## Notes of the Big Leagues

Holding the Athletics to three hits is the recent game shows that Ed Walsh is still there with the puzzling slants.

Springfield won the pennant and also established a record for games won in the three 1 league.

Kid Elberfeld, who succeeds Billy Smith as manager of the Chattanooga team, has started to hustle for players for next year's lookouts.

The Cincinnati Reds played great ball during their last eastern trip, producing the same high class brand of ball they played early in the season.

President McAleer, of the Boston American League champions, was a member of the Cleveland team which won the Temple cup series in 1895.

Joe Tinker, of the Chicago Cubs, says that Rube Marquard has lost the jump on his fast ball. Rube better find it before he faces the Red Sox.

Outfielder Max Carey, of the Pittsburgh team, will return to a theological school at the close of the season. Eventually he is to become a Lutheran minister.

Miguel Gonzales, the new catcher of the Boston Braves, is a Cuban and doesn't speak English. "Hub" Pardee is an American and doesn't speak English, which makes the Braves standing 500 in the language league.

## Clarke Off His Guard

Chicago, Oct. 3.—Manager Fred Clarke, of the Pittsburgh National League Club, allowed Cotter, catcher for Chicago, to bat out of his turn in the tenth inning of yesterday's game, without protesting, although Cotter's single won the game for Chicago by the score of 6 to 5. Umpire Owens doffed his mask and waited patiently at the plate for Clarke put in his protest, for the rules read that a batsman hitting out of regular order shall be called out when such protest is lodged. Clarke grasped his sweater and raced for the clubhouse. Owens watched the retreating manager for a few paces and then turned and left the field. The game was over and Clarke's chance to rectify his mistake was gone.

Clarke today telegraphed a protest to President Lynch, taking the ground that it was the duty of the umpire to point out any violation of the rules.

## CLARKE WINS MIS BETS

Pittsburgh, Oct. 2.—Manager Fred Clarke, of Pittsburgh, failed to land his team a winner of the National League pennant this year, but the leader of the Pirates will win so many bets that he will have enough neckties, shoes, hats and suits of clothing to stock a good sized store. Last winter Clarke declared that he would not play ball this season. He said that he would not even go to bat in a pinch.

No one took him seriously. All figured that Clarke could not resist the temptation to get into the game. Clarke offered to wager that his name would not figure in a box score all season. From all sides he was flooded with offers to bet that he would play in a game. Clarke took the wagers as fast as they were offered. In a few weeks more Fred will begin to collect his winnings. If all those who bet win him make good Clarke will be the best dressed manager that baseball ever had.

## The Turf

HALIFAX COLT MADE GOOD SHOWING AT BROCKTON—WON FOURTH MONEY.

The Halifax colt, Baring's Comet, made a splendid showing at Brockton yesterday, winning fourth money in such fast company. Dillon Axworthy did not compete, but Nowaday Girl, the holder of the world's record for a half-mile track, was a starter, and as was generally expected, proved the winner. Her third heat was in 2.18, which is faster than the world's record for a half mile track until lowered by herself last month. A Boston despatch last night says:

Baring's Comet, owned and driven by Howard Musgrave of Halifax, won fourth money in the two-year-old stake for trotters at Brockton Fair

today. The Comet finished fourth in each heat. The race was won by Nowaday Girl, with Todds Echo second and Thomas Aquinas third. Sixteen horses started and Nowaday Girl trotted the final heat in 2.18, smashing the track record. The horses finished in a bunch in the last heat, Comet being only beaten by a nose for third position. The Comet was timed separately in 2.20, the fastest heat he ever trotted. The purse was \$1,000.

The receipts of the 1911 world's championship series to date, under the auspices of the National Commission. The total attendance for the six games played was 179,851 and the cash receipts were \$342,364.50. Of this the National Commission received \$34,236.25; the New York and Athletic clubs received each \$90,108.72; the Athletic players received \$76,746.37 and the New York players \$51,162.24. At the rate of 60 and 40 percent of the player's pool for the four games they were entitled to participate in \$127,910.61. Twenty-one players on each team were eligible to a share in the world's series money, which means each of the Athletics drew down \$3,654.58, while each eligible Giant received a check for \$2,436.19. Following are the official figures:

Attendance Receipts	
First game, New York	38,281 \$77,359.00
2nd game, Philadelphia	26,286 42,902.50
3rd game, New York	37,216 75,953.00
4th game, Philadelphia	24,355 40,957.00
5th game, New York	33,228 69,384.00
6th game, Philadelphia	20,485 36,109.00
<b>Totals</b>	<b>179,851 \$342,364.50</b>

Each club's share	\$90,108.72
National Commission's share	\$34,236.25
Players' share for four games	\$127,910.61

Will the financial figures for 1912 surpass those of last year? Some of the experienced Eastern critics are saying that should the Giants and Red Sox stretch the series into six games the receipts will be close to half a million dollars.

## RUNNING.

A. D. George the English runner and sport writer, says: "A word of praise is due to Hans Holmer, who put in a fine performance when winning the Marathon race round Paris last Sunday. He ran the 42 kil., 194 meters (26 miles) in 2 hrs., 43 mins. 52 secs., and beat his nearest rival, Vermeulen, of France, by over 6 minutes. Holmer is a great stayer, and sportsmen here would like to see him again meet Kolehmainen and Longboat over the Marathon distance."

## STEAMSHIPS

A hundred years ago the steamship Comet steamed down the Clyde to the wonder of all beholders. Today, in celebrating the centenary of the steamship, we seem to be on the eve of another innovation which promises to end the reign of steam for ships. The internal combustion propulsion engine is arriving, and has so many advantages over steam that there can be no lasting competition. It is announced that Ger-

many is to build a motor cruiser of 5,500 tons displacement, which will have a cruising radius of 12,000 miles. And already we have, in the submarine, the best sea-going vessel in the British Navy. These submarines, with their motor engines, can keep the high seas for months at a time, and point the way which must be followed by other war-craft. Steam has done much for sea-traffic, and yet it must give way to oil-and, in its turn, oil will be supplanted by something of which mankind has not yet known, or not realized, the possibilities.

The development of the submarine and the various flying craft leads us seriously to question whether the future warfare at sea will not depend rather upon these new factors than upon the gigantic line-of-battle vessel. The possibilities of the submarine are not yet fully realized, but in the recent naval manoeuvres it was shown how a submarine could enter a defended harbour and work havoc in supposed safety. There is no question that these ferrets of the sea are of greater advantage to the attacking navy than to one forced to remain on the defensive. There will no longer be need for long and tedious blockades, since the sea ferrets can enter harbours and drive out the sheltering warships to combat in the open, just as a rabbit is given out of its hole to fall to the waiting guns. How things have changed since Nelson's time—to-day the establishment of a submarine station at Alexandria means more to us in the Mediterranean than did the blockade of Toulon then. The submarine, with its great range of action and despite its relatively low speed, is the real commerce destroyer, and the knowledge that one is cruising in any of the narrow seas will immediately stop all commerce.

## The Canada West India Co.

(Observer.)

Last Friday evening Dr. E. S. Kirkpatrick and Coun. Flemming addressed a slimly attended meeting in the Forester's Hall with a view to inducing farmers to invest in the "Canada West India Co.," of which Dr. Kirkpatrick is chief promoter. Cuba was pictured as a better market for potatoes and other New Brunswick products than United States, but those who have voted against reciprocity with the Yankees on the ground that they were foreigners, must have felt horrified at the suggestion of dealing with Spaniards, Creoles and niggers.

Shipping New Brunswick potatoes to the West Indies and Cuba has not yet been proven a success. Carleton county farmers know that to their sorrow. There seems to be something about the business that affects the brain, for we have witnessed, in some instances, the dealers shipping themselves to Cuba and leaving the potatoes here. Then, also, the unsatisfactory steamship service, the expensive warehousing of potatoes in St. John, the danger of freezing in the process of loading on the ships, the hazard of the long ocean voyage, and the likelihood in the heat unloading, are hindrances not yet overcome.

We do not know the details of Dr. Kirkpatrick's scheme. Therefore we would be unfair to condemn it. We would likewise be unfair to the farmer if we did not advise caution. No doubt the doctor has made his scheme plain to the farmers. Granting he has, the farmers, then, should urge the Government to back the bonds of the Canada West India Co. for all the money Dr. Kirkpatrick needs to exploit it. If it is a safe scheme for the farmers it is eminently more safe for the Government, for in the event of failure the farmers would be only indirectly affected. And does not the Government owe the farmers something? Who keeps them deprived of United States markets?

The Observer is informed that only Conservatives are sought to become shareholders in the Company; that as a reward for their loyalty they are offered a chance to invest \$100 apiece. This sounds nonsensical—foolish. Nevertheless, those, to date who have become members in this vicinity are all of that faithful band—and some of them are feeling very uneasy. Others who recently joined the 'grange' are hesitating before they invest a second time.

## Big Potato Yield

An estimated yield of 3,000 barrels of potatoes from 28 acres would be considered a good crop in any sea-son, but considering the nature of college in Sackville Academy and the summer just ended it seems more than ordinarily good. This is what has been raised on the farm at Burton, Sunbury county, owned by the Burbot Land and Development Company. The potatoes in question were planted between the trees of an orchard that had been set out in the spring. The usual result of so much wet weather is to bring on rust, when the tops die before the tubers have a chance to ripen. By persistent spraying, however, with Bordeaux mixture the tops in this case are quite green yet. The hills which have been already dug show a remarkable absence of the small potatoes which are usually observed, one of them containing no fewer than thirty-two tubers of good merchantable size. The estimated yield in this case is nearly 114 barrels to the acre and shows what can be done in this province by the intelligent use of advanced agricultural methods.

The following new Professors have been appointed at Acadia University. Mr. Ralph P. Clarkson has been appointed to the Ivan Curry Professorship of Engineering. Mr. Clarkson is a graduate of Worcester Polytechnic Institute having taken his work in Electrical Engineering; he also included most of the Mechanical subjects. Besides practical work he has taught one year in the University of Vermont and left there to accept an important position in Patent Office in Washington. There Mr. Clarkson has been employed as a government expert in the examination of applications for United States patents in Engineering subjects, passing judgment on the operativeness, usefulness, and novelty of machines submitted. Mr. Clarkson will take up

the work in Engineering formerly done by Professor Durkee.

Harold Garnet Black has been appointed Professor of English. Mr. Black was a native of Pugwash, Cumberland County; prepared for college in Sackville Academy and graduated from Mt. Allison in 1907 when he was valedictorian of his class. The following year he taught in the Mt. Allison Ladies College and since then has been doing graduate work in English at Harvard. He has received his M. A. from the latter Institution and has almost completed his residence for his Doctor of Philosophy requirements. Mr. Black comes to Acadia with the highest recommendations and the authorities feel assured of his success.

The Doukhobors are leaving British Columbia for Colorado. This is one case where the country correspondent will not write: "What is our loss is other's gain." —Edmonton Journal.

## PRIVATE OFFICE

Cramming down ill-chosen food, and rushing back to work, leads straight to dyspepsia, with all its means in misery.

Proper habits of eating, with a Na-Dru-Co Dyspepsia Tablet after each meal, restore good digestion, health and happiness. A box of Na-Dru-Co Dyspepsia Tablets costs but 50c. at your Druggist's. National Drug and Chemical Co. of Canada, Limited.

## Heating Stoves IN STOCK.

Enterprise Hot Blast for Coal

## HAPPY THO' MARRIED?

There are unhappy married lives, but a large percentage of these unhappy homes are due to the illness of the wife, mother or daughter. The feelings of nervousness, the belaguered mind, the ill-temper, the pale and wrinkled face, hollow and circled eyes, result most often from those disorders peculiar to women. For the woman to be happy and good-looking she must naturally have good health. Dragging-down feelings, hysteria, hot-flashes or constantly returning pains and aches—are too great a drain upon a woman's vitality and strength. Dr. Pierce's Favorite Prescription restores weak and sick women to sound health by regulating and correcting the local disorders which are generally responsible for the above distressing symptoms.

Mrs. DICKOVER.

"I suffered greatly for a number of years and for the past three years was so bad that life was a misery to me," writes Mrs. R. F. Dickover, of Urica, Ohio, Route 4. "The doctors told me I would have to go to a hospital before I would ever be better. A year ago this winter and spring I was worse than ever before. At each period I suffered like one in torment. I am the mother of six children. I was so bad for five months that I knew something must be done, so I wrote to Dr. R. V. Pierce, telling him as nearly as I could how I suffered. He outlined a course of treatment which I followed to the letter. I took two bottles of 'Favorite Prescription' and one of 'Golden Medical Discovery' and a fifty-cent bottle of 'Smart-Weed,' and have never suffered much since. I wish I could tell every suffering woman the world over what a boon Dr. Pierce's medicines are. There is no use wasting time and money doctoring with anything else or any one else."

The Medical Adviser by R. V. Pierce, M. D., Buffalo, N. Y., answers hosts of delicate questions about which every woman, single or married ought to know. Sent free on receipt of 50 stamps to pay for wrapping and mailing only.

## Central Garage

Connell Street, - Woodstock.  
R. S. CORBETT, Manager.

Automobile Supplies Bicycle Gasoline Engine

## BUY A FARM

In the West Florida Country, this is not the Florida that you have been reading so much about, but some five hundred miles from the much exploited and advertised country. This West Florida Country is High, Dry and Healthy, no extreme heat in the summer, nor cold in winters. Fruits, vegetables, figs and watermelons, satsuma oranges, fish and oysters are in abundance, eggs and chickens are extremely high, and this is a good climate to raise them in. This part of the world has never been advertised before for sale, and no extravagant literature is gotten out to show the enormous growths to the public, but the growths are here just the same, with a climate seldom equalled and never excelled. Rheumatism, Catarrh and Tuberculosis are cured in numbers of instances. This land is extremely productive if properly handled. The majority of the native are too indifferent to cultivate the land, and prefer just enough to eke out an existence upon. We are offering lands in tracts of ten to one hundred acres at twenty dollars per acre. Three dollars per acre down and the balance at the rate of twenty-five cents per acre per month. Also we have some small and large improved farms, with all kinds of fruit, bearing, pecans, oranges, figs, etc., etc. No interest or taxes until entirely paid for, and if you miss a payment for thirty days you do not lose what you have paid in. Particulars may be obtained of the Charter Land Company, Pensacola, Florida. 3 mos-33.

## Ladies' & Misses' Long Coats

For Fall and Winter Wear

We have now on display a beautiful range of Ladies' and Misses' Long Coats for Fall and Winter wear.

These Coats are good styles and made from the best All-Wool Cloths procurable in Canada.

We shall be glad to show them and give prices when requested.

Please come in and inspect as soon as you can while the stock is complete.
