

Prescriptions

are orders from your doctor for certain ingredients to be made into a medicine.

Whether these are put up just as your doctor desires or in some hurried, careless way, will mean considerable as to the beneficial results obtained.

What's the use of having a doctor and getting the medicine unless you know it is filled up just as it should be?

Bring your prescriptions here. We are cranks on filling prescriptions exactly right.

This means more than we are exact on measurements and weights of the different ingredients. After the articles are weighed there is a right and a wrong way to mix them.

We are careful to mix them to secure the best results and don't dump them carelessly together.

Bring your prescriptions here if you would be sure of getting the best possible results from your doctor's advice.
