Deering Drills, Etc

As the Disks on the DEERING DRILLS are disked like those used on disk plows, they have more penetration than any other class of drills. It is estimated that the Deering Drills pull from 25 to 33 per cent lighter than any other drills of equal size. The Levers of the Deering Drills fold parallel with the box, so that when the drill is stored away it will occupy the smallest possible space. The Bearings, Oil and Grease Cups are absolutely Dust and Grit proof.

We are also sole agents for the Bissell Disk Harrows, Delaval Cream Separators, Robins & Aspinwall Potato Planters. Every article the World's Standard in its line.

Our Fertilizer Disk Drill this year is the nearest to perfection of any implement of its kind ever put on the market.

Call, inspect our goods and get our prices and terms.

650,000 BUSHELS OF POTATOES

(Continued from page eight)
land (Mr. Loggie) does not ask for the abolition of the duty.

Mr. BURNHAM: That is unfair, that is rank, that is absurd.

Mr. CARVELL: My hon. friend (Mr. Burnham) is entitled to his opinion, but he will have a chance to talk later, and he can go over in an aeroplane if he wants to, and bring a cargo of potatoes back to Canada.

The province of New Brunswick was represented at that meeting by the provincial Deputy Minister of Agriculture, and the potato dealers were represented by Mr. Guy Porter, of Porter and Manzer, Limited, which I think is the largest potato-jobbing firm in the Maritime provinces. The matter was argued very thoroughly. There were about three hundred representatives from different parts of the United States, all asking the department to prohibit the importation of potatoes on account of the disease, and the information which had been collected by these gentlemen was placed before the Secretary of Agriculture and they established that there was a disease in New Brunswick potatoes. I am not sure, but I think there was also some evidence given, that there was disease in Quebec potatoes, but I do not think there was any evidence given as to the disease in Ontario or Prince Edward Island potatoes.

The result was that some six or seven days afterwards an order went forth imposing an embargo on the importation of potatoes from any country in which disease was known to exist, and as they claimed that this disease was known to exist in Canada the importation of potatoes from Canada was prohibited. I understand that the terms of the order were such that the United States could exclude from its operation any province or provinces of Canada in which the disease did not exist, and therefore I believe that the province of Ontario could be excluded from the operation of the order, if the people of Ontario desired it. However, we cannot have New Brunswick or Quebec excluded. It would be in the interests of the producers, at least in Prince Edward Island, if an attempt were made to have the embargo removed with respect to potatoes from that province. I know that at present New Brunswick cannot get the embargo removed until we can convince the American authorities that our potatoes are free from disease.

Mr. MORPHY: Does the hon. member consider that the embargo by the American authorities on New Brunswick potatoes was a far dealing between the American people and ourselves?

Mr. CARVELL: Yes, I do. If the American authorities are honestly convinced of the existence of disease in our potatoes, I think it is perfectly fair and justifiable proceeding on their part to prohibit their importation. In reference to that, I wish to quote from this morning's Citizen.

Mr. WRIGHT: When the matter was investigated by the United States committee, was it found that American potatoes were diseased?

Mr. CARVELL: In the first place, the producers in the state of Maine were responsible for the imposition of this embargo, and they brought it about purely from a selfish motive, believing that if they could prevent the importation of potatoes from any part of the world it would enhance the price of their potatoes, or at least it would prevent the price being reduced. These people sent

their agents through our province, and they claimed they found, and I do not say they did not, evidence of this powdery scab. I have never yet seen in New Brunswick a potato exactly looking like the potato shown in the document issued by the Department of Agriculture and said to be afflicted with powdery scab. I do not raise potatoes, and the scab may exist in New Brunswick and I might not know it, but I have discussed the matter with potato-growers and potato-merchants, and while some believe it does exist, yet nine out of every ten in the province of New Brunswick will contend that it does not exist. It is a moot question. Nobody yet has ever been able to convince me that the scab does exist, and yet if the American authorities say they have evidence of it, I would not feel like saying they have not. However, I have great doubt that this disease exists in New Brunswick. To continue with the history of the matter:

other portions of the United States got busy as well as Maine, and their contention is that if the powdery scab existed in New Brunswick, which is right alongside of Maine, it was reasonable to expect that the powdery scab existed in the Maine potatoes as well. As a result of this, some two or three months ago a big delegation went from the county of Aroostook to Washington and they had a pretty bitter fight over it, and in the end a regulation was promulgated by which inspectors were put at every shipping point in Maine. Every car-load of potatoes shipped from the county of Aroostook during the last two or three months has been inspected, and the inspector puts his seal upon the car, and if he finds what he thinks is scab or any other disease, he gives a certificate that these potatoes shall be used only for food purposes, because everybody knows that this disease goes not render the potato poisonous. But, if the inspector finds that the scab or any other disease exists, he prohibits these potatoes from being used for seed purposes. In explanation of this it is necessary to understand that one-half of the potato output of the northern portion of the United States is used for seed purposes in the south, and not for table use. It is contended that potatoes grown in the south will not reproduce as well as potatoes grown in the north, and the result is that no person will use southern potatoes for seed, if he can get northern grown potatoes. The New Brunswick potatoes would be used for seed purposes in the south, as are the potatoes grown in the state of Maine. I rather felt like chiding the Minister of Agriculture for not trying to have some such regulation as that which prevails in Maine applied in Canada. But even this rigid inspection did not satisfy the potato-growers of other portions of the United States. They claimed that if the disease existed in the state of Maine, that state ought not to be allowed to disseminate it throughout the rest of the United States. They have been making another move. I find in this morning's Citizen the following despatch from Washington:

Minard's Liniment Cures Dandruff.

Ayer's Cherry Pectoral
Away back in 1841. Old enough to remember those days? Still used for coughs and colds. Sold for 70 years.

10 CENT "CASCARETS"
FOR LIVER AND BOWELS
Cure Sick Headache, Constipation, Biliousness, Sour Stomach, Bad Breath—Candy Cathartic.
No odds how bad your liver, stomach or bowels; how much your head aches, how miserable you are from constipation, indigestion, biliousness and sluggish bowels—you always get relief with Cascarets. They immediately cleanse and regulate the stomach, remove the sour, fermenting food and foul gases; take the excess bile from the liver and carry off the constipated waste matter and poison from the intestines and bowels. A 10-cent box from your druggist will keep your liver and bowels clean; stomach sweet and head clear for months. They work while you sleep.

Hotpoint Week May 11-16
From May 11th to 16th we will sell the El-Glo-Stove, the New Electric Stove at \$3.25 half the regular price \$6.50. You want El-Glo-stove, the New Electric Stove—of course you do—Who wouldn't want a stove that will do away with the unbearable drudgery of summer kitchen work? El-Glo-stove does it—does regular family cooking from any lamp socket—does not require special wiring or special dishes—and does the cooking with a third to a half less current than any other electric stove costing three times as much—You can use it in the kitchen, dining room, breakfast room, boudoir, den or on the porch anywhere there is an electric light socket to attach it—it is always ready—just push in the switch, and it is at full working heat in 15 seconds!—Beautifully designed, with a chafing-dish body; made of pressed steel, nickel-plated and brightly polished—And fully guaranteed for FIVE years.—The El-Glo-stove is now on exhibition at our store—Come in and look it over.

Hotpoint Week May 11-16
From May 11th to 16th we will sell the El-Glo-Stove, the New Electric Stove at \$3.25 half the regular price \$6.50. You want El-Glo-stove, the New Electric Stove—of course you do—Who wouldn't want a stove that will do away with the unbearable drudgery of summer kitchen work? El-Glo-stove does it—does regular family cooking from any lamp socket—does not require special wiring or special dishes—and does the cooking with a third to a half less current than any other electric stove costing three times as much—You can use it in the kitchen, dining room, breakfast room, boudoir, den or on the porch anywhere there is an electric light socket to attach it—it is always ready—just push in the switch, and it is at full working heat in 15 seconds!—Beautifully designed, with a chafing-dish body; made of pressed steel, nickel-plated and brightly polished—And fully guaranteed for FIVE years.—The El-Glo-stove is now on exhibition at our store—Come in and look it over.
