New leather boots are sometimes eh.-Figaro.

Western Canada is the place you want to consider when thinking of making an investment either in Farm Lands, Town or City Property. It is the place you want to consider when you think of securing a profitable and congenial business or professional location.

130,000 Americans

Over 130,000 Americans located in Western Canada last year. In the same year over 150,000 English, Irish and Scotch people located in Western Canada, and over 50,000 from other countries. The movement is just beginning. In the course of a few years the immigration to Western Canada will exceed One Million souls per annum. As the country settles up and is developed, realty values must in necessity increase accordingly.

Farm & Fruit Lands

We own some very fine Farms in Western Canada, Fruit Lands In British Columbia, and excellent townsites from Winnipeg to Pacific Ocean. Some of these townsites are located in new territory along new lines of railway, and in a great many cases an undeveloped tract of land springs into a town of two or three thousand population in a year, and for those in a position to know, such a condition offers unusual opportunities to make money either from the establishment of a business or a profession in such a town.

New Towns

Lots in such towns in the beginning range in price at from \$50.00 to \$500.00, depending on the location. Lots can be paid for on terms of one-tenth cash, and the balance in eighteen monthly payments. Lots sold in one of our towns a year ago at prices ranging from \$100.00 to \$500.00 are selling today at from \$250.00 to \$500.00 each, and are in great demand by people moving to that town to engage in business.

To the Farmer

who wishes to settle in Western Canada, the country offers unusual opportunities. Wild Land range in price at from \$10 to \$20 per acre, and improved farms at from \$15 to \$30 per acre. These farms, under cultivation and properly operated, produce at from 20 to 35 bushels of wheat per acre, at from 60 to 120 bushels of oats per acre, from 75 to 100 bushels of barley per acre, and at from 10 to 15 bushels of flax per acre. As a farmer you can easily figure out the present selling price of these products. You can also easily figure out the profit that you would make as a farmer in this country.

INVESTORS

To mortgage loan investers, we wish to say that safe first real estate mortgage loans can be made in Western. Canada to bring an income at from 6 to 10 per cent per annum. Write us, and we will be pleased to mail you full information about Western Canada. If you want a farm, we will give you full information about farm lands. If you want to make an investment we will tell you about the various methods by which money can be invested safely and profitably. If you want a business or a professionl location, we will give you full information along that line. Write today, for Western Canada represents the last opportunity of this kind on the North American Continent.
