THE
PHONOGRAPH
which really sings.

The NEW EDISON

"The Phonograph with a Soul"

actually sings. It has stood beside Anna Case, Giovanni Zenatello, Guido Ciccolini, Arthur Middleton, Thomas Chalmers and a score of other great artists; and has sung duets with them, and then sung in comparison with them.

The musical critics of more than five hundred newspapers concede in the columns of their own papers, that it is only by watching the lips of the artist standing before them, that they can tell whether it is the artist singing or The New Edison singing.

We almost hope you will disbelieve what we say—and come to our store and make us prove our statements. You will not be asked to buy. We merely wish to prove that the New Edison Recreation of music is a fact.
