WATER BY-LAW ENACTED FOR TOWN OF WOODSTOCK

A by-law of the Town of Woodstock relating to the Water Works and the Consumers of Water.—

Passed by the Municipal Corporation of the Town of Woodstock by council there of enacts as follows—

DEFINITIONS

1. In this by-law the following terms shall have the meanings respectively assigned to them:—

"WATER WORKS":—The words "Water works" whenever used in this by-law shall mean and include all the buildings, machinery, filtration plant, basins, distribution pipes, hydrants, gates, services, and apparatus, now or hereafter in use, and belonging to the water, pumping and filtration plant of the Town of Woodstock, and the word "water" and the words

"water supply" shall be held to mean—the water supplied by the water works system of the Town of Woodstock to the consumers for the purposes herein specified.

"PREMISES":—The word "Premises" includes every house, tenement block, warehouse, hotel, school, factory, workshop or building in the Town of Woodstock.

"WORK":—The word "Work" includes any operation involving the construction, re-construction, renewal addition to or extension of any plumbing or drainage system or any part thereof, for which a permit is required under this by-law.

"PLUMBER":—The word "Plumber" includes any licensed person, firm or corporation carrying on the occupation, trade or business of plumber on his or its own account or executing any work pertaining to such occupation, trade or business in the Town of Woodstock.

"OWNER":—The word "Owner" shall include every person seized of or in the occupation of any premises, or in receipt of the whole or any part of the rents and profits there-

from, whether on his own account or as agent or trustee for any other person.

"PERSON":—The word "Person" shall include every person, firm or corporation.

"PLUMBING & WATER INSPECTOR":—The words "plumbing & Water Inspector" shall mean the Superintendent of Water Works or his duly authorized assistants.

"FIXTURE":—The word "Fixture" shall mean every pipe, receptacle, or apparatus to which water is connected or through which it shall pass on the premises.

2. "WATER COMMITTEE":—The "Water Committee" shall consist of a Committee to be appointed by the Town Council each year at the time the standing Committees of the Council are appointed, and such Committee in addition to any and all powers in them vested by any act or acts of Assembly shall have and exercise, subject to the direction of the Town Council, the full administration, supervision, and control of the Water Works for the time being.

3. "WATER SUPERINTENDENT":—

The Town Council shall, each year, at the time the other Town Officers are appointed, appoint on the recommendation of the Water Committee a Superintendent of Water Works whose duty it shall be to see that the by-laws governing the use and operation of the water works are enforced, that all contracts in connection with the said water works are complied with. He shall act as the Executive Officer of the Water Works Committee and be responsible for the maintenance of the water works in an efficient state of repair. He shall report monthly in writing as to the condition and efficiency of the water works, the work done and the cost thereof. He shall prepare annually a full and detailed report of the condition of the water works, its maintenance and operation for the preceding year, setting forth in detail the cost of operation, fuel and materials consumed and on hand. He shall audit and certify to the expenditures of his department and submit the same to the Water Committee on the first Monday in every month, and from time to time will furnish such special reports as may be required by the water committee. He shall have full control of the employees of the water department, and shall see that they perform their respective duties in the best interests of the water works. He shall maintain a complete set of records of the operation of the pumping station and filter plant, and he shall maintain and keep up-to-date such records as are necessary to show the size and location of all water mains, services, hydrants, gates, fixtures, and other appurtenances. A duplicate copy of which shall be filed by the Superintendent with the Collector of Water Rates. He shall act as the Plumbing and Water Inspector of the Town and shall make such inspections and examinations as are required and shall issue the proper permits. On notification from the Collector of Water Rates the Water Supt. shall forthwith shut off any water service or collect the water rates but he shall not have power to grant any extension of time to any person. He shall also keep a record of the expenditures on the account of the Water Works Dept., under such general heading as will show the detailed cost of operation of the works. All materials, supplies and appurtenances required for the maintenance and operation of the Filter Plant shall be purchased by the Water Superintendent under the Direction of the Water Committee.

4. "WATER WORKS, ENGINEERS AND ASSISTANTS":—The Town Council on the recommendation of the Water Committee shall appoint such engineers as are required at the pumping station from time to time, one of whom shall be known as the Chief Engineer of the Pumping Station and Filtration Plant; They may also appoint such fireman and other assistants as are

required from time to time in connection with the efficient and continuous operation of the pumping station and filter plant, and shall fix their remuneration. The Chief Engineer shall have control of the other Employees of the pumping station, and will report to the Superintendent of water works under whose control he shall be. He shall be responsible for the maintenance of a continuous supply of pure water, and for keeping all the plant and equipment in efficient state of repairs. In the absence of the Chief Engineer, the engineer in charge of the shift shall act on his behalf and give such directions as are necessary to the other employees, which at all times shall conform with any rules or regulations that have been adopted for the operation of the Water Works.

5. The Town Council shall appoint a Collector of Water Rates whose duty it shall be to receive and collect any and all water rates and keep a proper record of the money so received.

6. The Water supply of the Town shall be furnished for:—

(a) Domestic purposes and fire protection within the town.

(b) Corporation purposes including street sprinkling, water for parks and boulevards, flushing sewers and supplying public drinking fountains and watering troughs.

(c) Industrial purposes, such as supplying water for manufacturing plant, and the operation of their plant and equipment.

Water shall not be furnished for any other purposes than above specified, nor for any purpose whatsoever outside the limits of the town, unless in the opinion of the Town Council and upon the recommendation of the Water Committee that the efficiency of the water services for domestic purposes and fire protection within the town limits will be satisfactorily fulfilled. The Town Council may however, subject to the foregoing limitations and the provisions of this by-law furnish water for other than domestic and fire protection purposes as aforesaid, under an agreement in writing that the same may be shut off at any time, temporarily or permanently by order of the council, or in an emergency by the Water Superintendent.

7. This by-law shall be considered a part of the contract with any person who is a water consumer, and the fact of taking the water shall be considered as expressing assent on the part of the water taker to be bound thereby. No water service shall be laid connected, or turned on to any premises until the owner thereof, or authorized agent, shall have made application for the use of water in writing to the collector of water rates, which application shall specify the purpose for which the

MET MANY WOODSTOCK BOYS

Stephen Pike's Interesting Letter
—Giving Huns a Hot Time—
Will Soon Be Over

F. Coy, 2nd Can. Coun. Depot,
Bramshott Camp,
Hants, England.

Dear Grace:

Received your letter a few days ago, and was glad to hear from you again. I also received £4 (four pound) from the Bank of Montreal which I suppose was sent by father.

I am at Bramshott Camp now and there is no place to go in the evening or on Sundays except to a Y.M.C.A. hut or some of the Salvation Army clubs. You see it is just a big training camp.

There are quite a lot of new fellows from home over here now — Kenneth and Ralph Gibson, Tom Oliver and Norman Ketch are at the 13th reserve here. I see them about every night.

I was down to Whitley Camp last Monday night and saw Joe Ralston. He was in the battery at Woodstock. He went to France the next evening after I saw him. I also saw Sperry Tapley and a lot more fellows from home there in the artillery.

Tell father not to work too hard and I will soon be home with him. They are giving the Huns a hot time now, and I think it will soon be over.

I don't think I will ever go back to France, for there are all kinds of men over here now (new men) and I am going to be taken on Instructors course as soon as I go back to our reserve, and will be training the new men coming over this winter. It will be a good job after two winters in France. I think I will go in for a Lewis Gun instructor as I had about six months experience with one in France and took one instructors course last spring.

I just wrote out my exams yesterday on a Chelsea course that I have been on for three weeks. It was a course in the Guards drill including the slow march, goose step and all this fancy drill that

the Grenadier Guards do on the square in peace times. I guess they are getting ready for going home by the looks of things, learning us fellows all the fancy drills.

Well I suppose they are knocking down a few deer over there now. I would like to have a chance to hunt this year. You know there are no woods over here, only little groves. I will be glad when I see the old Canadian woods again. Of course I am not sorry that I had a crack at old Fritz.

I had a good time up to Scotland on leave, I think Scotland is the nicest place I have seen since I left home. The people are very good to Colonials up there, especially the Canadians, and I have met some fine people. I was all through Edinburgh Castle and Edinburgh Palace. I saw the room that Mary, Queen of Scots, used to sleep in, her private bedroom, and private staircase; the room that the guy was murdered in. You can look it up in the history. I saw all of this in the palace but the most interesting part is the Castle. I spent half a day going through it and looking at the armour and clubs and different things that they used to scalp with in olden times. I saw some old muskets there that a common man of today couldn't carry over half a mile. I would hate to fire one for I suppose it would kick the side out of a house. And you ought to see the armour that they wore in olden times. I don't think I could carry one a all, and scraping with one on would be out of the question. I guess there were mighty big men that fought in those days. I know I would want a team of mules to haul around the junk that they carried on their backs such as old battle axes, spears, clubs and an old musket about 10 feet long.

Well Grace, I guess I will have to close as I will have to wait until I get home to tell you all I have seen in the old Castle. What I have written is only a little of what there is to see. Hoping to hear from you soon,
Your brother,
Steve.

How Many Crowns Shall We Have on Our Honor Flag?

EVERY city, town and village in Canada is asked to support the men who fight our battles on a dozen fronts.

An Honor Flag will fly in each place which meets this call with honor. We are asked for \$1,250,000, an amount set as a fair response from Carleton County. If we subscribe 25 per cent. over that amount a crown is added to our Honor Flag, and for every additional 25 per cent. another crown.

HOW MANY CROWNS SHALL WE HAVE ON OUR HONOR ROLL?

With our pocket books wide open we will answer this call. To the limit of our means we will do our share in helping to OVER-SUBSCRIBE.

Canada's Victory Loan 1918

Canada—the whole commercial fabric of our country—stands behind the Victory bonds. Whether we buy a \$50 Bond or one at \$100 or \$500 or \$1,000, let us do it quickly. There is no safer, no finer investment in the world than a Victory Bond—a Bond pledging the repayment of our money at the end of a definite period, and paying us, meanwhile, interest at 5 1-2 per cent.

Money arms the soldiers, money pays for the thous-

and daily needs of the war. It is our part to lend the money to the limit of our ability.

The Victory Loan Honor Button will show that you are a Buyer of Victory Bonds. Get it early. Your name on the Honor Roll of your place of business will be an inspiration to others.

Get it there quickly.

Carleton County must have a place of honor on the list.
