RECORD FEAT TOLD BY AMERICAN "ACE"

Downed Three Enemy Airplanes in Ten Minutes.

Three enemy airplanes downed in ten minutes is the unprecedented record made by Lieutenant Donald Hudson, of Washington, D.C., on the battlefield in France, and the details below just how he made it in a letter to his mother. The feat made Lieutenant Hudson the fifth American "ace." The young man is a son of Paul Hudson, of Washington, for many years publisher of The Mexican Herald of Mexico City.

The letter follows, in part: "I did not like my new machine when I first got it as I did not think she was manoeuvrable enough, but I feel differently about it, as I believe she has hung up a record for me. We were escorting a photographic machine when we were attacked by von Richthofen's squadron. Jerry Vasconcellos was leading and I was second. He stayed right with the photo bus and the other turned to ward off the attack. I went off to the right and started down, getting four of them to follow me. When about 15,000 feet from the ground I got on one fellow's tail and put a stream of bullets right into him. The lucky burst got him and down he went.

"The other three had gotten behind me, so I turned on them and they started climbing back up to where the others were fighting. I couldn't get back as the air pressure on my gas had gone down. I was fighting with my left hand and pumping with my right. I couldn't get enough pressure to make the engine run right and was slowly but surely getting down into Hunland. That is not a pleasing prospect, so by increasing my efforts I finally got enough pressure to keep going, though I could not climb. Consequently I was flying along about four hundred or five hundred feet above the ground when I spied a German two-seater coming along just above me and to my right. "I didn't care to get into a scrap under the circumstances, and just kept my eye on him to see what he was going to do. I found out when he got opposite me. He tipped up to give his observer a good crack at me. That was a fatal mistake for him, as his audacity made me mad and I turned around and got on his tail. He started going around in a circle, and I followed him, pouring a beautiful hail of bullets right into him, attested by the fact that the observer's shots no longer went past me. He went around about a turn and a half when off went his right wing and down he went.

"I started back home when again I heard the rat-tat-tat of machine guns. I pulled up and looked around and found they were shooting at me from the ground. I had to keep zig-zagging to avoid the fire from the Archies. While doing this I caught sight of another two-seater.

"I flew straight at him, but kept me left wing a little low as he was a good bit to my left. In that way I was side-slipping slightly down and over toward him, still keeping him head-on, so his observer could not shoot at me. When I got right over him I set my machine right up on the left wing and let her nose drop.

"Just as the nose started down the observer shot at me, but it went behind him. I was looking out the left side of the bus and as the nose approached his right wing I opened up. When the spray got quite a way up the wing I straightened out and held it on the cockpit. In order to see what was going on I looked over the right side. I was greeted by an empty observer's cockpit and the pilot must have been anxious to get down as he never changed his course except to nose down toward the ground while I played a little tune on my machine guns to cheer and speed him on his way.

"You wonder what the record is—well, it's simply that all this happened inside of ten minutes, which makes me the best American aviator to get that many Huns in that length of time."

PICKLING RECIPES

The time of pickling is at hand and the smell of spices will soon be abroad in the land. Below are given some recipes which the housewife may like to try if they are not already familiar to her:

CUCUMBER PICKLES.

Soak cucumbers in brine, made of one cup salt to two quarts of water, for a day and night. Remove from brine, rinse in cold water and drain. Cover with vinegar, and one tablespoonful brown sugar, some stick cinnamon and cloves to every quart of vinegar used, bring to a boil and pack in jars. For sweet pickles use one cup of sugar to one quart of vinegar.

GREEN TOMATO PICKLES.

Take four quarts of green tomatoes, four small onions and four green peppers. Slice the tomatoes and onions thin; sprinkle over them one-half cup of salt and leave over night in a crock or enameled vessel. The next morning drain off the brine. Into a

Far more effective than Sticky Fly Catchers. Clean to handle. Sold by Druggists and Grocers everywhere.

separate vessel put one quart of vinegar, one level teaspoonful each of black pepper, mustard seed, celery seed, cloves, allspice and cinnamon and three-quarters cup of sugar. Bring to a boil and then add the prepared tomatoes, onions and peppers. Let simmer for twenty minutes. Fill jars and seal while hot.

SWEET PICKLED CARROTS.

Boil young, tender carrots until three-quarters done. Scrape, cut in thin slices and pour a boiling spiced syrup over them. The syrup is made by boiling together one quart of vinegar, one quart of sugar, one tablespoonful of cinnamon, cloves, mace and allspice. Allow to stand over night in this syrup, next morning boil for five minutes. Pack in jars and seal tightly.

SAUER KRAUT.

If you have a surplus of cabbage which you are unable to keep fresh, make into sauer kraut. Cut the cabbage into shreds, no not chop. Put a layer of cabbage about three inches deep into tank or vessel having straight sides. Crockeryware of cyprus or white pine casks are good for the purpose. Sprinkle over the first layer of shredded cabbage the best dairy salt. The proper proportion is two and one-half pounds salt for each 100 pounds of cabbage. Repeat this until the cask is full and heaped up. Have a cover fitted to inside of cask. Put this over the cabbage and weigh it down with rocks. In ordinary temperature, the kraut will cure in from sixteen to eighteen days.

EVERY MAN ON HIS JOB

(American Machinist.)

Said Michael O'Leary to Patrick McCreery,

"You sure make me weary the way that you work;

Last week you lost one day, (and this week—on Monday—

You laid off completely. Bedad, ye're a shirk!"

Said Patrick McCreery to Michael O'Leary,

"Well, what if I did?—and I did, it is true—

If I grab off a play-day or two around pay day,

I guess it's my business and nuthin' to you!"

Said Michael O'Leary to Patrick McCreery,

"Me son is a solger who's fightin' in France;

He's got to have trifies like helmets and rifles,

Or else with the Boches he won't stand a chance.

He needs to have batteries—guns that'll shatter his

Enemy's trenches before an attack—

And motors to carry his camp commissary,

And ships that'll bring him whe the nags he may lack.

"But when you are shirkin' yer job, or ain't workin',

You're holdin' him up on his arms and supplies;

For, get this straight, neighbor, when you slack your labor,

You're doin' more harm than a half-dozen spies.

There's need for the keenest of work—each machinist

And fireman and blacksmith should stick to the job

In war-time conditions to make the munitions

To help smash the Kaiser and all of his mob.

"And so," said O'Leary, "your ways make me weary;

You throw down me son as he fights Over There;

To loaf is a bum thing—you bet it means something

To me when you're slackin' from doin' your share!"

Said Patrick McCreery to Michael O'Leary,

"I never have thought of it that way before;

But now that I see it sure will agree it

Ain't me that'll loaf on the job any more!"

Wood's Phosphorine, The Great English Remedy. Tones and invigorates the whole nervous system, makes new blood in old veins, cures Nervous Debility, Mental and Brain Worry, Despondency, Loss of Energy, Palpitation of the Heart, Failing Memory. PUBLIC NOTICE

FUEL ADMINISTRATION New Brunswick.

The Fuel Controller of Canada has advised me under date of August 31st, that it is probable that the Maritime Provinces will not receive 50 per cent of the normal requirements of anthracite coal from the United States for the coming winter. He urgently requests that the consumers of anthracite coal in the Province of New Brunswick take immediate steps to procure a supply of bituminous or soft coal to make up this shortage in anthracite, and if they neglect to do this, they will unquestionably suffer from cold in the coming winter season. By ordering or providing now, it will ensure a supply of fuel. If neglected it means that in the cold weather, when rail transportation is difficult, and railways and equipment are crowded with export and local goods, and vast quantities of munitions are being forwarded, that coal will not be moving from the mines. By ordering now it gives an opportunity to dealers to release storage for new supplies, and thus make room for coal demands which must come later.

This statement is not made by the Fuel Controller without full knowledge of the facts, and it is to be hoped that this appeal will not remain unheeded, and that consumers of coal will take advantage of the opportunities now offering for obtaining soft coal which may be denied them at a later day.

JAMES H. FRINK,
Fuel Administrator for New Brunswick

TAKES OFF DANDRUFF, HAIR STOPS FALLING

Save your Hair! Get a small bottle of Danderine right now—Also stops itching scalp.

This, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff—that awful scourge. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Danderine tonight—now—any time—will surely save your hair.

Get a small bottle of Knowlton's Danderine from any drug store. You surely can have beautiful hair and lots of it if you will just try a little Danderine. Save your hair! Try it!
