PREMIER SCOTT SWEEP THE PRAIRIE PROVINCE

ENGINEER WEEKS MET DEATH AT GRAND FALLS

Locomotive Left the Track and he was Crushed to Death—Funeral was Held From St. Gertrude's Church Wednesday

William Weeks was injured so badly when the engine of his train ran into a land slide, Monday morning, that he died a few hours later in the hospital.

The accident happened about four miles above Grand Falls. How the unfortunate young man met his death is not known definitely. He was found on the floor of the cab by his fireman, Howard Jacques, who escaped uninjured. A handcar was used to remove him to Grand Falls hospital and Drs. Puddington, Laporte and Guay were summoned. Weeks never regained consciousness, and succumbed to his injuries shortly after four o'clock in the afternoon.

The unfortunate man was one of the youngest and best known of the C. P. R. locomotive engineers. He worked for some time at Brownville, Me., and was a considerable period at McAdam. Eight years ago he was transferred to Woodstock, and of late has been running on the route known as "Round the Horn," from Edmonton to Presque Isle. He is survived by his wife, formerly Miss Elizabeth Cogger, of Woodstock, two small children and his parents, residing at McAdam.

The funeral was held from his late residence Wednesday morning and was largely attended. Rev. Fr. McMurray officiated at requiem high mass, and after the service spoke very feelingly of the sudden death of the husband and father.

Mr. Weeks who was 35 years of age was a man of great kindness of heart and most highly esteemed by all who knew him and the news of his death was received with deep expressions of regret.

The sympathy of the whole community goes out to the sorrowing relatives in their deep affliction.

The Nova Scotia Fertilizer Co. vs. Kearney

An interesting case has recently been decided by the Supreme Court of New Brunswick in which the Nova Scotia Fertilizer Co. is the plaintiff and Robert H. Kearney, Frederick A. Kearney and Roy Kearney are the defendants. The action was brought by M. G. Teed, K. C. of St. John, in the Chancery Division of the Supreme Court for the purpose of setting aside certain deeds which had been made by Robert H. Kearney to his sons, on the alleged ground that the deeds were fraudulent as against creditors. The case was tried before His Honor Mr. Justice McLeod last fall in St. John, and his judgment was that, although there had been no intent to defraud, the deeds should be considered fraudulent because they had the effect of defeating the plaintiff company and preventing it from recovering its claim against Robert H. Kearney. W. P. Jones, K. C., who was acting for the defendants, appealed from the decision of Judge McLeod to the Supreme Court and the case was argued during the winter. The Court were unanimous in setting aside Judge McLeod's judgment with costs, and ordering that judgment be entered for the defendants with costs, and the action was dismissed. The Court held that Robert Kearney had a perfect right to transfer the property when he did to his sons and that he received consideration therefor. It is understood that Mr. Teed may appeal the case to the Supreme Court of Canada.

RECIPROCITY WAS ISSUE ON WHICH LIBERALS CARRIED DAY

Forty-Six Liberals and Only Eight Conservatives Elected in Saskatchewan—When All the Returns Are in Premier Scott's Majority Will be Still Further Increased—The Rogers-Haultain Combination Completely Routed—A Signal Triumph for Larger Markets

THE RESULT IN BRIEF

Liberals Elected	46
Opposition Elected	8
Seats to be heard from	8
Elections to be held	2
The last House	
Liberals	27
Opposition	14

REGINA, July 12—Saskatchewan has spoken and the voice of the great Prairie Province has been emphatic. Premier Scott will have probably fifty seats in the new House. According to the latest returns he has forty-six seats, and the Conservatives not yet heard from will probably increase his majority. The Liberals practically made a clean sweep of the whole Province, as the best the Conservatives can hope for in the new House is eight. The rout of the Opposition forces was almost complete.

While the returns in the outlying districts are still far from complete, it is evident that the cause of the larger markets and good Government has again scored a signal triumph and that the "Bob" Rogers-Haultain combination, with its elaborate election machine, has sustained a crushing defeat, at the hands of the citizenship of Saskatchewan.

HAVE DISAPPEARED.

The Federal emissaries of Rogers packed their grips and several avoided themselves of the night to steal silently out of town. Their rout here was complete. Certain of them, however, were unable to join in the flight, owing to the fact that they are held under arrest on serious charges of bribery, intimidation and attempted personation.

The Liberals are celebrating as never before. Great cheering throngs paraded the thoroughfares, farmers who had driven in for miles, marched behind an illuminated banner reading "We stand for larger markets." At the Liberal headquarters enthusiasm knew no bounds, while the lights went out at the Conservative offices early in the evening.

LAURIER AND SCOTT.

There seems to be none but Liberals in the capital tonight. The crowds cheered loudly for "Laurier and Scott."

Haultain, the Conservative leader, according to last reports, has two of a majority in his former safe Conservative riding of Quappelle. He has had the fight of his life and the Liberals still claim his defeat. A recount will probably be demanded. Old Tory strongholds like Souris, Last Mountain, Pipestone and Moose Mountain, where the previous Conservative majorities ran up into hundreds, have been captured by the Liberals.

AN OUTSTANDING TRIUMPH.

It is an outstanding triumph for the cause of increased markets, as the Scott Government made this Dominion issue the issue of the campaign, coupled with a vindication of the bears.

the present administration. It is also a crushing blow to "Bob Rogers" machine and the interference of the Borden Government in Saskatchewan's affairs. The bitter resentment of the Ottawa meddling did much to add to the pronounced character of the victory. The Rogers' machine operated throughout the Province on a scale which will probably call for investigation by the re-elected Government when the House meets.

Returns from the other settled parts of the province have unexpectedly strengthened the Government, and the net gains effected by the Liberals in the agricultural districts will need a remarkable turn over of outlying, foreign settled constituencies and of the newly-delimited seats where homestead inspectors and the Rogers operators were supposed to "get in their work," to counteract. The returns that they have made do not indicate that they have made much headway against the overwhelming sentiment for increased trading facilities.

Haultain Says Victory Was Due To Strength of Reciprocity

REGINA, July 12—Mr. Haultain, seen this morning by your representative, was looking fit and well and did not appear to be very downhearted or disconcerted by his defeat. "The outstanding feature, of course," said Mr. Haultain with a smile, "is that we are beaten. As far as I can see the Reciprocity idea was much stronger than a good many people supposed, stronger, I think, than even Liberals themselves believed. I knew, of course, that Reciprocity was very strong in Saskatchewan last autumn, and I always wondered why the Government did not go to the country much sooner. I said openly to my friends last spring that if the Government were to go to the country then we would be wiped out of existence. I regret very much that some of my old friends in the Legislature have been defeated. With Dr. Elliott I have been associated for 14 years and with Mr. Gillis for 18 years. I attribute the Liberal victory almost entirely to the strength of Reciprocity in Saskatchewan."

Two bears that came out of their native haunts and started to cross the bridge from Grafton, on Friday last, illustrates that Ernest Thompson Seaton's claim that bears are not ferocious is correct, at least in this instance.

Their bearships after arriving on the bridge took a view of the country and evidently deciding that destruction was the better part of valor, as a base ball game might take place on Connell park which would be on their line of travel, turned back and retraced their steps to the woods. A number of people passed close to the animals and while not stopping to ask questions, were quite impressed by the friendly attitude of the bears.

WOMAN KILLED IN RUNAWAY

Her Mother Rendered Unconscious—Baby Had Miraculous Escape

PERTH, N. B., July 12—Mrs. Edward Carle, aged 38, of Somerville, Mass., was thrown from a carriage in a bad runaway this evening and instantly killed, and her mother, Mrs. James Paterson, of this place, was rendered unconscious, while a sixteen months old babe of Mrs. Carle carried in her arms, was unharmed.

The accident happened about four miles from Perth. The occupants of the carriage were Mrs. Carle and her mother, Mrs. James Paterson, and the former, who is the mother of five children, carried her youngest little girl of sixteen months in her lap. The horse had apparently taken fright and locking the wheels threw out both ladies with great force. Mrs. Carle struck on her head and was killed instantly and her mother was rendered unconscious for more than an hour. The baby's cries attracted the attention of two men passing by. The investigation resulted in the finding of Mrs. Carle with life extinct, and Mrs. Paterson unconscious and the child close by. Mrs. Carle is the mother of five young children.

PERMANENT STREETS

Report of Superintendent to July 15th, 1912

To the Mayor and Council:

Thinking it would be of interest to the residents of Woodstock, I beg to submit the following report of the road and its cost up to the 15th of the present month. I might say that the cost of this piece of road under operation is greater than any other pieces of road will be, as we had a good deal to contend with in excavating the old railway, on one side, and the old sidewalk on the other, and then owing to a misunderstanding surface pipes and gate boxes, etc. had to be installed, for houses, and vacant lots through Mill St., which of course had to be done before permanent streets could be made. The work being done is on the Telford Macadam road principally with a good rock foundation, length 360 ft by 30 to 32 ft wide. The sub grade is excavated 10 inches deep, 16 ft wide, of course I could have excavated wider but for the quantity of traffic of Woodstock it is useless and of course a good deal less expensive to make it only the 16 ft, which is a standard double track. As stated above owing to the old railway ties this excavation had to be done by pick and shovel, which otherwise could have been done by the plough. The ditches also had to be excavated and built up by rock so that they will correspond with the road in wear and tear. When finished the road will have a crown of 10 1/2 inches in 30 ft., and will consist of the following:—A good rolled foundation with all spongy places filled up, then 5 inches of picked rock, rolled till there is no give whatever, 3 in. layer from 1 in. to 2 inches in size, when all voids are thoroughly filled this then is rolled solid, after that a 1/2 in. layer of smaller grade, then screenings for a top finish. To the interest of those who do not know why the excavation was done, I would like to explain the reason; when any heavy load passes over it will not force the rock toward the ditch, which otherwise would happen. I think that is all I can report on at present, so will close with the approximate cost of the piece of road operated on up to the 15th, outside of the cost of crushing the pile of (Continued on page ten.)
