

Quackery and Corns

Hundreds of treatments have been offered for corns. Some were sedatives to quiet pain. Some were acids, harsh and risky. Some were quackery.

But one man—a famous chemist—studied corns for 25 years. And finally discovered Blue-jay.

That is now the standard treatment, gentle, certain, scientific. It is used on a million corns monthly.

It has stopped the corn pain instantly, 70 million times. It has ended the corns completely within 48 hours, in 91 per cent of the cases. The others take a little longer.

Stop paring corns. Stop treating them in wrong ways. Use Blue-jay, and that ends them in a gentle, easy way. Prove that tonight.

Not In His Line.

She—You must give him credit for the fact that he expresses his ideas beautifully. He—But, you see, I am a freight agent.—Judge.

Be neither ignorant nor careless with respect to the future.—Vergil.

MODERN WIRE ROPE.

Mathematical Precision Rules Every Process in Its Making.

Although wire rope has been used as a mechanical appliance for almost 5,000 years, it is commonly regarded as a modern invention. During the many years which have elapsed since the first records of its use wire rope has passed from a crude to a highly developed product, and the purposes for which it is employed have increased a thousandfold. In no other branch of the American steel industry is there so great a demand for material of proved integrity, for it might be safely suggested that wire rope is born to be abused. It is subjected to tremendous tensile strains; it must withstand constant bendings, abrasion, corrosion and the peculiar internal stress produced by vibration.

Wire rope as it is made today is the product of the metallurgist and the mechanic. Every process, from the smelting of the ores, the cold drawing of the wire and the heat treatments it receives down to the stranding and laying up of the cable, is conducted with mathematical precision.

The chemist sees that only steel of the proper analysis is used; the electric pyrometer insures uniformity of heat; treatment in various testing machines clearly develops the worth of the product before it is allowed to leave the mill. Wire rope is used in the mine shafts more than a mile in depth, and may be found on aeroplanes which sail a mile or more above the ground.—Technical World.

The Norwegian Costume.

It is at church in Norway that the national costume is best seen. In the north the women wear short dark gowns, with fringed handkerchiefs tied becomingly over their curly fair hair, black ones for the matrons and white ones for maidens. In the south the old Norwegian dress is often worn. It consists of a short dark petticoat, with a stripe of bright colors, a full white blouse and a red bodice heavily embroidered, while on Sundays a quantity of silver pins and chains are added. The head dress varies according to the occasion and the wearer's social condition. The girls wear jaunty red caps, the married women a coil made of many folds of starched white linen, plaited over a wooden frame, and a bride wears a high metal crown curiously chased and set with jewels.

Differentiation.

"Is your husband an optimist?" "Well," replied the tired looking woman, "he's an optimist in hoping for the best, but a good deal of a pessimist in working for it."

Long Sentence.

William E. Gladstone, when he was British premier, once made a speech at Birmingham, the opening sentence of which contained 176 words.

Noble blood is an accident of fortune. Noble actions characterize the great.—Goldoni.

Cataclysmic Geology.

Cataclysmic geology no longer exists. It was once the accepted opinion that the great changes in the earth's surface had been mainly brought about by sudden and violent (cataclysmic) agencies, but Sir Charles Lyell, as far back as 1830, demolished the old theory of cataclysm at once and forever. Sir Charles proved by facts which were indisputable that the great geological changes have been produced slowly by gradual processes of subsidence and elevation and not by earthquakes, volcanic action, etc. Lyell may be said to be the father of scientific geology.

OPPOSITION Convention

ALL ELECTORS OF THE COUNTY OF

VICTORIA

Interested in the proper administration of public business, and opposed to the methods of the present provincial government, are invited to attend a convention at the

'Specialty' ANDOVER

TUESDAY, 3.30 p. m. **AUG. 22**

For the purpose of choosing two candidates to be nominated by the Opposition Party when the General Provincial Elections are announced.

F. B. Carvell, M.P., Woodstock; W. E. Foster, St. John; P. J. Veniot, Bathurst; E. S. Carter, Provincial Organizer, will be present to address the electors, as well as the candidates chosen

Those wishing to attend will come on regular trains returning on excursion trains to Grand Falls & Plaster Rock after evening meeting

ALL ARE WELCOME

J. W. P. Dickison, Sec

R. W. Deming, Pres.

"Please send me some Chewing Gum:

WRIGLEY'S

is the kind the boys all like. It's sealed in a wax-wrapper. Air, moisture and dirt can't harm it.

The chap with some Wrigley's to pass around is 'cock of the walk.'

It's so refreshing and thirst-quenching. Send some of both flavors.

The boys like **WRIGLEY'S SPEARMINT** after smoking and **WRIGLEY'S DOUBLEMINT** after eating."

Sealed tight Kept right

UNITED BAPTIST CHURCH, WOODSTOCK, N. B.

Both Are Good.

We are asked, "What is the best conundrum and answer you ever heard?"

That which was answered by a minister who was asked by a vain woman which hand he regarded as the most beautiful. And he replied, "Ask the poor, and they will tell you that most beautiful hand is the hand that gives."

Next to it is the reply of a banker who was asked, "Why is a promissory note like a rosebud?" He answered, "Because it matures on falling dew."

Not Settled Yet.

"Is the head of the house at home?" asked the agent as the mister of the family answered the doorbell. Making no effort to answer the question, the mister person said, "I don't know what line of goods you are introducing or whether they would fit in our establishment or not, that phase of the matter being neither here nor there, but let me tell you something—if you can establish once for all just who is to be recognized as the head of this house I'll buy a gross of whatever you've got and pay the catalogue price."
