you should buy a Sold by most first-class Canadian-built Gendron—ask your dealer.
