

The Carleton Sentinel

F. B. CARVELL, PRESIDENT.

A Weekly Newspaper printed and published by the "Carleton Sentinel Publishing Company, Limited."

FRIDAY, JULY 13th, 1917.

WE MUST BE FAIR.

A great deal of opposition to compulsory military service bill is founded on the fact that it applies only to manhood and not money or other resources—or forms of service, that can be, and should be given by men who cannot fight with arms.

It is evident that a great deal of the opposition to compulsory service would disappear, or be reconciled to the necessity of the measure, if a provision to conscript wealth as well as manhood, were added.

Such an amendment will probably be presented, and the government should cordially accept it. Sir Robert Borden in introducing his Conscription bill, invited criticism and amendment. He should accept a proposal to include wealth and other resources in its operation, not only as a matter of fair play and justice, but also as a measure of good policy—to make its enactment more easily possible and its enforcement less difficult and—perhaps, less dangerous.

"GIVE UNTIL IT HURTS."

Although the Red Cross, Soldiers' Comforts and other societies are supported by voluntary subscription, it is not charity. Charity is no word to use in connection with anything that is done to help the boys who are doing the fighting for us. They deserve every single bit of assistance that can be given them, deserve it as a right, and he who withholds such assistance from them is undeserving of their protection, the enjoyment of his home and privileges of the country.

"Give until it hurts." And it may be remembered that the hurt that comes from giving cannot compare with the hurt that comes to the soldier wounded on the firing line, or to the home which is broken by the fatal message from the front.

FOOD CONSERVATION.

"Food conservation is essential to win the war," is really the essence of the statement recently issued by the Food Controller for Canada, Hon W J Hanna. It is not merely that there is a great shortage in food in the Allied countries overseas that the Controller wishes to emphasize, but even more especially he points out that the elimination of waste at home makes more food available for overseas. Owing to the ease with which bumper crops of grain and vegetables could be produced in the New World, the

habit of extravagance has become almost inherent.

Every household can do its share in curtailing waste. Eliminate waste in the home by cutting down the number of courses served. If the soldiers can thrive on plain fare, we who sit at home may reasonably be expected to do the same. It is wise and necessary that perishable foods be eaten by those who stay at home, so that all foods that can be stored and transported without loss or waste should be conserved for the use of our own armies and those of our Allies. Among the most important of these are wheat, beans, and pork products. We should use substitutes for these.

The need for conservation is imperative and the Food Controller can do something towards compelling the country to conserve, but after all, the result will depend mainly upon the willing response of the individual. Every loyal, patriotic citizen, man and woman, should make it his or her prime business in life at present to respond to the Food Controller's urgent call to conserve food and avoid all waste.

The new Sheriff of Carleton County is not only one of the most efficient peace officers in Eastern Canada, but he is also something of a diplomat. He demonstrated this when he arrested William Glenn the slayer of Harry Wiley, a short time ago. Glenn had barricaded himself in his home and threatened death to all who dared molest him. There are some people who rush into places where angels would hesitate, but Sheriff Foster is not one of that kind. He employed diplomacy in the case of Glenn, and rounded up his man without further bloodshed.—Mail.

The soldier son of Mr. W. S. Loggie, M. P., for Northumberland, writing from the trenches to his sister, a nurse "somewhere in France" asked: "What is the news regarding conscription and coalition? I am strong for conscription myself. What does father think of it?" That settled it for Mr Loggie. He supports conscription as does practically every other father in and out of parliament whose sons are doing their duty. Opponents of conscription in and out of parliament are mainly those whose relatives have failed to answer the call.

The United States Red Cross Fund, after a seven days' campaign, stands at \$114,000,000. This probably is a world's record for a fund voluntarily contributed for relief work.

The farmers will have no small part in the great war which is now on and it is up to them to "act well their part" by providing abundant crops for the demands which war has created.

SYNCHRONIZE?

The failure to find pure water cost \$2000. Liens, executions and suits will be taken to recover all taxes not paid by August 1st.

PRIZE WINNERS AT SCHOOL GRADUATION EXERCISES

Governor General's Medal won by Winifred Marion McCunn.

W. M. Connell's medal for best English essay on "Good Citizenship" won by Leola Blanche Robinson.

Latin Prize, presented by Rev Frank Baird, won by Wilmot Robert Seely.

J. R. Brown's medal for England literature and history won by Helen Louise Pringle.

James A. Gibson medal for French and Chemistry won by Winifred Marion McCunn.

P. B. Carvell medal for Mathematics, won by Wilmot Robert Seely.

F. C. Squires' medal for original work in Mathematics won by Marjorie Leola Wright.

W. S. Sutton's prize for highest standing in grade 10 won by Dorothy Stockton.

F. L. Atherton's prize for second highest standing won by Deborah Slipp.

Rev. A. S. Hazel's prize for Latin in grade 9 won by Glenn Adney.

E. W. Mair's medal for Mathematics in grade 9 won by Glenn Adney.

Lieut. Governor's medal for highest standing in the county on high school entrance examination won by Albert Sutherland. This prize has been won by Broadway school every year since Mr. Daley took charge. The prize this year will probably go to Miss Kathleen Bowlin who has made exceedingly high marks.

Mrs E. London of Canterbury visited friends in town this week.

Mr E J Clarke made a business trip up river this week.

Mrs. A. M. Fisher left on Thursday for Fredericton, where she will be the guest of Mrs W T Whitehead.

Mrs CR Watson and Mrs Jack Sylvester spent a few days in Southampton, visiting friends this week.

Miss Katharine Clarke, trained nurse of Boston, is expected on Saturday to spend a few weeks at her home here.

Mrs. George Simpson and little miss Georgina Simpson of Presque Isle, Me., are spending a week with Mrs Simpson's parents, Mr. and Mrs Edward Deming.

Mr J D Carey, for many years a resident of Woodstock, has gone to Tryan, P. E. I., as associate pastor of the Methodist church. He has been stationed at Bathurst.

Rural Science School Opened With Good Attendance

Efficient Teaching Staff Engaged—Rev. Frank Baird Delivers Address At Public Meeting.

The Rural Science School opened Tuesday in the Vocational school.

The instructors this year are: R. P. Steeves, Dr. H. E. Bigelow, Prof. A. F. Baird and F. A. Dixon.

The enrolment on opening numbered 40. The public meeting in the evening was well attended. Mr. Dixon was in the chair and made a few remarks about the object of the school.

Rev. Frank Baird spoke on "The Rural Science School as an asset of the Province."

Mr. Baird called attention to the resources of the province and the immense possibilities in future development, the importance of greater knowledge in cultivation of the soil, the natural beauty of the province and the opportunity for establishing beautiful and prosperous homes.

Brief remarks were made by W. S. Sutton M. L. A., Dr. Bigelow, Mr. King and Prof. Baird.

The prospects are for a successful school with the number of students exceeding that of last year.

HOW IS YOUR APPETITE?

Loss of appetite during the summer months is a common trouble, and indicates that the digestive system is out of order. Lacking a healthy appetite many people—especially women—go too long without food, or eat sparingly because food seems to distress them, and it is no wonder that they complain that they are constantly tired and unable to stand the hot weather. This simply means that the digestive system is not doing its proper work, and that the nutri-

Cool Clothes

Here's Summer Comfort for the Man who is warm in Body or in Mind
We've Cool Things Galore

Cool Underwear

There's great comfort in right fitting Summer Underwear and everlasting nagging discomfort if it doesn't fit!

We handle the best makes of Underwear and the man we outfit for Summer will have no trouble

Union Underwear, Athletic Underwear, Two Piece regular Underwear Short Sleeves or Long Sleeves

Full length or knee length Drawers. We have Underwear for the Boys too in Combinations or two piece

COOL YOUR HEAD

Cool your Head in one of our new Straw Hats. Its necessary to keep a Cool Head these days, when there is so much doing all over the world.

ALL THE CORRECT SHAPES

Every good Straw and every right block in an endless variety as conservative or as smart as the Modest Man or Swagger Fellow can desire.

Chip Hats, Plain Straws, Palms, Sennits, Panamas and Bancocks.

We've a "just right" Straw Hat for every head that comes

Cool Summer Shirts in all styles Sport Shirts, Neglee Shirts, Shirts with Soft Collars and Cuffs

Cool Hosiery in Cotton, Lisle, Silk in Black, White, Palm Beech Greys and Tan.

Don't You Forget The Little Fellows Comfort

We have been looking out for them and have a nice line of Rompers, Wash Shirts, Cotton Pants, and Cotton Jerseys to keep them cool through the hot days. The cost is a trifle while the Summer comfort is great. Come here for Summer Wear and

Rural Science School Opened With Good Attendance

Efficient Teaching Staff Engaged—Rev. Frank Baird Delivers Address At Public Meeting.

The Rural Science School opened Tuesday in the Vocational school.

The instructors this year are: R. P. Steeves, Dr. H. E. Bigelow, Prof. A. F. Baird and F. A. Dixon.

The enrolment on opening numbered 40. The public meeting in the evening was well attended. Mr. Dixon was in the chair and made a few remarks about the object of the school.

Rev. Frank Baird spoke on "The Rural Science School as an asset of the Province."

Mr. Baird called attention to the resources of the province and the immense possibilities in future development, the importance of greater knowledge in cultivation of the soil, the natural beauty of the province and the opportunity for establishing beautiful and prosperous homes.

Brief remarks were made by W. S. Sutton M. L. A., Dr. Bigelow, Mr. King and Prof. Baird.

The prospects are for a successful school with the number of students exceeding that of last year.

HOW IS YOUR APPETITE?

Loss of appetite during the summer months is a common trouble, and indicates that the digestive system is out of order. Lacking a healthy appetite many people—especially women—go too long without food, or eat sparingly because food seems to distress them, and it is no wonder that they complain that they are constantly tired and unable to stand the hot weather. This simply means that the digestive system is not doing its proper work, and that the nutri-

ment that should come from the food is not being distributed to the various organs of the body. In other words the blood is growing thin and watery.

You need a summer tonic, and in all the realm of medicine there is no tonic can equal Dr. Williams' Pink Pills. Take short treatment with these pills now and notice how promptly your appetite returns and your power to digest food improves. Your food will then do you good, your strength will return and you will no longer complain that the hot weather tires you out.

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel the least bit out of sorts. The sooner you do so the sooner you will regain your old time energy. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

OBITUARY

WILLIAM E. SPIKE.

The death occurred of William E. Spike of Andover, on Friday, July 6. Mr. Spike had been in ill health for some time. He is survived by a widow and two daughters, Helen and Bertha, also by a son, Eugene W., and daughter, Louise by his first wife, who was a daughter of the late William Clayton, of Sheffield. Four sisters and one brother also survive. The late Mr. Spike was sixty years of age and was a son of the late Rev. Henry N. Spike.

BOARDERS WANTED—Apply

at MRS. DUNSTAN, No 17 Broadway.

WANTED—First or second class female teacher for school district No 6 parish of Gordon, Victoria Co., N. B., salary \$115 short term, \$135 long term.

GEO. W. GOUCHER, Secy to Trustees.

Engineer Grimmer Reports

(Continued from page One.)

INFORMATION OBTAINED BY DRILLERS.

From an examination of plan No 101 you will notice that the location of the wells was such as would show the continuity of strata, and each individual well would show the nature of the strata at that point. As previously stated well No 4 showed good material, and had this existed throughout there would have been no doubt of good driven well supply. The results obtained in drilling at wells A B C D & E have been plotted on plan No 102, on which also are shown extreme high and low water, the low water line being as a matter of fact the condemning feature of the whole proposition. In all of the above wells it was found that no satisfactory water bearing strata existed below elevation 90, while extreme low water was placed at elevation 100, giving only a head of 4 feet on which to base your supply. The fact that wells No 1 2 3 and 4 show greater depths of suitable strata goes to show that the formation is variable, and leaves the possibility of an even more shallow strata at some points through which the water would be drawn.

PUMPING TESTS.

A great deal of trouble was experienced at first in pumping, both engine and pump giving trouble. The pump was considerably out of repair, and had to be overhauled, and when the tests were first started a lot of fine sand was raised which effected the pumps operation. These troubles were finally overcome, and on June 12th an average of 65 gallons per minute was drawn from Well No. 3 for twelve hours with a drop of three feet in the water level on Well No. 3 and no effect on Well No. 4. On the 13th the pump ran for seven hours at a rate of 85 Gallons per minute, and lowered the water 3.3 feet. The same results were obtained on the 14th and no effect was found on Well No. 4. The drop in water level occurred during the first two hours pumping, and did not appear to increase with continued pumping, so that with the river at its present stage the proposition would have proven satisfactory but with the low water conditions as they are known to exist it would not be a safe supply, and could not be recommended. Samples of material found in the different wells were saved, which together with the notes taken are available for your Committee.

Respectfully submitted, A. K. GRIMMER, Consulting Engineer.

To the Chairman & Members of the Water Committee, Woodstock, N B Gentlemen—

The test wells have been sunk on the Meduxnakik intervals, and it has been found that the underlying strata are blue clay and quick sand and they extend over the entire flat and the location will be entirely unsuitable for driven wells.

I have gone over all the other apparent available sights with the drillers and there are evident signs that this same strata forms part of all the general formation, it therefore appears to me that we cannot hope to find a supply of pure water from driven wells.

On the Upper Island this blue clay and fine sand are now visible and I am informed that in the past years this was used for the manufacture of brick so I do not think it advisable to make any test of this property. This situation places us with one alternative, and that is a filter plant.

We are today making surveys at the water works site, to ascertain whether a filter plant can be located there or not, the result of which will be submitted to you next week, at the earlier possible time.

Respectfully yours, A. K. GRIMMER, Consulting Engineer.
