

The Hundred Ways Which Don't End Corns

Perhaps you say—"I've tried and tried, but found nothing that ends a corn."

You might keep trying for years, Madam. There are a hundred ways which don't. Most of them are very much alike.

But remember this:

There is one way which has removed 70 million corns. It is now removing half the corns that grow.

It's a plaster which contains a bit of wondrous wax. It ends the corn pain in a jiffy. It ends the corn itself in two days. It gently loosens the corn until it comes out without any pain or soreness.

When you merely pare corns—

When you use some folderol—

Bear this in mind. There are folks all around you—users of Blue-jay—who never suffer corns. You are wronging yourself when you fail to do what they do.
