Two Points
About a Watch

One has to do with appearance—Style. It's important because in many ways you are judged by the watch you carry.

The other has to do with service—Accuracy. It's important because you do not carry a watch for its beauty alone. You use it in a decidedly practical way—so practical that a watch—an accurate watch—is a necessity to every person who values time.

Style and Accuracy are prime features of every watch purchased at Gibsons.

As to style, you have a wide range of choice in both men's and women's watches.

As to accuracy, you must accept Gibsons' standard—Absolute accuracy. You can exercise no choice there.

Both Branches of the
Drug Business Have Due

Attention Here

The drug business has two distinct branches—one professional, the other commercial. In our relations with the public we endeavor to draw a well-defined line between the two phases of the business.

In our prescription department or in the sale and dispensing of drugs we give careful, scientific attention.

In the mercantile side—the sale of drug sundries, toilet articles, etc.—we also give the best service. We feel justified in pushing this branch of our business for we believe that it is impossible to give suitable service to either branch unless we do in both.
