weeds and worthless lumber. The forest, said Mr. Watson, should be a permanent producing holding and it was a crime to destroy it. Care should be taken in cutting and the seed trees left as they are, something that will grow into money. The hardwood in this vicinity will undoubtedly become of much importance as it is a question of a short time when the hardwood supply of the United States will be exhausted. Mr. Watson left for his home on Monday's train.

A Name to Remember.

Here is a name—"Penslar"—that will mean a great deal to every man, woman and child in this county, when they learn what it stands for.

It is our duty and our pleasure to tell you.

There is a great firm of Manufacturing Chemists in Detroit and Walkerville, Ont. The Penslar Chemical Company, whose name on the label of a remedy is the best possible guaranty of its purity and medicinal worth.

They prepare in their splendid laboratories over 100 remedies for household use.

They do not believe in secret medicines. They think you have a right to know what you are taking. And you have.

So they put the full formula on every label—the name and the exact quantity of every ingredient—all in plain English so you can judge for yourself.

If they were not sure that each of these was the best possible prescription—if they were not sure that their skill in compounding these remedies was unsurpassed, they could not afford to do this.

We like to handle drugs of quality. That is the way we get our trade. That is why we obtained the agency for these splendid remedies known as
