

RESOLUTION PUTS SAFETY LOCK ON GRANT FOR PUBLICITY

Council Will, on Approval, Pay Bills to the Amount of Grant — Permanent Streets

The town council met in the town hall Friday evening, Mayor Jones presiding.

Coun. Lindsay moved the following resolution which was seconded by Coun. A. E. Jones, and carried.

Whereas—The Town Council at its session on March 3, 1913, after hearing a delegation of the board of trade, passed a resolution to donate the sum of \$500, as a portion of the sum to be raised for the purpose of publicity in the County of Carleton, and Town of Woodstock; and

Whereas—It is understood that the sum of \$1500 is to be raised for that purpose; and

Whereas—It is desirable that the Council should have some oversight of how the ratepayers' money is expended; therefore

Resolved—That this Council will upon approval pay the expenditure up to the grant of \$500 after the bills have been submitted to them.

Stephen Green, Building Inspector, in his report to the board said that the Queen Hotel building was in a dangerous condition, and a menace to the public travelling on the street. He recommended that the roof of the Main building be taken off, and the ell and barn be torn down.

He also stated that in his opinion, the weight on the fire escape on the Graham building should be fastened more securely, as the wire holding it was liable to become weakened by rust, and in that case there was nothing to prevent the weight from falling to the street.

The matter was thoroughly discussed by the Council, and the inspector's duty in such cases was clearly defined by the town clerk.

The inspector was instructed to notify the owners of the dangerous condition of these buildings, and to take such steps as he deems advisable to have the buildings removed or remodelled.

The usual batch of monthly bills and the monthly salaries were ordered paid.

Coun. Dibblee said he had been informed by Mr. A. B. Connell that the executors of the L. P. Fisher estate wished to meet the finance committee, regarding taxes of Fisher estate. The executors thought that a reduction should be made in view of the fact that the estate has already donated to the town the hospital and magnificent school building, and that the library and technical school building are to be erected this year.

Coun. Dibblee moved, sec. by Coun. Lindsay, that the finance committee meet the executors of the Fisher estate as soon as possible. Carried.

Coun. Dibblee read the following report from the Carrutte-Paterson Mfg. Co. in reference to permanent street work on the hill between the post office and the bridge.

DESCRIPTION OF PROPOSED METHOD.

First—A firm, even, and hard sub-grade is formed which conforms in shape to the finished street surface and is everywhere 6" below finished grade.

Second—A layer of crushed stone (1 to 3 inch size) is spread and rolled to a final thickness of 4 inches.

Third—Crushed stone (1-4 to 1-1-2 inch size) is mixed with Tarvia "X" on mixing boards by hand labor until all fragments of stone are thoroughly coated. Tarvia is lightly sprinkled on the first course of stone and then the mixed tar and stone is spread by a rake to a depth of 3 inches. This is thoroughly rolled.

Fourth—Stone "screedings" or pea stone is spread over the roadway to a depth of about 1/2 inch and the whole again thoroughly rolled.

ESTIMATE OF COST.

Unit prices in Woodstock are considered as follows:

Broken Stone 95c per ton

Labor (ordinary) 1.75 per day

Double Teams 4.00 per day

Tarvia 15 per gal

The area of the proposed work as roughly paced amounts to 5508 sq. yds. The following estimate is based on this figure and if the area, when carefully measured, is found to be different the estimated cost can be changed in proportion.

Stone in bins (1600 tons at 95 cts) \$1520

Hauling stone to job (80 days for one team at \$4.00) 320

Labor (gang of 6 men 45 days at \$10.50) 473

Rolling (40 days at \$10.00) 400

Kettles and Equipment 200

Tarvia 11000 gals at 15c 1650

Supervision 400

Incidentals 200

Total \$5163

Cost per sq. yd. 94c

It will be understood that the above prices are only approximate as local conditions (such as labor, weather, etc.) may modify them to some extent.

If the item of stone and steam roller were subtracted from the estimate the result will be \$3240 or \$32c per sq. yd.

As above mentioned the total area of the street surface may be considerably less than 5500 sq. yds. The yardage found to be correct may be multiplied by the unit price estimated and you will have approximately the correct cost of the work.

PROPOSAL.

We would be pleased to take the contract of putting down the pavement according to the method above outlined, for a consideration of 15 per cent of the actual cost of the work. Under this condition we would give a guarantee on the street for two years.

If you do not wish to let the work out by contract we would furnish Tarvia to you for 15c per gal. and an engineer supervisor familiar with this type of construction for \$7.00 per day.

If you wish other propositions kindly write us your ideas.

Respectfully submitted,
THE CARRUTTE-PATERSON MFG. CO. LTD.

Coun. Jones, Gallagher and Dibblee spoke on the subject. They were of the opinion that the town could not afford to spend that amount of money on the hill this year, as the appropriation for permanent work was only \$3,000 and other streets were in much worse condition.

The report was referred to the street committee.

On motion the council adjourned.

INSPECTOR F. B. MEACHER MAKES HIS ANNUAL REPORT

In his annual report of the schools in his district Inspector Meacher says:—

"A review of the year's work shows a number of encouraging features. Additions in respect to school apparatus, furniture, etc., and improvements of houses and rooms have been numerous, and a very large outlay has been made on new buildings of which there are several in course of erection.

A decided improvement is going on in the general character of the teaching work, and such subjects as Nature Study, Physical Training and Writing are being made more effectively treated than in former years.

The exodus of teachers to the west, however, still continues and our yearly loss in this way is quite serious.

The remedy would seem to be better pay at home as an offset to the more attractive salaries which are offered abroad. A material increase could be made in the district pay of each teacher without bearing at all heavily on the ratepayers concerned but it is hard to expect such an increase to become general or to be voluntarily made until a wider and more liberal scope shall be given to the local management of school affairs, by the substitution of parish boards or the township system, for the school district as a unit."

Of the Fisher Memorial School building the Inspector says:—

"The Fisher Memorial School building, a photograph of which is enclosed, is nearly completed. It is a magnificent structure erected at a cost of about sixty-two thousand dollars, and is said to be one of the finest buildings of the kind in the Maritime Provinces. It will stand as an abiding monument to the memory of the late L. P. Fisher, Esq., at the expense of whose estate it has been erected, and it will be a lasting evidence of the deep interest which he always displayed in educational work during his lifetime.

A lot of land 200x215 feet has been acquired by the Fisher estate, on

IT DOES NOT TAKE A GREAT DEAL OF MONEY TO WORK UP A WAR SCARE

Correspondent Writes on F. B. Carvell's Masterly Speech on the Naval Question — A Wise and Sincere Leader of the People

Editor Woodstock Sentinel:

Sir,—In his masterly speech on the naval bill recently delivered on the floor of the House of Commons at Ottawa, Mr. F. B. Carvell, M. P., referred at some length to the ease with which our periodic German war scares are developed. He says: "It is somewhat remarkable how regularly those German scares come around. It seems that a certain number of gentlemen in the Old Country are able to work up a German scare at almost any time they want to do so. And after all it does not take a great amount of money to work up a German scare—a string of newspapers, a contribution of a few thousands, or perhaps tens of thousands of pounds, which amount to a mere bagatelle to the great manufacturers of ships, armaments and war material. They want a chance to sell their goods and they start a German scare. Why Sir, we have had German scares regularly from the beginning of 1909 down to the present time."

The conclusions to which the member for Carleton County has come on the subject of these scares is one with which no well informed and serious student of international matters will find occasion for quarrel. They are based upon facts with which the people of this and every other nation cannot too soon become acquainted, for they effect most seriously the deepest, the most vital concerns of the whole human family.

That the manufacturers of war ships and war materials are as anxious as other manufacturers to get business is not difficult to understand. They differ, however, from the latter in their service to mankind. The owners of woolen mills for instance, perform a natural and necessary work in the human economy; the effect of their efforts is to contribute to the comfort and welfare of their fellows. Vastly different is the case of the makers of armaments. The products of their activities are confessedly for the destruction of human life and property. The world does not need them, rather does it need to be rid of them. They are the instruments and emblems of the basest and vilest of man's infamies—the shedding of the blood of ones fellows. They are on the same plane precisely as the dirk, the dagger and the scalping knife, and in time will be regarded with the same degree of reprehension and repugnance. It is because of these considerations and others of a kindred character that the manufacturers in question find it necessary to work up the "war scares."

It is possible that some of "The Sentinel's" readers who have given but little thought to the matter may entertain doubts as to the ability of a few individuals to create a nation-wide war scare, but a little careful reflection upon the subject should convince these people that it is not so difficult an undertaking as they supposed. Money and "a string of newspapers," to use Mr. Carvell's phrase, are all that is necessary. There are other agencies which are employed, however, such as pamphlets, books and periodicals, not to mention a certain type of politician who is ever ready to serve any cause that promises in turn to serve him. Through these media warnings

which it is proposed to erect a building to accommodate Manual Training and Domestic Science Departments, under the control of the Board of School Trustees of the Town and an agricultural department under the direction and control of the Department of Agriculture for the Province of New Brunswick. The architect is now at work preparing plans for the erection of the building in question and it is intended that it will be ready for occupancy on the 1st of November, 1913.

The Agricultural Department will be free to residents of the County of Carleton. Lectures on agricultural subjects will be provided by the Provincial Department of Agriculture."

"NA-DRU-CO DYSPEPSIA TABLETS"

Proved of Great Value to Me"

There is only one explanation for the numbers of enthusiastic letters that we receive praising Na-Dru-Co Dyspepsia Tablets, and that is that these tablets certainly do cure any kind of stomach trouble.

Here is a typical letter from Miss Eliza Armstrong, Canoe, N.S.:

"It is with pleasure I write to inform you that your Na-Dru-Co Dyspepsia Tablets have proved of great value to me. I tried remedy after remedy but without any lasting good. Having heard of your tablets curing such cases as mine I decided to give them a fair trial. They proved satisfactory in my case."

The remarkable success of Na-Dru-Co Dyspepsia Tablets is such a success as can only come to an honest remedy, compounded according to an exceptionally good formula, from pure ingredients, by expert chemists. If you are troubled with your stomach just ask your Druggist about Na-Dru-Co Dyspepsia Tablets, compounded by the National Drug and Chemical Co. of Canada, Limited, and sold throughout the Dominion at 50c. a box. 142

are issued concerning the war-like intentions of some other nation, sensational reports are circulated, patriotic appeals are put forth, sane and level-headed statesmen, who fail to become excited, are lampooned and criticised, comparisons of armies and navies are made, and so on to the end of the list. In time—and not a very long time either—the discussion of "the peril" is taken up by reputable newspapers and statesmen, and finally "the scare" reaches the goal it was intended for namely, the people. The accused infamy is now far enough removed from its

promoters to render them immune from suspicion. They may even refrain from any longer taking part in their malign enterprise. The suspicions, fears, animosities and other frailties of mankind amply insure its continuance to a successful issue—to a wide-spread demand for increased national defences. The armament makers of course obtain the big orders they sought and proceed to reap their harvest, and the nation's toilers bend to the task of earning the tens or hundreds of millions the scare has cost them. "Behold how great a matter a little fire kindleth!"

What is true of our own country in the above respect is equally true of every other country, for everywhere there are individuals who are willing to enrich or otherwise promote themselves through the weaknesses of their fellow men. In reality they constitute in themselves the only perils that today threaten the world from the realms of war and militarism, and if they are the enemies of one country more than of another then that country is the one afflicted with their citizenship.

Mr. Carvell is already recognized from the Atlantic to the Pacific as one of Canada's ablest parliamentarians and he has fairly and fully earned that reputation, but if he continues to point out to the people the secret devices of their enemies—the world's enemies—civilization's enemies he will stand in history where his friends hope, and believe he will, as a wise and sincere leader of the people.

Very truly yours,
D. E. JACKSON.
Debec, N. B., March 7, 1913.

A Bid!

THIS is an earnest, honest bid for your good will. If what we say is true we shall learn it. Otherwise it will cost us heavily. Besides we shall sacrifice the respect of the housekeepers.

We assert:

Regal Flour bakes the best quality and the utmost quantity of bread per barrel of any you have ever used. It is economical, little goes far. It makes delightfully light, white loaves. And fine, flaky pastry.

Guarantee:

Your dealer will return your money if what we have told you here is not true. He loses nothing. For we pay him back. Will you meet our sincerity half way? Please remember—Regal.

Housework Drudgery!

Housework is drudgery for the weak woman. She brushes, dusts and scrubs, or is on her feet all day attending to the many details of the household, her back aching, her temples throbbing, nerves quivering under the stress of pain, possibly dizzy feelings. Sometimes rest in bed is not refreshing, because the poor tired nerves do not permit of refreshing sleep. The real need of weak, nervous women is satisfied by Dr. Pierce's Favorite Prescription, and as Mrs. Briggs and others testify:

It Makes Weak Women Strong and Sick Women Well.
This "Prescription" removes the cause of women's weaknesses, heals inflammation and ulceration. It tranquilizes the nerves, encourages the appetite and induces restful sleep.

Dr. Pierce is perfectly willing to let every one know what his "Favorite Prescription" contains, a complete list of ingredients on the bottle-wrapper. Do not let any druggist persuade you that his unknown composition is "just as good" in order that he may make a bigger profit.

Mrs. BRIGGS, of 529 N. Washington St., Delphos, Ohio, writes: "Having taken your 'Favorite Prescription' for a bad case of intestinal disease and constipation with woman's ill, for which I was almost unable to do anything, I think I am safe in saying that there are no remedies in the world like Dr. Pierce's Favorite Prescription and 'Purifying Lotion Tablets.' I am now enjoying the best of health, and thank Dr. Pierce for his wonderful medicines which have done me a world of good."

Dr. Pierce's Pleasant Pellets regulate liver and bowels.

Our Sixth Annual White Wear Sale IS NOW ON

Will last until February the 28th inst.

This sale will Surpass all previous sales as regards Price, Quality and Quantity.

We will show the most Up-to-date range of CORSET COVERS, UNDERSKIRTS, DRAWERS and NIGHT ROBES that is to be had in Canada, and at the Most Reasonable Prices.
