Covered.

## LIBERALS WIN A GREAT VICTORY IN RICHELIEU

**Deliberate Attempt Made to Bribe the County — Government Employees Give Handsome Majority for Liberal Candidate in Spite of Every Influence to Induce Them to Vote for Government Candidate — Victory Over Combined Nationalists and Conservatives**

Sorel, Que., Oct. 25th. Despite every effort of the Government the riding of Richelieu has remained faithful to Laurier and returned Mr. Cardin, the Liberal candidate by a majority of 301. While this is a reduction from the majority secured at the election of September 1911, it is a very satisfactory result. Richelieu includes the big government shipyards and works at Sorel, which employ many hundreds of voters, and every possible influence was used to induce these men to support the government candidate while the manner in which the axe has been wielded would probably happen to any employee who dared to vote Liberal. Despite this Sorel gave a handsome majority for Mr. Cardin. And not only were these handicaps denounced Monk and the Nationalists be overcome but a deliberate attempt was made to bribe the whole riding end of the government. It was there by Sir Rodolphe Forget, who brought his election methods into the campaign, and pledged his word that if Richelieu elected Morgan, the Conservative the Marine Railway would be voted at next session of course the inference being that if Cardin was elected there would be no vote for this railway, which is badly needed in the district. That in face of such bulldozing and bribery the old riding of Richelieu should stand firm by Laurier is pretty good proof that the Province of Quebec is as solid as ever for Liberal principles. The election has a double significance. On Hon. F. D. Monk, since was a pretty strong hint of what was coming so shortly after the re-election in which the axe has been wielded would probably happen to any employee who dared to vote Liberal. Despite this Sorel gave a handsome majority for Mr. Cardin. And not only were these handicaps denounced Monk and the Nationalists be overcome but a deliberate attempt was made to bribe the whole riding end of the government. It was there by Sir Rodolphe Forget, who brought his election methods into the campaign, and pledged his word that if

**C. P. R. BOOKLET TELLS OF ADVANTAGES OF NEW BRUNSWICK TOWNS**  
**Advantages of Valley of St. John River—All Crops Flourish**

The C. P. R. has issued a booklet entitled The Handbook of Information Regarding Business and Industrial Opportunities in Eastern Canada. Of New Brunswick, it says in part: The province is well settled, there are good educational facilities, and practically every religious denomination is established. The climate is magnificent and nowhere is there greater freedom from epidemic disease. Few realize that St. John is in the same latitude as Milan and Venice. Not only do grain and fruit crops flourish in New Brunswick, but Maize (Indian corn) tomatoes and grapes are successfully cultivated. This province produces in abundance apples, pears, plums, and all kinds of northern small fruit. The valley of the St. John River is probably one of the best apple districts in America today. Its forest, coal, iron and other mineral wealth is very great. Florenceville, N. B. (X.P. Pop. 400) has three general stores, one saw mill, one school and four churches. This town is the centre of the potato district. Bristol, N. B. (X.P. Pop. 508.) There is splendid fishing and shooting but at present no suitable accommodation—a good hotel is needed, also a woodenware or furniture factory. There is a considerable amount of cheap water power available. There are three churches, one school and one doctor. Plaster Rock, N. B. (X.P. Pop. 500) —Gypsum is found in abundance. Gold is creating quite a sensation at present. There are four churches, one school and four general stores. The Tobique salmon fishing is very popular, fish weigh from 15 to 300 pounds. Best hunting grounds for big game available. Arrostook, Jct., N. B. (X.P. Pop. 500), has 10,000 h.p. at hand undeveloped. This speaks for itself as to opportunities existing. There are two stores and one church. Grand Falls, N. B. (X. P. Pop. 1,500), has fine water power, estimated at 46,000 h.p., fully developed; will attain 300,000 h.p. Good openings for all kinds of business, especially factories and pulp and paper mills. Plenty of timber available, also hundreds of acres of good agricultural land, finest for raising potatoes. There are three churches, public school, saw mills, woodworking factory, cheese and butter factories, general stores, etc. Good fishing and shooting in neighborhood. Edmundston, N. B. (X. P. Pop. 2,000)—In addition to a big deposit of brick clay there is about 4,000 h.p. undeveloped. There are two saw mills, two construction woodworking mills, Transcontinental Railway vaudeville are thrilling and entertaining, but nothing can take the place of the minstrel show, which stores, two paint stores, one hay, we learned to love in the days when grain and coal merchant, one hard-burnt cork artists were indispensable in the amusement world. Mr. F. B. physicians, two banks, one druggist, Herrick the well known teacher of the 67th band will put on a minstrel performance about the last week in November. It will be a band brick yard, foundry and machine benefit and everything connected with ship, carriage and harvesting manufacture up-to-date. The soberest kind of factory, any kind of woodenware factory will not miss this chance to see the array of big collars stretch some distance from the town. The ing from the middle man, and sigh for days that are no more. Get Debec Jct., N. B. (X.P. Pop. 150), some relief from your gloom by going to this performance. Watch for grist mill, one school and one church. Wednesday night, 23rd inst., at or further announcements.

## THE BACHELORS' BALL

The Most Successful Ever Held in Woodstock

Upwards of two hundred people were present at the ball given by the bachelors of Woodstock in the Hayden-Gibson theatre on Monday evening last. The chaperones, Mesdames W. P. Jones, J. T. A. Dobbie and A. G. Bailey, commenced receiving at 8.30 and sharp at nine o'clock the grand march was formed under the able management of W. E. Stone and E. B. Durham, the members of the managing committee having charge of the floor. A programme of twenty one dances was rendered by Prof. Herrick's orchestra, and the music was splendid. A midnight supper was served and the gathering broke up about 2.30. The dance was one of the most successful ever held in Woodstock and the committee in charge is to be congratulated very highly. Many beautiful gowns were in evidence and there was also ample justification for the claim that is made that Woodstock has more pretty girls for its size than any place on the continent. A feature of the evening was the large number of married people present, nor were they of the kind that discreetly retire at midnight, but danced the programme through and thoroughly enjoyed every minute of it. The committee in charge was composed of R. Perley Hartley, secretary, Burpee M. Hay, Walter E. Stone, E. Frank Wolverton and E. B. Durham, to whose energy and enthusiasm the very successful function is due.

Woodstock, N. B. (X.P. Pop. 4,000) A power plant has been erected for supplying light and power. There are prospects of iron, copper and silver mines being developed. There are three saw mills, three foundries, one butter factory, one woodworking factory, one cannery, seven churches and two schools. There is a good opening here for a canning factory. Plenty of good agricultural land is available at moderate prices. Hartland, N. B. (X.P. Pop. 1,000), situated in the centre of a good agricultural community, has large cement block plant, one bank, one newspaper, four hotels, several stores, five churches, one high school. Plenty of water power is available. A starch factory would do well at this point. Lumbering is the chief industry, yearly output of various mills from 20,000,000 to 25,000,000 feet. The best salmon and trout fishing and shooting in the neighborhood.

## SPECIAL SERVICES

There will be a series of special services held in the Reformed Baptist Church, beginning Wednesday, Nov. 6th. Rev. E. Hilton Post of Pawtucket, R. I., will assist the pastor. Service each evening at 7.30 p. m. All are invited to come.

Mrs. A. Stevens, returned from St. John on Wednesday.

## TRAGIC DEATH OF NORMAN WILLIAMS

**Inquest Concluded—Jury Recommends That All Locomotives be Equipped With Electric Head Lights**

The inquest to ascertain the facts that led to the death of Norman Williams on Wednesday night, Oct. 23rd, was concluded Tuesday afternoon.

Fred Logue in his evidence stated: I was conductor on night of Oct. 23. Norman Williams was on train. Asked him for ticket or money; he said he had no ticket, and did not produce the money. Told him that he would have to pay or get off. Had engineer stop the train and I put the passenger off; that would be about 9 o'clock. He walked off peacefully by the rear door. Messrs Jim Gillin and Bert Day of Hartland were with him. John Morrison, A. C. Grant, Ernest Bunn, Arthur McGibbon, George Boyer and other witnesses, employees of the C. P. R., gave testimony. Owen Kelly, chief of police, told of receiving a telephone message at 11 o'clock stating that a man had been killed; he notified Coroner Lindsay, and then went with party in search of the body, found it and from a notepad in the pocket of deceased coat, he was satisfied that the body, although horribly mangled, was that of Norman Williams. On Saturday afternoon the jury heard the evidence of Jim Gillin, Bert Day and John Hines were recalled. Messrs. Gillin and Day told of Williams getting aboard the train, of the conductor asking for the ticket, of the stopping of the train and the putting off of passenger. They swore that the deceased was not intoxicated and that neither of them had anything to drink on the train. On Tuesday the jury reported as follows: That the said Norman Williams came to his death by being run over by the Gibson train (so-called) on Wednesday night, 23rd inst., at or

within a few feet of the 53 mile post below Upper Woodstock, in the County of Carleton.

That the said Norman Williams was under the influence of liquor when he left the station at Woodstock on the Arrostook train at seven fifty five the evening of the 23rd.

That in view of the fact that the said Williams was under the influence of liquor the conductor of the Arrostook train should not have ejected him before the train reached the station at Upper Woodstock.

That if the rules of the Canadian Pacific Railway instruct conductors and trainmen to eject any passenger who may be under the influence of liquor at almost any point along the railway route, the said rules are entirely drastic and should be amended.

That in the opinion of this jury all engines on the road should be equipped with electric head lights.

Had the Gibson train been so equipped it is quite possible that the death of the said Williams might have been averted.

J. C. Hartley appeared for relatives of the deceased, and F. B. Carey for the C. P. R.

John A. Lindsay was coroner and the jury was composed of John S. Leighton, Jr., Wallace Gibson, Jas. Carr, George E. Balmain, James S. McManus, Stephen Green, J. D. Carey.

## UP-TO-DATE MINSTREL

Moving picture houses and modern vaudeville are thrilling and entertaining, but nothing can take the place of the minstrel show, which we learned to love in the days when grain and coal merchant, one hard-burnt cork artists were indispensable in the amusement world. Mr. F. B. physicians, two banks, one druggist, Herrick the well known teacher of the 67th band will put on a minstrel performance about the last week in November. It will be a band brick yard, foundry and machine benefit and everything connected with ship, carriage and harvesting manufacture up-to-date. The soberest kind of factory, any kind of woodenware factory will not miss this chance to see the array of big collars stretch some distance from the town. The ing from the middle man, and sigh for days that are no more. Get Debec Jct., N. B. (X.P. Pop. 150), some relief from your gloom by going to this performance. Watch for grist mill, one school and one church. Wednesday night, 23rd inst., at or further announcements.

There is a fair amount of lumber
