

## Worth Protecting

A good article is worthy of a good package. A rich, strong, delicious tea like Red Rose is worth putting into a sealed package to keep it fresh and good.

A cheap, common tea is hardly worth taking care of and is usually sold in bulk.

Red Rose is always sold in the sealed package which keeps it good.

## Semi-ready Suits

They fit you and satisfy your idea of what good clothes and good tailoring should be.

With wool still soaring in price the label-in-the-pocket means the cost of the suit when the wool was bought over a year ago.

\$18 Suits and Overcoats in British-woven cloths. It's a pleasure to show such finely tailored garments as these in Semi-ready Tailoring.

**B. B. DYKEMAN**

Has the Only Genuine Semi-Ready Tailoring

### Canada's Contribution.

It is now more than a century and a half since Louis XV. of France signed over to Great Britain the Dominion of Canada with the light remark: "Oh, well; it's only a few acres of snow."

One cannot help wondering what his thoughts would have been could he have had a vision of the Canada of to-day and the part she is playing as an ally of his countrymen of the twentieth century. Out of a population of some seven and a half millions Canada has given 440,000 fighting men to the war. At the end of last year war orders totalling \$1,095,000,000 had been placed with her, while this year's munitions orders are expected to exceed \$700,000,000—or about \$100 for every man, woman, and child. At the beginning of this year 630 factories were working on munition contracts, the country's output being now more than that of any European nation except Germany before the war. Wooden ships, steel ships, and submarines are being turned out, and on this account and that the Imperial Munitions Board is spending annually more than two and a half times as much as the Federal Government spends in a normal year. Anxious European allies await the grain and flour of the Canadian prairies as eagerly as ever the populace of Ancient Rome looked for the corn ships from Sicily and Egypt. And if the province of Alberta alone were cultivated on the same intensive scale prevailing in pre-war Belgium it would support an agricultural population of fifty million—or half the entire population of the United States.—From "Canada's Troubles and Triumphs," by Harry C. Douglass, in the American Review of Reviews.

### An Intrepid Mariner.

An intrepid but almost forgotten Canadian mariner was Captain J. H. Gardiner, who left Shelburne, N. S., on June 19, 1893, in an effort to cross the Atlantic in a fifteen-foot sailboat of his own make.

Captain Gardiner was last heard of about eight hundred miles east of New York, when Captain Crowley, of the British steamship Verejone, picked him up and outfitted his boat with supplies.

Captain Gardiner insisted on continuing his solitary journey across the ocean, although he said that he had had hard luck in the journey out of Shelburne. He was bound for Falmouth. He said that he was trying that method of crossing the ocean in an effort "to make a name for himself."

**PHYSICIANS

DR. ED. MORIN & CO., Limited. Quebec, P. Q.

### Mathematics and War.

In addition to his attainments as a chess player Napoleon was a skilled mathematician, a science which he always attracted great soldiers. As a young man he was quite distinguished by his ready manipulation of mathematical formulae, and his keen mathematical brain was a big factor in his success as a general.

Wellington also had a similar talent and on one occasion he told the Rev. R. Gleig that he attributed much of his military success to his lifelong devotion to the science of numbers. Many other famous soldiers of the last century were adepts in rapid and accurate calculation, among them Lee, Jackson, and Moltke. Washington, too, was a mathematician, a subject in which he was exceptionally proficient.

General Joffre, had he not chosen the army as a profession, might have been a professor of mathematics. Mathematical calculation and applied science are great factors for success in war.

### Knew It Was Good Music.

The late violinist, Remenyi, used to call at the old Edison office at 65 Fifth Avenue. Some one asked Mr. Edison if he remembered the visits.

"I remember him well," Mr. Edison replied. "I was working on the phonograph. He used to come to No. 65 after his concerts and talk. He would sit there talking, and by and by start playing most beautiful things—waltzes, soft music. He would play \$2,000 or \$3,000 worth every night."

"Didn't you get him once to play for the phonograph?" Mr. Edison was asked.

"Yes, but the phonograph wasn't working well in those days, so it didn't do him justice. He stood on a soap box and played for me one night, and when he finished tears were rolling down his cheeks. I asked him what the matter was, and he said it always made him cry to hear good music."

### Australian Wool Industry.

Australian wool, on which has been built up much of that British colony's prosperity, started well over a century ago. It originated with a certain Captain MacArthur, a soldier in the British army. Settling in New South Wales soon after Governor Phillip arrived there, he saw the possibilities for growing fine wool and by the luckiest accident was able in 1796 to import five merino ewes and three rams. They were of a flock presented by the king of Spain to the Dutch at the Cape and came from the famous Escurial flock. These, judiciously added to by MacArthur, were the beginning of the vast Australian sheep industry of today. The first shipment of Australian wool was 245 pounds in 1807. Now the shipments run into hundreds of millions of pounds.—Indianapolis News.

### Wooden Ammunition.

Some years ago civil war was raging between two Afghan tribes, the Ali Khel and the Mala Khel. The latter tribe built great hopes of success on a cannon of such a size that 100 men were required to draw it. A Sikh trained in a British battery was engaged to work the gun on the understanding that he receive 20 rupees every time he hit the village fort of the foe. This did not prove remunerative, for, according to an eyewitness, the ammunition consisted of "olive wood balls bound with iron bands, which have a highly eccentric flight and are calculated to do about equal damage to friend and foe." After a few days' bombardment, in which the fort was hit only three times, the hostilities came to an end.—London Standard.

### The Healthful Hoe.

Man armed with a hoe protects himself from the agencies of death more completely than man with any other defense weapon. The United States Bureau of statistics has discovered an important fact by study of the records of life insurance companies. The statistics of the entire country show that farmers live longer than all others, fifty-eight years being their average years of life.

### His Given Name.

"What is the name of that handsome prisoner?" asked the impressionable young lady.

"No, 22nd, miss," replied the guard. "How funny! But, of course, that is not his real name."

"Oh, no, miss; that's just his pen name."

### Soothing Her.

"Darling," whispered Miss Winsom to the victim of her wiles, "will you love me when I am old?"

"Impossible situation," he whispered back. "You couldn't grow old, angel, on only one birthday in five years."

### The Test of Society.

"Pa, how can you tell whether a man is in society or not?"

"The man who is not in society, my son, is trying to get known, and the man who is in is trying not to."

### Straight.

Redd—Do you believe a woman can drive an automobile straight? Greene—Sure thing. My wife drove my car today straight into a tree.

### His Handicap.

First Credit Man—How about Jones of Pigville Center? Second Credit Man—He always pays cash, so we don't know how honest he is!—Boston Globe.

Do not drink poison relying on the antidote you may possess.

Why leave your money in the bank at 3 per cent when you can get 5 per cent compounded half yearly from WAR-SAVINGS CERTIFICATES?

## HELP FOR WORKING WOMEN

Some Have to Keep on Until They Almost Drop. How Mrs. Conley Got Help.

Here is a letter from a woman who had to work, but was too weak and suffered too much to continue. How she regained health:—

Frankfort, Ky.—"I suffered so much with female weakness that I could not do my own work, had to hire it done. I heard so much about Lydia E. Pinkham's Compound that I tried it. I took three bottles and I found it to be all you claim. Now I feel as well as ever I did and am able to do all my own work again. I recommend it to any woman suffering from female weakness. You may publish my letter if you wish."—Mrs. JAMES CONLEY, 516 St. Clair St., Frankfort, Ky.

No woman suffering from any form of female trouble should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for forty years proved to be a most valuable tonic and invigorator of the female organism.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice—it will be confidential.

### A DARING AVIATOR.

Captain W. A. Bishop Possesses Three Decorations.

The intrepidity of Captain William Avery Bishop, a Canadian, and a member of the Royal Flying Corps, in attacking a German aerodrome, has been rewarded by the bestowal upon him of the Victoria Cross, the most prized of the British valor medals. The Official Gazette gives the following resume of the action which brought Captain Bishop the Victoria Cross:—

"Captain Bishop flew first to an enemy aerodrome, finding no enemy machine about, he flew to another aerodrome three miles distant and about twelve miles inside the German lines. Seven machines, some with their engines running, were on the ground. He attacked these from a height of 50 feet, killing one of the mechanics.

"Two of the machines got off the ground, but Captain Bishop, at a height of 60 feet, fired 15 rounds into it at close range and it crashed to the ground. A second machine got off the ground, into which he fired 30 rounds, and it fell into a tree. Two more machines rose from the aerodrome, one of which he engaged at a height of 1,000 feet, sending it crashing to the ground. He then emptied a whole drum of cartridges into a fourth hostile machine and flew back to his station.

"Four hostile scouts were 1,000 feet above him, for a mile during his return journey, but they would not attack. His machine was badly shot about by machine-gun fire from the ground."

Captain Bishop is a native of Owen Sound, a son of W. A. Bishop, Grey County court clerk and registrar of the Surrogate Court. At the outbreak of the war he was a student at the Royal Military College, Kingston, and he went overseas shortly after the outbreak of hostilities with an engineering corps from Kingston. He was home on furlough some time ago, having been slightly injured in an aeroplane accident.

Frequent reference has been made in recent war despatches to an aviator "from a Northern Ontario town" who was making a name for himself at the front, and it is now apparent that Captain Bishop was the officer referred to. He is said to have the knack of unnerving his opponent at once by diving straight at him as a hawk strikes his prey.

Six weeks ago his father received reliable information to the effect that his son had destroyed 36 German aircraft. Captain Bishop, who is but 23 years of age, already holds the Distinguished Conduct Cross and the Military Cross. Field Marshal Sir Douglas Haig referred to his most recent exploit in his despatches and endorsed it as "remarkably clever work."

Captain Bishop's brother, Major Worth Bishop, is on the headquarters staff at London, Ont.

### Colony Convicts.

Virginia was the only colony which ever received convicts, and very few were sent there, and most of those sent were political prisoners. The aristocratic element predominated. In 1676 parliament forbade the transportation of convicts to English colonies in America.

### Seizing the Opportunity.

Crabshaw—If you insist on this new gown I'll have to get it on credit. Mrs. Crabshaw—As long as it's going to be charged, dear, I may as well get a more expensive one.

### Train the Child.

A child should not only be taught, but trained. Training is drilling him in what he does until he has acquired the habit of doing it—Henry Ward Beecher.

Keep up and you will never have to catch up.

**Wood's Phosphorine,** The Great English Remedy. Tones and invigorates the whole system. Cures Nervous Debility, Mental and Brain Worries, Depression, Loss of Energy, Palpitation of the Heart, Failing Memory. Price \$1 per box, six boxes \$5.00. ### Hoe cakes and Their Origin.

The hoe cake is the most common form of corn bread found in the south. It was named by the southern slaves in early slavery times. The women slaves hoed cotton and rice by the task. When a task was begun in the morning it was completed before going back home. Sometimes they would get hungry; then the hoe was detached from the belt, a fire started and a hoe cake was cooked then and there upon the hoe. It was discovered by the planters that meal cooked thus was palatable, and the hoe cake was henceforth made part and parcel of a complete plantation dinner.

For a hoe cake take one pint of sifted meal, one-half teaspoonful of salt; add lard or fried meat grease and mix with enough lukewarm water to form a thin griddle. Bake both sides brown. Serve hot with vegetables, fish, bacon, pork, etc.

For corn pone use the above formula, but make the dough or paste thicker. Make into loaves and bake in a hot oven.—A. W. Brabham in New York Sun.

### East Indian English.

A railway surgeon in India sends some curious messages he has received from time to time from the company's employees:

1. Honored Sir—I am suffering from fever and swelling of my whole body, and my legs, too, are swelled up. Please take trouble to see me.

2. I beg to inform you that I am suffering by too much hot fever, but just now it is subsided somewhat, and there is much perspiration, and my legs are trembling like riding horse. First comes cold fever and then it becomes hotting. Inside is somewhat defected.

3. I tell you truly, sir, that I am really sick. Mr. Sprunk has refused to leave, and if you don't certify I will die like a dog, and my father will be issueless.

4. Sir—Now I pray that you will make me cure soon because I am a very familiar man.

5. Wife lingering near to next world. Come soon to prevent goodbye.—London Standard.

### Fame of Arras.

The history of Arras, France, dates back beyond the Christian era, when it was the chief town of a Gallic tribe known as Atrebates. It was then known as Nemetacum or Nemetocenna, but its present name is derived from that of the tribe. During the French revolution Arras suffered grievously, thanks to the cruelty of her native son, Joseph Lebon, who organized and directed the reign of terror there. Maximilien Robespierre and his younger brother, Augustin, were also born in this city. It is interesting to recall in view of his subsequent sanguinary career as a member of the commune and of the committee of public safety, responsible for converting the streets of Paris into rivers of blood fed by the guillotine, that as a young man Robespierre resigned his office as criminal judge in Arras rather than sentence a guilty man to death.

### Shearing Sheep in Syria.

The manner of shearing sheep in Syria and all Asiatic Turkey does not differ materially from the ancient methods of the people as applied to practically every other vocation. While the sheep industry is one of the oldest in the country, having existed for centuries in the same pastures where the ancestors of the present herders also tended flocks, there does not appear to have been any improvement in the manner of shearing or breeding the sheep. Shearing is still accomplished in the crudest way, the workers always leaving a considerable amount of wool on the animal, while the fleece removed is cut most unevenly. The shears frequently cut great holes in the skins of the sheep, which by the use of modern shearing machines could easily be avoided.

### Quick Work.

Two insurance men were bragging of the promptness with which their respective companies paid up. Said one of them, "The man died and I handed the check to his family within an hour of his death."

"That's nothing," said the other scornfully. "Why, a man fell from an upper story of one of our buildings, and I handed him the check as he went past my window."—London Mail.

### Got Through.

Among other startling statements in her composition on "A Railway Journey" the following was made by a little girl:

"You must get a ticket, which is a piece of paper, and you give it to a man, who cuts a hole in it and lets you pass through."

### Perfectly Natural.

"Why does that young man reach in his pocket and draw out a package of papers as soon as he begins to talk to any one?"

"That's a mere matter of habit. You see, he is a life insurance agent."—Exchange.

### Revised.

"Did he tell you all the bright things his youngsters have been saying?"

"Yes." "What did you say?" "I told him children should be seen and not heard from."

### Welcome Trouble.

Miss Newitt—May's in trouble. She's had proposals from two men and can't choose between them. Miss Passay—Heavens! And does she call that trouble?

A weak mind is like a microscope, which magnifies trifling things but cannot receive great ones.
