ONE YEAR	4,000	2,500	\$1.00
TWO YEARS	5,000	3,000	2.00
THREE YEARS	6,500	4,000	3.00
FOUR YEARS	8,500	6,000	4.00
FIVE YEARS	12,500	8,000	5.00

Get Busy—You Need Not Invest a Cent—Only An Honest Effort To Win a Valuable Prize

LIEUT.-COL. KIRKPATRICK APPEALS TO PEOPLE OF NEW BRUNSWICK AND PRINCE EDWARD ISLAND

Asks for Machine Guns, that the 55th Battalion May be on Equal Footing With the Enemy—Sons and Brothers who are Fighting Your Battles Should Not be Left at a Disadvantage—It Rests with the People—What Will Your Answer Be?

To the people of New Brunswick as a whole and in particular to the Mayor and Aldermen of each and every city and town; To the wardens and members of each and every municipal council and to interested and influential citizens of the province.

I take this opportunity of expressing to the people of New Brunswick and Prince Edward Island, my hearty appreciation for their sympathy and co-operation in the recruiting campaign.

The main object of this communication is to draw the attention of the people of New Brunswick and Prince Edward Island to the value of Machine Guns in war.

Its numerous advantages cannot be enumerated here for want of space but reports from the front to its importance and to the terrible and deadly results achieved by troops well supported by Machine Guns.

The fire of one Machine Gun is considered as equal to that of a platoon—forty to sixty men.

The Germans have a Machine Gun for each platoon—sixteen per battalion.

The British have one for each company—four per battalion. Therefore the Germans have a superiority of four times the number of Machine Guns of the British.

Some of the advantages of a Machine Gun are, that while equal to that of about sixty men is that it occupies only about a yard of space and owing to its size is readily dred being placed on an equal foot-

ing with the enemy we hereby appeal to those people of New Brunswick and Prince Edward Island who cannot themselves take up arms for the defense of the glorious principles of our empire to show their interest, sympathy, co-operation and support by seeing that those who are taking up arms in that defense; who are fighting your battles; who are making incomprehensible sacrifices to maintain the liberty that you now enjoy are armed with as many Machine Guns as the German aggressor.

We are most anxious to have each of our sixteen platoons armed with a Machine Gun.

Already one of the Montreal battalions have been presented with four Machine Guns by four private citizens of that city. Shall the New Brunswick and Prince Edward Island battalion be less efficient equipped than any other? That rests with the people of New Brunswick and Prince Edward Island.

We hereby ask the Mayor and aldermen of every city and town council; The warden and members of each and every municipal council; Each and every society and organization whatsoever and each and every financially strong and influential citizen to please consider this matter of personal interest and obligation and assist, co-operate and support by any and every means in their power.

This is a time when sacrifices must be made but no sacrifice would be involved by our cities, towns and municipalities or by many of our private citizens in contributing the necessary \$750.00 for the purchase of a Machine Gun for the 55th New Brunswick and Prince Edward Island battalion and we feel just fled in making this appeal and confident that not only cities and municipalities but that also many of our private citizens will cheerfully contributing in a marked degree in the Empire's defense and in discharge of the obligation which rests upon us all as citizens of the British Empire and especially on those who remain at home.

Then the various and numerous societies and organizations could institute a vigorous campaign for procuring funds for the same purpose, and each gun will bear the name of the city, town, county, society, or person presenting it.

J. R. KIRKPATRICK, LT. COL.
O. C. 55th N. B. & P. E. I. BATT.
Mr. E. Hutchison, of Newcastle, on July 19th wired offer of a machine gun.

WHAT HAS HAPPENED

A Concise Outline of the Trend of Events
That Have Transpired in the War Zone

Sol. Currie, in a speech at Toronto to last week, declared that Canada must send 150,000 more men to the war.

Ten thousand members of the Masonic Order are with the Canadian force.

Wallaceburg, with a population of 4,500, has contributed \$28,000 to the Patriotic Fund.

Eleven Austrians were captured at Port Arthur and five at Niagara, while attempting to escape to the United States. Some of those who aided in the attempt are facing a charge of treason.

The Canadian Eucharistic Congress, held in Montreal last week, closed with a prayer for peace in the name of the slain, in the name of the bread-winners who were no more, and in the name of the thousands of ruined homes and fortunes.

The number of Canadian casualties officially reported up to the middle of last week was well over 10,000. As some of those thus reported occurred in June, and even as far back as April, the real number of losses to date is far beyond the ten thousand mark.

Lieut. C. N. Cochrane, of the Military Institute, Toronto, says that recruiting which has already taken place has practically drained Canada of the "British born," and that reliance will have to be placed on the native born for the 150,000 men Col. Currie says are still required.

At a recruiting meeting held in Toronto, Mrs. J. Smart, of Lambton, whose husband is at Niagara-on-the-Lake and four brothers are on active service, complained that

after travelling to the camp every week, the wives of the men in the rank and file are made to wait outside the lines in the boiling sun for hours before being permitted to see their relatives, while the "wives of the officers are allowed to come and go as they please."

Alcoholic liquors are barred from French soldiers.

Fifty thousand women of Berlin gathered Sunday on the Victoria Embankment and paraded through the streets of London with banners flying, to demonstrate their enthusiastic desire to be enlisted in the service of the country.

The Kaiser promises a coup on the western front that will make all Europe tremble.

Robt. Rosenthal, a German spy, was shot in London last week, following upon conviction by court-martial.

During the fortnight ending July 8 776 British officers were reported killed, wounded, or missing.

Four hundred and fifty thousand square miles of German colonial possessions have been occupied by the Allies during the war.

A shortage of ammunition is said to be crippling the Turks. There is a very noticeable falling off in the number of shells used.

The war appears to be approaching the ultimate limit in barbarism. The French are substituting the knife for the bayonet in trench fighting. Shooting and bayoneting are bad enough, but knife fighting lowers men to the ferocity of wolves.

A strike in the Remington arms and ammunition plant at Bridgeport, Connecticut, threatens to tie up gigantic war contracts for the allies. Five hundred men were to be the first to walk out. The labor men put the blame on the company and not on any German influences.

The British Ambassador at Washington is being given the protection of special guards in order to ensure him against an attack such as that recently made on J. P. Morgan. An attempt to kidnap or kill the Ambassador during an auto trip is reported to have been frustrated only by the chauffeur jumping a ditch and cutting across fields to another road.

Scott & Bowne, Toronto, Ont.

TWENTY YEARS AGO

From the Sentinel
August 3rd, 1895.

Mrs. Geo. Walkwr, and Miss Walker, East Boston, are visiting Mr. and Mrs. W. B. Belyea.

Wm. Balmain, wife and daughter, left on Tuesday for Grand Lake, Queens County, where Mrs. B. and children will remain some weeks. Mr. Balmain will return the last of the week.

Miss Maud B. Corkery left on Monday for Somerville, Mass., where she intends to enter the hospital for the purpose of studying nursing.

Arthur Hay started on his bicycle, Tuesday, to visit his aunt, Mrs. Ferris, at White's Cove, Queens Co. He was accompanied as far as Fredericton by Thane Jones.

Messrs. Sol. Perley and Austin Hartley have returned from their gold mining operations on the Tobique and report the prospects are being very favorable. They have been working the stamp mill since early in July. The working crew consists of seven men: the veins tested, ten in number, lying quite near the stream, and proving fully up to anticipations. Altogether, the outlook is quite encouraging.

A "chess player" writing to the St. John Globe from Woodstock, seeking to have a game arranged between Messrs. McClement of Woodstock and Gaskin of St. John, says William McClement, an employee of the Sentinel office, is the best checker player here, and adds that those in the front rank of chess players are Rev. Fr. Chapman, Hon. H. A. Connell, F. B. Meagher, Dr. Griffin, John Lindsay, Jas. McManus and John P. Malaney.

The Woodstock nine had their batting clothes on, Saturday afternoon of last week, and polished off the Houlton base ballists to the tune of 43 to 12; this was too one-sided a game to prove interesting.

The Roses are corresponding with the Tartars, the champions of Fredericton, for a game in Woodstock in a week or two. The nine from the celestial city returned from St. John about a week ago, where they won two and dropped 1 game. If these two nines meet, an interesting game will be witnessed.

Woodstock's club is a first-class one in every particular; especial mention should be made of the battery, McKinley and Bourne. The writer is satisfied that the little catcher's

equal is not in the Province; he is a sure catch, bats like a Hercules, and is playing ball from the word go until the last man is out—this last characteristic is also true of all the nine; the pitcher knows the curves and has lots of speed. The citizens of Fredericton presented their club with \$40 to help pay expenses to St. John. If the match is arranged, everybody interested in ball should buy a ticket for game and lend a helping hand; they are all our own boys and should be encouraged.

What's the matter with a nine placed as follows:—Harry McKinley catcher; Percy Bourne, pitcher, Geo. Frapp, Jim Montgomery, Burnham Jacques, H. Thornton, infield; and an outfield made up from Frank Gilman, Frank Brewer, Aubrey Connell, Fred Hayden and Gordon Townsend.

RUMORED RETIREMENT OF SIR JOHN FRENCH

SUCCESSOR IN FLANDERS, SIR WILLIAM ROBERTSON

There is a persistent rumor, says the London World, that there is likely to be a change in the command of the British Expeditionary Force in Flanders. It is said that Sir John French will return to England and to take up the command of the Home Forces, and that he will be succeeded in Flanders by Sir William Robertson. The latter is the brilliant Chief of Staff, who began life as a footman, and afterwards, having joined the Army as a private, rose to be head of the Staff College. For three years previous to the outbreak of the present war he had lectured on the next war with Germany, and it is said that the plan of campaign which he indicated has proved amazingly correct. The appointment, if made, is likely to meet with the warm approval of General Joffre.
