More of our young men should take

advantage of these courses in agri-

culture and prepare themselves for

up-to-date scientific methods of farm-

ng. We need less extensive farming

and more intensive. Concentration

produce larger returns than

of energy and method on small fields

twice the amount of energy scattered

over large areas. Let our young

men read good agricultural magazin-

some of the advice therein given and

we will soon see a large development

of the output of farm products, with-

out the unnecessary wear and tear of

farm machinery caused by trying to

work over so much land, as is now

Less attention to phases of the

moon and the signs of the Zod ac,

etc., and more attention to modern,

progressive, enlightened methods,

will pay good dividends to the farm-

er and get him out of some of the

ruts and beliefs that cannot be prov

en by any systystem of logic, science

or common sense. This may sound

our respected friends, neighbors and

farmers, but if they will take the

trouble to try and demonstrate by

facts and figures, all these things

they will see that they will not have

very much proof of their belief in

the weather, crops, animals, seed-

time and harvest, and all the endless

catalogue of signs handed down from

forefathers since Columbus discover-

Mesers. W. J. Page and Colter
