The Best  
QualityAt a Reason-  
able Price

You cannot get a satisfactory pair of Glasses by just buying two lenses and a metal frame. You must have skilled service first. The refractive errors of your eyes must be measured accurately. From these measurements the Optometrist figures out formulae by which your lenses are ground. The grinding of the lenses, the selection of the proper mounting to meet your individual needs, and the final adjustment of the glasses on your face, are operations requiring highly specialized skill. But for these operations to be of value to you they must be based on a careful examination of the eyes such as we make. This is the keynote to satisfactory glasses.
